Valuation of Securities – Valuation of Bonds, Valuation of Debentures, Valuation of Preference Shares, Valuation of Equity Shares and Share Valuation: CAPM Model.

UNIT - II

Market Indices – Concept, Method of Computing India's Leading Stock Indices, Overview of various Benchmark Indices, Market capitalization Indices, Sectoral Indices and Broad market Indices.

Security Credit Rating – Introduction, Factors Affecting Assigned Ratings, Credit Rating Agencies in India, Functions, Approaches and Framework Used and Business Models, Benefits of Credit Rating, Regulatory Concerns.

Risk Management Through Derivatives – Introduction to Derivatives Market and Securities, Forward and Future Contracts – Overview, Hedging, Optimal Hedge Ratio, Valuation, Application and Strategies. Options – Overview, Valuation Models and Strategies. Swaps.

Investing in Alternative Asset Classes - Hedge Funds, Characteristics of a Hedge Fund, Hedge Fund Strategies, Risk Arbitrage Investing, Hedge Fund Performance, Private Equity and Venture Capital.

Suggested Readings:

1. Babu.Dr.G.Ramesh, Portfolio Management including Security Analysis,Concept Publishing Company.
2. Dr.RaganathamM&Madhumathi R. Investment analysisPortfoliomanagement. Person Education, New Delhi.
3. Dr.BhallaV.K.Investment Management, S.Chand and Company, NewDelhi.
4. Fisher & Jordan, Security analysis and portfolio management, Prentice Hall of India, New Delhi.
5. Rustagi R.P, Investments Analysis and Portfolio management, Sultan Chand & Sons, New Delhi.
6. Sharpe, William and Gordon, Investments – Prentice hall of India, NewDelhi.

BCH 608: INTERNATIONAL ECONOMICS

Objective: The objective of the paper is to provide basic knowledge to the students about International Economics.

Unit-I

Adam Smith's Absolute Advantage Theory; Ricardo's Comparative Advantage Theory; Heckscher-Ohlin Theory of Trade; Terms of Trade

Free Trade vs Protection, Rationale of Protection Policy in Developing Countries, Barrier Tarriffs, Quotas to Trade.

Unit-II

Balance of Payments: Definitions and Concepts- Balance of Trade, Balance of Payments on Current Account, Balance of Payments on Capital Account, Autonomous and Accommodating Capital Flows; Causes and Measures to Correct the Disequilibrium

Exchange Rate: Meaning and Its determination; Fixed vs Flexible Exchange Rate, Theories of Exchange Rate: BoPs Theory, PPP Theory.

Suggested Readings:

1. H.G. Mannur, International Economics, Vikas Publishing House PvtLtd.
2. Bo Sodersten, International Economics, Macmillan PublishersLtd.
3. Bo Sodersten and Geoffrey Reed, International Economics, St. Martin'sPress.
4. R.R. Paul, Money Banking and International Trade, KalyaniPublishers.
5. Dominic Salvatore, International Economics, John Wiley and SonsInc.
6. Economic Survey, Ministry of Finance, Government of India, Latestedition.

BCH 609: TRAINING & DEVELOPMENT

Objectives: This Course aims at educating students regarding the concept of training and development in an organization.

UNIT – I

Introduction to Training Concept: Definition, Meaning, Need For Training, Importance Of Training, Objectives Of Training, Process Of Training: Steps In Training

Concept of Training Need; Identification of Training Need, Methods of Training and Techniques of Training, On the Job, Off the Job, Lecture, Role Play , Case Study, Vestibule Training, Simulation Techniques, in Basket Exercise, Syndicate Method, T- Group Training, Psychological Lab, Business Game, Activity Based Training, Programme Instruction Training, Choosing the Right Training Techniques.

UNIT – II

Designing Training and Development Programs: Organisation of Training and Development Programs, Training Design, Kinds of Training and Development Programs- Competence Based and Role Based Training; Orientation and Socialization

Evaluation of Training and Development Effectiveness: Reasons for Evaluating Training and Development Programs, Problems in Evaluation; Methods of Evaluating Effectiveness of Training Efforts.

Suggested Readings:

1. Prior, John, Handbook of Training and Development, Jaico Publishing House, Bombay.
2. Noe, Raymond A., and Amitabh DeoKodwani, Employee Training and Development, Tata McGrawHill.
3. Blanchard, P. N. & Thacker, W. J. (1998). Effective Training: Systems, Strategies and Practices. Prentice Hall, NewJersey.
4. Raymond Noe, A. (2005). Employees Training and Development", McGraw Hill Publication.
5. Bhatia, S.K "Training And Development".

BCH 610: BANK MARKETING

Objective: The paper aims at acquainting the students application of marketing functions in banks, being directed at providing services to satisfy customers financial (and other related) needs and wants, more effectively and efficiently.

UNIT–I

Introduction of Marketing and Key Concepts–Definition Marketing and Market, Four Elements in Marketing Mix and Their inter-relationship. Marketing Planning–Micro and Macro Factors influencing the Market for an Organisation, Bank Marketing and Marketing Mix, Bank Distribution. The art of Customer Service as Applied to Banking. Customer Behaviour in Banking, Banking Consumer and Market Segmentation–Mass Marketing, Multiple Marketing, Steps in Strategy Formulation, Marketing Research in Banking– Types of Data–Primary and Secondary, Uses of Marketing Research. Relationship Marketing in Banking, Competitive Analysis in Banking.

UNIT–II

Bank's Product Strategy–Core, Value Added, Fundamental and Augmented Products, Product Item and Product Line , Difference between Product and Service , The Concept of Product/Service Delivery in Banking, Pricing Strategies and Its Applications in Banking—Elasticity of Demand , Break Even Analysis, Different Types of Products and Key Variables Banking Promotion Strategy– The Communication Process, Goals of Communication, Steps in Developing Effective Communication, Selling and Organising for Sales and Selling to Corporate Clients–Meaning of Corporate Clients, Relationship and Transaction Banking, Bank Organisation for large Corporate Clients, International Bank Marketing.

Suggested Readings:

1. Chacko, Oommen and Grewal, Rajendra, "Marketing of BankingServices". MacMillan IndiaLtd
2. Bank Marketing Association, "Bank Marketing", TheAssociation
3. Reidenbach, R. Eric and Pitts, Robert E, "Effective bank marketing: issues, Techniquesand Applications",1987, Bank AdministrationInstitute.

DEPARTMENT OF PHYSICAL EDUCATION

FACULTY OF EDUCATION
(PANJAB UNIVERSITY CHANDIGARH)

SYLLABUS FOR
BACHELOR OF PHYSICAL EDUCATION (B.P.Ed)
Two year course
(SEMESTER SYSTEM)
Examinations: 2020-2021

PREAMBLE:

The Bachelor of Physical Education (B.P.Ed) – Two Years (Four Semesters) Programme is meant for preparing quality teacher in Physical Education for Secondary Schools.

VISION

In line with the University mission, the Department has the aim of educating the "whole-person" and to produce quality teachers to serve as administrators in the profession of physical education and sports. Through improving our academic programme and services to the University and local community, we pledge to continually strive for academic excellence and to maintain our leadership role in our profession.

MISSION

1. To produce quality physical education teachers for imparting instructions in the subject of physical education.
2. To make people aware about the benefits of physical activity through extension lectures and demonstrations.
3. To provide excellent research and teaching in Physical Education in order to promote and develop the health and well being of people.
4. To promote health through specific physical activities, prescribed by a specialized physical educationalist.
5. To collaborate with the different organizations which are involved in promoting the quality life of the human beings i.e., educational institutions and NGOs.
6. To provide harmonious and stimulated academic environment for the promotion of quality teaching and research in the department.
7. To provide opportunity to faculty and students of the department for their self evaluations, accountability, autonomy and innovations in the area of physical education and sports.
8. To concentrate on quality research in the area of health, physical education and sports.
9. To introduce consultancy and training programmes for different educational institutions and other organizations for the conduct of sports and fitness events.
10. To update the curriculum and syllabi as per global needs and challenges.

OBJECTIVES:

This programme shall strive to achieve the following objectives:

General Objectives:

1. To enable teacher to understand the nature, purpose and philosophy of physical education at secondary stage.
2. To prepare teachers of physical education with broader educational perspective.
3. To develop for potentialities and organizing physical education programmes and activities.
4. To develop capacity to organized leisure and recreational activities.
5. To empower them to inspire their students to actively participate in physical and yogic exercises.
6. To enable teachers to develop personality, character, willpower, democratic values and positive games and sports.
7. To make teachers capable of imparting basic knowledge about health, hygiene and nutrition
8. To develop skills and competencies to organized school and community games and sports.
9. To cultivate the spirit of sportsmanship, mental and physical alertness, scientific temper and optimism.
10. To promote mental health, power of self- decision and self control, correct judgment and action emotional stability and equanimity, respect for others and acceptance of authority and rules
11. To promote appreciation and interest for indigenous games , sports and yogic exercises
12. To create awareness about health and hygiene in the community.

Specific Objectives

1. To lay down a sound foundation for higher and advance studies in Physical Education in India.
2. To produce quality teachers in physical education.
3. To prepare students for advance coaching Diplomas in disciplines – Athletics, Gymnastics, Hockey, Swimming, Basketball, Football etc.
4. To fulfill the eligibility criteria of Foreign Universities to get admission in post graduate courses abroad since it is a basic and global programme.
5. To generate employment in the fields of Health Fitness and Gym- Management, Physiotherapy, Journalism, Aquatics and Yoga.
6. To provide opportunity to talented students to excel in sports and become outstanding sports persons.
7. To promote mass participation in Physical Education activities (Games, Sports Displays etc) through intra – mural and Extra- mural programmes.

OUTLINES OF TESTS, SYLLABI AND COURSES FOR THE BACHELOR OF PHYSICAL EDUCATION (B.P.Ed.) EXAMINATION (SEMESTER SYSTEM) FOR THE EXAMINATIONS- 2020-21

The course of instruction for the B.P.Ed Examination consists of three parts as under:

PART – I	Theory Papers	1600 Marks
PART – II	Practical Course (Skill and Prowess)	800 Marks
PART – III	Practice of Teaching	800 Marks
		Total: 3200

Marks

Note I:

- *Part-I will be evaluated externally.*
- *Part-II will be evaluated by a panel of three internal examiners appointed by the Chairman/Principal of the Department/Institution.*
- *Part-III will be evaluated with one external and one internal examiner.*

Successful candidate shall be classified as follows:

	Pass	Third Division	Second Division	First Division	Distinction
Part-I: Theory	35%	Less than 50% marks in Aggregate	50%	60%	75%
Part-II: Practical Course (Skill and Prowess)	40%	Less than 50% marks in Aggregate	50%	60%	75%
Part-III: Practice of Teaching	40%	Less than 50% marks in Aggregate	50%	60%	75%

Note: Since this is a professional course aimed at improving the standard of games and sports, it is essential that special attention be given to the practical aspect of Track and Field, Games and Sports. Therefore, specified 20 hours per week must be devoted to the practical teaching.

SEMESTER-I
PART–I: THEORY PAPERS

Paper	Course Code	Title of the Papers	Total Hours	Credit	Internal Marks	External Marks	Total Marks
Core Course							
I.	CC-101	History, Principles and Foundation of Physical Education	68	4	20	80	100
II.	CC-102	Anatomy and Physiology	68	4	20	80	100
III.	CC-103	Educational Technology and Methods of Teaching in Physical Education	68	4	20	80	100
Elective Course (Any One)							
IV.	EC-101	Olympic Movement	68	4	20	80	100
	EC-102	Officiating and Coaching					
PART-II PRACTICAL COURSE (SKILL AND PROWESS)							
	PC-101	Track and Field (Sprints, Shot-Put, Long Jump, Relays)	68	4	40	-	40
	PC-102	Swimming, Gymnastics	68	4	20+20	-	40
	PC-103	Opening and Closing Ceremonies of Sports Events	68	4	40	-	40
	PC-104	Basketball, Football, Kabaddi, Kho-Kho	68	4	20+20+20+20	-	80
PART – III PRACTICE OF TEACHING							
.	PT-101	A) Movement Lesson: Action Song & Motion Story (B)Track & Field (C) Games	68	4	-	50 75 75	200

Total: 800marks

Note:

1. Each candidate will be required to take a minimum of 10 supervised lessons in the movement lesson and 05 officiating lessons in schools. The candidate shall prepare a note book covering action song and motion story lessons which shall carry (20+20) 40 marks.

2. In Swimming (Skill & Prowess) observers will be appointed by Chairman, Department of Physical Education, Panjab University Chandigarh and where swimming pool facilities are not available Swimming practical's (Skill & Prowess) will be held at Panjab University Campus swimming pool.

Paper –I (CC-101)
HISTORY, PRINCIPLES AND FOUNDATION OF PHYSICAL EDUCATION

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT 1: INTRODUCTION
- Meaning, Definition and Scope of Physical Education
- Aims and Objective of Physical Education
- Importance of Physical Education in present era.
- Misconceptions about Physical Education.
- Relationship of Physical Education with General Education.
- Physical Education as an Art and Science.

UNIT- 2: HISTORICAL DEVELOPMENT OF PHYSICAL EDUCATION IN INDIA
- Indus Valley Civilization Period. (3250 BC 2500 BC)
- Vedic Period (2500 BC 600 BC)
- Early Hindu Period (600 BC 320 AD) and Later Hindu Period (320 AD 1000 AD)
- British Period (Before 1947)
- Physical Education in India (After 1947)
- Y.M.C.A. and its contributions.

UNIT- 3: FOUNDATION OF PHYSICAL EDUCATION
- Philosophical foundation:
  - Idealism
  - Pragmatism
  - Naturalism
  - Realism
  - Humanism and Existentialism
- Fitness and wellness movement in the contemporary perspectives
- Sports for all and its role in the maintenance and promotion of fitness.

UNIT-4: PRINCIPLES OF PHYSICAL EDUCATION
- Biological
  - Growth and development
  - Age and gender characteristics
  - Body Types
  - Anthropometric differences
- Psychological
  - Learning types, learning curve
  - Laws and principles of learning
  - Attitude, interest, emotions and sentiments
- Sociological
  - Society and culture
  - Leadership
  - Social integration and cohesiveness

Paper –II (CC-102)
ANATOMY AND PHYSIOLOGY

Total Marks	*:*	*100*
Theory Marks	*:*	*80*
Sessional Marks	*:*	*20*

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT-I: ANATOMY AND PHYSIOLOGY

- Introduction of Anatomy and physiology and its importance in the field of physical education and sports.
- Introduction of Cell and Tissue.
- The arrangement of the skeleton Function - of the skeleton Ribs and Vertebral column and the extremities.
- Joints of the body and their types
- Gender differences in the skeleton.

UNIT-II: SYSTEMS OF HUMAN BODY

- **Blood and circulatory system:** Constituents of blood and their function Blood groups and blood transfusion, clotting of blood, the structure of the heart-properties of the heart muscle, circulation of blood, cardiac cycle, blood pressure, Cardiac output.
- **The Respiratory system:** The Respiratory passage the lungs and their structure and exchange of gases in the lungs, mechanism of respiration (internal and external respiration) lung capacity, tidal volume.
- **The Digestive system:** structure and functions of the digestive system, Digestive organs, Metabolism,
- **Excretory system:** Structure and functions of the kidneys and the skin.
- **The Endocrine glands:** Functions of glands pituitary, Thyroid, Parathyroid. Adrenal, Pancreatic and the sex glands.
- **Nervous systems:** Function of the Autonomic nervous system and Central nervous system. Reflex Action,

UNIT-III: NEUROMUSCULAR JUNCTIONS

- Muscles: Types of muscles, Properties and functions.
- Neuromuscular junction
- Fuel for muscular activity
- Role of oxygen- oxygen debt, second wind, vital capacity.
- Fatigue: Meaning and sites of fatigue.

UNIT-IV: EFFECTS OF EXERCISE ON VARIOUS SYSTEMS

- Effect of exercise and training on cardiovascular system.
- Effect of exercise and training on respiratory system.
- Effect of exercise and training on muscular system
- Physiological concept of physical fitness, warming up, conditioning.

Paper –III (CC-103)
EDUCATIONAL TECHNOLOGY AND METHODS OF TEACHING IN PHYSICAL EDUCATION

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION
- Education and Education Technology: Meaning and Definitions.
- Types of Education: Formal, Informal and Non- Formal education.
- Teaching: Meaning and Principles of teaching.
- Importance of technological devices used for imparting knowledge.

UNIT- II: TEACHING METHODS AND PRESENTATION TECHNIQUES
- Teaching Methods: Lecture method, Command method, Demonstration method, Imitation method, project method, Whole method, Whole- part- whole method, Part method, , At will method etc.
- Factors affecting teaching methods.
- Presentation Techniques: Personal and technical preparation, Steps of presentation.
- Types of class formations and Methods of classification of students.

UNIT- III: TEACHING AIDS
- Teaching Aids: Meaning, Importance, types of teaching aids.
- Criteria for selecting teaching aids.
- Team Teaching: Meaning, Principles and advantage of team teaching.
- Difference between Teaching Methods and Teaching Aid.

UNIT- IV: LESSON PLANNING AND TEACHING INNOVATIONS
- Lesson Planning: Meaning, Importance and Types
- Principles of lesson plans.
- Micro Teaching: Meaning, steps of micro teaching, advantages and principles
- Simulation Teaching: Meaning, Types and steps of simulation teaching.

Paper –IV (EC-101)
OLYMPIC MOVEMENT

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: ORIGIN OF OLYMPIC MOVEMENT
- Philosophy of Olympic movement
- The early history of the Olympic movement
- The significant stages in the development of the modern Olympic movement
- Educational and cultural values of Olympic movement

UNIT- II: MODERN OLYMPIC GAMES
- Significance of Olympic Ideals, Olympic Rings, Olympic Flag
- Olympic Protocol for member countries
- Olympic Code of Ethics
- Olympism in action
- Sports for All

UNIT- III: DIFFERENT OLYMPIC GAMES
- Para Olympic Games
- Summer Olympics
- Winter Olympics
- Youth Olympic Games

UNIT- IV: COMMITTEES OF OLYMPIC GAMES
- International Olympic Committee - Structure and Functions
- National Olympic committees and their role in Olympic movement
- Olympic commission and their functions
- Olympic medal winners of India

Paper –IV (EC-102)
OFFICIATING AND COACHING

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION OF OFFICIATING AND COACHING
- Concept of officiating and coaching
- Importance and principles of officiating
- Relation of official and coach with management, players and spectators
- Measures of improving the standards of officiating and coaching

UNIT- II: COACH AS A MENTOR
- Duties of coach in general, pre, during and post game.
- Philosophy of coaching
- Responsibilities of a coach on and off the field
- Psychology of competition and coaching

UNIT- III: DUTIES OF OFFICIAL
- Duties of official in general, pre, during and post game.
- Philosophy of officiating
- Mechanics of officiating position, singles and movement etc.
- Ethics of officiating

UNIT- IV: QUALITIES AND QUALIFICATIONS OF COACH AND OFFICIAL
- Qualities and qualification of coach and official
- General rules of games and sports
- Eligibility rules of intercollegiate and inter-university tournaments, preparation of TA, DA bills
- Integrity and values of sports

	PC-204	Hockey, Volleyball, Handball, Softball,	68	4	20+20+20+20	-	80
PART – III PRACTICE OF TEACHING							
	PT-201	(A) Theory Lesson (B) Track & Field (C) Games	68	4	-	50 75 75	200

Total: 800 marks

Note:

1. Each candidate will be required to take a minimum of 10 supervised lessons (General and Theory Lessons) and 05 officiating lessons in schools. The candidate shall prepare a note book covering General and Theory Lessons which shall carry (20+20) 40 marks.

2. In Swimming (Skill & Prowess) observers will be appointed by Chairman, Department of Physical Education, Panjab University Chandigarh and where swimming pool facilities are not available Swimming practical's (Skill & Prowess) will be held at Panjab University Campus swimming pool.

Paper –V (CC-201)
YOGA EDUCATION

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION
- Meaning and Definition of Yoga
- Aims and Objectives of Yoga
- Yoga in Early Upanisads
- The Yoga Sutra: General Consideration
- Need and Importance of Yoga in Physical Education and Sports

UNIT- II: FOUNDATION OF YOGA
- The Astanga Yoga: Yama, Niyama, Asana, Pranayama, Pratyahara, Dharana, Dhyana and Samadhi
- Yoga in the Bhagavadgita - Karma Yoga, Raja Yoga, Jnana Yoga and Bhakti Yoga

UNIT – III: ASANAS
- Effect of Asanas and Pranayama on various system of the body
- Classification of asanas with special reference to physical education and sports
- Influences of relaxtive, meditative posture on various system of the body
- Types of Bandhas and mudras
- Type of kriyas

UNIT- IV: YOGA EDUCATION
- Basic, applied and action research in Yoga
- Difference between yogic practices and physical exercises
- Yoga education centers in India and abroad
- Competitions in Yogasanas

Paper –VI (CC-202)
HEALTH EDUCATION AND ENVIRONMENT STUDIES

Total Marks	:	*100*
Theory Marks	:	*80*
Sessional Marks	:	*20*

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

Unit- I: Health Education

- Concept, Dimensions, Spectrum and Determinants of Health
- Definition of Health, Health Education, Health Instruction, Health Supervision
- Aim, objective and Principles of Health Education
- Health Service and guidance instruction in personal hygiene

Unit- II: Health Problems in India

- Communicable and Non Communicable Diseases
- Obesity, Malnutrition, Adulteration in food, Environmental sanitation, Explosive Population,
- Personal and Environmental Hygiene for schools
- Objective of school health service, Role of health education in schools
- Health Services Care of skin, Nails, Eye health service, Nutritional service, Health appraisal, Health record, Healthful school environment, first- aid and emergency care etc.

Unit- III: Environmental Science

- Definition, Scope, Need and Importance of environmental studies.
- Concept of environmental education, Historical background of environmental education,
- Celebration of various days in relation with environment.
- Plastic recycling & probation of plastic bag / cover.
- Role of school in environmental conservation and sustainable development.

Unit- IV: Natural Resources and related environmental issues:

- Water resources, food resources and Land resources
- Definition, effects and control measures of: Air Pollution, Water Pollution, Soil Pollution, Noise Pollution, Thermal Pollution
- Management of environment and Govt. policies , Role of pollution control board.

Paper –VII (CC-203)
ORGANIZATION AND ADMINISTRATION

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: ORGANIZATION AND ADMINISTRATION

- Meaning, definition and importance of Organization and Administration in physical education.
- Planning and their basic principles
- Program planning: Meaning, Importance, Principles of program planning in physical education.
- Qualification and Responsibilities of Physical Education teacher
- Importance of Pupil leader in Physical Education

UNIT- II: OFFICE MANAGEMENT, RECORD, REGISTER & BUDGET

- Office Management: Meaning, definition, functions and kinds of office management
- Records and Registers: Maintenance of attendance Register, stock register, cash register, physical efficiency record, Medical examination Record.
- Budget: Meaning, Importance of Budget making,
- Criteria of a good Budget, Sources of Income, Expenditure, Preparation of Budget.

UNIT- III: FACILITIES, & TIME-TABLE MANAGEMENT

- Facilities and equipment management: Types of facilities; Infrastructure-indoor, out door.
- Playfields: Area, Location, layout and care
- Equipment: Need, importance, purchase, care and maintenance.
- Time Table Management: Meaning, Need, Importance and Factor affecting time table.

UNIT- IV: COMPETITION ORGANIZATION

- Tournament and its importance.
- Types of Tournament and its organization structure - Knock-out Tournaments, League or Round Robin Tournaments, Combination Tournament, consolation tournaments and challenge Tournament.
- Organization structure of Athletic Meet.
- Sports Event Intramurals & Extramural Tournament planning.

Paper –VIII (EC-201)
CONTEMPORARY ISSUES IN PHYSICAL EDUCATION, FITNESS AND WELLNESS

Total Marks	*:*	*100*
Theory Marks	*:*	*80*
Sessional Marks	*:*	*20*

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: CONCEPT OF PHYSICAL EDUCATION AND FITNESS
- Definition, Aims and Objectives of Physical Education, fitness and Wellness
- Importance and Scope of fitness and wellness
- Modern concept of Physical fitness and Wellness
- Physical Education and its Relevance in Inter Disciplinary Context.

UNIT- II: FITNESS, WELLNESS AND LIFESTYLE
- Fitness Types of Fitness and Components of Fitness
- Understanding of Wellness
- Modern Lifestyle and Hypo kinetic Diseases Prevention and Management
- Physical Activity and Health Benefits

UNIT- III: PRINCIPLES OF EXERCISE PROGRAM
- Means of Fitness development aerobic and anaerobic exercises
- Exercises and Heart rate Zones for various aerobic exercise intensities
- Concept of free weight Vs Machine, Sets and Repetition etc
- Concept of designing different fitness training program for different age group.

UNIT- IV: SAFETY EDUCATION AND FITNESS PROMOTION
- Health and Safety in Daily Life
- First Aid and Emergency Care
- Common Injuries and their Management

REFERENCES:

Paper –VIII (EC-202)
SPORTS NUTRITION AND WEIGHT MANAGEMENT

Total Marks	:	*100*
Theory Marks	:	*80*
Sessional Marks	:	*20*

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION TO SPORTS NUTRITION

- Meaning and Definition of Sports Nutrition
- Basic Nutrition guidelines
- Role of nutrition in sports
- Factor to consider for developing nutrition plan

UNIT- II: NUTRIENTS: INGESTION TO ENERGY METABOLISM

- Carbohydrates, Protein, Fat Meaning, classification and its function
- Role of carbohydrates, Fat and protein during exercise
- Vitamins, Minerals, Water Meaning, classification and its function
- Role of hydration during exercise, water balance, Nutrition daily caloric requirement and expenditure.

UNIT- III: NUTRITION AND WEIGHT MANAGEMENT

- Meaning of weight management Concept of weight management in modern era Factor affecting weight management and values of weight management
- Concept of BMI (Body mass index), Obesity and its hazard, Myth of Spot reduction, Dieting versus exercise for weight control, Common Myths about Weight Loss
- Obesity Definition, meaning and types of obesity,
- Health Risks Associated with Obesity, Obesity - Causes and Solutions for Overcoming Obesity.

UNIT- IV: STEPS OF PLANNING OF WEIGHT MANAGEMENT

- Nutrition Daily calorie intake and expenditure, Determination of desirable body weight
- Balanced diet for Indian School Children, Maintaining a Healthy Lifestyle
- Weight management program for sporty child, Role of diet and exercise in weight management, Design diet plan and exercise schedule for weight gain and loss

SEMESTER-III
PART – I THEORY PAPERS

Paper	Course Code	Title of the Papers	Total Hours	Credit	Internal Marks	External Marks	Total Marks
Core Course							
IX.	CC-301	Computer Application in Physical Education	68	4	20	80	100
X	CC-302	Sports Psychology and Sociology	68	4	20	80	100
XI	CC-303	Sports Training	68	4	20	80	100
Elective Course (Any One)							
XII.	EC-301	Sports Medicine, Physiotherapy, and rehabilitation	68	4	20	80	100
	EC-302	Curriculum Design					
PART-II PRACTICAL COURSE (SKILL AND PROWESS)							
	PC-301	Track and Field (Long Distance Races, Javelin Throw, Triple Jump, Steeple Chase)	68	4	40	-	40
	PC-302	Swimming, Gymnastics	68	4	20+20	-	40
	PC-303	Folk Dances	68	4	40	-	40
	PC-304	Cricket, Badminton, Table-Tennis, Lawn-Tennis	68	4	20+20+20+20	-	80
PART – III PRACTICE OF TEACHING							
	PT-301	Teaching Lesson (A) Games (B) Track & Field)	68	4	-	(A)80+20=100 (B)80+20=100	200

Total: 800 marks

Note:

Each candidate will be required to take a minimum of 10 supervised lessons (Games, Track & Field) and 05 officiating lessons in schools. The candidate shall prepare a note book covering lessons of above said Games and Track & Field events which shall carry (20+20) 40 marks.

Paper –IX (CC-301)
COMPUTER APPLICATION IN PHYSICAL EDUCATION

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION TO COMPUTER

- Meaning, need and importance of information and communication technology (ICT). Application of Computers in Physical Education
- Components of computer, input and output device
- Application software used in Physical Education and sports

UNIT- II: MS WORD

- Introduction to MS Word
- Creating, saving and opening a document
- Formatting Editing features Drawing table
- Page setup, paragraph alignment, spelling and grammar check printing option, inserting page number, graph, footnote and notes

UNIT- III: MS EXCEL

- Introduction to MS Excel
- Creating, saving and opening spreadsheet
- Creating formulas
- Format and editing features adjusting columns width and row height understanding charts.

UNIT- IV: MS POWER POINT

- Introduction to MS Power Point
- Creating, saving and opening a ppt. file
- Format and editing features slide show, design, inserting slide number
- Picture, graph, table
- Preparation of Power point presentations

Paper –X (CC-302)
SPORTS PSYCHOLOGY AND SOCIOLOGY

Total Marks	:	*100*
Theory Marks	:	*80*
Sessional Marks	:	*20*

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT -I: INTRODUCTION
- Meaning, Importance and scope of Educational and Sports Psychology
- General characteristics of Various Stages of growth and development
- Types and nature of individual differences; Factors responsible -Heredity And environment
- Psycho-sociological aspects of Human behavior in relation to physical education and sports

UNIT-II: SPORTS PSYCHOLOGY
- Nature of learning, theories of learning, Laws of learning,
- Plateau in Learning; & transfer of training
- Meaning and definition of personality, characteristics of personality,
- Dimension of personality, Personality and Sports performance
- Nature of motivation: Factors influencing motivation; Motivation and techniques and its impact on sports performance.
- Mental Preparation Strategies: Attention focus, Self- talk, Relaxation, Imaginary.
- Aggression and Sports, Meaning and nature of anxiety, Kinds of anxiety
- Meaning and nature of stress; Types of stress, Anxiety, Stress, Arousal and their effects on sports performance

UNIT-III: RELATION BETWEEN SOCIAL SCIENCE AND PHYSICAL EDUCATION.
- Orthodoxy, customs, Tradition and Physical Education.
- Festivals and Physical Education.
- Socialization through Physical Education.
- Social Group life, Social conglomeration and Social group, Primary group and Remote group.

UNIT-IV CULTURE: MEANING AND IMPORTANCE.
- Features of culture,
- Importance of culture.
- Effects of culture on people life style.
- Different methods of studying Observation/ Inspection method, Questionnaire method, Interview method

Paper –XI (CC-303)
SPORTS TRAINING

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION TO SPORTS TRAINING

- Meaning and Definition of Sports Training ○ Aim and Objective of Sports Training
- Principles of Sports Training
- System of Sports Training Basic Performance, Good Performance and High Performance Training

UNIT- II: TRAINING COMPONENTS

- Strength Mean and Methods of Strength Development
- Speed Mean and Methods of Speed Development
- Endurance - Mean and Methods of Endurance Development
- Coordination Mean and Methods of coordination Development
- Flexibility Mean and Methods of Flexibility Development

UNIT- III: TRAINING PROCESS

- Training Load- Definition and Types of Training Load
- Principles of Intensity and Volume of stimulus
- Technical Training Meaning and Methods of Technique Training
- Tactical Training Meaning and Methods of Tactical Training

UNIT- IV: TRAINING PROGRAMMING AND PLANNING

- Periodization Meaning and types of Periodization
- Aim and Content of Periods Preparatory, Competition, Transitional etc.
- Planning Training session
- Talent Identification and Development

Paper –XII (EC-301)
SPORTS MEDICINE, PHYSIOTHERAPY AND REHABILITATION

Total Marks	:	*100*
Theory Marks	:	*80*
Sessional Marks	:	*20*

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT-I: - SPORTS MEDICINE:

- Sports Medicine: Meaning, Definition, Aims, Objectives, Modern Concepts and Importance.
- Athletes Care and Rehabilitation: Contribution of Physical Education Teachers and Coaches.
- Need and Importance of the study of sports injuries in the field of Physical Education
- Prevention of injuries in sports Common sports injuries Diagnosis
- First Aid - Treatment - Laceration Blisters Contusion - Strain Sprain Fracture Dislocation and Cramps Bandages Types of Bandages trapping and supports.

UNIT-II: PHYSIOTHERAPY

- Definition Guiding principles of physiotherapy, Importance of physiotherapy, Introduction and demonstration of treatments - Electrotherapy infrared rays Ultraviolet rays short wave diathermy ultrasonic rays.

UNIT-III: HYDROTHERAPY:

- Introduction and demonstration of treatments of Cry therapy, Thermo therapy, Contrast Bath, Whirlpool Bath Steam Bath Sauna Bath Hot Water Fomentation Massage: History of Massage Classification of Manipulation (Swedish System) physiological Effect of Massage.

UNIT-IV: THERAPEUTIC EXERCISE:

- Definition and Scope Principles of Therapeutic Exercise Classification, Effects and uses of Therapeutic exercise passive Movements (Relaxed, Forced and passive - stretching) active movements (concentric, Eccentric and static) application of the therapeutic exercise: Free Mobility Exercise Shoulder, Elbow Wrist and Finger Joints Hips, Knee, ankle and Foot joints Trunk. Head and Neck exercises.

Paper –XII (EC-302)
CURRICULUM DESIGN

Total Marks	:	*100*
Theory Marks	:	*80*
Sessional Marks	:	*20*

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: MODERN CONCEPT OF THE CURRICULUM

- Need and importance of curriculum, Need and importance of curriculum development, the role of the teacher in curriculum development.
- Factors affecting curriculum - Social factors - Personnel qualifications - Climatic consideration - Equipment and facilities -Time suitability of hours.
- National and Professional policies, Research finding

UNIT- II: BASIC GUIDE LINE FOR CURRICULUM CONSTRUCTION; CONTEST (SELECTION AND EXPANSION).

- Focalization
- Socialization
- Individualization
- Sequence and operation
- Steps in curriculum construction.

UNIT- III: CURRICULUM-OLD AND NEW CONCEPTS, MECHANICS OF CURRICULUM PLANNING.

- Basic principles of curriculum construction.
- Curriculum Design, Meaning, Importance and factors affecting curriculum design.
- Principles of Curriculum design according to the needs of the students and state and national level policies.
- Role of Teachers

UNIT- IV: Under-graduate preparation of professional preparation.

- Areas of Health education, Physical education and Recreation.
- Curriculum design-Experience of Education, Field and Laboratory.
- Teaching practice.
- Professional Competencies to be developed-Facilities and special resources for library, laboratory and other facilities.

SEMESTER-IV
PART – I THEORY PAPERS

Paper	Course Code	Title of the Papers	Total Hours	Credit	Internal Marks	External Marks	Total Marks
Core Course							
XIII.	CC-401	Measurement and Evaluation in Physical Education	68	4	20	80	100
XIV.	CC-402	Kinesiology and Biomechanics	68	4	20	80	100
XV.	CC-403	Research and Statistics in Physical Education	68	4	20	80	100
Elective Course (Any One)							
XVI.	EC-401	Theory of Sports and Games	68	4	20	80	100
	EC-402	Sports Management					
PART-II PRACTICAL COURSE (SKILL AND PROWESS)							
	PC-401	Track and Field (Race Walk, Road Race, Hammer throw, Pole Vault)	68	4	40	-	40
	PC-402	Swimming, Gymnastics	68	4	20+20	-	40
	PC-403	Mass Demonstrations	68	4	40	-	40
	PC-404	Wrestling, Judo, Boxing, Kabaddi (circle Style)	68	4	20+20+20+20	-	80
PART – III PRACTICE OF TEACHING							
	PT-401	Coaching Lesson (A) Games (B) Track & Field)	68	4	-	(A)80+20=100 (B)80+20=100	200

Total: 800 marks

Note:

Each trainee will be required to take a minimum of 10 supervised lessons (Games, Track & Field) and 05 officiating lessons in schools. The candidate shall prepare a note book covering lessons of above said Games and Track & Field events which shall carry (20+20) 40 marks.

Paper –XIII (CC-401)
MEASUREMENT AND EVALUATION IN PHYSICAL EDUCATION

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT-I: INTRODUCTION TO TEST & MEASUREMENT & EVALUATION
- Meaning of Test & Measurement & Evaluation in Physical Education
- Need & Importance of Test & Measurement & Evaluation in Physical Education
- Principles of Evaluation

UNIT-II: CRITERIA, CLASSIFICATION AND ADMINISTRATION OF TEST
- Criteria of good Test
- Criteria of tests, scientific authenticity (reliability, objectivity, validity and availability of norms)
- Type and classification of Test
- Administration of test

UNIT- III: PHYSICAL FITNESS TESTS
- AAHPER youth fitness test
- National physical Fitness Test
- Indiana Motor Fitness Test
- JCR test

UNIT- IV: SPORTS SKILL TESTS
- Lockhart and McPherson badminton test
- Johnson basketball test
- McDonald soccer test
- S.A.I volleyball test

Paper –XIV (CC-402)
KINESIOLOGY AND BIOMECHANICS

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION TO KINESIOLOGY AND SPORTS BIOMECHANICS

- Meaning and Definition of Kinesiology and Sports Biomechanics
- Importance of Kinesiology and Sports Biomechanics to Physical Education Teacher, Athletes and Sports Coaches.
- Terminology of Fundamental Movements
- Fundamental concepts of following terms Axes and Planes, Centre of Gravity, Equilibrium, Line of Gravity

UNIT- II: FUNDAMENTAL CONCEPT OF ANATOMY AND PHYSIOLOGY

- Classification of Joints and Muscles
- Types of Muscle Contractions
- Posture Meaning, Types and Importance of good posture.
- Fundamental concepts of following terms- Angle of Pull, All or None Law, Reciprocal Innovation

UNIT- III: MECHANICAL CONCEPTS

- Force - Meaning, definition, types and its application to sports activities
- Lever - Meaning, definition, types and its application to human body.
- Newtons Laws of Motion Meaning, definition and its application to sports activities.
- Projectile Factors influencing projectile trajectory.

UNIT- IV: KINEMATICS AND KINETICS OF HUMAN MOVEMENT

- Linear Kinematics Distance and Displacement, speed and velocity, Acceleration
- Angular kinematics Angular Distance and Displacement, Angular Speed and velocity, Angular Acceleration.
- Linear Kinetics Inertia, Mass, Momentum, Friction.
- Angular Kinetics Moment of inertia ,Couple, Stability.

Paper –XV (CC-403)
RESEARCH AND STATISTICS IN PHYSICAL EDUCATION

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT- I: INTRODUCTION TO RESEARCH

- Definition of Research
- Need and importance of Research in Physical Education and Sports.
- Scope of Research in Physical Education & Sports.
- Classification of Research
- Research Problem, Meaning of the term, Location and criteria of Selection of Problem, Formulation of a Research Problem, Limitations and Delimitations.

UNIT- II: SURVEY OF RELATED LITERATURE

- Need for surveying related literature.
- Literature Sources, Library Reading
- Research Proposal, Meaning and Significance of Research Proposal.
- Preparation of Research proposal / project.
- Research Report: A group project is to be undertaken by a small batch of students under the supervision of a teacher, wherein it is expected to survey school facilities of physical education, health assessment programme evaluation, fitness status of the students, staff and other stakeholders etc. and submit the report to the institution.

UNIT-III: BASICS OF STATISTICAL ANALYSIS

- Statistics: Meaning, Definition, Nature and Importance
- Class Intervals: Raw Score, Continuous and Discrete Series, Class Distribution, Construction of Tables
- Graphical Presentation of Class Distribution: Histogram, Frequency Polygon, Frequency Curve. Cumulative Frequency Polygon, Ogive, Pie Diagram

UNIT- IV: STATISTICAL MODELS IN PHYSICAL EDUCATION AND SPORTS

- Measures of Central Tendency: Mean, Median and Mode-Meaning, Definition, Importance, Advantages, Disadvantages and Calculation from Group and Ungrouped data
- Measures of Variability: Meaning, importance, computing from group and ungroup data
- Percentiles and Quartiles: Meaning, importance, computing from group and ungroup data

Paper –XVI (EC-401)
THEORY OF SPORTS AND GAMES

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT-I: GENERAL INTRODUCTION OF SPECIALIZED GAMES AND SPORTS

Athletics, Badminton, Basketball, Cricket, Football, Gymnastic, Hockey, Handball, Kabaddi, Kho-Kho, Tennis, Volleyball and Yoga.

Each game or sports to be dealt under the following heads

o History and development of the Game and Sports o Ground preparation, dimensions and marking
o Standard equipment and their specifications o Ethics of sports and sportsmanship

UNIT-II: SCIENTIFIC PRINCIPLES OF COACHING: (Particular Sports And Game Specific)

o Motion Types of motion and Displacement, Speed, Velocity, Acceleration, Distance and Newtons Law of motions.
o Force Friction, Centripetal and Centrifugal force, Principles of force.
o Equilibrium and its types o Lever and its types
o Sports Training Aims, Principles and characteristics.
o Training load Components, Principles of load, Over Load (causes and symptoms).

UNIT-III: PHYSICAL FITNESS COMPONENTS: (Particular Sports and Game Specific)

o Speed and its types
o Strength and its types o Endurance and its types
o Flexibility and its types
o Coordinative ability and its types
o Training methods: Development of components of physical fitness and motor fitness through following training methods (continuous method, interval method, circuit method, fartlek /speed play and weight training)

UNIT-IV: CONDITIONING EXERCISES AND WARMING UP

o Concept of Conditioning and warming up.
o Role of weight training in games and sports.
o Teaching of fundamental skill & their mastery (technique, tactic and different phases of skill acquisition).
o Recreational and Lead up games
o Strategy Offence and defense, Principles of offence and defense.

Paper –XVI (EC-402)
SPORTS MANAGEMENT

Total Marks : 100
Theory Marks : 80
Sessional Marks : 20

Note: *Nine questions will be set. Question number one will be compulsory of 20 marks with ten short types of answers covering the entire syllabus. Four questions are to be attempted selecting one from each unit and each question will carry 15 marks.*

UNIT-I

- Nature and Concept of Sports Management.
- Progressive concept of Sports management.
- The purpose and scope of Sports Management.
- Essential skills of Sports Management.
- Qualities and competencies required for the Sports Manager.
- Event Management in physical education and sports.

UNIT-II

- Meaning and Definition of leadership
- Leadership style and method.
- Elements of leadership.
- Forms of Leadership.
  - Autocratic
  - Laissez-faire
  - Democratic
  - Benevolent Dictator
- Qualities of administrative leader.
- Preparation of administrative leader.
- Leadership and Organizational performance.

UNIT-III

- Sports Management in Schools, colleges and Universities.
- Factors affecting planning ○ Planning a school or college sports programme.
- Directing of school or college sports programme.
- Controlling a school, college and university sports programme.
  - Developing performance standard
  - Establishing a reporting system
  - Evaluation
  - The reward/punishment system

UNIT-IV

- Financial management in Physical Education & sports in schools, Colleges and Universities.
- Budget Importance, Criteria of good budget,
- Steps of Budget making
- Principles of budgeting

OR

VI SEMESTER : Option (ii) : MODERN POLITICAL IDEOLOGIES

Max. Marks	: 100
Theory	: 90 Marks
Internal Assessment	: 10 Marks
Time	: 3 Hrs.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.
There shall be 9 questions in all. The first question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 10 to 20 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks each. It shall carry 18 marks and shall be a compulsory question. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all, of 18 marks each.

Objectives : The paper refers to the basic tenets of modern political ideologies.

UNIT-I **Liberalism :**
a) Classical and Modern Liberalism.
b) Neo Liberalism.

UNIT-II **Socialism :**
a) Marxian Socialism.
b) Democratic Socialism

UNIT-III
a) Anarchism.
b) Fascism

UNIT-IV **Gandhism**
a) Gandhi's Idea of State:
b) Social and Political Ideas of Gandhi.

Suggested Readings :

1. Bandhyopadhya, J., *Political and Social Thought of Gandhi*, Bombay, 1969.
2. George Lichtheim, Marxism : An Historical and Critical Study, Routledge and Kegan Paul, London, 1962.
3. Noel O' Sullivan, Conservation, St. Martin's Press, New York, 1976.
4. Manning, D.J., Liberalism, St. Martin's Press, New York, 1976.

OR

VI SEMESTER : Option (iii) — WESTERN POLITICAL THOUGHT

Max. Marks	: 100
Theory	: 90 Marks
Internal Assessment	: 10 Marks
Time	: 3 Hrs.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.
There shall be 9 questions in all. The first question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 10 to 20 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks each. It shall carry 18 marks and shall be a compulsory question. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all, of 18 marks each.

Objectives : This paper aims to introduce to the students the major themes of Western Political Thought. This will be done by taking an in-depth study of the key thinkers of this tradition.

UNIT-I Hobbes.
- a) Nature of Man, State of Nature, Natural Laws.
- b) Social Contract.
- c) Individualism Vs. Absolutism.

UNIT-II Locke.
- a) Nature of Man, State of Nature, Natural Rights.
- b) Social Contract.
- c) Contribution of Locke to Liberalism.

UNIT-III Rousseau.
- a) State of Nature, Natural Man.
- b) Social Contract.
- c) Theory of General Will.

UNIT-IV Karl Marx.
- a) Historical Materialism, Economic Determinism.
- b) Theory of Surplus Value.
- c) Class Struggle.

ECONOMICS

SEMESTER V

The candidates are required to study **one of the** following papers:

I Money and Banking.

II International Economics.

III Introduction to Econometrics.

Paper-I : MONEY AND BANKING

Max. Marks	: 100 Marks
Theory	: 90 Marks
Internal Assessment	: 10 Marks
Time	: 3 Hours

Objective: Money and Banking constitute important components towards understanding of economics. A clear understanding of the operations of money and banking and their interaction with the rest of the economy is essential to realize how monetary forces operate through a multitude channels- market, non market, institutes and among others, the state. The operation of financial markets and their regulations are to be studied to appreciate their key-role in an economy, especially after the far reaching banking and financial sector reforms in India and elsewhere. The present course is designed to acquaint the students fully with the changing role of financial institutes in the process of growth and development. Accordingly, the paper on 'Economics of Money and banking' is an optimal interaction of monetary theory, banking and non- banking financial institutes, which combines with itself a systematic discussion of the theory, institutions and policy with special reference to India.

The students would be evaluated at the end of each semester through subjective type questions/ answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

(i) *The syllabus has been divided into four units.*

There shall be **9** questions in all. The first question is **compulsory** and shall be short answer type containing 12 short questions spread over the whole syllabus to be of answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions.It shall carry 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two**questions and the candidates shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
The paper setter must put note (ii) in the question paper.

UNIT-I

Definition of Money, Money and Near Money Assets.
Supply of Money:Components, Determinants- High Powered Money and Money Multiplier, Measures of Supply of Money in India.

UNIT-II

Demand for Money: Classical Theory, Keynes Liquidity Preference Theory, Friedman's Restatement of Quantity Theory of Money.
Central Banking: Main Functions, Techniques of Monetary Management, Monetary Policy of Reserve Bank of India.

UNIT-III

Commercial Banking: Main Functions, Major Developments and Reforms in Indian Banking System since 1991.
Non-Banking Financial Institutions (NBFIs) – Role and Structure NBFIs in India.

UNIT-IV

International Monetary Fund- Features and Role.
World Bank: Features and Role.
Asian Development Bank: Features and Role.

Recommended Readings:

1. Diulio A. Eugene (latest Edition) : Theory and Problems of Money and Banking, International Edition (Schaum's Outline Series)
2. Gupta, S. B (2004) : Monetary Planning in India, S. Chand, New Delhi.
3. Khanna, Perminder (2005) : Advanced Study in Money and Policy : Relevance in the Indian Economy, Atlantic Publishers, New Delhi
4. Kulkarni, G (1999) : Modern Monetary Theory, McMillan, New Delhi
5. Laidler, D. E. W (1977) : The Demand for Money : Theories and Evidence, Allied Publishers, New Delhi.
6. Bofinger Peter (2001) : Monetary Policy: Goals, Institutions, Strategy and Instrument, Oxford University Press.

Supplementary Readings:

1. Reserve Bank of India Publications- (Latest).
2. Government of India: Economic Survey (latest)

Paper-II: INTERNATIONAL ECONOMICS

Max. Marks	:	100 Marks
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objectives: - The course intends to provide a deep understanding about the broad principles and theories, which tend to govern the free flow of trade in goods, services and capital- both short-term and long-term- at the global level. The contents of the paper spread over the different modules, lay stress on the theory and nature of the subject which, in turn, will greatly help them to examine the impact of the trade policies followed both as the national and international levels as also their welfare implications at macro level and the distribution of gains from trade.
The time-tested method of imparting verbal instructions through lectures would be used. Examples, in so far as possible, would be selected from everyday life/experience. The feedback would be sought the students writing assignments, tutorials and seminars.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus has been divided into four units.

(i) There shall be **9** questions in all. The first question is **compulsory** and shall be short answer type containing 12 short questions spread over the whole syllabus to beof answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (ii) in the question paper.

UNIT-I

The Pure Theory of International Trade:Theories of Absolute Advantage, Comparative Advantage andOpportunity Costs. Heckscher-Ohlin Theory. Factor Price Equalisation. Gains from Trade, their Measurement and Distribution. Terms of Trade, Secular Deterioration Hypothesis.

UNIT-II

Commercial Policy:The Theory of Tariffs, Optimum and Effective Rate of Tariff, Inter-relationship betweenTrade, Aid and Economic Development. The Theory of Economic Integration among Nations; Forms of Economic Integration. The Theory of Customs Union.

UNIT-III

Balance of Payments, Exchange Rate and Trade Structures:The Process of Adjustment in the Balance ofPayments. The Concept of Foreign Trade Multiplier. Fixed Vs. Flexible Exchange Rates and their Relative Merits and Demerits. Structure of Trade, Trade between Developing and Developed Countries. Unequal Exchange and its Impact on Balance of Payments. Current Problems of Trade and Finance of Developing Countries. Role of Multinational Corporations in the Developing Countries.

UNIT-IV

International Monetary System:IMF and International Monetary System, Present International Monetary System, problems of International Liquidity. Proposals for International Monetary Reforms. New International Economic Order.

Recommended Readings :

1. Soderston , B. O. (1994) : International Economics, 2nd Edition, Macmillan Press, London,
2. Salvatore, Dominick (latest edition) : International Economics, John Wiley & Sons.
3. Krugman P R &ObstifeldMaurice(latest edition) : International Economics – Theory and Policy, Addison- wesley.
4. Ghuman , Ranjit Singh (latest edition) : Antar-RashtriyaArthVigiyan, (Punjabi Medium) Punjabi University, Patiala.

Supplementary Readings :

1. Kindleberger, C. P. (1987) : International Economics, Richard Irwin, Homes wood, Illinois, Indian Edition.
2. Sir RaiHarrod (Trans. Pritam Singh Gill) : Antar-RashtriyaArthShastar, Punjabi University, Patiala.

Paper-III: - INTRODUCTION TO ECONOMETRICS

Max. Marks	:	100 Marks
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objectives: Application of economic theory need a reasonable understanding of economic relationship andstatistical methods. The econometric theory thus becomes a very powerful tool for understanding of applied economic relationships and for meaningful research in economics. This paper accordingly is devoted to equip the students with basic theory of econometrics and relevant application of the methods. The topics covered in the course include various problems faced in estimation of both single equations and simultaneous models.

Besides the time-tested method of imparting verbal instructions through lectures, description and derivation of econometric models would be demonstrated by extensive use of blackboard. Examples, is so far as possible, would be selected from everyday life/experience. The feedback would be sough through the students writing assignments and written examinations.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus has been divided into four units.

(i) There shall be **9** questions in all. The first question is **compulsory** and shall be short answer type containing 12 short questions spread over the whole syllabus to be of answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (ii) in the question paper.

UNIT-I

Definition and Scope of Econometrics. The Methodology of Economic Research. Specification and Estimation of an Econometric Model.
Single Equation Models*:*Ordinary Least Squares: Estimation and Properties of the Estimators

UNIT-II

Testing of Hypothesis*:*Basic Concepts; Type I and Type II errors. Simple and Composite Hypothesis.t and F tests. Maximum Likelihood Estimation.

UNIT-III

The General Linear Regression Model in Matrix Form: Estimation and Properties of the Estimators.
Tests of Significance of Coefficients. Partial Correlation Coefficients.
Multicollinearity:Its Detection and Solution.
Heteroscedasticity: Its Detection and Solution.

UNIT-IV

Dummy Variables*:*The dummy Variable Trap. Interpretation of Slope and Intercept.
Lagged Variables*:*Uses in Economics. Estimation Problems, Koyck Transformation, Partial and Stock Adjustment Models.

Recommended Readings :

1. Gujarati, Damodar (2007) : Basic Econometrics, McGraw Hill, New Delhi.
2. Ohnson, J. (1977) : Econometrics Methods, 2nd Edition, McGraw Hill, New

Supplementary Readings :

2. Kendall, M. G. & A. Sturat (eds.) : Advanced Theory of Statistics, Vols. I & II, Griffin and Co., London.
3. Maddala, G. S. (1977) : Econometrics, New Delhi, McGraw Hill.
4. Wallis, K. F. (1973) : Topics in Applied Econometrics, London, Bray Hills

---

ECONOMICS
SEMESTER VI

The candidates are required to study **one of the** following papers:

IV Environmental Economics
V Economics of Labour
VI Public Finance

Paper-IV : Environmental Economics

Max. Marks	:	100 Marks
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objectives: - This paper aims to make aware students about the importance of environment in economics and vice-versa. It helps them to know the ways of sustaining our resources by optimally allocating them for future use.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus has been divided into four units.

(i) There shall be **9** questions in all. The first question is **compulsory** and shall be short answer type containing 12 short questions spread over the whole syllabus to be of answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (ii) in the question paper.

UNIT-I

Introduction to Environmental Economics: Introduction; the Economy and the Environment: Inter-Linkages; First Two Laws of Thermodynamics.
Economic Efficiency and Market Failures: Market Solution and Efficiency; Market Failures; Problem of Externalities; Public goods and Public bads; Common Property Recourse; Non-convexities; Asymmetric Information.

UNIT-II

Economic of Pollution*:* Damage Functions and Abatement Cost Functions; Marginal Decision; Optimal Level of Pollution; Market Solutions and Government Actions; Economic Incentives and least-Cost Solution; Command and Control Policies.

UNIT-III

Valuing the Environment: Economic valuation of Environment Goods: Types of Environmental Values; Monetary Valuation Techniques; Non-Monetary Valuation Techniques; Comparing Methodologies. The Environmental Kuznets Curve

UNIT-IV

Cost-Benefit Analysis and the Environment: The Theory of Cost Benefit Analysis; Idea of Discounting and Choice of Discount Rate; Framework for Cost – Benefit Analysis; Discounting and Future Generation.
International Environmental Issue: Economics of Climate Change: Trade & Environment.

Economic Growth and Sustainable Development: Economic Growth and Development; the Environmental Kuznets Curve; Economics of Sustainable Development.

International Environmental Issues: Economics of Climate Change; Trade and the Environment.

Recommended Readings :

1. Goodstein, E.S. (2002) : Economics and the Environment (3rd ed.) Prentice Hall.
2. Hanley, N., Shogern, J.F and White, B (1977) : Environmental Economics in Theory and Practice, Macmillan
3. Sankar, U. (ed) James, A.J., M.N. : Environmental Economics, Oxford University Press, New Delhi.
4. Murty and Smita Mishra (2006) : Murty and Smita Mishra (1999), Economics of Water Pollution- The Indian Experience, Oxford University Press, New Delhi
5. Varian. Hal R., (2006) : Intermedate Micro-Economics- A Modern Approach, 7th ed., East-West Press.
6. Cherry, S.N. and Vyasual, Vinod (2000) : Environmental Management- an Indian Perspectives, Macmillan, New Delhi.

PAPER- V: ECONOMICS OF LABOUR

Max. Marks	: 100 marks
Theory	: 90 marks
Internal Assessment	: 10 marks
Time	: 3 Hours

COURSE OBJECTIVE: Issues pertaining to the labour market, wage theories, employment policies, trade unions and collective bargaining in the globalized economy have become vitally important for developing countries. In a country like India where the bulk of the labour force is in the unorganized sector and the organized sector is witnessing "joblessness", the importance of issues such as employment and social security for the growing millions continues to assume significance. This paper exposes students to theoretical as well as empirical issues relating to the labour market with special reference to India. The time–tested method of imparting verbal instructions through lectures would be used

The objective of the course is to provide students with the basic economic tools needed to understand and analyze how earnings are determined, how labour markets work and how various government policies may affect labour market.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus has been divided into four units.

(i) There shall be **9** questions in all. The first question is **compulsory** and shall be short answer type containing 12 short questions spread over the whole syllabus to be of answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (ii) in the question paper.

Unit I

Nature and Scope of Labour Economics, Nature and Characteristics of Labour Markets in Developing Countries like India.
Theories of Wages, Concept of Minimum Wage, Living Wage and Fair Wage in Theories and Practice.

Unit II

Wage Determination in various Sectors- Rural, Urban, Organized, Unorganized and Informal Sectors.

Poverty and Unemployment in Developing Countries, Unemployment: Concept, Types and Employment Policy particularly in India.

Unit III

Impact of Rationalization, Technological Change and Modernization on Employment in Organized Private Industry and Public Sector; Employment in Agriculture Sector; Women and Child labour.

Unit IV

Role and Functions of Trade Unions, Growth, Pattern and Structure of Trade Unions in India, Achievements of Labour Unions, Collective Bargaining.
Industrial Disputes: Causes of Industrial Disputes, Their Settlement and Prevention Mechanism.

BOOKS RECOMMENDED:

Paper-VI: PUBLIC FINANCE

Max. Marks	:	100 marks
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Objectives: Role and function of the Government in an economy have been changing with the passage of time. The term' Public Finance' has traditionally been applied to the package of those policies and operations which involve the use of tax and expenditure measures while budgetary policy is an important part to understand the basic problems of use of resources, distribution of income etc. there are vast array of fiscal institutions- tax system, expenditure programmes, budgetary procedures, stabilization instruments, debt issues, levels of government etc., which raise a spectrum of issues arising from the operation of these institutions. Further, the existing of externalities, concern for adjustment in the distribution of income and wealth, etc. require political processes for their solution in a manner which combines individual freedom and justice. This paper combines a thorough understanding of fiscal institutions with a careful analysis of the issues which underline budgetary policies in general and Indian experience in particular.

The student would be evaluated at the end of each semester through subjective type questions/answer (both short and essay type). The scripts would be evaluated by the examiners having adequate graduate teaching experience in the paper/option concern.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus has been divided into four units.

(i) There shall be **9** questions in all. The first question is **compulsory** and shall be short answer type containing 12 short questions spread over the whole syllabus to be of answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (ii) in the question paper.

UNIT-I

The Principle of Public Finance – Subjective and Objective Criteria.
Theory of Public Expenditure*:*Maximum Social Advantage, Theory of Social Goods: Distinction between
Public, Private and Merit Goods. Public Expenditure and Economic Growth. Effects of Public Expenditure on Production, Distribution, Social Over-head Capital, Stability and Innovation. Criteria of Public Expenditure.

UNIT-II

Public Revenue*:*Approaches of Equity in Taxation:Benefits principle Cost of Service Principle, Ability toPay Theory. Effects of Taxation. Analysis of Major Taxes – Income Tax, Expenditure Tax, Corporation Tax, Wealth Tax, Excise Duties, Sales Tax, and Custom Duties. The concept of Taxable Capacity. Taxation in a Developing Economy. Fiscal Incidence: Theories of Tax Shifting, Concepts of Incidence, Measurement of Incidence.

UNIT-III

Public Debt:Role of Public Debt. Different Forms of Public Debt. Burden of Public Debt, Redemption of Public Debt. Debt Management.
Budgetary Policy*:*Functional and Economic Classification of budgets and their Uses. PerformanceBudgets. Budget as an Instrument of Mobilization and Chanalization of Resources and Redistribution of Income and Wealth.

UNIT-IV

Balance and Unbalanced Budgets.
Fiscal Federalism*:*Principles of Federal Finance.
Development Finance*:*Functional Finance vs. Development Finance.
Mobilisation of Financial Resources for Planned Developments.

Suggested Readings:

1. Buchanan J.M. : Public Finance in the Demostic Process (Collected works of James M Buchanan), Library Fund, USA.
2. Musgrave, R. A. (1959) : Theory of Public Finance, McGraw- Hill Publishers.
3. Musgrave R A. & Musgrave P B (5th edition) : Public Finance in Theory and Practice, Mc Hill Publishers
4. Taylor P.E (1949) : The Economics of Public Finance, Macmillan Publishers, New York.

SOCIOLOGY

SEMESTER V

Methods and Techniques of Social Research

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hrs.

Note :

1. For written paper the students will be required to attempt five questions in all. Question No. I will be compulsory and cover the entire syllabus. In addition, students will attempt **four** essay type questions, one from each of the four units.

2. Question No. I will be compulsory comprising of short answer questions. It will consist of 12 short answer type questions of 2 marks each, out of which the students are required to attempt 9 short answer type questions (9 × 2 =18 marks).

3. On an average, 15 hours are to be devoted to each unit.

4. Question Nos. II to IX will be long answer questions, two questions from each unit with internal choice, consisting of 18 marks each (4×18 = 72 marks).

Objective :

The students will be introduced with basic methods and techniques in social research. The objective of this course is to familiarize the students with the basic elements of scientific method, various methods of data collection and social measurement.

Course Content :

UNIT-I

Scientific Method : Features; Concepts; Stages of social research; Hypothesis.

UNIT-II

*Sampling Technique: Meaning P*opulation and Census, Sampling frame
Types of Sampling: Probability: Simple random/stratified random/cluster/multi-stage. Non–Probability: Accidental/Quota/Purposive; Sampling Error.

UNIT-III

Techniques of Data Collection : Observation, Participant and Non-Participant Observation, Interview Schedule and Questionnaire (Structured/Unstructured); Case study method.

UNIT-IV

Measurement : Levels and Problems, Measures of Central Tendency: Mean, Mode, Median.

Essential Readings :

1.	*Sellltiz, Claire et.al*	*:*	*Research Methods in Social Relations (Revised ed.), New York: Henry Hold & Co. (latest edition).*
2.	*Goode, W.J. & Hatt, P.K. (2006)*	*:*	*Methods in Social Research, Delhi, Surjeet Publications*
3.	*Young, P.V.*	*:*	*Scientific Social Surveys and Research, New Delhi: Prentice Hall of India Private Ltd., (1988)*
4.	*Mukerjee, P.N.*	*:*	*Methodology on Social Research: Dilemmas and Perspectives, New Delhi: Sage, 2000.*

Further Readings :

1.	*Festinger, L. & Katz, D.*	*:*	*Research Methods in Behavioural Science, New York: Dryden Press, (1953)*
2.	*Lindzey, Gardner & Aronson*	*:*	*The Handbook of Social Psychology (2nd ed.), Addison: Wesley Pub. Comp.,(1968)*
3.	*Robson, Colin*	*:*	*Real World Research, Oxford: Blackwell, (2000)*

SOCIOLOGY
SEMESTER VI

Option (i) Social Demography

OR

Option (ii) Social Deviance

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hrs.

Option (i) Social Demography

Note :

1. For written paper the students will be required to attempt five questions in all. Question No. I will be compulsory and cover the entire syllabus. In addition, students will attempt **four** essay type questions, one from each of the four units.

2. Question No. I will be compulsory comprising of short answer questions. It will consist of 12 short answer type questions of 2 marks each, out of which the students are required to attempt 9 short answer type questions ($9 \times 2 = 18$ marks).

3. On an average, 15 hours are to be devoted to each unit.

4. Question Nos. II to IX will be long answer questions, two questions from each unit with internal choice, consisting of 18 marks each ($4 \times 18 = 72$ marks).

Objective :

The course exposes students to various components of population growth, data sources and basic theoretical problems of population. Concepts of mortality and fertility are discussed in general and with reference to India in particular. Students are apprised of the latest Population Policy in India.

Course Content :

UNIT-I

Population : Definition, Scope, Nature, Sources of Population Data-Census and Vital Registration.

UNIT-II

Population Theories : Malthusian theory of Population; Biological: Theory of Density Principle and Diet Theory; Social Theories: Social Capillarity and Theory of Diffusion: Theory of Demographic Transition.

UNIT-III

Concepts of Mortality : Causes of Mortality, Infant Mortality, Mortality Rate in India.

Fertility : Concept of Fertility, Factors affecting Fertility–Biological, Socio-Cultural and Psychological Fertility in India.

UNIT-IV

Population Policy in India, Female Foeticide (reference to PNDT Act).

Essential Readings :

1.	*Bhende, Asha & Kanitkar, Tara,(2014)*	*:*	*Principles of Population (revised ed.), Mumbai Himalaya Publishing House.*
2.	*Bogue, Donald, J.*	*:*	*Principles of Demography, New York: John Willey,(1969)*
3.	*Nam, Charles, P.*	*:*	*Population and Society,(1968)*
4.	*Premi, M.K.*	*:*	*An Introduction to Social Demography, Delhi: Vikas Publishing House, (1983)*
5.	*Weeks, J.R.*	*:*	*Population: An Introduction to Concepts & Issues, London: Wardworth Publishing Co., (1988)*
6.	*Raj Hans(2010)*	*:*	*Fundamentals of Demography, Delhi, Surjeet Publications*

Further Readings :

1.	*Bose, Ashish*	*:*	*India & The Asian Perspective, New Delhi: B.R. Publishing Corporation, (1993)*
2.	*Matras, Juda*	*:*	*A Sociological Approach, New Jersey: Prentice Hall, (1977)*
3.	*Government of India*	*:*	*National Population Policy (2000), Ministry of Health & Family Welfare, GOI.*
			(Latest Census Reports and Sample Registration Bulletins of the Government of India.)
4.	*Premi, M.K.*	*:*	*India's Population: Heading towards a Billion, Delhi: B.R. Publications, (1991)*
5.	*Dyson Tim,(2011)*	*:*	*Population and Development, The Demographic Transition,Jaipur, Rawat Publications*

OR

Option (ii) Social Deviance

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hrs.

Note :

1. For written paper the students will be required to attempt five questions in all. Question No. I will be compulsory and cover the entire syllabus. In addition, students will attempt **four** essay type questions, one from each of the four units.
2. Question No. I will be compulsory comprising of short answer questions. It will consist of 12 short answer type questions of 2 marks each, out of which the students are required to attempt 9 short answer type questions ($9 \times 2 = 18$ marks).
3. On an average, 15 hours are to be devoted to each unit.
4. Question Nos. II to IX will be long answer questions, two questions from each unit with internal choice, consisting of 18 marks each ($4 \times 18 = 72$ marks).

Objective :

To understand the contemporary social problems in society, the students are exposed to the basic concept of deviance, its theoretical perspectives and control mechanisms.

Course Content:

UNIT-I

Deviance : Definition, Concept (Relative and Absolute) Distinction between deviant behaviour and deviant role. Pathological theories (Biological and Psychological).

UNIT-II

Sociological Theories : Theories of social disorganization (C.H. Cooley, W.F. Ogburn).

Structural-Functional Theories : Theory of Anomie (Emile Durkheim, Robert K. Merton), Differential Association (E. Sutherland and D.R. Cressey).

Interactionist Theories : Theory of Labelling (Edwin M. Lemert and Howard S. Becker).

UNIT-III

Controlling Deviance : Socialization - means and agencies, Social Control: means and agencies, Social codes and customs; Sympathy: passive and active.

UNIT-IV

Selected Problems of Deviance: Sex Deviance, Delinquency, White Collar Crimes, Cyber Crime.

Essential Readings :

1.	*Becker, Howard S.*	*:*	*Outsiders: Studies in the Sociology of Deviance, Glenco, Free Press, (1987)*
2.	*Ferrell, R. & V.L. Swigert [ed.]*	*:*	*Social Deviance, New York: J.B. Lippincott Co. (1975).*
3.	*Haralambos, M.*	*:*	*Sociology – Themes & Perspectives, Delhi, Oxford University Press,(1984)*
4.	*Kelly, Delos H.*	*:*	*Deviant Behaviour: Readings in Sociology of Deviance, New York: Martin's Press, (1979)*
5.	*Lawson, T & T. Heaton*	*:*	*Crime & Deviance, New Delhi : Macmillan, (1999)*
6.	*Metta, Spencer*	*:*	*Foundations of Modern Sociology, New Jersey: Prentice Hall Inc., Englewood Cliff, (1979)*
7.	*Michael Mc Kee and Ian Robertson*	*:*	*Social Problems, Toronto: Random House Inc., (1976)*
8.	*Thio, Alex*	*:*	*Deviant Behaviour, London : Houghton Mifflin, (1978)*
9.	*Ahuja, Ram,(2012)*	*:*	*Criminology, Jaipur Rawat Publications*
10.	*Ahuja, Ram,(2015)*	*:*	*Social Problems in India, Jaipur, Rawat Publications*

Further Readings :

1.	Erdwin. H. Pfuhl	:	*The Deviance Process,* New York: D.Van Nostrand Co., (1980)
2.	Ian Robertson	:	*Sociology,* New York: Publisher Inc. (1977)

PHILOSOPHY
B.A. (HONOURS) THIRD YEAR EXAMINATION, 2020-21
SEMESTER – V

Paper-A, Option (i) : PHILOSOPHY OF SCIENCE
OR
Paper-A, Option (ii) : SOCIAL AND POLITICAL PHILOSOPHY

Paper-A Option (i) : PHILOSOPHY OF SCIENCE

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

AIMS AND OBJECTIVES :

The aim of this paper is to analyse the concepts of philosophy and science, Einstein's Theory of Relativity i.e. space, time and relativity; Nature of observational language and theoretical language; causality, prediction and probability; Principle of Complimentarity.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.
There shall be 9 questions in all. First question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall *attempt one question* from each Unit – 4 in all, of 18 marks each.

Course Contents:

UNIT-I

- The Nature and Scope of Philosophy of Science. Relation between Philosophy and Science.
- Einstein's Theory of Relativity : Space, time, reality.
- Methodological character of theoretical concepts. Observational language, theoretical language, a criterion of significance of theoretical terms. Dispositional concepts, Difference between theoretical terms and pure dispositional terms.

UNIT-II

- Causality, Prediction and Probability.
- Principle of Causality.
- Causality as the existence of Laws.

UNIT-III

- Causal Law and Statistical Laws.
- Induction and Probability.
- Theories of Probability.

UNIT-IV

- Rationality Debate & Theory Choice.
- Popper & Kuhn

Essential Readings :

Bridgman, P.W.(1958), The Logic of Modern Physics, Macmillan : New York
Earnest Nagel (1979), Structure of Science : Hackett Pub. Co.
Hans Reichenbac (1994), Rise of Scientific Philosophy :California University Press

Suggested Readings :

Minnesota Studies in the Philosophy of Science, Minnesota Centre for Philosophy of Science, 1958.
Phillip Frank (1957), *Philosophy of Science: The Link between Science and Philosophy* (Englewood Cliff : Prentice Hall)

OR

Paper – A, Option (ii) : SOCIAL AND POLITICAL PHILOSOPHY

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

AIMS AND OBJECTIVES :

The paper aims at understanding the nature of social and political philosophy and some of its fundamental concepts; its major social and political theories and Indian political thought.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus has been divided into four units.
There shall be 9 questions in all. First question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall *attempt one question* from each Unit – 4 in all, of 18 marks each.

Course Contents:

UNIT-I

- Nature and Scope of Social and Political Philosophy :

- Relation between Social and Political Philosophy and Social Sciences such as Sociology and Political Science with special emphasis on the distinction between Philosophy and Science.
- Empirical and Scientific study of society and politics as distinct from philosophical study of society and politics.

UNIT-II

- Some Fundamental Concepts of Social and Political Philosophy :

- Distinction between Natural Facts and Social Facts.
- Normative Aspects of Socio-Political Reality.
- State and Civil Society.
- Liberty, Equality and Fraternity.
- Social Change and Social Progress.
- Tradition and Modernisation.
- Power and Authority.
- Reform and Revolution.
- Justice.

UNIT-III

- Major Social and Political Theories
- Liberalism.
- Egalitarianism.
- Anarchism.

UNIT-IV

- Indian Political Thought : Chanakya, Vivekananda, Gandhi, Ambedkar.

Essential Readings :

Ambedkar, B.R. (2003), *Writings and Speeches,* Government of Maharastra, Bombay., Vol. 18, 19 & 20

Bhattacharyya, K.C. (1983), Studies in Philosophy, Motilala (U.K.) Books of India, New Delhi

Gautam, S.P. (1991), *Samaj Darshan,* Haryana Sahitya Akademy, Chandigarh

Tagore (2002), *Religion of Man,* Rupa Publications, Paperback, New Delhi

Will Kymlica Kamal Nayan Chaubey (2010), Samkalin Rajniti – Darshan Ek Parichay, 2nd Ed. Pearson Delhi

Complete Works of Swami Vivekananda (relevant portions) Advaita Ashram, Calcutta, 1957.

Suggested Readings :

Menon, Nivedita (2013), Seeing like a Feminist, Zubaan: New Delhi

Miller, David (2003), Political Philosophy, A very short introduction, Oxford University Press, New York

---

PHILOSOPHY
B.A. (HONOURS) THIRD YEAR EXAMINATION, 2020-21
SEMESTER – VI

Paper -B, Option (i) : LOGIC

OR

Paper-B Option (ii) : PHILOSOPHY OF CULTURE

OR

Paper -B, Option (iii) : AESTHETICS

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

AIMS AND OBJECTIVES :

The paper aims at training the students in skills of critical reasoning by introducing laws of thought, criteria for validity of arguments, deductive and inductive reasoning.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.
There shall be 9 questions in all. First question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall *attempt one question* from each Unit – 4 in all, of 18 marks each.

Course Contents :

UNIT-I

- Nature and Scope of Logic.
- Deductive Inference.
- Laws of Thought.

UNIT-II

- Aristotelian Classification of Propositions.
- Immediate and Mediate Inference.
- Syllogism.

UNIT-III

- Truth Tables.
- Propositional Calculus.
- Quantifiers and Propositional Functions.
- Predicate Calculus.

UNIT-IV

- Inductive Logic.
- Probability.
- Scientific Method.
- Law and Explanation

Essential Readings :

Irving Copi (2004), I*ntroduction to Logic,* Prentice Hall

Irving Copi (1979), Nagel and *Symbolic Logic,* Prentice Hall

Cohen (2002), *Introduction to Logic and Scientific Method,* Simon Publications

Suggested Readings :

Russell (1970), Principles of Mathematics (Allen & Unwin London)

Jean Necod (1970), Foundations of Geometry and Induction (kegan Paul)

OR

Paper- B Option (ii) : PHILOSOPHY OF CULTURE

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

AIMS AND OBJECTIVES :

This paper aims to introduce the problems like origin and meaning of culture, civilization, tradition, the role of ideology and Utopia, Indian cultural tradition.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.
There shall be 9 questions in all. First question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall *attempt one question* from each Unit – 4 in all, of 18 marks each.

Course Contents :

UNIT – I

- Origin and meaning of Culture.
- Culture, Civilization and the Individual.

UNIT – II

- Religion as an Apex of Culture.
- Culture and Language.

UNIT – III

- Culture, Tradition and Modernity. The metaphysical loss of Human.
- Sources of Indian Culture Tradition.

UNIT – IV

- Role of Science and Technology in Cultural Evolution.
- Inter – Cultural understanding and Hermeneutic Tradition.

Essential Readings:

Eliot (1962), Notes towards definition of Culture, Faber & Faber, London

Gadamer (2005), Truth and method. Continum International

G.C. Pandey (1972), Meaning and Process of Culture. Shivlal Aggarwal & Co. Agra

Sneh Pandit Ed. (1980), Perspectives on Philosophy of Culture, Delhi, S. Chand

Vellassery Sebastian & Geeta Manaktala (2008), Foundations of Indian Social Life: Cultural, Religious and Aesthetics. Booksurge Publishing U.S.

Wittgenstein (1980), Culture and Value. translated by Peter Winch, Oxford Blackwell

Suggested Readings :

A.J. Toynbee (1948), Civilization on Trial, Oxford University Press

Paul Ricouer (1984), Time and Narrative published by University of Chicago Press, London

OR

Paper – B, Option (iii) : AESTHETICS

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

AIMS AND OBJECTIVES :

This paper aims at familiarizing the students with the meaning and scope of Aesthetics, art and society, aesthetic experience according to the Western and Indian tradition.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.
There shall be 9 questions in all. First question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall *attempt one question* from each Unit – 4 in all, of 18 marks each.

Course Contents :

UNIT-I

- Aesthetics, its meaning and scope.
- Nature and function of art.

UNIT-II

- The relation of art to society.

UNIT-III

- Meaning and purpose of art in the Indian Tradition.

UNIT-IV

- Nature of Aesthetic experience according to the Western and Indian traditions.

Essential Readings :

Hiriyanna (1954), Art Experience, Karyalaya Publications: Mysore

Susan, L. Feagin and Patrick Maynard (ed.) (1997), *Aesthetics,* Oxford University Press

Suggested Readings :

Meredith (220 &) The Critique of Judgement by Immanuel Kant Tr., J.C., Oxford University, Press

Morris Weitz (ed.) (1970), Problems of Aesthetics : An Introductory Book of Readings, Macmillan, New York

---

PSYCHOLOGY

B.A. (HONOURS) THIRD YEAR EXAMINATION, 2020-2021

SEMESTER V

PAPER: PSYCHOLOGICAL TESTING

Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

OBJECTIVES :

(I) Its aim is to introduce the students history, importance and classification of psychological testing and provide them with knowledge and procedure of test construction and standardization.

(II) Pedagogy of the Course Work :
80% Lectures (including expert lectures).
20% assignments, discussion and seminars and tests.

INSTRUCTIONS FOR PAPER-SETTER AND THE CANDIDATES :

There shall be 9 questions in all. Five questions are required to be attempted. The first question shall be Short Answer type containing 12 short questions spread over the whole syllabus and the students are required to attempt nine short answer type questions in about 25-30 words each. It shall carry 18 marks and shall be compulsory question. Rest of the paper shall contain 4 Units. Each Unit shall have two essay type questions and the candidates shall be given internal choice, i.e. the candidates shall attempt one question from each Unit – 4 in all of 18 marks each.

UNIT-I : *Introduction to Psychological Tests :*History of Psychological Testing; Nature of Psychological Tests. Classification of Tests; Use of Tests.

UNIT-II : *Item Writing and Item Analysis :*Characteristics of a Good Item; Various types of Items; Item Difficulty; Item Discrimination.

UNIT-III : *Reliability and Validity :Reliability :* Concept, Types, Factors Affecting Reliability. *Validity :* Concept, Types, Factors Affecting Validity; Relation between Reliability and Validity.

UNIT-IV : *Interpretation of Test Scores :Criterion Referenced Scores :* Content Referenced and Outcome Referenced Scores; Norms Referenced Scores; Concept of Norms, Types of Norms (Percentile Scale and T. Scale).

Note : The use of non-programmable calculators and statistical tables is allowed in the examination.

Books Recommended

Suggested Readings :

1. Anastasi, A. (1998) : *Psychological Testing,* New York : Macmillan.

2. Gregory, R.J. (1996) : *Psychological Testing,* Singapore : Allyn and Bacon.

3. Guilford, J.P. and Fruchter, B. (1981):*Fundamental Statistics in Psychology and Education,* Singapore: McGraw Hill.

4. Guilford, J.P. (1954) : *Psychometric Methods,* New Delhi : Tata McGraw Hill.

Reference Books :

1. Freeman, F.S. (1962) : *Theory and Practice of Psychological Testing,* New Delhi : Oxford and IBH.

2. Cronbach, L.J. (1990) : *Essentials of Psychological Testing,* New York : Harper and Row.

3. Brown, F.G. (1976) : *Principles of Educational and Psychological Testing,* New York : Holt, Rinehart and Winston.

PSYCHOLOGY

B.A. (HONOURS) THIRD YEAR EXAMINATION, 2020-2021

SEMESTER VI

PAPER: Counselling and Organizational Psychology

Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

OBJECTIVES :

(I) Its aim is to introduce the students history, importance and classification of psychological testing and provide them with knowledge and procedure of test construction and standardization.

(II) Pedagogy of the Course Work :
80% Lectures (including expert lectures).
20% assignments, discussion and seminars and tests.

INSTRUCTIONS FOR PAPER-SETTER AND THE CANDIDATES :

There shall be 9 questions in all. Five questions in all are required to be attempted. The first question shall be Short Answer type containing 12 short questions spread over the whole syllabus and the students are required to attempt nine short answer type questions in about 25-30 words each. It shall carry 18 marks, and shall be compulsory question. Rest of the paper shall contain 4 Units. Each unit shall have two essay type questions and the candidates shall be given internal choice, i.e. the candidates shall attempt one question from each Unit – 4 in all of 18 marks each.

UNIT-I : Concept of Counselling; Approaches to Counselling; Freudian, Experiential Client Centered, Gestalt, Existential, Cognitive Behaviour Therapy.

UNIT-II : Work Motivation: Early and Contemporary Theories.Strategies of Organizational Development.

UNIT-III : Concept and Nature of Health Protective Behaviour.Concept and types of Health Coronary Behaviour (Special reference to nicotine addiction and alcoholism).

UNIT-IV : Psychology of Exceptional Children with special reference to learning disabled and Gifted Children.

Books Recommended :

Suggested Readings :

GEOGRAPHY

B.A./B.Sc. (HONOURS) THIRD YEAR EXAMINATION, 2020

SEMESTER V

Paper III: APPLIED GEOGRAPHY

Max. Marks: 100
(Terminal Exam: 90 Marks)
(Internal Assessment: 10 Marks)

Time: 3 Hours

Objectives:
To understand the prevalent issues in environment, society and economy and to provide a geographical interpretation with special reference to India

Course Content:

Unit- I

Applied Geography: Meaning and concepts:

Meaning, nature and scope and significance of Applied Geography. Concept of planning region.

Regionalisation scheme with reference to economic regionalization. (25 lectures)

Unit- II

Applied Geography: Methods and technieques:

Cartographic techniqeues using point, line and area symbols. (10 lectures)

Unit- III

Applied Geography: Contributions:

Industrial location theory of Weber and its application in industrial planning.
Christaller's Central Place Theory and its application in location of central places.
Von Thunen's Agricultural Location Theory and its application in agricultural location.
Perroux's Growth Pole Theory and its application in regional development planning.

UNIT- IV

Land use studies: Rural and Urban.

Rural Land Use: Survey and Classification.

Urban Land Use : Survey and Classification.

Notes:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part will carry 2 marks (total 20 marks).
2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, 2 from each unit. The students will be required to attempt one question from each unit. These will be in addition to the compulsory question at serial number 1.
3. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.

Books Recommended

Essential Readings:

1.	Carter, H.	:	The Study of Urban Geography, Arnold-Heinemann, New Delhi, 1979.
2.	Chorley, R.J. & P. Haggett (Ed.)	:	Models in Geography, Methuen & Co., London, 1967.
3.	Jones, Alun	:	Fieldwork in Geography, Longman, Green Co., London, 1968.
4.	Stamp, L.D.	:	Applied Geography, Penguin Books, England, 1960.
5.	Singh, R.L. (Ed.)	:	Applied Geography, National Geographical Society of India, Department of Geography, B.H.U., Varanasi, India.

Further Readings:

1.	Dawson, J.A.	:	Geography, Teach Yourself Books, Hodder and Stoughton, UK 1983.
2.	Misra, R.P. and others	:	Regional Development Planning in India, Vikas, New Delhi.1974
3.	Misra, V.C. & others	:	Essays in Applied Geography, University of Sagar, India.1976

4. Sen Gupta, P. &Sadasyuk Galina : Economic Regionalization of India, Problems and Approaches, Registrar General Census of India.
5. Singh, Jasbir & Dhillon, S.S. : Agricultural Geography, Tata McGraw Hill, New Delhi, 1994.
6. World Report, World Bank & OUP (Annual Report)

Pedagogy:

- Exposure to media.
- National Five Year Plan documents and publications related to planning.
- Field work related to land –use and other socio-economic issues.

GEOGRAPHY

B.A./B.Sc. (HONOURS) THIRD YEAR EXAMINATION, 2021
Semester VI

Any one of the following options:

Option (i)	**:**	**AGRICULTURAL GEOGRAPHY (An Elementary Course)**
Option (ii)	**:**	**POLITICAL GEOGRAPHY (An Elementary Course)**
Option (iii)	**:**	**ENVIRONMENTAL GEOGRAPHY (An Elementary Course)**

Option (i) AGRICULTURAL GEOGRAPHY (An Elementary Course)

Max. Marks: 100
(Terminal Exam: 90 Marks)
(Internal Assessment: 10 Marks)
Time: 3 Hours

Objectives:

- To familiarise the students with the concepts and development of agriculture;
- To examine the role of agricultural determinants towards changing cropping patterns, intensity, productivity, diversification and specialisation. The course further aims to familiarise the students with the application of various theories, models and classification schemes of cropping patterns and productivity.
- Its objective is also to discuss environmental, technological and social issues in agricultural sector with special reference to India.

Course Content:

Unit- I

Nature, scope and significance of agricultural geography.

General landuse classification.

Physical determinants of agricultural landuse: Relief, climate, soils.

Unit- II

Social and cultural determinants of agricultural landuse, land tenure, size and fragmentation of holdings and labour.

Economic determinants of agricultural landuse: Marketing facilities, transport facilities, tariff and import restrictions, price incentives, credit.

Unit-III

A critical review of Whittlesey's agricultural classification.

Characteristics and world patterns of the following:

Subsistence types of agriculture: Nomadic herding, shifting cultivation, rudimentary sedentary tillage, intensive subsistence tillage, subsistence crop and livestock farming.

Unit- IV

Commercial types of agriculture: livestock ranching, commercial plantation farming, commercial grain farming, mixed farming, commercial dairy farming.

Notes:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part will carry 2 marks (total 20 marks).
2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, 2 from each UNIT. The students will be required to attempt one question from each UNIT. These will be in addition to the compulsory question at serial number 1.
3. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
4. For reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

Books Recommended:

Essential Readings:

1. Alexander, J.W.: *Economic Geography*, Prentice Hall, Englewood Cliffs, latest Edition.
2. Husain, M. : *Systematic Agricultural Geography*, Inter-India Publications, New Delhi, 2000.
3. Singh, J. & Dhillon, S.S. : *Agricultural Geography*, Tata McGraw Hill Publishing New Delhi, 1994.

Further Readings:

1. Morgan, W.B. & Munton, R.J.C. : *Agricultural Geography*, Methuen, London, 1971.
2. Symons, L. : *Agricultural Geography*, G. Bell & Sons, London, 1964.

Pedagogy:

The teacher should impress the students the overall importance of agriculture in the global perspective. The world is fast changing and its impact is felt on agriculture. Population is increasing and demand of agricultural products is also on the increase. Contrary to it, the farm lands are decreasing, that necessitates infusion of technology in agricultural sector. It is causing environmental pollution. The teacher should interact with students on said issues. Examples from neighbouring areas may be given to the students for better perceptions.

Option (ii): POLITICAL GEOGRAPHY (An Elementary Course)

Max. Marks: 100
(Terminal Exam: 90 Marks)
(Internal Assessment: 10 Marks)
Time: 3 Hours

Objectives:

- To familiarise the students with the geographical factors which have a bearing on the political/ administrative organisation of space.
- To enhance awareness among the students of multi-dimensional nature of geo-political space.

Course Content:

Unit- I

Nature and scope of political geography, phases in the development of political geography. Physical elements of political geography: Location, size and shape, relief, climate, and seas and oceans.

Unit- II

Economic elements of political geography: Basic natural resources; food and power, minerals, industry, trade and transportation.

Human-cultural elements of political geography: Ethnographic structure of nations, language, religion, population, quantity and quality.

Unit- III

Concepts of frontiers and boundaries: Classification of boundaries.

Global distribution of political power: Views of Mackinder, Mahan and Spykman and their contemporary relevance.

Unit- IV

International tension: Identification of tension areas and factors contributing to tensions in different areas with special examples from Middle East and Indian Ocean.

Political Geography of the Indian Ocean.

Notes:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part will carry 2 marks (total 20 marks).
2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, 2 from each unit. The students will be required to attempt one question from each unit. These will be in addition to the compulsory question at serial number 1.
3. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
4. For reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

Books Recommended:

Essential Readings:

1. De Blij, H.J. Glassner, M. : *Systematic Political Geography*, John Wiley, New York, 1968.
2. Dikshit, R.D. : *Political Geography*: A Contemporary Perspective, Tata McGraw Hill, New Delhi, 1996.

Further Readings:

1. Adhikari, Sudeepta : *Political Geography*, Rawat, Jaipur, 1997
2. Muir, R. : *Modern Political Geography*, Macmillan, London,1981.
3. Prescott, J.R.V. : *Political Geography*, Methuen, London, 1992.
4. Prescott, J.R.V. : *The Geography of Frontiers & Boundaries*, Aldine Pvt. Ltd., Chicago, 1965.
5. Valkenberg, S.V. New& Stotz, Carl, L. : *Elements of Political Geography*, Prentice Hall of India, Delhi, 1963.

Pedagogy:

- Fieldwork to understand the political/administrative boundary configuration and people's problems and their perceptions.
- Consult political maps (large scale, small scale).
- Atlases and archival records.
- Collect relevant newspaper items for group discussion.
- Prepare pin-up board for display of important events of geopolitical nature.

Option (iii): ENVIRONMENTAL GEOGRAPHY (An Elementary Course)

Max. Marks: 100
(Terminal Exam: 90 Marks)
(Internal Assessment: 10 Marks)
Time: 3 Hours

Objectives:

- To understand the significance of environment and its interrelationship with man.
- To understand the importance of soil and factors responsible for erosion.
- The importance of energy sources, forest and wildlife and their preservation to be studied.

Course Content:

Unit-I

Environment and Geography: Relationship between geography and environment; definition and scope of environmental geography; significance of environmental studies.

The Environment: Characteristics, components and functioning; concept of healthy environment.
(6 + 6 = 12 lectures)

Unit- II

The Soil System: Origin and composition; horizons, texture, chemistry, factors influencing soil types; soil erosion, soil conservation; and soil pollution.
Energy: Energy flow in the ecosystem; environmental impact of both conventional and non-conventional energy sources. (6 + 4 = 10 lectures)

Unit- III

Forests: Significance; world reserves; deforestation; and conservation strategies.

Wildlife: Wildlife and environment relationship, regional distribution; conservation of wildlife; and wildlife in India. (5 + 5 = 10 lectures)

Unit- IV

Population and Environment: Basic issues, environmental impact of population growth and agenda for action.

Global Environmental Issues: Water contamination; atmospheric pollution; acid rain; noise pollution; and control strategies.

Legislative strategies, environmental issues and the international community; Rio-de-Janeiro Earth Summit of 1992; selected environmental protection laws in India; Environmental Protection Act, National Environmental Tribunal Act, Wildlife Protection Act, Forest Conservation Act, Air Act, Water Act. (6 + 6 + 6 = 18 lectures)

Notes:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part will carry 2 marks (total 20 marks).
2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, 2 from each unit. The students will be required to attempt one question from each unit. These will be in addition to the compulsory question at serial number 1.
3. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
4. For reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

Books Recommended:

Essential Readings:

1. Adam, W.M. : *Green Development: Environment & Sustainability in the Third World*, Routledge, London, 1990.
2. Chandna, R.C. : *Environment Awareness*, Kalyani Publishers, New Delhi. Clarendon Press, Oxford, 1998. Also available in Hindi & Punjabi.
3. Chandna, R.C. : *Environmental Geography*, Kalyani Publishers, New Delhi, 2001.
4. Goudie, A.S. : *The Human Impact on Environment*, Blackwell, Oxford, 1993.

Further Readings:

1.	Ehrlich, Paul, R. et. al	:	*Ecoscience – Population, Resources and Environment*, Freeman and Co., San Francisco, 1977.
2.	Goudie, A.S.	:	*Environmental Change, Contemporary Problems in Geography*, Clarendon Press, Oxford, 1992.
3.	Pickering, K.T.	:	*An Introduction to Global Environmental Issues*, Routledge, London, 1994.
4.	Singh, Savinder Allahabad,	:	*Environmental Geography*, Paryag Pustak Bhawan, 1991.
5.	Strahler, A.N. & Strahler, L.A.	:	*Geography and Man's Environment*, John Wiley & Sons, New York.

Pedagogy:

- The interaction of teacher and students is must on issues related to environment, energy resources, forest and soil preservation.
- A field visit to those areas where soil erosion is a serious problem be arranged and methods of conservation be taught.

PUBLIC ADMINISTRATION
SEMESTER -V

Paper- III : RESEARCH METHODS AND STATISTICS

Max. Marks: 100
Theory: 90 Marks
Internal Assessment: 10 Marks
Time : 3 Hours

Objective of the Paper :

The objective of the paper is to give the student an in-depth understanding about the nature and scope of Social Research, Methods of Social Research, data collection and data processing. It would also acquaint the students with basics of sampling and statistical methods including measures of central tendency, dispersion, correlation and Chi-Squares Test.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES :

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

UNIT-I

Meaning, Nature and Scope of Social Research.
Concepts; Hypotheses : Meaning, Types and Significance.
Research Design - Meaning, Types and Components.
Methods of Social Research - Experimental–Survey and Case Study.

UNIT-II

Methods of Data Collection—Documents, Observation, Interview and Questionnaire.
Data Processing-Editing, Coding and Tabulation, The Use of Computer.
Report Writing.

UNIT-III

Sampling-Meaning, Types, Merits and Demerits.
Frequency Distribution – Meaning and Steps.
Measures of Central Tendency – Mean, Median and Mode.

UNIT-IV

Measures of Dispersion –Standard Deviation.
Correlation – Karl Pearson.
Chi-Square

Essential Readings :

Goode, W.J., & Hatt, P.K. (1990). *Methods in Social Research.* U.S.A. : McGraw Hill.
Gupta ,S.P. (1987) . *Statistical Methods.* New Delhi : Sultan Chand .
Moser, C.A. & Kalton. G. (1979).*Survey Methods in Social Investigations.* London : ELBS
Seltiz,C.et al. (1964) . *Research Methods in Social Relations* . New York : Rinehart & Winston.

Further Readings :

Bowley, A. (1947). *Elements of Statistics* (6th ed.) . New York : Staples.
Cohen, L. (1968) . *Statistical Method for Social Scientists* .New Delhi : Prentice Hall of India Private Ltd.
Ghosh., and Chowdhry. (2004). S*tatistics* (Rev. Enlarg. Ed.) Allahabad : Indian Press.

PUBLIC ADMINISTRATION
SEMESTER-VI

PAPER IV : The candidates have to select one out of the following four options :

Option (i) : Organisation Behaviour
Option (ii) : Cooperative Administration in India
Option (iii) : Public Enterprise Management (with special reference to India)
Option (iv) : Environment Administration in India
Option (v) : Emerging Issues in Public Administration

Paper- IV : OPTION (i) : ORGANISATION BEHAVIOUR

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objective of the Paper :
The objective of the paper is to give the student an in-depth insight into the various aspects and factors affecting individual, interpersonal and group behaviors in organisations. The key areas include study of human behavior and concepts like Attitudes, Morale, Leadership, Motivation and Organizational Change.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES :

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

UNIT-I

Organisation Behaviour : Concept and significance
Individual Behaviour : Concept; Nature; Individual Factors
Interpersonal Relations : Meaning; Dimensions; Factors

UNIT-II

Team Development : Importance; Types of Teams
Attitudes : Concept, Types
Morale : Concept; Significance; Building up High Morale

UNIT-III

Groups : Concept; Types
Leadership : Styles of Leadership
Motivation : Concept; Determinants

UNIT-IV

Organisational Change : Concept; Resistance to change
Organisational Development : Concept; Need; Techniques
Organisational Effectiveness : Concept; Approaches

Essential Readings :

Davis, K. (2001).*Organizational Behaviour* . NewYork: McGraw Hill.
Dubin, R. (1968). *Human Relations in Administration(*3rd ed.)*,* New Delhi: Prentice Hall.
Gupta, S. & Joshi, R. (2007).*Organizational Behaviour* . New Delhi: Kalyani Publishers.
Kolasa, B.J. (1969). *Introduction to Behavioural Sciences for Business.* New York: Wiley.
Prasad , L.M.(2000). *Organisational Behaviour*(3rd ed.).New Delhi: Sultan Chand
Sharma, K.K. & Sahni, P. (1988).*Organisational Behaviour* . New Delhi: Deep & Deep.

Paper- IV: OPTION (ii) : CO-OPERATIVE ADMINISTRATION IN INDIA

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objective of the Paper :

The objective of the paper is to acquaint the students with the evolution of cooperatives in India and its Principles. It will also deal with Legislation on Cooperatives, Registration, structure and Administration at the Union and State level. Further the students will gain an understanding of the forms and Role of Cooperatives, their managerial & personnel aspects.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES :

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

UNIT-I

Co-operation : Meaning, Significance and Evolution
Co-operative Principles
Co-operative Legislation : Government of India Act, 1912 and Punjab Co-operative Societies Act, 1961(as amended from time to time)

UNIT-II

Registration of a Co-operative Society
General Body, Board of Directors and Committees
Chief-Executive : Appointment, Functions and Role
Co-operative Administration at Union Level – Organisation and Functions

UNIT-III

Co-operative Department at State Level – Organisation and Functions
Registrar Co-operative Societies : Appointment and Role
Forms of Co-operatives : Role of Apex Federations and Primary Co-operatives
Co-operative Education

UNIT-IV

Human Resource Management : Recruitment and Training
Financial Management

I.L.O.(n.d.).*Cooperative Management and Administration* .Geneva: I.L.O.
Puri, S.S.(1979). *Ends and Means of Cooperative Development* . Delhi: NCUI

Paper-IV: OPTION (iii): PUBLIC ENTERPRISE MANAGEMENT (WITH SPECIAL REFERENCE TO INDIA)

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time :		3Hours

Objective of the Paper :

The objective of the paper is to give the student a detailed understanding of the concept, evolution, types, role and problems of public enterprises in India. It would also give an insight into legislative and government control over public enterprises, performance and reforms of the public enterprises and the concept of privatization.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

UNIT-I

Public Enterprise : Meaning and Evolution
Public Enterprises in India : Rationale and Role
Administrative and Managerial Problems of Public Enterprises

UNIT-II

Organisational Patterns: Departmental Undertakings, Public Corporation and Government Company
Board of Directors: Rationale, Constitution, Types and Functions

UNIT-III

Legislative Control over Public Enterprises
Government Control over Public Enterprises
Performance of Public Enterprises

UNIT-IV

Public Enterprise Reforms since 1991
Memorandum of Understanding
Privatization : Meaning, Rationale, Achievements and Failures

Essential Readings :

Paper-IV: OPTION (iv): ENVIRONMENT ADMINISTRATION IN INDIA

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objective of the Paper :

The objective of the paper is to give the student an in-depth understanding of the concept and components of environment, environment administration and sustainable development. In addition, the students would be made aware of environment problems, threats and impact of development on environment. The student will also gain knowledge regarding the machinery for environment protection at the Union and State levels, Environmental Policy, priorities, global issues and role of NGOs in environment conservation would be dealt with.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

UNIT-I

Environment – Concept and Components
Environment Administration – Meaning, Nature and Scope
Sustainable Development – Concept, Issues and Strategy

UNIT-II

Environment Problems and Threats–Air, Water, Land, Human Settlements and Forests
Impact of Development, Urbanization and Industry on Environment
Organisation and Machinery of the Government at the Union Level for Environment Protection
Organisation and Machinery of the Government at the State Level for Environment Protection

UNIT-III

Pollution Control Boards–Organisation, Functions and Role

Environmental Policy with special reference to Water, Air and Forest; Constitutional Provisions; Legislative Measures

Environmental Priorities in India—Population Stabilisation; Forest Cover; Deforestation; Wildlife Protection; Recycling of Wastes

UNIT-IV

Environment and Global Issues— Conventions; Depletion of Ozone Layer; Global Warming

Environment Education, Awareness and Ethics; Role of NGOs in Environment Protection and Conservation

PAPER- IV: OPTION (V): Emerging Issues in Public Administration

Max. Marks:	100
Theory:	90 Marks
Internal assessment:	10 Marks
Time:	3 Hours

Objective of the Paper:

The purpose of this course is to familiarize the students with the emerging issues in Indian Administration. At the end of the course the students will have an understanding of the concepts of disaster management, human rights, regulatory administration in India, consumer protection, right to information, new areas of governance in India.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Unit I

Good governance – Concept and significance
E- governance – Concept and significance
Regulatory Administration - Concept and significance

Unit II

Transparency and Accountability in Administration – Significance
Mechanism – Social Audit, Results Framework Document (RFD)
Ethics and Integrity in Administration

Unit III

Human Rights - Concept and significance
Women Empowerment with special reference to National Mission for Empowerment of Women (NMEW)
Youth Empowerment with special reference to Pradhan Mantri Kaushal Vikas Yojana (PMKVY)

Unit IV

Sustainable Development - Concept and significance
Environment Administration - Concept and significance
Disaster Management - Concept and significance

ANCIENT INDIAN HISTORY, CULTURE & ARCHAEOLOGY

SEMESTER – V

Note : The students shall have to opt for one paper for Semester - V examination out of the following two papers :

Outlines of Test :

Paper V : Archaeology

Paper VI : Spread of Indian Culture In Central Asia, China And Tibet

Paper-V: ARCHAEOLOGY

Total Marks	**: 100**
Theory	**: 90**
Internal assessment	**: 10**
Time	**: 3 Hours**

Objectives :

This course is a survey of the pre and pro to historic background to Indian history from the earliest times to the early historical period. Excavated sites are studied for an insight into the growth and development of early Indian culture.

Pedagogy of the CourseWork:

The students are made familiar with prehistoric, proto historic and historical sites. Slides, photographs of relevant sites, their significance in establishing chronologies is discussed in the class. Visits to museums is an important aspect through which students are made familiar with the material evidence.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES:

The syllabus has been divided into four units.

There shall be **9** questions in all. All questions carry equal marks. The first question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all.

UNIT-I:

The Palaeolithic, Mesolithic and Neolithic cultural sequences in various parts of the Indian subcontinent.

UNIT-II:

(a) The background and the phenomenon of the Harappan civilization.
(b) The Chalcolithic cultures of western and southern India

UNIT-III:
The beginning of iron technology and the Painted Grey Ware Culture.

UNIT-IV :
Excavations of early historic cities of :
(a) Northern India and Gangetic doab : Taxila and Hastinapura.
(b) Eastern India : Sisupalgarh and Chandraketugarh.
(c) Southern India : Arikamedu and Brahmagiri.

Essential Readings :

1. Agrawal, D.P. : The Archaeology of India, Select Book Service Syndicate, New Delhi, 1984.
2. Allchin, B. and F.R. : The Rise of Civilization in India and Pakistan, Cambridge University Press, New Delhi, 1989.
3. Fagan, Brian M. : People of the Earth : An Introduction to Longman, Singapore, 2004.
4. Possehl, G. : Ancient Cities of the Indus, Vikas Publishers, New Delhi, 1979.
5. Ratnagar, S. : Understanding Harappa, Tulika, New Delhi, 2001.

Suggested Readings :

1. Roy, T.N. : The Ganges Civilization a critical archaeological study of the painted grey ware and northern black polished ware periods of the ganga plains of India, Ramanand Vidya Bhawan, New Delhi, 1983.
2. Tripathi, V. : The Painted Grey Ware An Iron Age Culture of Northern India Concept, Publisher Corporation, Delhi, 1976.

Paper VI: SPREAD OF INDIAN CULTURE IN CENTRAL ASIA, CHINA AND TIBET

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objective :

1. The primary aim of this paper is to make the students study the spread of Indian culture and ideas in Central Asia, China and Tibet, generally termed in history as 'Greater India'. This forms an important phase of India's contribution to the world culture.

2. **Pedagogy of the Course Work :**
It is expected to acquaint the students with the background of Indian culture's spread and the factors responsible for it. While outlining the spread of Indian culture and religion, the spread of art, architecture and literature should also be taken care of. Visual aids wherever required should be used to familiarize students with Indian art and its influence in these countries.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

The syllabus has been divided into four units.

There shall be **9** questions in all. All questions carry equal marks. The first question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all.

UNIT-I:

Spread of Indian Culture in the Central Asian States.

UNIT-II:

Introduction of Buddhism in China and the early contacts.

UNIT-III:

Chinese pilgrims in India – Fahien, Hiuen Tsang and I-Tsing.

UNIT-IV:

(a) Spread of Buddhism in Tibet up to 12th century A.D. with special reference to the missions of Padma Sambhava.
(b) Lamaism.

Essential Readings :

1. Bagchi, P.C. : *India and Central Asia,* National Council of Education Bengal, Calcutta, 1984.
2. Bapat, P.V. : *2500 Years of Buddhism,* South Asian Books, New Delhi, 1977.
3. Dougles, R : *China (The Story of the Nation),* Hesperidis, London, 1900, 2006.
4. Elliot, C. : *Hinduism and Buddhism,* Vols. II and III, Routledge, London, 1962.
5. Puri, B.N. : *Buddhism in Central Asia,* Motilal Banarsidass, Delhi, 1987.

Suggested Readings :

1. Upasak, C.S. : *History of Buddhism in Afghanistan,* Central Institute of Higher Tibetan Studies, Varanasi, 1990.
2. Waddell, A.L. : *Buddhism and Lamaism of Tibet* rpt., Vimar Publishing House, London, 1979.

ANCIENT INDIAN HISTORY, CULTURE & ARCHAEOLOGY

SEMESTER – VI

Note : The students shall have to opt for one paper for Semester - VI examination out of the following two papers :

Outlines of Test :

Paper VII : Epigraphy and Numismatics

Paper VIII : Spread of Indian Culture in South-East Asia upto 12th Century A.D.

Paper-VII : EPIGRAPHY AND NUMISMATICS

Total Marks	:	100
Theory	:	90
Internal Assessment	:	10
Time	:	3 Hours

Objectives :

The paper is aimed to prepare students to handle the original source material – inscriptions and coins, which make the backbone of Ancient Indian History, as without the knowledge of epigraphy and numismatics, the subject cannot be mastered.

Pedagogy of the CourseWork:

Students should be familiarized with the each topic in detail.Visual aids like the photographs/slides of the coins and inscriptions shall be used regularly. The decipherment of Asokan inscriptions shall be taught with the help of plates and paleographic charts to the students.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

The syllabus has been divided into four units.

There shall be **9** questions in all. All questions carry equal marks. The first question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all.

UNIT-I:

(a) Origin and antiquity of writing in India with special reference to the origin of Brahmi script.

(b) Origin and antiquity of coinage in India.

UNIT-I

(a) Ashokan inscriptions – Pillar Edicts I to IV; Girnar Rock Edicts I, II and XIII. (Both for study and decipherment).

(b) Besnagar Pillar inscription of Heliodorus; Nasik Cave Inscription of Queen Balasri; Sarnath Buddha Image inscription of Kanishka's year 3; Junagarh Rock inscription of Rudradaman I, Saka year 72. (Study only). Gupta inscriptions—Allahabad Pillar inscription of Samudragupta, Mehrauli Iron Pillar inscription of Chandra, Bhitari Stone Pillar inscription of Skandagupta (Study only).

(c) Post-Gupta inscriptions : Mandasor Stone inscription of Malava Samvat 589, Banskhera Copper-plate of Harshavardhana, Pehowa inscription of Bhojadeva (Study only).

UNIT-III:

(a) Coins as source of ancient Indian history.

(b) Study of Punch marked coins.

UNIT-IV:

(a) Coins of the Kushanas.

(b) Coins of the Guptas.

Essential Readings :

1. Allan, John : *Catalogue of the Coins of Ancient India,* Trustees of the British Museum, London, 1967
2. Altekar, A.S. : *Coinage of the Gupta Empire,* Numismatic Society of India, Varanasi, 1957.
3. Buhler, G., : *Indian Paleography,* Munshiram Manoharlal, New Delhi, 2004
4. Dani, A.H., : *Indian Paleography*, Munshiram Manoharlal, New Delhi, 1997

Suggested Readings :

1. Gupta, P.L. : *Coins,* rpt. National Book Trust India, .New Delhi, 2006.
2. Hultzsh, E. : *Corpus Inscriptionum Indicarum,* Vol. I, rpt., Archaeological Survey of India, Delhi, 1991.

Paper-VIII : SPREAD OF INDIAN CULTURE IN SOUTH-EAST ASIA UPTO 12TH CENTURY A.D.

Total Marks :	100
Theory :	90
Internal Assessment:	10
Time :	3 Hours

Objectives:

This course enlightens the students about the spread of Indian culture in Burma, Indonesia, Combodia and Champa. In order to teach the students about the elements of Indian Culture, which made its impact felt in those countries, it is, therefore, necessary to discuss the political history, art, architecture and religion of those regions.

Pedagogy of the CourseWork:

The students are taught with the help of slides, photographs and maps. In addition to it, lectures, workshops, seminars, written assignments, class discussions and term papers are essential component of this course.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

The syllabus has been divided into four units.

There shall be **9** questions in all. All questions carry equal marks. The first question shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions. It shall carry 18 marks i.e. 2 marks of each and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all.

UNIT-I:

(a) Beginning of Indianisation in Burma.

(b) Art and Religion of Burma.

UNIT-II:

(a) Beginning of Indianisation in Indonesia.

(b) Study of Indo-Javanese Art.

UNIT-III:

(a) Beginning of Indianisation in Cambodia.

(b) Art of Cambodia.

UNIT-IV:

(a) Beginning of Indianisation in Champa.

(b) Study of Art and Archaeological remains of Champa.

Essential Readings :

1. Chatterji, B.R. : *Indian Cultural Influence in Cambodia,* University of Calcutta, Calcutta, 1933.
2. Coedes, C. : *The Making of South East Asia,* University of California Press, London, 1966
3. Coomaraswamy, A.K. : *History of Indian and Indonesian Art,* Kessinger Publishing, New Delhi, 1972.
4. Harrison, Brian, : *South East Asia, A Short History,* Macmillan Press, New York, 1966 .
5. Majumdar, R.C. : *Hindu Colonies in the Far East,* K.L. Mukhopadhaya, Calcutta, 1944.

Suggested Readings :

1. Majumdar, R.C. : *Suvarnadvipa, Ancient Indian Colonies in the Far East,* Modern Publication Syndicate, 1937.
2. Majumdar, R.C. : *Kambuja-Desa, or An Ancient Hindu Colony in Cambodia,* Lighting Source Incorporated, Madras, 1944.
3. Singhal, D.P. : *India and World Civilization,* Vols. I & II, Michigan State University Press, Calcutta, 1972.

****

POLICE ADMINISTRATION

SEMESTER V

Semester V: Police Procedures and Investigation-I

(A) Course Objectives:

The course has been designed to impart students knowledge about the procedures followed and investigation done by the police after the incidence of crime. The students will be taught about the crime scene, its importance, inspection of crime scene and its preservation along with the investigation officer and his/ her role. Further the students would be made aware about investigation, interrogation and interview techniques with a focus on witnesses, women and juvenile offenders.

(B) Pedagogy of the Course Work:

90 per cent of the Course Content would be delivered through Lecture Method and rest 10 per cent would comprise of :

i. Internal Test-5%;
ii. Academic activities (Seminar, Project, Assignment)-3%;
iii. Attendance-2%

(C) Instructions for Paper Setters and Candidates:

- The maximum marks for the paper will be 100. The question paper will be of 90 marks and internal assessment of 10 marks.
- Time allowed will be 3 hours.
- There shall be 9 questions in all.
- The first question shall be compulsory and be short answer type containing 12 short questions spread over the whole syllabus and to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions carrying 2 marks (9x2 = 18 marks).
- Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall have two questions and the candidates shall attempt one question from each unit i.e. four questions in all. Each question will carry 18 marks (4x18 = 72 marks)

(D) Course Content:

Unit-I

Investigating Officer: Power of observation and its importance in Investigation; and Qualities of investigating officer.

Unit-II

Crime Scene: importance of crime scene; inspection of crime scene; and preservation of crime scene.

Unit-III

Investigation; interrogation; and interviews.

Unit-IV

Examination of witnesses; interrogation of women accused; and interrogation of juvenile offenders.

Essential Readings:

1. Adams, Thomas F. : Police Field Operations, Prentice Hall, New Jersey, 1998.
2. Petraco, Nicholas & Sherman, Hal : Illustrated Guide to Crime Scene Investigation, C.R.C. Press, Taylor & Francis Group Boca Raton, London, 2006.
3. Williams, J.E. Hall : The Role of the Prosecutor, Avebury, Gower Publishing Company, Ltd., England, 1988.
4. Carter, Robert E. : Arson Investigation, Glencoe Publishing Co., California, 978.
5. International Association: Criminal Investigation: Basic Procedures, Bureau of of Chiefs of Police Operations and Research, Maryland, USA 1975.
6. Fuqua, Paul & Wilson, Jerry V. : Security Investigator's Handbook, Gulf Publishing Company, London, 1979.
7. Vadackumchery, James : Professional Police Witness Interviewing, A.P.H. Publishing Corporation, New Delhi, 1999.

Further Readings

1. Singh, S.P. : Combating Bio- terrorism with Special Reference to Anthrax Bacteria, Reliance Publishing House, New Delhi, 2002.
2. Dutta, K.K. : Some Aspects of Criminal Law, A.P.H. Publishing Corporation, New Delhi, 1998.
3. Ghosh, S.K. and Rustamji, K.F. : Encyclopaedia of Police in India, Volume III Ashish Publishing House, New Delhi, 1997.
4. Vadackumchery, James : Indian Police and Miscarriage of Justice, A.P.H. Publishing Corporation, New Delhi, 1997.
5. Vadackumchery, James : Police, the Court and Injustice, A.P.H. Publishing Corporation, New Delhi,1997.
6. Sharma, R : Human Rights and Bail, A.P.H. Publishing Corporation, New Delhi, 2002.

****

POLICE ADMINISTRATION

SEMESTER VI

Semester VI: Police Procedures and Investigation-II

(A) Course Objectives:

The objective of this course is to introduce to the students about the use of scientific techniques in the field of investigation. After providing knowledge in death, types of death and bodily changes after death, the students would be imparted information on how to preserve finger prints, footprints, knowledge about handling of physical evidences, along with their packing and forwarding. In addition knowledge about the modern tools of investigation would also be provided.

(B) Pedagogy of the Course Work:

90 per cent of the Course Content would be delivered through Lecture Method and rest 10 per cent would comprise of :

i. Internal Test-5%;
ii. Academic activities (Seminar, Project, Assignment)-3%;
iii. Attendance-2%

(C) Instructions for Paper Setters and Candidates:

- The maximum marks for the paper will be 100. The question paper will be of 90 marks and internal assessment of 10 marks.
- Time allowed will be 3 hours.
- There shall be 9 questions in all.
- The first question shall be compulsory and be short answer type containing 12 short questions spread over the whole syllabus and to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions carrying 2 marks (9x2 = 18 marks).
- Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall have two questions and the candidates shall attempt one question from each unit i.e. four questions in all. Each question will carry 18 marks (4x18 = 72 marks).

(D) Course Content:

Unit-I

Death; Types of death- death due to suffocation hanging, drowning, accident, suicide and murder. Bodily changes after death.

Unit-II

Preservation of finger prints, footprints, and blood at the scene of crime.

Unit-III

Physical evidence, handling packing and forwarding of physical evidence, and types of opinion to be obtained from physical evidence.

Unit-IV

Photography and its importance in police work; Polygraph; Brain mapping; and Narco Analysis.

Essential Readings:

1. Adams, Thomas F. : Police Field Operations, Prentice Hall, New Jersey, 1998.
2. Petraco, Nicholas & Sherman, Hal : Illustrated Guide to Crime Scene Investigation, C.R.C. Press, Taylor & Francis Group Boca Raton, London, 2006.
3. Williams, J.E. Hall : The Role of the Prosecutor, Avebury, Gower Publishing Company, Ltd., England, 1988.
4. Carter, Robert E. : Arson Investigation, Glencoe Publishing Co., California, 1978.
5. International Association : Criminal Investigation: Basic Procedures, Bureau of of Chiefs of Police Operations and Research, Maryland, USA, 1975.
6. Fuqua, Paul & Wilson, Jerry V. : Security Investigator's Handbook, Gulf Publishing Company, London, 1979.
7. Vadackumchery, James : Professional Police Witness Interviewing, P.H. Publishing Corporation, New Delhi,1999.

Further Readings

1.	Singh, S.P.	:	Combating Bio- terrorism with SpeciaL Reference to Anthrax Bacteria, Reliance Publishing House, New Delhi, 2002.
2.	Dutta, K.K.	:	Some Aspects of Criminal Law, A.P.H. Publishing Corporation, New Delhi, 1998.
3.	Ghosh, S.K. and Rustamji, K.F.	:	Encyclopaedia of Police in India, Volume III Ashish Publishing House, New Delhi, 1997.
4.	Vadackumchery, James	:	Indian Police and Miscarriage of Justice, A.P.H. Publishing Corporation, New Delhi, 1997.
5.	Vadackumchery, James	:	Police, the Court and Injustice, A.P.H. Publishing Corporation, New Delhi, 1997.
6.	Sharma, R	:	Human Rights and Bail, A.P.H. Publishing Corporation, New Delhi, 2002.

MUSIC (VOCAL AND INSTRUMENTAL)
SEMESTER-V

General Instructions:-

1. In case of the private candidates, there will be no internal assessment and the marks obtained in the external assessment of the practical examination shall be proportionately increased.
2. Harmonium will not be allowed as accompaniment in vocal music, but harmonium can be used while singing Alankars.
3. While sending the syllabus to paper-setter in theory, the syllabus prescribed for the practical paper also to be sent.
4. There will be ten questions in five units. The candidates will be required to attempt any five questions selecting at least one from each unit.
5. Separate Practical paper shall be set for each session from the syllabus prescribed for Practical Paper- B.
6. There should not be more than eight students in a batch for practical examination.
7. There would be upto ten students in one section in practical class.

Paper:-(Theory)

Total Marks	: 50
Theory	: 45 Marks
Internal Assessment	: 05Marks
Time	: 3 Hours

Note: There will be 10 questions in all and a student will attempt five questions choosing at least one from each unit.

UNIT-I

1. Definition with full explanation of the following :-

   Sthai, Antra, Khataka, Badhat, Jod-Alap, Lag Daat, Jugalbandi, Layakaries (Adi, Kaudi, Biadi)

2. Establishment of Swaras.

UNIT–II

1. Definition of Aesthetics in context of Indian Music
2. Rasa Sidhanta of Bharat

UNIT–III

1. Essay- Sangeet Sammelan
2. Knowledge of good qualities of a music performer (Vocalist or an Instrumentalist)
3. Elementary Knowledge of Harmonium,Tabla,Sitar

UNIT-IV

1. Description of Detailed & Non-detailed Ragas:-

   1. Detailed Raga :-
      `i) Marwa (ii) Purvi

   2. Non-detailed Raga: -
      (i) Sohni (ii) Purch

   3. Talas:- Tivra, Sultal

UNIT-V

The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions carrying 01 marks each.

Paper B: Practical (Choice & Viva) **:** 45 Marks

Internal Assessment : 05 Marks
Time : 45 Minutes

(a)	Choice (Solo performance)	:	22.5 Marks
(b)	Practical Test	:	22.5 Marks
	(i) Tuning	:	5 Marks
	(ii) Capacity to play Talas on Tabla	:	2.5 Marks
	(iii) Capacity to play Harmonium	:	2.5 Marks
	(iv) Viva	:	12.5 Marks

Part-A: (CHOICE OF THE CANDIDATE)

(a) A candidate has to demonstrate in the Raga of his/her choice from the prescribed ragas with detailed elaborations:

(i)	A Vilambit Khayal	:	7.5 marks
(ii)	A Drut Khayal	:	5 marks

OR

(i)	A Vilambit Gat	:	7.5 marks
(ii)	A Drut Gat	:	5 marks

(b) One Dhamar 2.5 marks

(c) Lokgeet, Lokdhun 2.5 marks

Part-B: (VIVA)

(a) List of Detailed Ragas:
(i) Marwa
(ii) P u r v i

(b) Non-detailed Ragas, description with Aroh, Avroh and pakad in the following Ragas:
(i) Sohni
(ii) Pardi

(c) Talas : Tivara, Sultal on Tabla.

(i) One slow khayal with extempore Alaps and Tanas in any of the detailed Ragas.

OR

One slow Gat with extempore Alaps and Toras in any of the detailed Ragas.

(ii) Two fast khayals or two fast gats with elaboration in each of the prescribed Ragas. 2.5 marks

(iii) Ability to recite Tivra, Jhoomra, and Punjabi talas in single .

(iv) Tuning of your instrument. 2.5 marks

(v) Capacity to play on Tabla the Talas prescribed in the course. 2.5 marks

(vi) Capacity to play on the Harmonium any raga from the choice. 2.5 marks

Books Recommended:

1.	Sangeetanjali	:	Pt. Onkar Nath Thakur
2.	Abhinav Geetanjali	:	Pt. Ramashray Jha
3.	Saras Sangeet	:	Pradeep Kumar Dixit
4.	Aakashvani Evam Hindustani Shastriya Sangeet	:	Dr. Suchismita
5.	Sangeet Visharad	:	Basant
6.	Raag Parichay	:	Harish Chandra Srivastav
7.	Sangeet swarit	:	Dr. Ramanand Dwivedi
8.	Sangeet Prabodhika	:	Dr. Parmanand Bansal Dr. Gyan Chand

MUSIC (VOCAL AND INSTRUMENTAL)

SEMESTER-VI

General Instructions:-

1. In case of the private candidates, there will be no internal assessment and the marks obtained in the external assessment of the practical examination shall be proportionately increased.
2. Harmonium will not be allowed as accompaniment in vocal music, but harmonium can be used while singing Alankars.
3. While sending the syllabus to paper-setter in theory, the syllabus prescribed for the practical paper also to be sent.
4. There will be ten questions in five units. The candidates will be required to attempt any five questions selecting at least one from each unit.
5. Separate Practical paper shall be set for each session from the syllabus prescribed for Practical Paper- B.
6. There should not be more than eight students in a batch for practical examination.
7. There would be upto ten students in one section in practical class.

Paper-:-Theory

Total Marks	: 50
Theory	: 45 Marks
Internal Assessment	: 05Marks
Time	: 3 Hours

UNIT – I

1. Definition with full explanation of the following :-
   Kalavant,Vaggeykar, Swarsthan Niyam

UNIT-II

1. Essays:- i Role of Music in National Integration
   ii Lok Sangeet
   iii Music Appreciation

UNIT-III

1. Impact of Western Music on Indian Music
2. Study of Western Instruments:- Guitar, Keyboard, Octopad
3. Study of Dakshini Music System of the following:-
   i Swara
   ii Raga
   iii Tala

UNIT-IV

1. Description of Detailed & Non-detailed Ragas: -

   1. Detailed Raga: - (i) Patdeep
      (ii) Megh Malhar
   2. Non-detailed Ragas: - (i) Bhimpalasi
      (ii) Madhmad Sarang
   3. Talas:- Tilwada, Adachautal

UNIT-V

The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.

Paper B: Practical (Choice & Viva) 45 Marks

Internal Assessment : 05 Marks
Time : 45 Minutes

(a)	Choice (Solo performance)	:	22.5 Marks
(b)	Practical Test	:	22.5 Marks
	(i) Tuning	:	5 Marks
	(ii) Capacity to play Talas on Tabla	:	2.5 Marks
	(iii) Capacity to play Harmonium	:	2.5 Marks
	(iv) Viva	:	12.5 Marks

Part-A: (CHOICE OF THE CANDIDATE)

(a) A candidate has to demonstrate in the Raga of his/her choice from the prescribed ragas with detailed elaborations:

(i)	A Vilambit Khayal	:	7.5 marks
(ii)	A Drut Khayal	:	5 marks

OR

(i)	A Vilambit Gat	:	7.5 marks
(ii)	A Drut Gat	:	5 marks

(b) Tarana or one Fast Gat in Ektal 2.5 marks

(c) Any one of the following:- 2.5 marks
Bhav-Geet, Bhajan, Shabad or Dhun

(a) Ability to write notation of the Vilambit and Drut Gat of Ragas prescribed in the course:-
Patdeep, Megh Malhar

Part-B: (VIVA)

(a) List of Detailed Ragas:
(i) Patdeep
(ii) Megh Malhar

(b) Non-detailed Ragas, description with Aroh, Avroh and pakad in the following Ragas:
(i) Bhimpalasi
(ii) Bahar

(c) Talas : Tilwada, Adachartala on Tabla.

(i) One slow khayal with extempore Alaps and Tanas in any of the detailed Ragas. 7.5 marks

OR

One slow Gat with extempore Alaps and Toras in any of the detailed Ragas.

(d) Geet Ghazal

(ii) Two fast khayals or two fast gats with elaboration in each of the prescribed Ragas. 2.5 marks

(iii) Tuning of your instrument. 2.5 marks

(v) Capacity to play on Tabla the Talas prescribed in the course. 2.5 marks

(vi) Capacity to play on the Harmonium any raga from the choice. 2.5 marks

Books Recommended:

1. Bhatkhande Sangeet Shastra	:	Pt. Bhatkhande
2. Abhinav Geetanjali	:	Pt. Ramashray Jth
3. Sangeetanjali	:	Pt. Onkar Nath Thakur
4. Raag Parichay	:	Harishchandra Srivastav
5. Sangeet Visharad	:	Basant
6. Sawars Sangeet	:	Pradeep Kumar Dixit
7. Sangeet Swarit	:	Dr. Ramanand Dwivedi
8. Sangeet Prabodhika	:	Dr. Parmanand Bansal Dr. Gyan Chand
9. Art Education	:	Janardan Prasad

****

HOME SCIENCE

The syllabus of Home Science for B.A./B.Sc. (Honours) Third year (SEMESTER SYSTEM) has been **KEPT IN ABEYANCE.**

****

PHYSICS

B.Sc. (HONOURS) THIRD YEAR (5th and 6th Semester) EXAMINATION, 2020-2021

SEMESTER-V

Paper V: Physics of Semiconductors

Unit I

Crystal Properties and Growth of Semiconductors: Semiconductor materials, Crystal lattices, Ge and Si crystal structure, production of electronic grade Si, Bulk crystal growth, Epitaxial growth.

Bonding forces and energy bands in solids, Metals, semiconductors and insulators, Direct and Indirect semiconductors, intrinsic and extrinsic semiconductors, compensation, Electrons and holes, effective mass, Fermi level, Conductivity and mobility, temperature dependence of Carrier concentration, effect of temperature, doping and field on mobility, Hall effect, Invariance of Fermi level at equilibrium.

Excess carriers in semiconductors: Optical absorption, Photoluminescence, Electroluminescence, Carrier lifetime and photoconductivity, photoconductive devices.

Unit II

Diffusion and drift of carriers: Einstein relation, built-in fields in semiconductors with different doping profiles, energy band diagrams. Steady state carrier injection, diffusion length, Haynes-Shockley experiment (qualitative discussion).

pn junction energy band diagrams, forward and reverse-biased junction, calculation of contact potential and depletion width in abrupt junction, diffusion and drift currents, Reverse-bias breakdown, Zener and Avalanche diode. Diffusion and depletion capacitance of pn junction, varactors.

Metal-semiconductor contacts, energy band diagrams of ohmic and rectifying contacts, Schottky diodes.

Recommended Books:

1. Solid State Electronic Devices: Ben Streetman, Sanjay Banerjee (Prentice Hall India, 2005).

Paper VI: Computational Physics

Note : The Computational Physics paper will consist of two parts (a) written examination of one hour duration and (b) Practical examination of two hours duration. Both the parts carry equal marks.

Unit I

C Programming Language

Types of Computer Systems and Operating Systems.
Introduction to Programming : Algorithms, Structured Programming. Basic idea of Compilers.
Data and Statements : Data Types. Constants and Variables. Mathematical, Relational, Logical and Bitwise Operators. Expressions and Statements. Block, Local and Global variables. Auto, Static and External Variables.
I/O Statements : printf, scanf, getc, getch, getchar, getche, etc.
Manipulators for Data Formatting: setw, width, endl and setprecision etc. ASCII Files I/O.
Preprocessor : #include and #define directives.
Control Statements :- If-statement. If-else Statement. Nested if Structure. Else-if Statement.
Ternary Operator. Goto Statement. Switch Statement. Unconditional and Conditional
Looping. While Loop. Do-while Loop. For Loop. Break and Continue Statements. Nested
Loops.
Arrays and Structures :- One and Two Dimensional Arrays. Idea of Structures, Strings and Pointers
Functions : Standard Library Functions and User-defined Functions.
Functions returning Values. Function Prototypes. Function Call by Value and by Reference.
Recursion.

Unit II

Design of algorithm and computer programs based on the numerical techniques read in Paper III "Statistics and Numerical Techniques".
Programs : (a) Data handling: find standard deviation, mean, variance, moments etc., (b) the least squared fitted curve for a data set, (c) roots of quadratic equations, (d) first order derivative at given x for a data set using Lagrange interpolation, (e) numerical integration on 1-D function using Simpson methods, (f) solving a differential equation using Euler/Runge-Kutta method, (g) Sum, Difference and Product of Matrices, (h) determinant of a matrix - its eigenvalues and eigenvectors.(h)Plotting and evaluation of mathematical functions.

Recommended Books:

1. Schaum's Outline of Programming with C, Byron Gottfried, McGraw-Hill.
2. Computer Programming in C, V. Rajaraman (Prentice Hall of India Pvt. Ltd.) (2006)
3. Computer Applications in Physics: S. Chandra (Narosa) (2008).
4. Computational Physics: R.C.Verma, P.K. Ahluwalia and K.C. Sharma (New Age) (2005).

****

PHYSICS
SEMESTER-VI

Paper VII: Nuclear Radiations and Detection

Unit I

Radiation Sources:

Radioactive decays: Alpha decay, β^-, $\beta+$ and EC decays, Radioactivity units, gamma rays, Internal conversion, X-rays, Auger electron, Bremesstrahlung, Annhilation radiation.
Neutron sources- fission, radioisotope based sources and photoneutron sources, Accelerator based sources.
Radiation Interactions : Interaction of light and heavy Charged Particles, Stopping power, energy and range straggling.
Interaction of Fast Electrons - ionsation and radiative loss, backscattering.
Interaction of Gamma rays, photoelectric absorption, Compton scattering and pair production. Attenuation coefficient.
Interaction of Neutrons, Slowing down power, thermal neutrons.
Sources of Background: Natural radioactivity, Air borne radioactivity, Primary and secondary Cosmic rays.

Unit II

General Properties of Radiation Detectors: Modes of detector operation, Current mode, pulse mode, Pulse Height Spectra, Energy Resolution, Detection Efficiency, Dead Time-paralyzable and non-paralyzable models.
Radiation Detectors:
Ionization process in gases, Ion pair formation, fano factor, diffusion, charge transfer and recombination, Charge Migration and Collection.
Gas-filled detectors: Gas Multiplication, avalanche formation, Regions of detector operation.
Proportional Counters, fill gases and choice of geometry.
Geiger-Mueller counter, Fill Gases and Quenching mechanism, Recovery time and dead time, detection of charged particles, gamma and neutrons rays with G.M. counter.
Scintillation Detectors : Organic and Inorganic Scintillators; Characteristics and parameters associated with Gamma ray spectrum
Semiconductor detectors.
Detection of slow and fast neutrons by neutron-induced reactions.

Recommended Books:

1. Radiation detection and measurement: G.F. Knoll (Wiley, New York) (2000).

Paper VIII: Physics Practical

Note : The students are expected to perform any 6 experiments taking at least 3 from each section.

Unit I

1. Measurement of vacuum using the pirani/thermocouple gauge made using electric bulb filament.
2. To study Poisson and Gaussian distributions using a GM Counter.
3. To study absorption of gamma rays in Pb and Fe absorbers.
4. Strength of Alpha source using Solid state nuclear track detector.
5. To study regulated power supply and voltage multiplier circuits (using breadboard).

Unit II

6. To design an Astable multivibrator of given specifications using 555 Timer IC.
7. To design a monostable multivibrator of given specifications using 555 Timer IC and to measure the pulse-width of its output.
8. To study logic gates and clocked JK Master-Slave flip flops using IC's.
9. Study of photon intensity variation through crossed polariods and diffraction spectrum from diffraction grating using LDR/Photodiode.
10. To measure resistivity of semiconductor at different temperatures using four probe method and the deduce band gap of the semiconductor.

****

CHEMISTRY

B.Sc. (HONOURS) THIRD YEAR (SEMESTER SYSTEM) EXAMINATION, 2020

SEMESTER- V

Outlines of Tests

				Marks	
			Lecture Hours	*Theory*	*Internal Assessment*
Paper V	:	Inorganic Chemistry-A	20	45	05
Paper VI	:	Physical Chemistry-A	20	45	05

Paper V: INORGANIC CHEMISTRY-A

Total Marks	:	50
Theory	:	45
Internal Assessment	:	5
Total Lectures	:	20

OBJECTIVE OF THE COURSE

To teach the fundamental concept of Chemistry and their applications. The syllabus pertaining to B.Sc. (HONOURS) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills

Unit-I

Inorganic Chains: (5 lectures)

(a) Chains : Catenation including heterocatenation, silicate minerals, intercalation, One dimensional sulphur-nitrogen conductor.

Unit II

Inorganic Rings and Cages : (5 lectures)

(a) Rings : Borazines, phosphazenes and phosphazene polymers.

(b) Cages : Simple cage molecules; Phosphorus–oxygen and phosphorus-sulphur cages; introduction to carboranes and metallocarboranes

Unit III

Organometallics-I : (5 lectures)

Formation and reactions (i) carbonylate ions (ii) metal-carbonyl hydrides & (iii) metal carbonyl halides.

Unit IV

Organometallics-II : (5 lectures)

Transition metal-carbon multiple bonds : Chemistry of :

Alkylidene Complexes.

Alkylidyne complexes including bridged molecules.

Metallocumulenes.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***All questions carry equal marks.***

Suggested Books:

1. Cotton, F.A., G. Wilkinson, Advanced Inorganic Chemistry; 6th edition Pubs: John Wiley & Sons, 1999.
2. Basolo, F., Pearson, R.G., Inorganic Reactions; Reprint 2nd edition, Pubs: Wiley-Eastern, 1977.
3. Greenwood, N.N., Earnshaw, A., Chemistry of Elements; 1st edition, Pubs: Pergamon Press, 1984.
4. Huyer, J.E., Keiter, E.A., Keiter, R.L., Inorganic Chemistry-Principles of Structure and Reactivity; 4th edition, Pubs: Pearson Education India, 1993.

Paper VI: PHYSICAL CHEMISTRY-A

Total Marks	:	50
Theory	:	45
Internal Assessment	:	5
Total Lectures	:	20

OBJECTIVE OF THE COURSE

To teach the fundamental concept of Chemistry and their applications. The syllabus pertaining to B.Sc. (HONOURS) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills

Unit-I

Transport Properties-I *:* (5 Lectures)

Recapitulation of Collision Properties of gases such as collision cross section, collision diameter, collision number, collision frequency and mean free path.
Meaning of transport, Properties of gases, Flux, General equation of transport. Thermal conductivity, kinetic theory of thermal conductivity (derivation of the expression).

Unit-II

Transport Properties-II *:* (5 Lectures)

Viscosity of gases, kinetic theory of gas viscosity, (derivation of the expression). Measurement of gas viscosity, Diffusion Coefficient. Kinetic theory of diffusion in gases. (derivation of the expression).
Diffusion in liquids, theory of diffusion in liquids, diffusion in solutions, laws of diffusion.

Unit-III

Dynamic Electro-Chemistry : (5 Lectures)

Processes at electrodes. The electric double layer (Gouy-Chapman, Helmholtz and Stern models-qualitative ideas. The potential difference, Rate of charge transfer, Bulter Volmer equation, Tafel plot, Overpotential Polarisation, Polarography, Fuel cells, Corrosion, Inhibition of Corrosion.

Unit-IV

Surface Chemistry : (5 Lectures)

Interfacial region, types of interfaces, surface tension, thermodynamics of surfaces, plane interface, curved surfaces, Laplace and Kelvin equations including their derivation.
Gibbs Adsorption Equation and its Thermodynamic derivation, Wetting and adhesion in solid-liquid systems, contact angle, Capillary rise and surface tension. Surface Films on liquids.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.
ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.
iii. All questions carry equal marks.

Suggested Books:

1. Atkins, P.W., Physical Chemistry; 8th edition, Pubs: Oxford University Press, 2008.
2. Levine, I.N., Physical Chemistry, 3rd edition, Pubs: Prentice Hall International Inc., 2000.
3. Pruton, Maron, Principles of Physical Chemistry; 4th edition, Pubs: Oxford & IBH Publishing Co. Pvt. Ltd., 1972.
4. Chandra, A.K., Introductory Quantum Chemistry; 4th edition, Pubs: Tata McGraw-Hill Publishing Company Ltd.
5. Moore, W.J., Basic Physical Chemistry; 1st edition, Pubs: Prentice-Hall of India Pvt. Ltd., 1986.
6. Albert, R.A., Physical Chemistry; 1st edition, Pubs: John-Wiley & Sons, 1992.

CHEMISTRY

SEMESTER VI

Outlines of Tests

			Lecture Hours	*Marks*	
				Theory	*Internal Assessment*
PaperVII	:	Inorganic Chemistry -B	20	45	05
PaperVIII	:	Physical Chemistry -B	20	45	05

Paper VII: INORGANIC CHEMISTRY-B

Total Marks : 50

Theory : 45

Internal Assessment : 5

Total Lectures : 20

OBJECTIVE OF THE COURSE

To teach the fundamental concept of Chemistry and their applications. The syllabus pertaining to B.Sc. (HONOURS) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills

Unit-I

(5lectures)

Complexes of aromatic systems with transition metals. M.O. description of bonding in Ferrocene.

Study of coordinative unsaturation, oxidative addition,

Unit-II (5 Lectures)

Insertion reactions in Organometallics.

Phenomenon of Fluxionality in Organometallics and its characterization.

Unit-III

Reaction Mechanism : (5 lectures)

Nature and classification of lignad substitution reactions, application of V.B. & C.F. theories to predict the substitution reactions. Mechanism of ligand replacement reactions, substitution in octahedral complexes acid hydrolysis, base hydrolysis, acid-catalysed, acid hydrolysis and acid hydrolysis for chelates.

Unit-IV (5 lectures)

Substitution in square planar complexes. The trans-effect & its Synthetic applications, M.O. theories and trans-effects. Electron transfer reactions & their mechanism. Molecular rearrangements, mechanistic pathways of substitution.

Instructions for paper setters and candidates:

iv. *Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.*
v. *The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.*
vi. *All questions carry equal marks.*

Suggested Books:

5. Cotton, F.A., G. Wilkinson, Advanced Inorganic Chemistry; 6th edition Pubs: John Wiley & Sons, 1999.
6. Basolo, F., Pearson, R.G., Inorganic Reactions; Reprint 2nd edition, Pubs: Wiley-Eastern, 1977.
7. Greenwood, N.N., Earnshaw, A., Chemistry of Elements; 1st edition, Pubs: Pergamon Press, 1984.
8. Huyer, J.E., Keiter, E.A., Keiter, R.L., Inorganic Chemistry-Principles of Structure and Reactivity; 4th edition, Pubs: Pearson Education India, 1993.

Paper VIII: PHYSICAL CHEMISTRY-B

Total Marks	:	50
Theory	:	45
Internal Assessment	:	5
Total Lectures	:	20

OBJECTIVE OF THE COURSE

To teach the fundamental concept of Chemistry and their applications. The syllabus pertaining to B.Sc. (HONOURS) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills

Unit-I

Colloids-I : (5 Lectures)

The colloidal state; preparation of colloidal solutions, Methods of purification of colloidal systems, dialysis, electro-dialysis, filtration, Ultra-filtration. Classification of colloidal systems, their typical properties with special reference to optical properties (Tyndall effect).

Unit-II

Colloids-II : (5 Lectures)

The Brownian movement. Electrokinetic phenomena, Stabilization of colloidal systems and theories of stability; zeta potential, Coagulation, Flocculation of colloids by electrolytes and its mechanism. Association Colloids, Micellar system, Emulsions and their types, HLB value of emulsifiers, Introduction to microemulsions.

Unit-III

Quantum Chemistry-I : (5 Lectures)

ATOMS : Schrodinger equation for multi-electron atoms, Need for approximate Solutions. Basic ideas of the Variation theorem and the Perturbation methods. Self-Consistent Field methods (Hertree and Hertree-Fock)- Elementary treatment only. Indistinguishability of Electrons. Pauli exclusion principle, two electron spin functions; Slater determinants and Pauli principle. New Atomic term symbols. Spin-orbit coupling (Total orbital momentum, multiplicity, total angular momentum) vector model of atom, Hund's rules, atomic spectra and Selection rules.

Unit-IV

Quantum Chemistry-II : (5 Lectures)

Molecules :

Schrodinger equation for molecules, Born-Oppenheimer approximation.Valence bond theory and Molecular Orbital theory as two approaches for approximate solution of Schrodinger equation LCAO-MO treatments of H_2 and Valence bond treatment of H_2 (complete solutions not required. Only wave functions to be discussed) Comparison of MO and VB treatments. Brief Introduction to the electronic structure for polyatomic molecules. Metals, Insulators and Semiconductors. Band Theory of Solids (elementary discussion).

Instructions for paper setters and candidates:

iv. *Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.*
v. *The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.*

BOTANY

B.Sc. (Honours) Botany Fifth and Sixth Semester Syllabus

(Examination 2020-2021)

Fifth Semester		Time	Theory	Int Assess.	Max Marks
Theory Paper- A:	Biology of Cryptogams and Seed Plants	3 hrs.	36	4	40
Theory Paper-B:	Genetics, Plant Breeding, Biochemistry, Molecular Biology and Biotechnology	3 hrs	36	4	40
One practical pertaining to entire syllabus included in both theory papers		3 hrs	18	2	20
Sixth Semester					
Theory Paper- A:	Microbiology and Plant Pathology	3 hrs.	36	4	40
Theory Paper-B:	Systematics of Angiosperms and Environmental Biology	3 hrs	36	4	40
One practical pertaining to entire syllabus included in both theory papers		3 hrs.	18	2	20
		Total			**200**

Note:

1. The number of teaching hours for theory and practical per semester shall be 60 hrs. and 100 hrs. respectively.

2. There will be a two theory papers (A & B) in each semester. Each paper will consist of 9 questions. Question No. 1 will be compulsory and will consist of 8 parts (one mark each) comprising 4 MCQ and the rest 4 parts will be of fill-in the blanks covering the entire syllabus in both the theory papers A & B. The remaining 8 questions in papers A & B shall include two questions from each unit. Candidates shall be required to attempt one question from each Unit. Question No. 1 will carry 8 marks and the rest of 8 questions will be of 7 marks each.

BOTANY

B.Sc. (Honours) Fifth Semester (Examination December, 2020)

PAPER-A: BIOLOGY OF CRYPTOGAMS AND SEED PLANTS

Max. Marks : 40
Theory : 36
Internal Assessment : 04

Objective : The basic objective of this paper is to make the students understand the diversity in various life forms of plant kingdom. It provides knowledge about evolution of simpler forms to complex ones along with their morphology, anatomy and reproduction.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I
BIOLOGY OF CRYPTOGAMS

Algae: Occurrence and distribution; thallus organization and evolutionary tendencies; ultrastructure of algal cell; criteria for classification, structure and life history of *Oedogonium* (Chlorophyceae), *Vaucheria* (Xanthophyceae), *Ectocarpus* (phaeophyceae), *Batrachospermum* (Rhodophyceae) and economic importance of algae.

Fungi: Occurrence and distribution; ultrastructure of fungal cell, cell wall composition, modern concepts in the classification of fungi; nutrition, reproduction, structure and life history of *Rhizopus* (Zygomycetes), *Peziza*, *Saccharomyces* (Ascomycetes), *Alternaria* (Deuteromycetes), *Agaricus* (Basidiomycetes); types of fungal spores and mode of their liberation and economic importance of fungi.

UNIT-II

Bryophytes: Comparative account of morphology, anatomy and reproduction in *Riccia, Marchantia, Anthoceros, Funaria*; evolution of sporophyte and gametophyte; classification, ecological aspects and economic importance.

Pteridophytes: The primary vascular plants; classification, comparative account of morphology, anatomy and reproduction in *Rhynia, Lycopodium, Selaginella, Equisetum, Marsilea, Pteris*; Telome theory; stelar evolution; heterospory and seed habit.

UNIT-III
SEED PLANTS

Phanerogams, the seed bearing plants: General characteristics and types.

The Living Cycads: Distribution; vegetative organography and anatomy; reproductive cycle –sporophytes and sporangia, gametophytes, fertilization, embryogeny and seed development of *Cycas*.

The Coniferales: General organography and anatomy; foliage leaves; storbilli and sporangia; reproductive cycle– sporogenesis, gametophytes, fertilization, embryogeny and seed development of *Pinus*.

The Gnetales: Habit and distribution; vegetative organography and anatomy; reproductive cycle – the storbilli, sporogenesis, male and female gametophytes, pollination, fertilization and embryogeny of *Ephedra*.

UNIT-IV

Alternatives for Reproduction: Vegetative and sexual reproduction.

Flower: Evolution, concept of flower as a modified determinate shoot and functions of flower.

Structure of Anther : Microsporogenesis: formation of pollen grains (male gametophyte); pollen germination; pollen tube growth.

Structure of Pistil**:** Ovules; megasporogenesis; development of embryo sac (female gametophyte).

Mechanisms and Agencies of Pollination: Pollen-stigma interaction; self-incompatibility; double fertilization, apomixis.

Seed and Fruit: Development of endosperm and embryo in monocotyledons and dicotyledons; storage of reserve materials and desiccation in seeds; dormancy and seed germination; fruit maturation; ripening and dispersal.

Suggested Readings

18. Srivastava, H.N. Diversity of Seed Plants and Their Systematics, Vol.III, Pradeep Publications, Jalandhar, India, 2014.
19. Wilson, N.S. and Rothwell, G.W. Palaeobotany and the Evolution of Plants (2nd Edition), Cambridge University Press, UK, 1993.

Suggested Laboratory Exercises (Biology of Cryptogams)

1. Comparative study of algal genera with reference to the classes mentioned in theory.
2. Comparative study of fungal genera with reference to the classes mentioned in theory.
3. Comparative study of morphology, anatomy and reproductive structures in *Riccia, Marchantia, Anthoceros* and *Funaria.*
4. Comparative study of different members of Pteridophytes mentioned in the theory syllabus.
5. Comparative anatomical structure of stem/wood of Cycadales, Coniferales, Ephedrales, Gnetales and angiosperms, from sections and macerations.
6. Comparative structure of the male and female cones of Cycads (*Cycas*), Conifers (*Pinus*) and Ephedrales (*Ephedra*).
7. Comparative structure of leaf, leaf appendages, venation and stomata of gymnosperms and angiosperms.
8. Diversity in pollen grain structure among Cycads, Conifers, Ephedrales and angiosperms with respect to size, exine sculpturing, germ spore number, number of constituent cells and any other features.
9. Microsporogenesis and male gametophyte development in angiosperms through microtome sectioning and acetocarmine squash technique.
10. Pollen grain germination by hanging-drop and sitting-drop techniques in *Impatiens*, *Catharanthus roseus* (= *Vinca rosea*) or any other suitable material.
11. Diversity in the structure of stigma, style, stigmatic papillae and transmitting tissue of style.

BOTANY

SEMESTER – V

PAPER-B: GENETICS AND PLANT BREEDING, BIOCHEMISTRY, MOLECULAR BIOLOGY AND BIOTECHNOLOGY

Objective: The course work of this paper deals with basic concepts of genetics, plant breeding, molecular biology and biotechnology. It deals with various types of plant reproduction and methods of plant improvement. It provides knowledge of molecular and cellular basis that would enable the students to understand the hereditary and evolutionary trends in plants kingdom.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I
GENETICS

Cell division - Mitosis and Meiosis.

Mendel's Experiments and Principles of Inheritance: Backcross and test cross; gene interactions and modified dihybrid ratios – complementary, supplementary, duplicate and epistatic factors.

Quantitative Genetics: Quantitative traits and quantitative genetics; the multiple factor hypothesis; descriptive statistics.

Linkage and Recombination: Coupling and repulsion phases; two and three point testcrosses with their significance in chromosome mapping; interference and co-efficient of coincidence.

Maternal Influence on Inheritance: Shell coiling in snails and Kappa particles in Paramecium; cytoplasmic inheritance in yeast (mitochondria) and Mirabilis jalapa (plastids).

Changes in Chromosome Structure: Origin, types and effects of duplications, deletions, inversions and translocations; meiosis in structural heterozygotes.

UNIT –II

PLANT BREEDING

Methods of Plant Improvement: Pure line and mass selection; hybridization in self and cross pollinated crops; introduction and acclimatization; hybrid vigour.

Alterations in the Genetic makeup – changes at Genetic Level: Spontaneous and induced mutations; mutagens – types and mode of action; transitions, Transversions and frame-shift mutations; detection of mutations.

Alterations in Genetic makeup – changes in Chromosome Number : Origin, types and effects of auto and allopolyploidy; origin and meiosis in nullisomics, monosomics and trisomics.

Mutations and polyploidy as methods of plant improvement.

UNIT-III

BIOCHEMISTRY AND MOLECULAR BIOLOGY

Nucleic Acids: Composition of nucleic acids and synthesis of nucleotides; DNA structure; A,B and Z forms of DNA; denaturation and renaturation of DNA; chromatin structure; DNA replication and recombination; DNA polymerases; different forms of RNA and their role.

Amino Acid and Protein Metabolism: Structure, characteristics and classification of amino acids; protein and non-protein amino acids; amino acid biosynthesis; GS/GOGAT cycle; transamination; peptide bond and polypeptide chain; primary, secondary, tertiary and quaternary structure of proteins; protein biosynthesis and its regulation; post-translational modification of proteins; protein targeting; protein degradation.

Carbohydrate Metabolism: Classification; structure of some representatives examples of monosaccharides, disaccharides, polysaccharides; stereoisomers, enantiomers and epimers; biosynthesis and degradation of sucrose and starch.

Lipid Metabolism: Saturated and unsaturated fatty acids; fatty acid biosynthesis; oxidation of fatty acids; storage and mobilization of fatty acids and lipids.

UNIT-IV

BIOTECHNOLOGY

Gene Structure, Expression and Regulation: Gene organization in prokaryotes and eukaryotes; operon concept; gene regulation in prokaryotes and eukaryotes; inducible, repressible, positive and negative gene regulation; interrupted genes in eukaryotes; RNA splicing; mRNA stability.

Recombinant DNA Technology: Restriction endonucleases: prokaryotic and eukaryotic cloning vectors; genomic and cDNA libraries; southern and northern analysis; various techniques of gene mapping and DNA fingerprinting (RFLP, RAPD, AFLP); chromosome walking; polymerase chain reaction; DNA sequencing.

Plant Biotechnology: Cellular differentiation and totipotency; organogenesis and embryogenesis; protoplast isolation and culture; somatic hybridization; clonal propagation; genetic engineering of plants; vectors for gene delivery; selectable markers and reporter genes; methods of gene delivery; Agrobacterium – the natural genetic engineer; salient achievements in crop biotechnology (with suitable examples) and prospects.

Suggested Readings:

15. Russel, P.J. Genetics (5th Edition), The Benjamin/Cummings Publishing Co., Inc., USA, 1998.
16. Sharma, J.R. Principles and Practice of Plant Breeding, Tata McGraw Hill Publishing Co. Ltd., New Delhi, India, 1994.
17. Simmonds, N.W. Principles of Crop Improvement, Longman, London and New York, 1979.
18. Snustad, D.P. and Simmons, M.J. Principles of Genetics (2nd Edition), John Wiley & Sons, Inc., USA, 2000.
19. Srivastava, H.N. Cell Biology and Genetics, Vol.II, Pradeep Publications, Jalandhar, India, 2006.
20. Srivastava, H.N. Plant Physiology, Biochemistry and Biotechnology, Vol.V, Pradeep Publications, Jalandhar, India, 2013.
21. Verma, P.S. and Agarwal, V.K. Cell Biology, Genetics, Molecular Biology, Evolution and Ecology. S. Chand & Company (Reprint, 2010).

Suggested Laboratory Exercises:

1. Determination of chromosome count from dividing pollen mother cells and root tips.
2. Preparation of karyotypes from dividing root tip cells and pollen grains.
3. Determination of intraspecific variation in chromosome number from locally available taxa.
4. Correlation of floral structure with pollination system (e.g. *Salvia*, *Sesamum*, pea, *Lathyrus*, wheat, rice, maize).
5. Field exploration for detection of male sterile plants and estimation of their pollen fertility in locally grown crop plants e.g. *Sorghum*, tomato and *Linum*.
6. Estimation of pollen ovule ratio and its bearing on pollination system.
7. Emasculation and bagging of flowers of Brassicaceae, Poaceae, Papilionaceae, Malvaceae and Linaceae, pollinating them manually and estimating fruit and seed set.
8. Chemical tests to demonstrate the presence of starch, sugar, fat and protein in plant material.
9. To identify the amino acids in a mixture by resolving through paper chromatography or TLC.
10. To prepare the standard curve for protein and determine the protein content in unknown samples by Biuret method.
11. Colorimetric estimation of RNA using orcinol.
12. Colorimetric estimation of DNA using diphenyl amine.
13. Isolation of plant genomic DNA and its spooling.
14. Isolation of total RNA from plant tissue and its colorimetric estimation.
15. Preparation of tissue culture media, sterilization and inoculation of plant material.
16. Demonstration of techniques of in vitro culture of various explants.
17. Isolation of plant protoplasts (e.g. Tobacco, *Petunia*) using enzymes available commercially and estimation of their yield.

Note: In the practical classes, emphasis should be given on basic principles of spectro-photometry, chromatography, electrophoresis and rDNA technology and related fundamentals.

Guidelines for Botany Practical Examination:

Max Marks	**:**	**20**
Practical	**:**	**18**
Int. Assessment	**:**	**2**
Time	**:**	**3 hrs.**

Q.1 Identify classify & write illustrated morphological note on specimens A & B (unit I – III of paper A) 4
Q.2 Demonstrate and perform the experiment C (Biochemistry/Biotechnology) and show it to the examiner. 5
Q.3. Identify slides D & E giving at least two reasons for each. 4
Q.4 Practical note book 2
Q.5 Viva-Voce 3

BOTANY

B.Sc. (Honours) Sixth Semester (Examination May, 2021)

PAPER-A: MICROBIOLOGY AND PLANT PATHOLOGY

Objectives: The basic objective of this paper is to make students familiar with the systematic position of microorganisms, their ultrastructure, classification and industrial application. It also deals with the important aspects of plant diseases, their pathogens and disease management.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I
(MICROBIOLOGY)

General account of Microorganisms and their characteristics features.

Ultrastructure of Microorganisms: Prokaryotic microorganisms; fine structure of prokaryotic cell; eukaryotic microorganisms; viruses – properties and classification; characteristic features of host-virus interaction; bacteriophage T4; tobacco mosaic virus; general account of mycoplasma and actinomycetes.

Industrial Application of Microorganisms: Organic acids, alcohol, food processing, milk products, antibiotics and biopesticides.

UNIT-II

Genetic Recombination in Prokaryotes: Conjugation, transformation and transduction.

Role of Microorganisms in biogeochemical cycling of nitrogen and carbon; Biological N_2 fixation.

UNIT-III

(PLANT PATHOLOGY)

Major Diseases of Plants, their symptoms and Control : Blast and brown spot of rice, rust and smuts of wheat, downy mildew and green ear disease of bajra, white rust of crucifers, late blight of potato, wilt of pigeon pea, damping off seedlings of tomato/mustard/chillies, Tikka or leaf spot of groundnut, citrus die back, powdery mildews of cucurbits and grapes, red rot of sugarcane.

Plant Disease Management: Chemical, biological; IPM systems; development of transgenics; biopesticides; plant disease clinics.

UNIT-IV

Pathogen Attack and Defense Mechanisms: Physical, physiological, biochemical and molecular aspects.

Plant Disease Epidemiology: Transmission and spread of plant pathogens; disease cycles, epidemics; modeling and disease forecasting.

Suggested Readings:

1. Agrios, G.N. Plant Pathology, Academic Press, London, 1997.
2. Albajes, R. Gullino, M.L., Van Lenteren, J.C. and Elad, Y. Integrated Pest and Disease Management in Green house crops, Kluwer Academic Publishers, 2000.
3. Bridge, P. et al. Molecular Variability of Fungal Pathogens, CAB International, UK, 1998.
4. Bridge, P. et al. Application of PCR in Mycology, CAB International, UK, 1999.
5. Bridge, P., Moore, D.R. and Scott, P.R. Informational Technology, Plant Pathology and Biodiversity, CAB International, UK, 1998.
6. Clifton, A. Introduction to the Bacteria, McGraw Hill Co., New York, 1958.
7. Mandahar, C.L. Introduction to Plant Viruses, Chand & Co. Ltd., Delhi, India,1998.
8. Persley, G.J. Biotechnologies and Integrated Pest Management, CAB International, UK, 1996.
9. Skerritt, J.H. and Apples, R. New Diagnostics in Crop Sciences, CAB International, UK, 1995.

Suggested Laboratory Exercises

1. Calibration of microscope: determination of dimensions of microorganisms (suggested model organisms: yeast, lactobacilli, cyanobacteria).
2. Cultivation media for autotrophic and heterotrophic microorganisms (cleaning of glasswares, mineral media, complex media, solid media, sterilization).
3. Isolation of microorganisms: streaking on agar plates/pour plate method, isolation of clones, preservation.
4. Preparation of Winogradsky column using pond bottom mud, observations on temporal sequence of appearance of microbes. (visual appearance, microscopic observations)
5. Observation on virus infected plants (symptoms).
6. Fermentation by yeast (inverted tube method, use of different substrates, e.g. glucose, fructose, cane sugar, starch)
7. Study of histopathology of various plant diseases included in theory.
8. Isolation and culture of plant pathogens (e.g. *Colletotrichum, Fusarium, Alternaria*) and establishment of Koch's postulates and their pathogenicity.
9. Study on antagonism between isolated antagonists and plant pathogens and test of biological control.
10. Demonstration of the assay of prohibitins (phytoalexins).
11. Demonstration of biopesticides (essential oils, neem, turmeric and garlic) against some pathogens.

****

BOTANY

SEMESTER – VI

PAPER-B: SYSTEMATICS OF ANGIOSPERMS AND ENVIRONMENTAL BIOLOGY

Objective: This paper deals with taxonomy and species concept of plants. It provides a knowledge about identification, nomenclature and classification which forms the basis of future research work. It also deals with inter-relations of plants and environment as well as various environmental problems, role of national and international organization in environmental management.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I

ANGIOSPERM SYSTEMATICS

Introduction : Aims and components of systematics, introduction to identification, nomenclature, phylogeny and classification.

Systematics in Practice: Importance of herbarium specimens and their preparation; role of herbaria and botanical gardens; documentation (floras, monographs, manuals, journals, abstracts, indices and dictionaries); keys for identification of plants.

Taxonomic Hierarchy: Taxonomic category, taxonomic groups; concepts of species, genus and family.

Botanical Nomenclature: Principles and rules; ranks and names; type method; principle of priority and its limitations; names of hybrids and cultivars; concept of biocode.

UNIT-II

General characters of Angiosperms.

Systems of Classification: Bentham and Hooker's system. Engler and Prantl's system and Takhtajan's system.

Modern Taxonomy: Supporting evidences/inputs for taxonomy; taxonomy in relation to anatomy, embryology, palynology, ecology, cytology (cytotaxonomy), secondary metabolites in plants (chemotaxonomy).

A brief account of following families: Ranunculaceae, Brassicaceae, Rutaceae, Fabaceae, Cucurbitaceae, Apiaceae, Asteraceae, Asclepiadaceae, Solanaceae, Lamiaceae, Chenopodiaceae, Euphorbiaceae, Liliaceae and Poaceae.

UNIT-III

ENVIRONMENTAL BIOLOGY

Introduction: Inter-relationship between the living world and the environment; the components and dynamism; homeostasis; relevance to man.

Earth as a System: The biosphere, the hydrosphere, the atmosphere and the lithosphere; components within biosphere (Biomes); parameters delimiting individual biomes.

The Environment: Soil, water and atmosphere – general account and adaptations.

Organismal Ecology/Biotic components: Individuals, species, population communities and their characteristics.

Ecosystems: Concepts of ecosystem; homeostasis; structure of ecosystem; functions of ecosystem; transfer of energy and minerals via grazing and detritus chains and role of micro-organisms; cycles (hydrologic, gaseous); role of humans in maintaining biogeochemical cycles.
Diversity of Ecosystem: Aquatic (fresh water); terrestrial (forest/grassland); man-made ecosystems.

UNIT-IV

Human Ecology and Ecological Management: The human population; renewable and non-renewable natural resources and their management; conservation of biodiversity; endangered species; conventional and non-conventional energy sources.

Impact of human activities: Pollution of air, water and soil; a brief account of environmental toxicology; incidence of noise; thermal and radioactive pollution; prevention and control of pollution; global warming, desertification and ozone depletion.

Suggested Readings

1. Barbour, M.G., Burk, J.H. and Pitts, W.D. Terrestrial Plant Ecology, Benjamin/Cummings, Publications Co., California, 1987.
2. Bhojwani, S.S. Plant Tissue Culture: Applications and Limitations, Elsevier Science Publishers, New York, USA, 1990.
3. Collins, H.A., and Edwards, S. Plant Cell Culture, Bios Scientific Publishers, Oxford, UK, 1998.
4. Dhand, Neelam. Systematics of Spermatophyta, Trueman Book Company, Jalandhar, India, 2006.
5. Hill, M.K. Understanding Environmental Pollution, Cambridge University Press, 1997.
6. Kormondy, E.J. Concepts of Ecology, Prentice-Hall of India Pvt. Ltd., New Delhi, India, 1996.
7. Mackenzie, A. et al. Instant Notes in Ecology, Viva Books Pvt. Ltd., New Delhi, India, 1999.
8. Misra, R. Ecology Work Book, Oxford & IBH, New Delhi, India, 1968.
9. Moore, P.W. and Chapman, S.B. Methods in Plant Ecology, Blackwell Scientific Publications, 1986.
10. Odum, E.P. Basic Ecology. Saunders, Philadelphia, 1983.
11. Raghavan, V. Embryogenesis in Angiosperms: A Developmental and Experimental Study, Cambridge University Press, New York, USA, 1986.
12. Smith R.K. Ecology and Field Biology. Harper Collins, New York, 1996.

13. Srivastava, H.N. Diversity of Seed Plants and Their Systematics, Vol. III, Pradeep Publications, Jalandhar, India, 2014.
14. Vasil, I.K. and Thorpe, T.A. Plant Cell and Tissue Culture, Kluwer Academic Publishers, The Netherlands, 1994.

Suggested laboratory Exercises

Description of the following flowers belonging to the various families included in theory syllabus:

1. Ranunculaceae : *Ranunculus, Delphinium*
2. Brassicaceae : *Brassica, Iberis*
3. Rutaceae: *Citrus, Murraya*
4. Fabaceae: *Lathyrus, Cassia, Mimosa* and *Acacia*
5. Cucurbitaceae: *Luffa*
6. Apiaceae; *Coriandrum*
7. Asteraceae: *Helianthus, Ageratum, Sonchus.*
8. Asclepiadaceae: *Calotropis.*
9. Solanaceae: *Solanum, Petunia*
10. Lamiaceae: *Ocimum, Salvia*
11. Chenopodiaceae: *Chenopodium*
12. Euphorbiaceae: *Euphorbia, Phyllanthus*
13. Liliaceae: *Asphodelus, Asparagus*
14. Poaceae: *Avena, Triticum.*

Suggested laboratory Exercises (Environmental Biology)

1. Mechanical analysis of soils by sieve method
2. Determination of water holding capacity and field capacity of soil.
3. Determination of permeability (capillarity and percolation) of different types of soils.
4. Determination of species area curve by minimal quadrat size.
5. Analysis of the herbaceous vegetation for frequency, density and abundance.
6. Effect of tree canopy on the distribution of herbaceous vegetation.
7. Field visit: students should be taken for field visits to places of ecological/environmental interest. They should submit detailed report of the visit in the form of project report in the final practical examination for evaluation. The report shall carry marks.

Note to teachers:

The students are to be familiarized with the families listed above in the practical classes with representative's species or any other that may be available locally. However, questions pertaining to these may be asked in the theory examinations.

Guidelines for Botany Practical Examination:

Max Marks	**:**	**20**
Practical	**:**	**18**
Int. Assessment	**:**	**2**
Time	**:**	**3 hrs.**

Q.1	Describe specimen A in technical terms & proper sequence. Draw F.D and V.S of the flower. Cut T.S of ovary and V.S of the flower and show it to the examiner. Write its F.F. as well.	6
Q.2	Identify specimen B and write Histopathological note on it.	3
Q.3.	Identify slides C by giving at least two reasons.	2
Q.4	Field Diary	2
Q.5	Practical note book	2
Q.6	Viva-Voce	3

****

ZOOLOGY

SEMESTER – V

PAPER I: REPRODUCTIVE BIOLOGY AND HUMAN WELFARE-I

PAPER II: AQUATIC BIOLOGY-I

PAPER I: REPRODUCTIVE BIOLOGY AND HUMAN WELFARE-I

Max. Marks	: 40
Theory Exam.	: 36 marks
Internal Assessment	: 4 marks
Time	: 3 hrs.

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT -I

Structure and functions of testis, epididymis, vas deferens.

UNIT –II

Seminal vesicle and prostate gland.
Semen composition, sperm maturation and capacatation.

UNIT -III

Structure and functions of ovary, oviduct, uterus and vagina.

UNIT -IV

Oestrous and menstural cycles.
Fertilization, implantation, gestation, parturition and lactation.

Books Recommended :

1. Milt, J. & Everitt, B.J.,Essential of Reproduction, Blackwell Scientific Publications, 1985.
2. Genong, M., Reproduction, Saunders Intern. Publications, 1985.
3. Greep, R.O. & Astwood, E.B.,(Eds), Handbook of Physiology, Kluwer Academic/ Plenum Publishers, New York, 2002.
4. Balin, H., & Glasser, S. (Eds.), Reproductive Biology, Excerpta Media, 1972.
5. Guyton, A.S., Text Book of Medical Physiology, 7th edition, Iquakushoinl/Saunders International Publications, 1994.

PAPER II: AQUATIC BIOLOGY-I

Max. Marks	: 40
Theory Exam.	: 36 marks
Internal Assessment	: 4 marks
Time	: 3 hrs.

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT -I

Physico-chemical characteristics of marine environment

UNIT -II

Zonation in marine habitat : Pelagic and benthic zone and their flora and fauna.

UNIT -III

Freshwater zonation in a lake and stream : Supralittoral, littoral, sublittoral, profundal & limnetic zones of a lake. Pool zone and rapid zone of a stream.

UNIT -IV

Classification of freshwater habitats : Streams ponds, lakes, marshes and swamps.

Books recommended

1. Ruttner, F., Fundamentals of Limnology, University of Tronto Press, Tronto, 1975.
2. Reid, G.K. & Wood, R.D., Ecology of Inland Waters and Estuaries , Van Nostrand Reinhold Publishing Co., New York, 1975.
3. Welch, P.S., Limnology, McGraw Hill Book Co., New York, 1952.
4. Jhingran, V.G., Fish & Fisheries of India, Hindustan Publications Corporation, Delhi, 1991.

PRACTICALS

Practical based on both theory papers I & II :

I. Demonstration of male and female reproductive systems and their associated glands in rat/rabbit through charts.
II. Histology of testis, epididymis, vas deferens, prostate, seminal vesicle, ovary, uterus and vagina through permanent slides..
III. Study of permanent slides of the vaginal smear of human menstrual cycle and rat/mice oestrous cycle.
IV. Determination of the different phases of the oestrous cycle in living rat through permanent slides.
V. Study of mammalian sperm through slides/charts.
VI. Histological examination of placenta through slides/charts.
VII. Freshwater zonation in lake/stream and study of different communities (plankton, nekton, neuston, benthos and lotic communities).

Scheme for Conduct of Practical Examination

Max. Marks	: 20
Practical Exam.	: 18 marks
Internal Assessment	: 2 marks

Note : 1. Practical will be of 4 hrs. duration.

2. The students will be required to submit in writing the principles, methods employed and precautions to be observed wherever necessary within 1 hr. of the start of examination.

I Draw a labeled sketch of given system and show to examiner/Spot parts of system on the charts/models. (3)

II Identification of phases of oestrous cycle. (1)

III Record biota in a given sample from a lake. Make labeled sketches and demonstrate them to the examiner. (2)

IV Examine the water sample for various communities from different zones of a lake and draw labelled sketches. (2)

V Identify the specimens/slides/charts A-D. Give reasons of the identification. (4)

VI. Note book and charts. (3)

VII. Viva-Voce. (3)

****

ZOOLOGY

SEMESTER – VI

PAPER I: REPRODUCTIVE BIOLOGY AND HUMAN WELFARE-II

PAPER II: AQUATIC BIOLOGY-II

PAPER I: REPRODUCTIVE BIOLOGY AND HUMAN WELFARE-II

Max. Marks	: 40
Theory Exam.	: 36 marks
Internal Assessment	: 4 marks
Time	: 3 hrs.

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT –I

Neuro-Hormonal Regulation of production of Gonadal and Gonadotropic hormones.

UNIT –II

Neuro-Hormonal Regulation of production of Hypothalamic factors and Structural behaviour.

UNIT –III

Fertility Regulation

Contraception and modern contraceptive technology-natural, mechanical, chemical immunological and surgical methods and Fertilization *in vitro* (Test tube baby).

UNIT -IV

Application of fertility regulation in live stock:

i. Artificial insemination in farm animals.
ii. Milk yield.
iii. Egg production in poultry.

Books Recommended :

1. Milt, J. & Everitt, B.J.,Essential of Reproduction, Blackwell Scientific Publications, 1985.
2. Genong, M., Reproduction, Saunders Intern. Publications, 1985.
3. Turner, C.P. & Bagnara, J.T., General Endocronology, Saunders Intern. Publications, 1984.
4. Balin, H., & Glasser, S. (Eds.), Reproductive Biology, Excerpta Media, 1972.
5. Guyton, A.S., Text Book of Medical Physiology, 7th edition, Iquakushoinl/Saunders International Publications, 1994.

PAPER II: AQUATIC BIOLOGY-II

Max. Marks	:	40
Theory Exam.	:	36 marks
Internal Assessment	:	4 marks
Time	:	3 hrs.

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT -I

Ecosystem : Study of ecosystem with particular reference to the components of aquatic ecosystem. Food chains and food webs. Flow of energy in a food chain.

UNIT -II

Physico-chemical characteristics of freshwater environment : Temperature, light, current of water, density, pH, dissolved oxygen, carbon dioxide and nutrients.

UNIT -III

Productivity : Concepts of productivity, primary, secondary and tertiary productivity, yield and carrying capacity.

UNIT -IV

Ecological sucession : Succession, kinds of succession, changes in animal life during hydrarch concept of climax.
Adaptations of aquatic organisms.

Books recommended

1. Ruttner, F., Fundamentals of Limnology, University of Tronto Press, Tronto, 1975.
2. Reid, G.K. & Wood, R.D., Ecology of Inland Waters and Estuaries , Van Nostrand Reinhold Publishing Co., New York, 1975.
3. Welch, P.S., Limnology, McGraw Hill Book Co., New York, 1952.
4. Odum, E.P., Fundamentals of Ecology, Saunders Co., Philadelphia, 2004.

PRACTICALS

Practical based on both theory papers I & II:

I. Study of permanent slides of mammalian ovary and testis.
II. Study of different techniques of contraception through charts/models/video clippings.
III. Study of artificial insemination, egg production through charts/models/video clippings.
IV. Study of components of lake ecosystem and grazing type of food chain.
V. Physico-chemical characteristics of freshwater environment. Temperature, Light. turbidity, current of water, density, pH, dissolved O_2, CO_2 and nutrients.
VI. Ecological succession in an aquatic habitat in the laboratory.

Scheme for Conduct of Practical Examination

Max. Marks	: 20
Practical Exam.	: 18 marks
Internal Assessment	: 2 marks

Note : 1. Practical will be of 4 hrs. duration.

2. The students will be required to submit in writing the principles, methods employed and precautions to be observed wherever necessary within 1 hr. of the start of examination.

I	Draw a labeled sketch of techniques of contraception/artificial insemination.	(3)
II	Determine the physico-chemical factors in a given sample of fresh water. Write the procedure followed.	(4)
III	Draw labeled diagram of food chain (in aquatic/terrestrial environment)	(2)
IV	Identify the cells/part in slides A & B. Give reasons for identification and name the hormone secreted by it.	(3)
V.	Note book and charts	(3)
VI.	Viva-Voce.	(3)

****

B.A. (Honours) MUSIC (INDIAN CLASSICAL DANCE)

SEMESTER-V

General Instructions:-

1) In case of the private candidates, there will be no internal assessment and the marks obtained in the external assessment of the practical examination shall be proportionately increased.

2) There would not be more than eight students in one section in practical examination.

3) There would be upto eight students in one section in practical class.

4) In all, nine questions will be set from the whole syllabus. The question paper will be divided into five units. First four units will contain two questions each, out of which the candidates are to attempt one question from each unit, the ninth question of fifth unit is compulsory and is consists of 13 short answer questions (covering entire syllabus i.e theory & practical) out of which students have to attempt 09 questions of 01 marks each.

5) No electronic Instruments will be allowed for lehra in practical examination.

6) While sending the syllabus to paper setter in theory, the syllabus prescribed for the practical paper should also be sent.

Paper-A: THEORY (Duration 45 minutes, 02 theory periods per week) : 45 Marks
Paper-B: PRACTICAL (Duration 45 minutes, 06 practical periods per week) : 45 Marks

Paper-A Theory

Maximum Marks : 50 marks
Theory : 45 marks
Int. Assessment : 05marks
Time : 3 Hours

Unit-I

1. Definitions:- Pharmaishi Chakardar paran, Chakardar paran, Hela, Kataksh, Anghar
2. Eyebrow movements
3. Comparison of Gat Nikas and Gat Bhav

Unit-II

1. Knowledge of dance forms:- Kuchipudi, Kathak
2. Costumes used in kathak in mughal and present period
3. Dance and festivals

Unit-III

1. Knowledge of modern dance
2. Contribution of Pt. Birju Maharaj in the field of kathak dance
3. Description of tribal dance i.e. Sammi and Santhal

Unit-IV

1. Notation of Thaat, Amad, Tora, Chakardar- Paran, Chatusjati Paran, Kavit in Teentaal2.
2. Notation of Thaat, Amad, Uthan, Tora, Ganesh Paran in swari Taal (15 Matra)
3. Notation of Tora, Tukra, Paran in sultaal (10 Matra)
4. Nagma of above mentioned Taals
5. Ekgun, Dugun, Tigun, Chaugun Layakries of above Taals prescribed in course

Unit-V

The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.

Paper- B Practical

Maximum Marks : 50 marks
Theory : 45 marks
Int. Assessment : 05marks
Time : 20 minutes

1. Teentaal (16 Matra)
   Thaat-1
   Amad-1
   Tora-2
   Chakardar Paran-1
   Chatusjati Paran-1
   Kavit-1

2. Swari Taal (15 Mara)
   Thaat-1
   Amad-1
   Uthan-1
   Tora-2
   Ganesh Paran-1

3. Sool Taal (10 Matra)
   Tora-2
   Tukra-1
   Paran-1

4. Gat Nikas :- Thaat and Murli
5. Paltas in Teentaal
6. Practical demonstration of Sammi and Naatti
7. Play Nagma in Teentaal and Swari Taal

Books Recommended

1. Bharat Ke Lok Nritya : Dr. Laxmi Narayan Garg
2. Folk Dance of Punjabi : Aarohi Walia
3. Natyeshwartar Ka Sangeet Vivechan : Puru Dhadhach
4. Nrityesutram : Puru Dhadhach
5. Nritye Nibandh : Puru Dhadhach
6. Pachchatye Nritye Kala : Puru Dhadhach
7. Kathak Preveshika : Tirth Ram Azad
8. Kathak Ke Pracheen Nritaang : Geeta Raguvir
9. Kal Aaj Aur Kal : Shikha Shukla
10. Books prescribed of B.A. Indian Classical Dance (General)

****

B.A. (Honours) MUSIC (INDIAN CLASSICAL DANCE)

SEMESTER-VI

General Instructions:-

1. In case of the private candidates, there will be no internal assessment and the marks obtained in the external assessment of the practical examination shall be proportionately increased.
2. There would not be more than eight students in one section in practical examination.
3. There would be upto eight students in one section in practical class.
4. In all, nine questions will be set from the whole syllabus. The question paper will be divided into five units. First four units will contain two questions each, out of which the candidates are to attempt one question from each unit, the ninth question of fifth unit is compulsory and is consists of 13 short answer questions (covering entire syllabus i.e theory & practical) out of which students have to attempt 09 questions of 01 marks each.
5. No electronic Instruments will be allowed for lehra in practical examination.
6. While sending the syllabus to paper setter in theory, the syllabus prescribed for the practical paper should also be sent.

Paper-A: THEORY (Duration 45 minutes, 02 theory periods per week) : 45 Marks
Paper-B: PRACTICAL (Duration 45 minutes, 06 practical periods per week) : 45 Marks

Paper-A Theory

Maximum Marks : 50 marks
Theory : 45 marks
Int. Assessment : 05marks
Time : 3 Hours

Unit-I

1. Definitions: - Chaturang, Trivat, Tarana, Sargam, Palta.
2. Neck Movements
3. Brief note on Choreography

Unit-II

1. Knowledge of Dance forms:- Kathakali and Kathak
2. Contribution of leading Institutions of Kathak Dance
3. Importance of Thumri and Hori in Kathak Dance

Unit-III

1. Contribution of Pt. Rajinder Gangani in the field of Dance
2. Status of Dance in Society
3. Detailed knowledge of dance

Unit-IV

1. Notation of Thaat, Amad, Uthan, Tora, Mishrjati -Paran, Kavit, Premlu in Teentaal
2. Notation of Thaat, Amad, Tora, Kavit in Basant Taal
3. Notation of Thaat, Tora, Premlu, Shiv Paran in Dhamar Taal.
4. Nagma of above mentioned Taals
5. Ekgun,Dugun, Chaugun, Layakaries of above mentioned Taals

Unit-V

The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.

Paper-B Practical

Maximum Marks : 50 marks
Theory : 45 marks
Int. Assessment : 05marks
Time : 20 minutes

1. Teentaal (16 Matra)
   - Thaat-1
   - Uthan -1
   - Amad-1
   - Tora-2
   - Mishrjati Paran-1
   - Kavit-1
   - Paremelu-1
2. Basant (9 Mara)
   - Thaat-1
   - Amad-1
   - Tora-2
   - Kavit-1
3. Dhamar (14 Matra)
   - Thaat-1
   - Tora-2
   - Premelu-1
   - Shiv Paran-1
4. Gat Nikas – Ghungat, Gagri
5. Paltas in Teentaal
6. Practical demonstration in Luddi and Haryanvi
7. Play Nagma in Teentaal and Dhamar

Books Recommended

1. Bharat Ke Lok Nritya : Dr. Laxmi Narayan Garg
2. Folk Dance of Punjabi : Aarohi Walia
3. Natyeshwartar Ka Sangeet Vivechan : Puru Dhadhach
4. Nrityesutram : Puru Dhadhach
5. Nritye Nibandh : Puru Dhadhach
6. Pachchatye Nritye Kala : Puru Dhadhach
7. Kathak Preveshika : Tirth Ram Azad
8. Kathak Ke Pracheen Nritaang : Geeta Raguvir
9. Kal Aaj Aur Kal : Shikha Shukla
10. Books prescribed of B.A. Indian Classical Dance (General)

10. ** *Elective Vocational Subject (one of the following) :* *Pre-requisite subject at +2 level*

1.	Mass Communication –Video Production	Any
2.	Functional English	English
3.	Advertising, Sales Promotion & Sales Management	Any
4.	Foreign Trade, Practices and Procedures	Preferably with Economics or Commerce
5.	Office Management & Secretarial Practice	Any
6.	Computer Applications	Preferably Computer
7.	Functional Hindi	Hindi
8.	Tax Procedures & Practices	Accountancy/Business Studies
9.	Principles and Practice of Insurance	Any
10.	Information Technology	Any
11.	Fashion Designing	Any
12.	Early Childhood Care & Education	Any

**A student who opts for Computer Science as an Elective subject shall not take up Computer Applications/Information Technology as Elective Vocational subject and vice-versa.

Note :- Syllabus for the Subject at Sr. No. 1 is not framed.

FOR B.SC. (GENERAL) CANDIDATES :

(Besides the compulsory subject, a student shall offer any three elective subjects)

A	*Elective Vocational Subject*	*Other Two Elective Subjects*	*Pre-requisite subjects at +2 level*
1.	Clinical Nutrition Dietetics	Chemistry, Physics & Botany	PCB*
2.	Bio-Technology	Chemistry, Botany or Zoology	PCB
3.	Seed Technology	Botany, Chemistry	PCB
4.	Industrial Fish & Fishery	Zoology, Chemistry	PCB
5.	Instrumentation	Physics, Mathematics	PCM
6.	Mass Communication Video Production	Any two Science Subjects	Any
7.	Electronic Equipment Maintenance **(Kept In Abeyance)**	Physics, Chemistry/Maths.	PCM
8.	Computer Applications	Any two Science Subjects	Preferably Computer
9.	Industrial Chemistry	Chem., Maths./Botany/Zoology	PCM/B
10.	Industrial Microbiology	Chemistry and Botany or Zoology	PCB
11.	Food Science & Quality Control **(Kept In Abeyance)**	Chemistry and Botany/Zoology	PCB
12.	Information Technology	Any	Any

B			
13.	Bioinformatics, **Botany/Zoology*** and any one of the following Mathematics/Physics/Chemistry/Computer Science	:	PCM/PCB
14.	Biotechnology, **Botany/Zoology*** and any one of the following Mathematics/Physics/Chemistry/Computer Science	:	PCM/PCB
15.	Electronics : Physics + Electronics +Mathematics	:	PCM
	OR		
	Chemistry + Electronics + Computer Science		
16.	1. Agriculture, Botany & Zoology	:	PCB
	2. Agriculture, Biotechnology, Botany/Zoology	:	PCB
	3. Agriculture, Microbiology, Chemistry/Botany/Zoology	:	PCB
	4. Agriculture, Chemistry, Physics/Botany/Zoology	:	PCB

* P stands for Physics, C stands for Chemistry, B for Biology and M for Mathematics.
** B for Botany.
*** Z for Zoology

Note :- Syllabus for the Subject at Sr. No. 1, 3, 4, 5 and 6 are not framed.

Guidelines for continuous internal assessment (10%) for regular students of Under-Graduate courses (semester system):

Criteria for Internal Assessment:

(i)	Class test	=	5%
(ii)	Academic Activities (Seminar, Project, Assignment)	=	3%
(iii)	Attendance	=	2%

For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will be proportionately be increased to maximum marks of the paper in lieu of internal assessment.

PANJAB UNIVERSITY, CHANDIGARH

OUTLINES OF TESTS, SYLLABI AND COURSES OF READING IN VARIOUS SUBJECTS FOR B.A./B.Sc. (GENERAL) FIRST YEAR (SEMESTER SYSTEM) i.e. FIRST SEMESTER NOVEMBER/DECEMBER 2020 AND SECOND SEMESTER APRIL/MAY 2021, EXAMINATIONS.

ENGLISH (Compulsory)

SEMESTER – I

Max. Marks	:	50
Theory	:	45 marks
Internal Assessment	:	05 marks
Time	:	03 Hours

Text Prescribed :

English at Work, (Selection from Poetry & Prose), Eds T. Vijay Kumar, B. T. Seetha, A. V. Suresh Kumar, Y. L. Srinivas, New Delhi: Macmillan India Ltd. 2012, revised edition.

For foreign students Paragraph Writing on Proverbs in not more than 100 words.

ਪੰਜਾਬੀ (ਲਾਜਮੀ)

ਬੀ.ਏ. ਅਤੇ ਬੀ.ਐਸ.ਸੀ. ਭਾਗ ਪਹਿਲਾ ਦਸੰਬਰ 2020 ਦੇ ਇਮਤਿਹਾਨ ਲਈ

(ਬੀ.ਏ. ਅਤੇ ਬੀ.ਐਸ.ਸੀ. ਦੇ ਵਿਦਿਆਰਥੀਆਂ ਲਈ)

ਸਮੈਸਟਰ ਪਹਿਲਾ

ਕੁੱਲ ਅੰਕ: 50
ਲਿਖਤੀ: 45
ਇੰਟਰਨਲ ਅਸੈਸਮੈਂਟ: 5
ਸਮਾਂ:3 ਘੰਟੇ

ਪਾਠਕ੍ਰਮ

1. ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਕਵਿਤਾ ਦਾ ਅਧਿਐਨ 20 ਅੰਕ
2. ਲੇਖ ਰਚਨਾ 10 ਅੰਕ
3. ਸੰਖੇਪ ਰਚਨਾ 5 ਅੰਕ
4. ਵਿਆਕਰਨ : ਸਿਧਾਂਤ ਤੇ ਵਿਹਾਰ 10 ਅੰਕ

ਕੋਰਸ

1. **ਕਾਵਿ-ਸੁਮੇਲ**, (ਸੰਪਾਦਕ) ਡਾ. ਕਰਮਜੀਤ ਸਿੰਘ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਊਰੋ, ਪੰਜਾਬ ਯੂਨੀਵਰਸਿਟੀ, ਚੰਡੀਗੜ੍ਹ ।
(ਹਰਭਜਨ ਸਿੰਘ ਹੁੰਦਲ ਅਤੇ ਹਰਭਜਨ ਸਿੰਘ ਰੈਣੂ ਸਿਲੇਬਸ ਵਿਚ ਨਹੀਂ ਹਨ)

ਯੂਨਿਟ ਅਤੇ ਥੀਮ

1. (ੳ) ਕਾਵਿ-ਸੁਮੇਲ ਪੁਸਤਕ ਵਿਚੋਂ ਪ੍ਰਸੰਗ ਸਹਿਤ ਵਿਆਖਿਆ (ਦੋ ਵਿਚੋਂ ਇਕ) 5 ਅੰਕ

(ਅ) ਕਵਿਤਾ ਦਾ ਸਾਰ ਤੇ ਕੇਂਦਰੀ ਭਾਵ (ਦੋ ਵਿਚੋਂ ਇਕ) 5+5= 10 ਅੰਕ

2 ਕਾਵਿ-ਸੰਗ੍ਰਹਿ ਵਿਚੋਂ ਸੰਖੇਪ ਉੱਤਰਾਂ ਵਾਲੇ ਪ੍ਰਸ਼ਨ (ਉੱਤਰ ਤਿੰਨ ਸਤਰਾਂ ਤੋ ਵੱਧ ਨਾ ਹੋਵੇ) (ਅੱਠ ਪ੍ਰਸ਼ਨਾ ਵਿਚੋਂ ਪੰਜ ਦੇ ਉੱਤਰ ਦਿਓ) 5×1= 5 ਅੰਕ

3. ਲੇਖ ਰਚਨਾ (500 ਸ਼ਬਦਾਂ ਵਿਚ) ਚਲੰਤ ਮਸਲਿਆਂ ਬਾਰੇ 10 ਅੰਕ
(ਚਾਰ ਵਿਸ਼ਿਆਂ ਵਿਚੋ ਕੋਈ ਇਕ ਕਰਨਾ)

4. ਸੰਖੇਪ ਰਚਨਾ 5 ਅੰਕ

5. ਵਿਆਕਰਨ : ਸਿਧਾਂਤ ਤੇ ਵਿਹਾਰ 6 ਅੰਕ

(i) ਵਿਆਕਰਨ : ਵਿਆਕਰਨ ਦੀ ਪਰਿਭਾਸ਼ਾ, ਮਹਤੱਵ ਤੇ ਤੱਤ (ਵਾਕ ਪ੍ਰਬੰਧ, ਰੂਪ ਪ੍ਰਬੰਧ, ਧੁਨੀ ਪ੍ਰਬੰਧ ਤੇ ਲਿਖਤ ਪ੍ਰਬੰਧ (ਸੰਖੇਪ ਜਾਣ ਪਛਾਣ) (ਦੋ ਵਿਚੋਂ ਇਕ ਪ੍ਰਸ਼ਨ ਹੱਲ ਕਰਨਾ ਹੈ)

(ii) ਵਿਹਾਰਕ ਪ੍ਰਸ਼ਨ

ਨੋਟ : ਪੇਪਰ ਸੈਟਰ ਵਲੋ ਪੰਜਾਬੀ ਵਿਆਕਰਨ ਦੇ ਹਵਾਲੇ ਨਾਲ ਹੀ ਸੰਖੇਪ ਉੱਤਰਾਂ ਵਾਲੇ ਵਿਹਾਰਕ ਪ੍ਰਸ਼ਨ ਪੁੱਛੇ ਜਾਣ। (ਚਾਰ ਵਿਚੋਂ ਦੋ ਪ੍ਰਸ਼ਨ ਹੱਲ ਕਰਨੇ ਹਨ) 2+2= 4 ਅੰਕ

ਨੋਟ: 1. ਟੈਕਸਟ ਲਈ ਹਫ਼ਤੇ ਦੇ ਛੇ ਪੀਰੀਅਡ।
2. ਕੰਪੋਜੀਸ਼ਨ ਲਈ 25–30 ਵਿਦਿਆਰਥੀਆਂ ਦਾ ਗਰੁੱਪ ਅਤੇ ਹਫ਼ਤੇ ਦੇ ਤਿੰਨ ਹੋਰ ਪੀਰੀਅਡ।
3. ਹਫ਼ਤੇ ਦੇ 6+3 = 9 ਪੀਰੀਅਡ।

ਪੰਜਾਬੀ (ਲਾਜ਼ਮੀ)
ਬੀ.ਏ. ਅਤੇ ਬੀ.ਐਸ.ਸੀ ਭਾਗ ਪਹਿਲਾ ਅਪ੍ਰੈਲ/ਮਈ 2021 ਦੇ ਇਮਤਿਹਾਨ ਲਈ
(ਬੀ.ਏ. ਅਤੇ ਬੀ.ਐਸ.ਸੀ ਦੇ ਵਿਦਿਆਰਥੀਆਂ ਲਈ)
ਸਮੈਸਟਰ ਦੂਜਾ

ਕੁਲ ਅੰਕ: 50
ਲਿਖਤੀ ਅੰਕ: 45
ਇੰਟਰਨਲ ਅਸੈਸਮੈਂਟ: 5
ਸਮਾਂ : 3 ਘੰਟੇ

ਪਾਠਕ੍ਰਮ

1. ਪੰਜਾਬੀ ਕਹਾਣੀਆਂ ਦਾ ਅਧਿਐਨ — 20 ਅੰਕ
2. ਸੂਚਨਾ ਹਿਤ ਨੋਟਿਸ — 10 ਅੰਕ
3. ਮੁਹਾਵਰੇ — 5 ਅੰਕ
4. ਵਿਆਕਰਨ : ਸਿਧਾਂਤ ਤੇ ਵਿਹਾਰ — 10 ਅੰਕ

ਕੋਰਸ

1. **ਕਥਾ ਕਹਾਣੀ**, (ਸੰਪਾਦਕ) ਡਾ. ਧਨਵੰਤ ਕੌਰ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਊਰੋ, ਪੰਜਾਬ ਯੂਨੀਵਰਸਿਟੀ, ਚੰਡੀਗੜ੍ਹ

ਯੂਨਿਟ ਅਤੇ ਥੀਮ

1. (ੳ) 'ਕਥਾ ਕਹਾਣੀ' ਪੁਸਤਕ ਵਿਚੋਂ ਕਿਸੇ ਇਕ ਕਹਾਣੀ ਦਾ ਵਿਸ਼ਾ ਦੱਸ ਕੇ ਸਾਰ ਲਿਖਣਾ (ਤਿੰਨ ਵਿਚੋਂ ਇਕ) — 4+6= 10 ਅੰਕ

   (ਅ) ਕਹਾਣੀ-ਸੰਗ੍ਰਹਿ ਵਿਚ ਸੰਮਲਿਤ ਕਹਾਣੀਆਂ ਵਿਚੋਂ ਪਾਤਰ ਚਿਤਰਣ ਕਰਨਾ (ਤਿੰਨ ਵਿਚੋਂ ਇਕ) — 5 ਅੰਕ

2. ਕਹਾਣੀ-ਸੰਗ੍ਰਹਿ ਵਿਚੋਂ ਸੰਖੇਪ ਉੱਤਰਾਂ ਵਾਲੇ ਪ੍ਰਸ਼ਨ (ਉੱਤਰ ਤਿੰਨ ਸਤਰਾਂ ਤੋਂ ਵੱਧ ਨਾ ਹੋਵੇ।) (ਅੱਠ ਵਿਚੋਂ ਪੰਜ ਪ੍ਰਸ਼ਨ ਕਰਨੇ) — 5×1= 5 ਅੰਕ

3 ਸੂਚਨਾ ਹਿਤ ਨੋਟਿਸ ਲਿਖਣਾ (ਸਾਹਿਤਕ, ਸੱਭਿਆਚਾਰਕ ਤੇ ਖੇਡ ਖੇਤਰ ਨਾਲ ਸੰਬੰਧਤ) — 10 ਅੰਕ

4 ਮੁਹਾਵਰੇ : ਅਰਥ ਦਸ ਕੇ ਵਾਕ ਬਣਾਉਣੇ (ਸੱਤ ਵਿਚੋਂ ਕੋਈ ਪੰਜ ਕਰਨੇ) — 5 ਅੰਕ
(ਮੁਹਾਵਰੇ ਕਾਲਜ ਪੰਜਾਬੀ ਵਿਆਕਰਣ ਵਿਚੋਂ ਹੀ ਪੁੱਛੇ ਜਾਣ)

5 ਵਿਆਕਰਨ : ਸਿਧਾਂਤ ਤੇ ਵਿਹਾਰ — 6 ਅੰਕ

(i) ਧੁਨੀ ਤੇ ਧੁਨੀ ਗ੍ਰਾਮ : ਧੁਨੀ ਦੀ ਪਰਿਭਾਸ਼ਾ, ਖੰਡੀ ਤੇ ਅਖੰਡੀ ਧੁਨੀਆਂ (ਸੰਖੇਪ ਜਾਣ ਪਛਾਣ)
ਪੰਜਾਬੀ ਸਵਰ ਧੁਨੀਆਂ ਤੇ ਵਿਅੰਜਨ ਧੁਨੀਆਂ : ਪਰਿਭਾਸ਼ਾ ਤੇ ਵਰਗੀਕਰਨ (ਦੋ ਪ੍ਰਸ਼ਨਾਂ ਵਿਚੋ ਇਕ ਪ੍ਰਸ਼ਨ ਕਰਨਾ)

(ii) ਵਿਹਾਰਕ ਪ੍ਰਸ਼ਨ — 2+2= 4 ਅੰਕ
ਨੋਟ : ਪੇਪਰ ਸੈਟਰ ਵਲੋ ਪੰਜਾਬੀ ਵਿਆਕਰਨ ਦੇ ਹਵਾਲੇ ਨਾਲ ਹੀ ਸੰਖੇਪ ਉੱਤਰਾਂ ਵਾਲੇ ਵਿਹਾਰਕ ਪ੍ਰਸ਼ਨ ਪੁੱਛੇ ਜਾਣ । (ਚਾਰ ਵਿਚੋਂ ਦੋ ਪ੍ਰਸ਼ਨ ਹੱਲ ਕਰਨੇ ਹਨ)

ਸਹਾਇਕ ਪੁਸਤਕਾਂ :

1. ਪੰਜਾਬੀ ਸੰਚਾਰ ਯੋਗਤਾ ਅਭਿਆਸ, ਪੰਜਾਬ ਸਟੇਟ ਯੂਨੀਵਰਸਿਟੀ ਟੈਕਸਟ ਬੁੱਕ ਬੋਰਡ, ਚੰਡੀਗੜ੍ਹ।

Total: 100 Marks

Paper-A THEORY

UNIT-I

1. Brief history of Tabla
2. Elementry knowledge of Taal
3. Sangeet (definition & Importance).

UNIT-II

1. Definitions : Sam, Tali, Khali, Vibhag, Bol, Theka, Avartan, Thah, Dugun
2. Brief description of Tabla.
3. Description of playing techniques of ten vernas.

UNIT-III

1. Life sketches and contributions of the following:-
    a. Ustad Siddhar Khan
    b. Miyan Kadar Baksh
    c. Pt. Chatur Lal

UNIT-IV

1. Ability to write in notation the composition prescribed Taal: (Teentaal, Chautal, Kehrva) Quaida, Simple Tukra, Tihai
2. To write description of Taal of the syllabus.
3. To write the notation of Taal in Single and Double.

UNIT-V

1. The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.

Paper-B PRACTICAL

1. Taals Prescribed Teen Taal, Chautaal, Kehrwa
2. Laggi in Kehrwa Taal and its variety.
3. Teen Taal (Peshkara, Two Paltas, Two Kaydas, Two Mukhra)
4. Chautaal (Theka in Thah and Dugun)
5. Practice of playing the above Taals with Vocal and Instrumental performances.
6. Ability to play Nagma/Lehra on Harmonium in Teen Taal.

Books Recommended:

1. Taal Prabhakar Prashnottari : G.C. Srivastava.
2. Tabla Tarang : B.S. Nigam
3. Taal Prakash : Sangeet Karyalaya, Hathras.
4. Avanaddha Vadhya : M.P. Sharma
5. Hamare Sangeet Ratan : Sangeet Karyalaya, Hathras.
6. Tabla ki Utpatti Evam Vikas : Yogmaya Sharma
7. Tabla Vadan Part-1 : Jagmohan Sharma
8. Tala Parichya Part-1 : G.C. Srivastava.

MUSIC (Tabla)

SEMESTER-II

GENERAL INSTRUCTIONS:

1. In case of the private candidates, there will be no internal assessment and the marks obtained in the external assessment of the practical examination shall be proportionately increased.
2. In all, nine questions will be set from the whole syllabus of Semester-II. The question paper will be divided into five units. First four units contain 02 questions each, out of which the candidates are to attempt one question from each unit, unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.
3. Harmonium/Sarangi will be allowed to play Nagma/Lehra. No electronic Lehra machine will be allowed for practical examination.
4. Practical Paper shall be set from the syllabus for Paper-B (Practical).

Paper-A:	**THEORY** (3 Hours duration)	:	45 Marks
Paper-B:	**PRACTICAL** (20 minutes duration).	:	45 Marks
(i)	Viva	:	30 Marks
(ii)	Harmonium	:	05 Marks
(iii)	Tabla (Tuning)	:	05 Marks
(iv)	Padhant on Hand	:	05 Marks
Internal Assessment (Theory & Practical) (5+5)		:	10 Marks
	Total	:	**100 Marks**

Paper-A Theory

UNIT- I

1. Origin and development of Tabla
2. Definition of Baaj and Chhand.
3. Brief description of Bhatkhande Taal notation system.

UNIT- II

1. Importance of Taal in music.
2. Elementary knowledge of the following musical terms (not more than 100 words)
   Matra, Laya (Vilambit, Madya, Drut) Tukra, Ateet, Anagat
3. Gharana:- Definition and importance in the context of Tabla.

UNIT- III

1. Life sketches and contributions of the following:-
   a. Ustad Allah Rakha Khan.
   b. Ustad Ahmad Jaan Thirkava.
   c. Pt. Samta Parshad (Gudai Maharaj)

UNIT- IV

1. Teental, Ektaal, Dadra.
2. To write description of Taals of your syllabus.
3. To write the notation of Taal in Single Double and Chaugun

UNIT- V

1. The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.

Paper-B: PRACTICAL

1. Taals prescribed Dadra, Ektaal, Teen Taal
2. Laggi in Dadra and Kehrwa Taal.
3. Ektaal (One Qaida, Two Tukra, Two Tihai, One Paran)
4. Teentaal (One Rela, One Chakradar Paran, One Tukra, One Mohra)
5. Practice of Dholak playing in Kehrwa Taal.
6. Ability to play Nagma/Lehra on Harmonium in Ektaal.
7. Tuning of Tabla.

Books Recommended:

1. Tala Prabhakar Prashnottari : G.C. Srivastava.
2. Tabla Tarang : B.S. Nigam
3. Taal Prakash : Sangeet Karyalaya, Hathras.
4. Avanaddha Vadya : M.P. Sharma
5. Harmare Sangeet Ratan : Sangeet Karyalaya, Hathras.
6. Tabla ki Utpatti Evam Vikas : Yogmaya Sharma
7. Tabla Vadan Part-1 : Jagmohan Sharma
8. Tala Parichya Part-1 : G.C. Srivastava.

MUSIC (Indian Classical Dance)

SEMESTER-I

GENERAL INSTRUCTIONS:

1 In case of the private candidates, there would be no internal assessment and the marks obtained in the external assessment of the practical examination shall be proportionately increased.
2 There would be upto ten students in one section in practical class.
3 There would not be more than eight students in a batch for practical examination.
4 No electronic Instruments will be allowed for lehra in practical examination
5 The candidate can take Dance along with Vocal music.
6 The candidate can also take instrumental music with Dance.
7 While sending the syllabus to paper-setter in theory, the syllabus prescribed for the practical paper should also be sent.
8 In all, *nine* questions will be set. The question paper will be divided into five Units. Four Units will contain two questions each and the candidates are required to attempt four questions selecting at least one question from each Unit. The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of 01 marks each.

THEORY (Time duration 3 hours.)	45 Marks
PRACTICAL (20 minutes duration)	45 Marks
Internal assessment (Theory and Practical) (5 + 5)	10 Marks

Paper-A : Theory

Unit –I

1. Origin of Tandava
2. Four Neck movements
3. Eight eye glances

Unit-II

1. Defination of Mudra. Explain Asamyukta Mudras based on Abhinaya Darpan.
2. Definition of the following terms:
   Tora, Salami, Theka, Tehai, Amad.
3. Brief study of Kathak Dance in Ancient period .

Unit-III

1. Definition of folk Dance.
2. A study of folk dances of Punjab, their costumes and background music.
3. A study of folk dance of Haryana, their costumes and background music.

Unit-IV

1. Notation of Tatkar and Theka in Ekgun, Dugun and Chaugun laykaries.
2. Notation of Amad, Tukra, Salami, Tora and Tihai in Teentaal.
3. Notation of Nagma in Teentaal.

Unit-V

1. The ninth question of unit v is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each

Practical: Paper-B

(A) Teen Taal:

i)Tatkar in Ekgun, Dugun and Chaugun laykaries. Theka and Tatkar with Ekgun. Dugun and Chaugun Layakaries

ii) Salami - 1
iii) Amad - 1
iv) Tora - 4
v) Tihai - 1
vi) Tukra - 1

B) Practical of all the technical part in Teentaal on hand
C) Theka of Teentaal on hand in Ekgun and Dugun laykaries
D) Theka of Teentaal on table.

…….

MUSIC (Indian Classical Dance)

SEMESTER –II

2. There would be upto ten students in one section in practical class.
3. There would not be more than eight students in a batch for practical examination.
4. No electronic Instruments will be allowed for lehra in practical examination
5. The candidate can take Dance along with Vocal music.
6. The candidate can also take instrumental music with Dance.
7. While sending the syllabus to paper-setter in theory, the syllabus prescribed for the practical paper should also be sent.
8. In all, nine questions will be set. The question paper will be divided into five Units. Four Units will contain two questions each and the candidates are required to attempt four questions selecting at least one question from each Unit. The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of 01 marks each.

THEORY (Time duration 3 hours.)	45 Marks
PRACTICAL (20 minutes duration)	45 Marks
Internal assessment (Theory and Practical) (5 + 5)	10 Marks

Paper-A: THEORY

Unit –I

1. Study of Lasya Dance.
2. Six Eyebrow movements.
3. Nine Head movements.

Unit-II

1. Detail knowledge of Samyukta Mudras based on Abhinaya Darpan.
2. Essential characteristics of Bharatnatyam.
3. Detailed study of Kathak in mughal period.

Unit-III

1. Brief study of Abhinaya and its various parts.
2. Life sketch of Pt. Narayan Prasad.
3. Definition of Nritta, Nritya and Natya.

Unit IV

1. Notation of Theka of Jhaptaal in Ekgun, Dugun and Chougun layakaries.
2. Notation of Tatkar, Tora, Amad and Paran and Chakardar Paran in Jhaptaal.
3. Notation of Tatkar, Thaat, Tora, Tehai and Kavit in Teentaal.

Unit-V

1. The ninth question of unit v is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.

Paper-B : PRACTICAL

(A) Teen Taal:

i) Tatkar in teentaal in Ekgun, Dugun and Chougun layakaries.

ii) Thaat - 1

iii) Tora - 2

iv) Kavit - 1

v) Tihai - 1

(B) Jhaptaal:-

i) Tatkar in Ekgun, Dugun and Chaugun layakaries.

ii) Tora - 2

iii) Amad - 1

iv) Paran - 1

v) Chakardar paran - 1

(C) Practice of prescribed material in both the taals on hand.

(D) Practical knowledge of Samyukta Mudras.

(E) Ability to play nagma in teentaal on Harmonium.

(F) Ability to play theka of Jhaptaal on Tabla.

FINE ARTS

SEMESTER – I

Theory (History of Art)

Max. Marks	:	60
Written Paper	:	54 Marks
Internal Assessment	:	06 Marks
Total	:	60 Marks

Instruction to paper-setters

The paper-setter is required to set **9 questions** in all. **The candidate is to attempt 5 questions as per the instructions given in the question paper.**

The first question shall be of short answer type containing 9 questions, spread over the whole syllabus. Each question is to be answered in about 25 to 30 words. It shall carry 18 marks and shall be a **Compulsory** question.

8 questions are to be set from the entire syllabus consisting of 4 Units. Two questions will be set from each Unit and the candidates shall be given internal choice i.e. a candidate shall attempt one question from each Unit. So, the candidate shall attempt 4 questions in all out of 8 questions. **Each question** would be of **9 marks.**

Objectives :

The aim of the paper is to introduce to the students various schools, styles and phases of the developments in painting and sculpture in India and the West. The emphasis will be to make them aware of the different terms, concepts, forms and subject matter of these works.

Unit-I : History of Indian Painting

- Pre-historic paintings from Bhim–Betka .
- Ajanta Cave Painting: Shaddanta Jataka, Padmapani, Avalokitesvara, Dying Princess, Mahajanaka Jataka, Decorative ceiling panels from Cave No. 2.

Unit-II : History of Indian Sculpture

- Indus Valley Civilization - Seals, Metal Dancing Girl, Red Sandstone Torso, Bust of Priest from Mohenjodaro.
- Mauryan Art: Rampurva Bull Capital, Lion Capital from Sarnath, Didarganj Yakshi.

Unit-III : History of Western Art

- Greek Art - Standing Youth, Discobolus, Laocoon Group.

Unit-IV : Definition of Key Terms and General Concepts

- Colour: Colour Theory, Colour wheel, Colour terminology and meaning of colour, Line - different types of lines and its meaning, Perspective: Linear and Aerial, Foreshortening.

Pedagogy :

The students are expected to familiarize themselves with the art forms as seen from the books, slides and related films. Visits to Museums, exhibitions and art galleries are a part of study.

Suggested Readings :

1. Kramrisch, Stella : Survey of Painting in the Deccan, Oriental Books Corporation, New Delhi, 1983.
2. Majumdar, R.C. (editor) : The History and Culture of Indian People, Vols. I, II and III (Sculpture and Painting Sections only) Bhartiya Vidya Bhawan, Bombay, 1988, 1990, 1996.
3. Gupte and Mahajan : Ajanta, Ellora and Aurangabad Caves, D.B. Taraporevala Sons & Co. Pvt. Ltd., Bombay, 1962.
4. Rowland, Benjamin : The Art and Architecture of India, Penguin Books, Great Britain, 1959.
5. Saraswati, S.K. : A Survey of Indian Sculpture, Munshiram Manoharlal Publishers Pvt. Ltd., New Delhi, 1975.
6. Ray, N.R. : An Approach to Indian Art, Publication Bureau, Panjab University, Chandigarh, 1974.
7. Barrett, D. and Gray, B : Painting of India, The World Publishing Co., Ohio, 1963.
8. Archer, W.G. : India and Modern Art, George Allen & Unwin Limited, London, 1959.
9. Brown, Percy : Indian Painting under the Mughals, Cosmo Publications, New Delhi, 1981.
10. Aggarwala,V.S. : Heritage of Indian Art, Publications Division, Ministry of Information & Broadcasting, Govt. of India, New Delhi, 1976.
11. Aggarwala,V.S. : Indian Art (English), Varanasi, 1965.
12. Aggarwala,V.S. : Bhartiya Kala (Hindi), Prithvi Prakashan, 1977.
13. Read, Herbert : Meaning of Art, Faber & Faber, London, 1972.
14. Janson, H.W. : History of Art, Thames & Hudson, London, 2001.
15. Gardener, Helen : Art Through the Ages, Harcourt Brace & Co., U.S.A., 1991.
16. Gombrich, E.H. : The Story of Art, Phaidon Press Limited, New York, 1995.

PRACTICAL

This paper consists of three sections :

1.	**Still Life Study**	**Max. Marks : 30**	**Max.Time: 5 hours**
2.	**Drawing from Life**	**Max. Marks : 30**	**Max.Time: 5 hours**
3.	**Landscape Painting (on the spot)**	**Max.Marks: 30**	**Max.Time: 5 hours**
		Total : 90 Marks	

SECTION-I Still Life Study (30 Marks)

1. Drawing and Painting of a number of objects and to study the proportion, volume and rhythmic relationship of masses, study and rendering of texture of different objects.
2. Number of objects : Three objects with display at the back.
3. Medium : Pencil, charcoal or Pastel colours.
4. Size : ½ Imperial sheet

SECTION-II Drawing from Life (30 Marks)

1. Portrait : From Live Model or Cast in Monochrome
2. Medium: Pencil Shading, charcoal
3. Size: ½ Imperial size sheet.
4. Emphasis should be on structure, proportion, foreshortening, Textural Values, Posture & Individuality of the model.

SECTION-III Landscape Painting (on the spot) (30 Marks)

1. Landscape painting: Study relationship of objects, their arrangements in the foreground, middle and distance, texture, relative size of masses, tones and colours, use of linear and aerial perspective.
2. Medium : Pencil Sketching or Pastel, Pencil colours.
3. Size : ½ Imperial sheet

SESSIONAL MARKS : 50 (Based on work related equally to 3 sections).

Sessional marks will be given on the basis of the work done during the session in all the three sections. At least, three works will be submitted in each section. Sessional marks shall be given by external and internal examiners jointly. In case of difference of opinion, marking may be done separately by each examiner giving marks out of 50% of the aggregate of the sessional marks.

NOTE :

1. Choice of option to be offered would depend on the facility available in each Institution concerned.
2. Minimum of 9 hours' teaching per week be assigned to the subjects and out of nine hours, six hours be earmarked for practical classes and three hours for theory classes (per week)

ECONOMICS

SEMESTER – I

Paper : MICRO ECONOMICS

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 hours

Course Objective :

Microeconomics is concerned with the analysis of economic phenomena from the perspective of the individual. The course covers the basic concepts and tools needed to undertake the analysis of such problems that arise due to the law of scarcity. The course also aims at introduction of the functioning of competitive and noncompetitive product markets and performance of the markets for resources. The students are expected to develop rudimentary understanding of how and why consumers, firms, and markets in the economy function the way they do.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

The syllabus has been divided into four units.

(i) There shall be **9** questions in all. All questions carry equal marks. The first question shall be short answer type containing **12** short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any **9** short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** Units. Each Unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (ii) in the question paper.

Unit-I

Introduction : Definition, Meaning, Nature and Scope of Economics.

Theory of Demand and consumer Behaviuor : Utility Analysis and Indifference Curve Analysis. Law of Demand and its Exceptions, Elasticity of Demand and its measurement, Consumer Surplus and its measurement.

Unit-II

Theory of Production and Costs: Concept, Law of Variable Proportions and Laws of Returns to Scale, Cost Concepts and Cost Curves in Short and Long periods (Traditional Theory of Costs).
Market Forms and Revenue: Behaviour of Average Revenue and Marginal Revenue under Perfect Competition and Imperfect Competition. Relationship between Average Revenue, Marginal Revenue and Elasticity of Demand.

Unit-III

Price and Output Determination: Price and Output Determination of the Firm and Industry under Perfect Competition, Monopoly and Monopolistic Competition in Short and Long run, Concept of Discriminating Monopoly.

Unit-IV

Distribution: Marginal Productivity and Modern Theories of Wage Determination, Ricardian and Modern Theories of Rent. Classical and Loanable Funds Theory of Interest, Risk and Uncertainty theories of Profit.

Recommended Readings:

1. Chaudhary, Kalyanjit Roy(2012) : Modern Micro Economics, Vol. I & II Bookland Publishers, New Delhi.
2. Chopra, P.N., Singh, Joginder & Grewal, P.S. (Punjabi Medium) (Latest Edition) : Price Theory and Distrubution, Kalyani Publishers, Ludhiana.
3. Lipsey, R.G. & Crystal, K.A.(2011) : Principles of Economics, Oxford University Press, New Delhi.
4. Samuelson, P.A. (trans. Piar Singh) (1972) : Arth-Shastar Ek Prarmbhik Vishleshan, Punjabi University, Patiala
5. Stonier, A.W.. & Hague, D.C. (2005) : A Text Book of Economic Theory.

Supplementary Readings:

1. Ahuja, H.. (2012) : Advanced Economic Theory, S.Chand & Co., New Delhi.
2. Chopra, P.N.(2012) : Micro Economics Theory and Welfare Economics, Kalyani Publishers, New Delhi.
3. Dwivedi, D.N. (2012) : Microeconomics-Theory and Applications, Pearson Education Delhi.

ECONOMICS

SEMESTER – II

Paper : MACRO ECONOMICS

Max. Marks	: 100
Theory	: 90 marks
Internal Assessment	: 10 marks
Time	: 3 hours

Course Objective:

This paper aims to familiarize the student with the generally accepted principles of macroeconomics. It deals with aggregates i.e. consumers as a whole, producers as a whole, exporters and importers as a whole, the effects of government spending and taxation, and the monetary policy of the central bank. The course includes the basic theories of determination of income, consumption, investment, employment, money and interest, inflation, Monetary and Fiscal policies, and business cycles.

INSTRUCTIONS FOR THE PAPER-SETTERS AND CANDIDATES:

The syllabus has been divided into four units.

(i) There shall be **9** questions in all. All questions carry equal marks. The first question shall be short answer type containing **12** short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any **9** short answer type question i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidate shall be given internal choice i.e. the candidates shall attempt one question from each unit – 4 in all.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (ii) in the question paper.

Unit-I

Introduction: Nature, Meaning and Scope of Macro-Economics.

Consumption Function:
Average and Marginal Propensity to Consume, Keynes' Psychological Law of Consumption.
Investment Function:
Types of Investment, Investment Demand Schedule and Factors Affecting Investment Decisions, Marginal Efficiency of Capital, Static and Dynamic Multiplier.

Unit-II

Determination of Income and Employment:
Classical and Keynesian Theories of Income, Output and Employment, Say's Law of Markets. Principle of Effective Demand.

Unit-III

Money and Banking:
Money : Definition, Functions and Role
Quantity Theory of Money: Fisher's Equation and Cambridge Equation, Keynesian Liquidity Preference Theory.
Banking: Major Functions of Commercial Banks and Process of Credit Creation.

Unit-IV

Inflation and Macro-Economic Policies:
Cost-push and Demand-pull Theories of Inflation, Measures to Control Inflation. Monetary and Fiscal Policies for Stabilization.

Trade Cycle: Meaning and Phases.

Recommended Readings:

1. Dernburg, T.F. & McDougal, D.M.(1983) : Macro Economics, McGraw Hill, New York.
2. Ghuman, Ranjit Singh (latest edition) : Antar-Rashtriya Arth Vigyan, Punjabi University, Patiala.
3. Shapiro, E. (1996) : Macroeconomic Analysis, Galgotia Pub.(P) Ltd., New Delhi.
4. Sharma, O.P. (Punjabi Medium) (latest edition) : Macro Economics, Punjabi University, Patiala.
5. Vaish, M.C. (2010) : Macro Economic Theory, Oxford Unversity, Press, New Delhi.

Supplementary Readings:

1. Ackley, Gardner (1985) : Macro Economic Theory, McMillan, New York.
2. Ahuja, H.L. (2004) : Macroeconomics Theory and Policy, S.Chand Pub. New Delhi.
3. Baird, C.W. (1982) : Elements of Modern Economics, West Publishing Company.
4. Dwivedi, D.N. (2012) : Macroeconomics-Theory and Policy, Tata McGraw Hill Publication House, New Delhi.

SOCIOLOGY

SEMESTER - I

FUNDAMENTALS OF SOCIOLOGY

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

(i) For written paper, the students will be required to attempt **five** questions in all. Question No. I will be **compulsory** comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt **nine** short answer type questions out of 12, i.e. 9 X 2 = 18 marks.
In addition to it, Question Nos. II to IX will consist of long answer (essay type) questions, two questions from each Unit with internal choice carrying 18 marks each i.e. 4 X 18 = 72 marks. .

(ii) On an average, 15 hours are to be devoted for each Unit.

(iii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (iii) in the question paper.

Objective :

This paper aims at introducing Fundamentals of Sociology to the beginners of the subjec, the basic understanding about Sociology as a discipline. Study of various terms, concepts and processes will help students in formulating a Sociological Viewpoint and an easy comprehension of the discipline at later stages.

Course Content :

Unit-I

Introduction to Sociology: Origin and Development; Nature and Significance.

Relationship of Sociology with other Social Sciences –Anthropology, History and Psychology.

Unit-II

Understanding Society: Meaning, Characteristics, Theories of Origin of Society – Organic and Social-Contract. Relationship between Individual and Society.

Social Groups - Meaning, Characteristics and Classification Primary and Secondary Groups Ingroups & Outgroups, Reference Group.

Unit-III

Culture: Meaning and Features, Culture and Civilization, Cultural Lag, Acculturation, Assimilation, Cultural Pluralism.

Dimensions of Culture: Cultural Trait, Cultural Patterns, Cultural Complexes, Cultural Relativism.

Unit-IV

Socialization: Meaning, Stages, Agencies and Theories of Mead and Cooley.
Social Control: Meaning, Types and Agencies – Formal and Informal

Essential Readings:

SOCIOLOGY

SEMESTER - II

SOCIOLOGY STRATIFICATION

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

(i) For written paper, the students will be required to attempt **five** questions in all. Question No. I will be **compulsory** comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt **nine** short answer type questions out of 12, i.e. 9 X 2 = 18 marks.
In addition to it, Question Nos. II to IX will consist of long answer (essay type) questions, two questions from each Unit with internal choice carrying 18 marks each i.e. 4 X 18 = 72 marks. .

(ii) On an average, 15 hours are to be devoted for each Unit.

(iii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (iii) in the question paper.

Objective :

All over the world, social groups are differentiated from one another and often ranked in terms of certain criteria. In this paper, students are exposed to the theoretical understanding of social stratification. In the Indian context, it is pertinent to apprise the students of the concept of social mobility and various factors that contribute to it. The major purpose of this course is to prepare the students to understand the hierarchical structure of groups in various societies and help them understand the social mobility.

Course Content

Unit-I

Social Stratification – Meaning, feature and functions; Inequalities – Social and Natural.
Elements : Differentiation, Hierarchy, Ranking, Reward, Evaluation.

Unit-II

Theories of Social Stratification :
Functionalist – Davis and Moore.

Conflict – Marx.
Class, Status, Party – Weber.

Unit-III

Forms of Social stratification: Caste, Class, Race and Gender. Interface between caste and class.

Unit-IV

Social Mobility – Meaning, types, factors.
Indicators – Education, Occupation, Income.

Essential Readings :

PUBLIC ADMINISTRATION

SEMESTER - I

PAPER : ADMINISTRATIVE THEORY

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	03 Hours

Objective of the Paper :

The objective of this paper is to acquaint the student with the basic concepts and principles of public administration. In addition, the paper would trace the evolution of public administration and its relationship with other social sciences.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES :

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Unit-I

Meaning, Nature, Scope and Significance of Public Administration; Public and Private Administration; Public Administration as a Science or an Art; Relationship of Public Administration with other Social Sciences; Evolution of Public Administration since 1887.

Unit-II

Organization: Meaning, Types: Formal and Informal Organization
Forms of Organization: Department, Public Corporation, Government Company.
Principles of Organization: Hierarchy, Span of Control, Unity of Command, Authority and Responsibility.

Unit-III

Chief Executive- Types, functions and Role
Line, Staff and Auxiliary Agencies
Centralisation and Decentralisation
Decision Making: Meaning, types and process

Unit-IV

Coordination: Concept, Methods and Hindrances
Communication: Concept, Process and Barriers
Supervison: Concept and Methods
Leadership: Concept, Styles, Qualities of a Good Administrator

PUBLIC ADMINISTRATION

SEMESTER - II

PAPER : : INDIAN ADMINISTRATION

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objective of the Paper:

The objective of this paper is to give the student an in-depth understanding of various aspects of Indian administration particularly the functioning of executive, legislature and judiciary at the union and state levels. It would also make them aware of the bureaucratic set up at these levels.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Unit-I

Features of Indian Administration
Union Executive: President; Prime Minister, and Council of Ministers
Union Legislature: Lok Sabha – Composition, Functions and Role: Rajya Sabha – Composition, Functions and Role

Unit-II

State Executive: Governor, Chief Minister and State Council of Ministers
State-Legislature: Legislative Assembly and Legislative Council – Composition, Functions and Role
Centre-State Relations: Administrative and Legislative

Unit-III

Union and State Judiciary: Supreme Court – Composition, Functions and Role
High Court – Composition, Functions and Role
Control over Administration: Legislative and Judicial
Delegated Legislation: Meaning, Reasons and Safeguards

Unit-IV

Cabinet Secretariat– Composition, Functions and Role
State Secretariat– Composition, Functions and Role
District Administration: Structure and Functions

PHILOSOPHY

SEMESTER – I

Outlines of Tests, Syllabi and Courses of Reading

Paper : ELEMENTS OF PHILOSOPHY

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours
Lectures	:	75

AIMS & OBJECTIVES :

The aim of this paper is to familiarize the students with the subject, its branches, problems and methods. The contents of this paper provide the students with a wider canvas about tackling day-to-day problems from a larger perspective.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

(i) There shall be 9 questions in all.

(ii) The first question shall be of short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25-30 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be compulsory question.

(iii) Rest of the paper shall contain 4 Units and each Unit shall have two questions with internal choice. The candidates shall attempt one question from each Unit i.e. – 4 in all.

(iv) For private and reappear candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (iv) in the question paper.

Unit-I

1. Nature of Philosophy (Introduction).
2. Problems of Philosophy with special focus on social equality, self knowledge and rationality.
3. Methods of Philosophy : Critical and Reflective approach.

Unit-II

4. Introduction to main branches of Philosophy : Metaphysics, Epistemology, Ethics, Social Philosophy and Aesthetics (The interrelation between the branches will be focused).
5. Relation of Philosophy with Science and Religion.
6. Nature of Art and Aesthetic Experience

Unit-III

7. Ethics and Social Philosophy : Good life and Good Society.
8. Morality in Public and Private life.
9. Individual and Society.

Unit-IV

11. Justice : Virtue, Fairness, Equality.
12. Tolerance : Respect for Cultural Pluralism and Social diversities.
13. Caste System in India : Jyoti Ba Phule, Gandhi, Ambedkar.

Essential Readings :

1. G.L. Chandramani : Hitopadesa, Jaico Publishing House, 1995.
2. Mandukya Upanisad, Yamuna Prasad Tripathi : Varanasi Bhartiya Vidya Prakashan, 1966.
3. Narvane, V.S. : Modern Indian Thought, Orient Longman Publishers, 1978.
4. Titus, H.H. : Living Issues in Philosophy, Oxford University, 1993.
5. Amartya Sen : The Idea of Justice, The Belknap Press of Harvard University Press Cambridge, Massachusetts, 2009.
6. Calvin Lewis Pinchin : Issues in Philosophy, Palgrave Macmillan, London, 2nd Ed. December, 2004.
7. Morris Weitz (ed.) : Problems of Aesthetics : An Introductory Book of Readings, Macmillan, New York, 1970.

Suggested Readings :

1. Aesop's Fables : Penguin Books, Harmondsworth, 1998.
2. Dr. B.R. Ambedkar : Annihilation of Caste, Navayana Publishers, New Delhi, 1936.
3. Jyotiba Phule : Gulamgiri (The Slavery), Hindi Translator S. Murti, Cultural Publishers, Lucknow, 3rd Ed. 1994.
4. Narayana Hitopadesa : Translated from Sanskrit by A.B.D. Haksar, Penguin Books, 1998.

PHILOSOPHY

SEMESTER-II

Paper : LOGIC

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours
Lectures	:	75

AIMS AND OBJECTIVES :

This paper aims at a systematic study of the Science of Logic which is the most effective means of developing logical abstract thinking in us. It tries to provide students with a mastery of Logic so that they can think in clearer terms and be less prone to error.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

(i) There shall be **9** questions in all.

(ii) The first question shall be of short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25-30 words. The candidate is required to attempt any 9 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be compulsory question.

(iii) Rest of the paper shall contain 4 Units and each Unit shall have two questions with internal choice. The candidate shall attempt one question from each Unit i.e. – 4 in all.

(iv) For private and reappear candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (iv) in the question paper.

Unit-I

1. Nature, Scope and Utility of Logic.
2. Terms and Propositions : Kinds of Terms, Connotation and Denotation of Terms. Aristotle's classification of proposition (Square of Opposition—Contradictories), Contraries, Sub-Contraries and Sub-Alterns.

Unit-II

3. Laws of Thought : Identity, Contradiction, Excluded Middle and Sufficient Reason.
4. Argument : Immediate Inference and Mediate Inference. Some kinds of immediate inference : Conversion, Obversion, Contraposition, Inversion.

Unit-III

5. Categorical Syllogism : The Structure and Rules of validity of Pure Categorical Syllogism, Figures and moods, Fallacies of Syllogism.
6. Introduction to Truth-Tables, Negation, Conjunction, Disjunction, Implications and Equivalences.

Unit-IV

7. Nature of Induction : Distinction between Deduction and Induction.
8. Kinds of Induction.
9. Causation : Nature of Cause, Plurality of Causes.

Essential Readings :

1. Copi, I. M. : Introduction to Logic (N.Y., Macmillan, 1972, Hindi Translation available); London : Routledge and Kegan Paul.
2. Copi, Irvin M. : Introduction to Symbolic Logic (Prentice Hall of India), New Delhi, 1998.
3. Cohen and Nagel : Introduction to Logic and Scientific Method (Allied Publishers), New Delhi, 2000.

Suggested Readings :

1. Alice Ambrose, Morris Lazerowitz : Fundamentals of Symbolic Logic, revised ed., Holt, Rinehart and Winston, New York, 1962.
2. F.H. Bradley : The Principles of Logic, Oxford University Press, London, 1950.
3. John Dewey : Logic, Henry Holt and Company, New York, 1938.

PSYCHOLOGY

SEMESTER –I

Objectives :

(I) The course introduces to the students the general concepts and historical viewpoints in general psychology. The students would also get an understanding of the principles and theories in different areas like personality, motivation, intelligence, etc. The course also apprises them of the concept of growth and development and also introduces them to the elementary statistics.

(II) Pedagogy of the Course Work :
80% Lectures (including expert lectures).
20% assignments, discussion and seminars and tests.

Paper : GENERAL PSYCHOLOGY-I

Max. Marks	:	80
Theory	:	70 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

There shall be **9** questions in all. The first question shall be short answer type containing 12 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 7 short answer type questions i.e. 2 marks of each. It shall carry 14 marks and shall be **Compulsory** question. Rest of the paper shall contain **4** Units. Each Unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all. Each question will carry 14 marks.

Unit I

Nature of Psychology, Goals and Branches of Psychology, Historical Evolution of Psychology, Development of Psychology in India.

Unit II

Emotions : Definition and Concept of Emotions, Types of Emotions, Theories of Emotions (James–Lange, Cannon Bard, Schacter-Singer Theory.), Introduction to Emotion Intelligence.

Unit III

Method of Psychology: Experimental Method, Observation Method.
Sampling Techniques, Survey Method.

Unit IV

Motivation: Definition, Nature, Concept. Types of Motives (Physiological, Psychological, Social): Theories of Motivation: Humanistic (Maslow), Need Theories (McClelland and Murray).

Note: The use of non-programmable calculators and statistical tables is allowed in the examination.

PSYCHOLOGY PRACTICALS

Max. Marks : 20
Time : 3 Hrs.

Four practicals have to be performed out of six :

1. Level of Aspiration.
2. Facial Expressions in Emotions
3. Public Opinion Survey.
4. Measurement of Motivation
5. Zeigarnik Effect
6. Familiarization of any five apparatuses

Suggested Readings:

1. Baron, R.A. (2003). Psychology, New Delhi : Pearson Education.
2. Ciccarelli, D. (2008). Introduction to Psychology, Delhi: Pearson.
3. Das, J.P. (1998). The Working Mind: An Introduction to Psychology. New Delhi: Sage.
4. Feldman, R.S. (2014). Understanding Psychology. New Delhi : Tata McGraw Hill.
5. Garrett, H.E. (1966). Statistics in Psychology and Education, New Delhi : Vakils, Feffer and Simons.
6. Kerlinger, F. N. (1964).Foundations of Behavioural Research. New York: Rinehart and Winston.
7. Morgan, C.T., King, R.A., J.R. Weisz and Schopler, J. (1987). Introduction to Psychology, Singapore: McGraw, Hill.
8. Singh, A.K. (1986). Tests, measurements and research methods in behavioural sciences. Tata McGraw-Hill.

.....

PSYCHOLOGY

SEMESTER –II

Objectives :

(I) The course introduces to the students the general concepts and historical viewpoints in general psychology. The students would also get an understanding of the principles and theories in different areas like personality, motivation, intelligence, etc. The course also apprises them of the concept of growth and development and also introduces them to the elementary statistics.

(II) Pedagogy of the Course Work :
80% Lectures (including expert lectures).
20% assignments, discussion and seminars and tests.

Paper : GENERAL PSYCHOLOGY-II

Max. Marks	:	80
Theory	:	70 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

There shall be **9** questions in all. The first question shall be short answer type containing 12 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 7 short answer type questions i.e. 2 marks of each. It shall carry 14 marks and shall be **Compulsory** question. Rest of the paper shall contain **4** Units. Each Unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all. Each question will carry 14 marks.

Unit I

Personality – Concept, Trait Theories (Eysenck, Costa and MCrae), Psychoanalytic Theory (Freud).

Humanistic Theory (Rogers). Measurement of Personality, (Self Report Measures, Projective Techniques and Behavioural Assessment)

Unit II

Statistics: Graphical Representation of Data: Measures of Central Tendency and Variability.

Correlation - Meaning of Correlation, Rank Order and Product Moment-Correlation and Interpretation.

Unit III

Development: Concept, Heredity and Environmental Influences. Theories of Development : Erickson, Psychosocial Theory, Piaget's theory of Cognitive Development.

Unit IV

Intelligence : Concept, Theories of Intelligence: Spearman, Thurstone, Cattell, Guilford. Measurement of Intelligence (Verbal and Non Verbal Test and Individual and Group Tests).

Note : The use of non-programmable calculators and statistical tables is allowed in the examination.

PSYCHOLOGY PRACTICALS

Max Marks : 20
Time : 3 Hrs.

Four practicals have to be performed out of the following :

1. Verbal Test of Intelligence
2. Non Verbal Test of Intelligence
3. Performance Test of Intelligence.
4. McCosta & Crae NEO Big Five Personality Inventory.
5. Interest Inventory.
6. Familiarization of any five apparatuses

Suggested Readings:

1. Baron, R.A. (2002). Psychology, New Delhi : Pearson Education.
2. Ciccarelli, D. (2008). Introduction to Psychology, Delhi: Pearson.
3. Das, J.P. (1998). The Working Mind: An Introduction to Psychology. New Delhi: Sage.
4. Feldman, R.S. (1996). Understanding Psychology, New Delhi : Tata McGraw Hill.
5. Garrett, H.E. (1966): Statistics in Psychology and Education, New Delhi Vakils, Feffer and Simons.
6. Guilford, J.P., and Fruchter, B. (1981). Fundamental Statistics in Psychology and Education Singapore: McGraw Hill.
7. Jain, S. (2000). Introduction to Psychology. New Delhi: Kalyani.
8. Kerlinger, F. N. (1964).Foundations of Behavioural Research. New York: Holy, Tinvsty snf Eindyon.
9. Morgan, C.T., King, R.A., Weisz ,J.R. and Schopler, J. (1987). Introduction to Psychology, Singapore: McGraw, Hill.
10. Singh, A.K. (1986). Tests, measurements and research methods in behavioural sciences. Tata McGraw-Hill.

GEOGRAPHY

SEMESTER - I

Paper-I : PHYSICAL GEOGRAPHY-I : Geomorphology

Max. Marks	:	70
Theory	:	60 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Objectives:

The course aims to familiarize the students with the fundamental concepts in physical geography, essentially geomorphology.

Course Content:

UNIT-I

Nature & Scope of Geography: Place of Physical Geography within the discipline of Geography, Divisions of Physical Geography (Geomorphology, Climatology Oceanography and Biogeography). (8 lectures)

Interior of the Earth: Constitution, Isostasy, Continental Drift (with special reference to Wegener's Theory and Plate Tectonics). (12 lectures)

UNIT-II

Movements of the Earth : Orogenic and Epeirogenic (with special reference to Geosyncline theory); landforms resulting from forces of Compression and Tension; Earthquakes and Volcanoes (causes, types and distribution) (20 lectures)

UNIT-III

Rocks: Origin, classification and characteristics. (8 lectures)

Major Land Forms: Mountains, plateaus and plains in the world. (10 lectures)

UNIT-IV

Geomorphic Agents and Landscapes: Fluvial, Glacial, Aeolian, Coastal and Karst. (22 lectures)

Note :

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 10 parts. The answer of each part should be in about 25 words. Each part will carry 2 marks (Total 20 marks).
2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, two from each Unit. The students will be required to attempt one question from each Unit. Each question will carry 10 marks (Total 40 marks). These will be in addition to the compulsory question.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Internal assessment will be based on written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
5. For USOL, reappear/improvement candidates(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.
   The paper-setter must put note (5) in the question paper

List of Readings :

Essential Readings:

1. Blij, H.J. De & Petor O. Muller : *Physical Geography of the Global Environment,* John Wiley & Sons, Inc., New York, 1996.
2. Bryant, R.H. : *Physical Geography*, Rupa Publications India Pvt. Ltd., New Delhi, 2011.
3. Hussain, Majid : *Fundamentals of Physical Geography (3rd Edition),* Rawat Publication, Jaipur, 2011.
4. Hyndman, D. and D. Hyndman : *Natural Hazards and Disasters (2nd Edition),* Brooks/Cole Cengage Learning, Belmont, USA, 2009.
5. Khan, Nizamuddin : *An Introduction to Physical Geography*, Concept Publishing Company, New Delhi, 2001.
6. Lal, D.S. : *Physical Geography,* Sharda Pustak Bhawan, Allahabad, 2012.
7. Monkhouse, F.J. : *Principles of Physical Geography (8th Edition),* Hodder & Stoughton, London, UK, 1975
8. Pal, Saroj K. : *Physical Geography of India : A Study in Regional Earth Sciences,* Orient Longman, Calcutta, 1998.
9. Petersen, J.F., D. Sack and R.E. Gabler : *Physical Geography (10th Edition)*, Brooks/Cole Cengage Learning, Belmont, USA, 2011
10. Singh, Savindra : *Physical Geography,* Gyanodya Prakashan, Gorakhpur, 2012.
11. Strahler, Alan H. and Arthur N. Strahler : *Modern Physical Geography,* John Wiley, New York, 2003.

Further Readings:

1.	Bunnett, R.B.	:	*Physical Geography in Diagrams,* Pearson Education, Noida, 1987.
2.	Dayal, P.	:	*A Text Book of Geomorphology*, Shukla Book Depot, Patna, 1995.
3.	Dury, G.H.	:	*The Face of the Earth,* Penguin, England, 1973.
4.	Gass, I.G.	:	*Understanding the Earth,* The Artemis Press, Sussex, 1973.
5.	Gautam, Alka		*Geomorphology,* Sharda Pustak Bhawan, Allahabad, 2012.
6.	Kaur, Dhian	:	*The Earth,* Kalyani Publishers, Ludhiana, 2000.
7.	Kale, V. and Gupta, A.	:	*Elements of Geomorphology,* Oxford University Press, Calcutta, 2001.
8.	Mamoria, C.P. and Niati, J.L.	:	*Bhautic Bhoogol Ke Tatwa* (in Hindi), Agra, 1976.
9.	Singh, Savindra	:	*Geomorphology,* Prayag Pustak Bhawan, Allahabad, 2004.
10.	Sparks, B.W.	:	*Geomorphology,* Longman, London, 1986.
11.	Thornbury, W.D.	:	*Principles of Geomorphology,* Second Edition, Wiley Eastern Ltd., New Delhi, 1993.

Pedagogy:

- Use of Audio-visual aids, maps, diagrams and other forms of illustrations especially in the Indian context are recommended.
- Relevant educational field trips must be arranged to illustrate the theory being taught.

Paper-II: CARTOGRAPHY-I Max. Marks: 30

Time : 3 Hours

Written paper of 3 hours duration at college level (except USOL)	:	20 marks
Viva and Practical Record (5+5)	:	10 marks

Objective:

- To introduce the concept of maps and relevance of maps in Geography.
- To explain the elements of Map (Scale and Orientation) and steps in Map making.
- To introduce relief representation.

Course Content:

UNIT-I

Maps: Brief history of map making and types of maps.

Geometry of the Earth: Latitude, Longitude (Time Zones and International Date Line), Size and Shape of the Earth. (3 lectures, 6 lab sessions)

UNIT-II

Scales: Methods of representing scale;
Methods of construction of Graphic scales: Plain, Comparative, Time and Diagonal.
(6 lectures, 12 Lab. sessions)

UNIT-III

Directions and Bearings: Plotting of a course, True North, Magnetic North, finding True North with the Pole star, a watch and a rod; Bearing and its conversion. (6 lectures, 12 Lab. sessions)

UNIT-IV

Representation of Relief: Hill-shading, Hachures, and Layer Tints, Spot heights, Benchmarks, Contours.
(6 lectures, 12 Lab. sessions)

Note :

1. The written and practical examination including viva-voce shall be conducted at the respective college itself except USOL. However, the format of the question paper shall be uniform. A separate paper of 20 marks shall be prepared on the spot by the examiners from the prescribed syllabus.
2. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the Principal of the respective colleges in consultation with the senior most teacher of Geography in the college.
3. **For students of USOL, a written theory paper for 20 marks shall be conducted by the University along with the University examination. A separate paper of 20 marks shall be prepared for USOL students from the prescribed syllabus.**
4. A compulsory question containing 6 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 4 parts. The answer of each part should be in about 25 words. Each part will carry 1 mark (Total 4 Marks).
5. The whole syllabus has been divided into 4 Units. Eight questions will be set out of the whole syllabus, i.e. 2 from each Unit. Each question will carry 4 marks (Total 16 marks). The students will be required to attempt one question from each Unit. These will be in addition to the compulsory question.
6. Evaluation of Practical Record will be done at the time of viva-voce examination. A minimum of 15 sheets are to be prepared by the students. There will be no laboratory exercise at that time.
7. There will be no viva-voce examination for the candidates appearing through USOL.They will be required to submit their Practical Note Book (Practical files) with the University School of Open Learning (Department of Geography) at least 10 days before the commencement of their examination. Their Note Books (Practical files) will be evaluated by two examiners (including at least one from the USOL).

8. For the students of University School of Open Learning, there will be an internal assessment of 10 marks in lieu of the viva-voce examination.
9. A fresh practical note book shall be prepared by failed/improvement candidates.
10. For practical classes, the number of students in one group shall not exceed fifteen.
11. There will be 3 hours of teaching per week for this paper.
12. For USOL, reappear/improvement candidates(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

The paper-setter must put note (12) in the question paper.

List of Readings

Essential Readings:

1. Dink, Phyllis: *Map Work*, Atma Ram & Sons, 1962.
2. Khullar, D.R.: *Essentials of Practical Geography*, New Academic Publishing Company, Jalandhar, 2003.
3. Mishra, R.P. & Ramesh, A.: *Fundamentals of Cartography*, Concept Publishing Co., New Delhi, 1989.
4. Sarkar, Asish: Practical Geography: A Systematic Approach (2nd Edition), Orient BlackSwan, Hyderabad, 2011.
5. Singh, Gopal: *Map Work and Practical Geography*, Vikas Publishing House Pvt. Ltd., New Delhi, 2009.
6. Singh, R.L. & P.B. Singh: *Map Work and Practical Geography*, Central Book Depot, Raghunandan Allahabad, 2007.

Further Readings:

1. Bagulia, A.M.: *Practical Geography*, Anmol Publications Pvt. Limited, New Delhi, 2006.
2. Monkhouse, F.J. & Wilkinson, H.R.: *Maps and Diagrams*, Methuen & Co., London, Third Edition, 1976.
3. Rather, G.M.: *A Text of Practical Geography,* Arina Publishers, New Delhi, 2011.
4. Robinson et al.: *Elements of Cartography (6th Edition)*, Wiley India Pvt. Ltd., New Delhi, 2009.

Pedagogy:

- The use of topographical sheets of Survey of India
- A well equipped cartographic laboratory with necessary instruments to prepare exercises.

……

GEOGRAPHY

SEMESTER - II

Paper-III: PHYSICAL GEOGRAPHY-II: Climatology & Oceanography

Max. Marks	:	70
Theory	:	60 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Objectives:

- To acquaint the students with the elements and attributes of climatology and oceanography
- To underscore the role of climate in human life
- To emphasize the significance of oceans within the global environmental system

Course Content:

UNIT-I

Definition of Climatology: Concepts of Climate and Weather, Nature and Scope of Climatology. (2 Lectures)
Climate: Elements and Controls. (4 Lectures)
Physical Structure of the Atmosphere: Troposphere, Tropopause, Stratosphere, Ozonosphere, Mesosphere, Thermosphere and Exosphere (attributes of these layers). (6 Lectures)
Physical and Chemical Composition of the Atmosphere: Dust particles, Vapour Particles, Active gases, Inert gases. (2 Lectures)
Insolation and Temperature: Distribution of Insolation (horizontal); Distribution of Temperature (vertical, horizontal, annual, seasonal and diurnal) (6 Lectures)

UNIT-II

Atmospheric Pressure and Wind Distribution: Atmospheric disturbances: Tropical Cyclones, Temperate Cyclones and Anticyclones. (8 Lectures)
Atmospheric Moisture: Condensation forms: cloud, dew, fog, frost and snow. (8 Lectures)
Precipitation: forms and types, world patterns (spatial and seasonal).
Introduction to Koppen's classification of world climate (4 lectures)
Role of Climate in Human Life : Atmospheric pollution and global warming: causes, consequences and measures of control (4 lectures)

UNIT-III

Oceanography : Definition, Nature and Scope (5 lectures)
Topography of the Ocean Basins; Continental Shelf, Continental Slope, Abyssal Plain, Ridges, Deeps and Trenches (5 lectures)
Temperature and Salinity of ocean waters: World patterns and controlling factors (6 lectures)

UNIT-IV

Movements of Oceanic Waters: Waves, Tides and Currents; Surface currents of the oceans;
Role of Ocean Currents in heat distribution over the globe. (10 lectures)
Marine Deposits and Corals: Origin and types. (10 lectures)

Note : 1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 10 parts. The answer of each part should be about 25 words. Each part will carry 2 marks (Total 20 marks).

2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, two from each Unit. The students will be required to attempt one question from each Unit. Each question will carry 10 marks. These will be in addition to the compulsory question I.

3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.

4. Internal assessment will be based on written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.

5. For USOL, reappear/improvement candidates(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

The paper-setter must put note (5) in the question paper.

Essential Readings :

1. Critchfield, H.J. : *General Climatology,* Prentice Hall of India Private Ltd., New Delhi, 1975
2. Frederick K. and Edward J. Tarbuck : The Atmosphere: An Introduction to Meteorology, Prentice Hall of India Pvt. Ltd., New Delhi, 1995.
3. Hess Darrel, Dennis G Tasa : Mcknight's Physical Geography: A Landscape Appreciation (2011).
4. Khan, N. : *An Introduction to Physical Geography,* Concept, New Delhi, 2001.
5. Lal, D.S. : *Climatology,* Chaitanya Publishing House, Allahabad, 2009.
6. Sharma, R.C and Vatal, M : *Oceanography for Geographers*, Chetnya, Allahabad, 2005.
7. Singh, Malkit : Dimensions in Physical Geography, Rasmeet Parkashan, Jalandhar 2012.
8. Singh, Savindra : *Climatology,* Prayag Pustak Bhavan, Allahabad, 2004.
9. Trewartha, G.T. Delhi, : *An Introduction to Climate,* McGraw Hill Book Co., New International Student Edition, 1980.

Further Readings :

1. Bhutani, Smita : *Our Atmosphere,* Edited by R.C. Chandna, Kalyani Publishers, Ludhiana, Delhi, 2000.
2. Bunnett, R.B. *Physical Geography in Diagrams,* Pearson Education, Noida, 1987.
3. Gross, Grant M. : *Oceanography : A View of the Earth*, Prentice Hall, New Jersey, 1975.
4. Monkhouse, F.J. : *The Principles of Physical Geography*, University of London Press, London, 1959.
5. Pattersen, S. : *Introduction to Meteorology,* McGraw Hill Book Co., London, 2011
6. Stringer, E.T. : *Foundations of Climatology*, Surjeet Publications, Delhi, 1982.

Pedagogy:

- Conscious effort be made to make the students aware of the significance of climate and oceans to human life.
- Use of Slides, photographs and documentaries on climates and oceans strongly recommended.

Paper-IV: CARTOGRAPHY-II Max. Marks: 30

Time : 3 Hours

Written paper of 3 hours duration at college level (except USOL)	:	20 marks
Viva and Practical Record (10+10)	:	10 marks

Objective:

- To introduce the concept of maps and relevance of maps in Geography
- To explain the elements of Map (Scale and Orientation) and steps in Map making
- To introduce relief representation and weather symbolization on maps

COURSE CONTENT

UNIT-I

Brief History of Cartography
Elements of Map Design (6 lectures, 12lab sessions)

UNIT-II

Enlargement and Reduction of Maps: Graphic methods – Square and Similar Triangles.
Introduction to concept of Global Positioning System (GPS).

(6 lectures, 12 Lab. sessions)

UNIT-III

Interpretation of Indian Weather Maps: General introduction to the study of weather maps, the scheme of weather symbols including Beaufort's scale employed in Indian Daily Weather Maps.

(6 lectures, 12 lab. sessions)

UNIT-IV

Weather in India: Summer season (period of summer monsoon), winter season, Weather Forecasting through the study of weather maps and recent advances in weather forecasting.

(6 lectures, 12 lab. sessions)

Note :

1. The written and practical examination including viva-voce shall be conducted at the respective college itself except USOL. However, the format of the question paper shall be uniform. A separate paper of 20 marks shall be prepared on the spot by the examiners from the prescribed syllabus.
2. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the Principal of the respective colleges in consultation with the senior most teacher of Geography in the college.
3. **For students of USOL, a written theory paper for 20 marks shall be conducted by the University along with the University examination. A separate paper of 20 marks shall be prepared for USOL students from the prescribed syllabus.**
4. A compulsory question containing 6 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 4 parts. The answer of each part should be about 25 words. Each part will carry 1 mark (Total 4 Marks).
5. The whole syllabus has been divided into 4 Units. Eight questions will be set out of the whole syllabus, i.e. 2 from each Unit. Each question will carry 4 marks The students will be required to attempt one question from each Unit. These will be in addition to the compulsory question I.
6. Evaluation of Practical Record will be done at the time of viva-voce examination. A minimum of 15 sheets are to be prepared by the students. There will be no laboratory exercise at that time.
7. There will be no viva-voce examination for the candidates appearing through USOL. They will be required to submit their Practical Note Book (Practical files) with the University School of Open Learning (Department of Geography) at least 10 days before the commencement of their examination. Their Note Books (Practical files) will be evaluated by two examiners (including at least one from the USOL).
8. For the students of University School of Open Learning, there will be an internal assessment of 10 marks in lieu of the viva-voce examination.
9. A fresh practical note book shall be prepared by failed/improvement candidates.
10. For practical classes, the number of students in one group shall not exceed fifteen.
11. There will be 3 hours of teaching per week for this paper.
12. For USOL, reappear/improvement candidates(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

The paper-setter must put note (12) in the question paper

Essential Readings :

1. Mishra, R.P. & Ramesh, A. : *Fundamentals of Cartography*, Concept Publishing Co., New Delhi, 1989.
2. Singh, Gopal : *Mapwork and Practical Geography*, Vikas Publishing House Pvt. Ltd., New Delhi, 1995.
3. Singh, R.L. & Singh : *Mapwork and Practical Geography*, Central Book Depot, Raghunandan Allahabad, 2007.
4. Dink, Phyllis : *Mapwork*, Atma Ram & Sons, Latest Edition, 1962.
5. Anderle, R : *The Global Positioning System, Royal* Society of London, 1998.
6. Kulkarni, M.N : *The GPS and Its Applications, Training,* Volume GPS Training Course, Civil Engg. Dept., I.I.T. Bombay, 9-19 May, 2000.
7. Hoffman-Wellenhof, B. et. al.: *GPS Theory and Practice,* $4^{th\ Rev}$. Edition, Springer Wien, New York.

Further Readings:

1. Monkhouse, F.J. & Wilkinson, H.R. : *Maps and Diagrams*, Methuen & Co., London, Third Edition, 1976.
2. Robinson, A.H. & Randall, D. Sale: *Elements of Cartography*, John Wiley & Sons, New York (Sixth Edition), 1995.
3. Colombo, O.L. & Watkins, M.M.: *Satellite Positioning in US National Report to IUGG,* on Geodesy, 1991.
4. King, R.W. & Others: *Surveying with GPS,* University of New South Wales, Australia,1985.
5. Kulkarni, M.N.: *GPS from an Indian Perspective,* GIM International Journal, GITC Publication, The Netherlands, Vol. 14, Oct., pp. 43-45. (2000a).
6. Mueller, I.I.: *Global and Regional Geodynamics,* IAG Symposia 101, Springer Verlag, 1989.
7. Wells, D.E.: *Guideto GPS Positioning, Canadian* GPS Association, New Brunswick, Canada, 1988.

Pedagogy :

- The use of topographical sheets of Survey of India and weather maps.
- A well equipped cartographic laboratory with necessary instruments to prepare exercises.

GANDHIAN STUDIES
SEMESTER –I

MAHATMA GANDHI: FAMILY AND EARLY LIFE (INDIA, ENGLAND AND SOUTH AFRICA)

Max. Marks	:	100 marks
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 hours

Course Objectives :

The paper is designed to acquaint the students with the early life of Mahatma Gandhi in India and in London.

Pedagogy of the Course Work :

90% Lectures (including expert lectures)

10% Unit Tests, Snap Tests, assignments, attendance and class room participation.

Note :

1. The syllabus has been divided into four (4) units.
2. There shall be 9 questions in all.
3. The first question is compulsory and shall be short answer type containing 15 short answer type questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question.
4. Rest of the paper shall contain four (4) units and each units shall have two questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each unit – 4 in all. All questions shall carry 18 marks.
5. For the private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (5) in the question paper.

UNIT-I

Family and Schooling

a) Family Background – Parents, Rambha & others
b) Neighbourhood and Early Impact
c) Schooling
d) Influence of Indian Scriptures

UNIT-II

As a Law Student in London

a) Dilemma Before Going to London
b) As a Law Student
c) Vegetarianism
d) Self-transformation and Home Coming

UNIT-III

Gandhi in South Africa

a) Journey to South Africa
b) Encounter with Racial Discrimination/Apartheid
c) Conditions of Indians in South Africa
d) Birth of Satyagraha

UNIT-IV

Satyagraha in Practice

a) Disfranchisement of Indians
b) Establishment of Natal Indian Congress
c) Asiatic Law Amendment Ordinance
d) Home Coming

ESSENTIAL READINGS:

1 Bhattacharyya**,** Buddhadeva : *Evolution of the Political Philosophy of Gandhi* (Calcutta: Calcutta Book House), 1969.

HUMAN RIGHTS AND DUTIES

SEMESTER-II

Paper : HUMAN RIGHTS : INTERNATIONAL DIMENSIONS

Maximum Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objective :

This paper purports to deal with promotion and protection of human rights in the international context, particularly in the UN bodies. It aims to create awareness regarding the Universal Declaration of Human Rights, 1948, significant Covenants along with the Optional Protocols.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES:

Note : (i) For written paper, the students will be required to attempt **five** questions in all. **Question No. I** will be **compulsory** comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine short answer type questions out of twelve i.e. 9×2=18 marks.

(ii) In addition to it, Questions Nos. II to IX will consist of long answer (Essay Type) questions i.e., 2 questions from each unit with Internal choice carrying 18 marks each i.e., 4×18=72 marks

UNIT-I

INTERNATIONAL NORMS AND MECHANISMS:

- League of Nations
- The United Nations Charter and the development of Human Rights.

UNIT-II

INTERNATIONAL BILL OF RIGHTS:

- Universal Declaration of Human Rights (UDHR), 1948
- International Covenant on Civil and Political Rights (ICCPR), 1966; Optional Protocol
- International Covenant on Economic Social and Cultural Rights (ICESCR), 1966; Optional Protocol

UNIT-III

HUMAN RIGHTS AND UNITED NATIONS BODIES (I):

- UN General Assembly
- Economic and Social Council (ECOSOC)
- UN Human Rights Council

UNIT-IV

HUMAN RIGHTS AND UNITED NATIONS BODIES (II):

- International Labour Organization (ILO)
- United Nations Educational, Scientific and Cultural Organization (UNESCO)
- World Health Organization (WHO)

Essential Readings:

RELIGIOUS AND SIKH STUDIES

SEMESTER- I

PAPER-I, HINDUISM

Maximum Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objectives:

The course is designed for the students who want to pursue semester based graduate degree programme with Religious and Sikh Studies as an elective subject. It is open to any student drawn from multiple disciplinary backgrounds after completion of 10+2 course as one of the elective subject at the graduate level curriculum, it purports to develop a broad understanding of Indian Religions and awareness regarding the origin, features and teachings of different religions.

Pedagogy:

The Pedagogy of the course involves classroom lectures, assignments, discussions, special lectures. Field trip and feedback from the students.

INSTRUCTIONS FOR PAPER-SETTER AND CANDIDATES:

Note: (i) For written paper, the students will be required to attempt five questions in all. Question No. I will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine answer type questions out of twelve. Question No. I would carry 18 marks (9x2).

In addition to it, Questions No. II to IX will consist of **eight** long answer (Essay Type) questions which will be further divided into four units with each Unit having **two questions** to ensure internal choice to the candidate. The students are required to attempt any four out of these eight essay type questions selecting one question from each Unit. In all, each question in this section shall carry 18 marks and this section shall carry 72 marks (4x18).

Course Contents

Unit. I. Vaishnavism : origin, development; features and institutions

Unit. II. Shaivism: origin, development; features and institutions

Unit. III. Shaktism: origin, development; features and institutions

Unit. IV. Bhakti Movement in India: growth and development; with special reference to Ramanuj and Chaitanya

HOME SCIENCE

SEMESTER- I

Scheme of Examination

	Theory					Practical				
Sr. No.	*Name of Paper*	*No. of Papers*	*Time in hrs.*	*Marks allotted*	*Int. Ass.*	*No. of Papers*	*Time in hrs.*	*Marks Allotted*	*Int. Ass.*	*Total Marks*
1.	Family Resource Management, Hygiene & Health	1	3	45	05	1	3	45	05	100
									Total :	**100**

Note : 1. Each Practical group will have 12-15 students.

PAPER : FAMILY RESOURCE MANAGEMENT, HYGIENE & HEALTH

Max. Marks : **50**
Theory : **45**
Int. Ass. : **05**
Periods : **6 Hours per Week**

INSTRUCTIONS FOR THE PAPER SETTER :

The question paper will consist of five Sections : A, B, C, D and E. Sections A, B, C and D will have **two** questions from the respective sections of the syllabus and will carry 9 marks each. Section E will consist of objective type questions covering the entire syllabus uniformly and will carry 9 marks.

INSTRUCTIONS FOR THE CANDIDATES :

Candidates are required to attempt one question each from the Sections A, B, C and D of the question paper and the entire section E.

Section A

I (a) Meaning & Importance of Home Science.
(b) Functions of Home.

II (a) Home Scientist as an Entrepreneur.
(b) Agencies promoting Entrepreneurship- Commercial Banks, District Industries, Co-operative Societes.

Section B

III Interior Decoration

(a) Elements of Art - Line, Form, Pattern, Texture, Colour, Light and Space.
(b) Principles of Art in relation to interior decoration - Harmony, Balance, Rhythm, Proportion & Emphasis.

IV Colour

(a) Characteristics of colour
(b) Colour wheel
(c) Colour schemes

Section C

V Hygiene & Health

(a) Definition of Hygiene, Health
(b) Definition of infection, sources, carrier and control
(c) Definition and types of immunity.
(d) Immunization schedule

VI Causes & Spread of following diseases.

(a) Caused by insects – Malaria & Dengue
(b) Conveyed by ingestion – Enteric Fever, Cholera, Dysentery & Diarrhea
(c) Spread by droplet infection- chickenpox, measles, mumps & TB.
(d) Sexually transmitted diseases -AIDS.

Section D

VII Food Hygiene

(a) Definition
(b) Hygiene during preparation, service and storage of food.
(c) Domestic purification of water-
- Aquaguard
- Reverse Osmosis

VIII Food Adulteration

(a) Definition
(b) Common food adulterants and their effects on health.
(c) Household Methods of testing food adulteration.

PRACTICAL

Max. Marks : 50 Marks
Practical Theory : 45 Marks
Inter. Asses. : 05 Marks
Time : 3 hours per week.

1. Floor Decoration - Making of Alpana and Rangoli for different occasions.
2. Methods of detecting adulteration in any five foods such as ghee, castor sugar, milk, honey, red chili powder, tea leaves, turmeric powder etc.
3. Table setting, Table manners and Napkin foldings.
4. Making of a Chart/Model/Poster of Colour Wheel or Colour Schemes.
5. Survey of 5 households to study Immunisation schedule.

Periods : 6 Hours per Week

INSTRUCTIONS FOR THE PAPER SETTER:

The question paper will consist of five Sections: A, B, C, D and E. Sections A, B, C and D will have **two** questions from the respective sections of the syllabus and will carry 9 marks each. Section E will consist of objective type questions covering the entire syllabus uniformly and will carry 9 marks.

INSTRUCTIONS FOR THE CANDIDATES:

Candidates are required to attempt one question each from the Sections A, B, C and D of the question paper and the entire section E.

Section A

I. Resources

(a) Introduction
(b) Classification

II. Time Management

(a) Steps in making time plans.
(b) Tools in time management- peak loads, work curves and rest periods.

III. Money Management
(a) Types of Income
(b) Budget- Types, Advantages and limitations of budgeting, factors affecting budget, basic steps in planning of budget.
(c) Means of supplementing family income.

IV. Energy Management

(a) Fatigue – Types, Symptoms & Effects.
(b) Work Simplification (Mundel)

Section B

V. Furniture

(a) Factors affecting selection of furniture.
(b) Furniture requirement and arrangement for different rooms.
(1) Master Bedroom
(2) Drawing Room
(3) Dining Room
(4) Children's Room

VI. Flower Arrangement
(a) Definition and Types
(b) Principles of art in flower arrangement
(c) Material and Essential equipment used in Flower Arrangement.

Section C

VII. The Home maker as a Consumer
(a) Concept and objectives of Consumer Education.
(b) Rights and responsibilities of a Consumer.
(c) Malpractices in the production of consumer goods.
(d) Consumer guides- Standardized marks, labels, packaging, media and consumer redressal forum.

VII. Health Education
(a) Aims and Objectives
(b) Scope
(c) Importance

Section D

IX. Digestive System
(a) Diagram of Alimentary Canal
(b) Functions of mouth, stomach, intestines (Small and Large)
(c) Digestion of Carbohydrates, proteins and fats.

X. Simple first aid for burns, poisoning, electric shock, bleeding, drowning, fainting, fractures, insect bite, snake bite, nose bleeding, sunstroke, sprain, heart attack.

PRACTICAL

Max. Marks : 50 Marks
Practical : 45 Marks
Inter. Asses. : 05 Marks
Time : 3 hours per week.

1. Making of fresh flower arrangement for a corner and centre table.
2. Introduction to basic first aid techniques.
3. Cleaning & Polishing of household metals: brass, copper, silver, iron, aluminium, plastic and nonstick ware.
4. Cleaning and polishing of Wooden Furniture.
5. Cleaning of Glass windowpanes.

ENVIRONMENT CONSERVATION

SEMESTER – I

Paper : ENVIRONMENT AND FORESTRY

Theory hours	Practical hours	Theory marks	Internal Assessment Marks	Practical marks	Practical-Internal Assessment Marks	Total marks
6	4	65	10	25	-	100

The number of hours for theory and practical per week shall be 6 hours and 4 hours, respectively.

Note: The practical will include survey and its project reports carrying 5 marks and 20 marks will be allotted to laboratory practical.

Instructions for paper setters:
There will be 9 questions in all, two each from Section I to 1V. All questions will carry equal marks (13 marks each). Question No. I will be short answer type & will cover the whole syllabus. Candidates will attempt five questions in all, selecting one each from Section I to IV and the first compulsory question.

PAPER : ENVIRONMENT AND FORESTRY

UNIT-I

Environment: **Definition, Scope & importance** of Environment. A brief introduction of Physical & biological environment.

Ecosystem: Concept of Ecosystem, Biotic & abiotic components, food chain, food web trophic levels, types of ecosystems, terrestrial and aquatic. Biogeochemical cycles - nitrogen, carbon, phosphorous and sulphur cycle.

UNIT-II

Natural Resources: Definition, type of natural resources (Renewable and nonrenewable natural resources) and the policies of their conservation. Energy resources; Fossil fuel, Alternative source of energy (Solar energy, wind power, geothermal energy, dung energy and wood energy.

UNIT-III

Forestry: Forestry, Concept, types of forests in India & the world. Deforestation, reforestation and afforestation. Major and minor forest products. Reasons of forest destruction and its impact on Environment. Community forestry, Farm forestry, Social forestry and Agroforestry.

UNIT-IV

Indoor Environment: Pollution of the in house environment pollutants in the offices, workplaces (School, Bus stand, College and Kitchens). Environmental problems linked to urban and rural lifestyle, Adulterants; Food adulterants (Wheat flour, milk, red chili powder, mustard oil, desi ghee, sweets, artificial sweetness, dyes, food allergens).

PRACTICAL

(*Based on theory paper*)

Laboratory work: Tests of food adulterants.

Study the forest products with help of charts and specimens.

Survey reports of indoor environmental pollutants and local forests.

A visit to forest to study different components of these ecosystems.

ENVIRONMENT CONSERVATION

SEMESTER – II

PAPER : SOIL AND WATER POLLUTION

Theory hours	Practical hours	Theory marks	Internal Assessment Marks	Practical marks	Practical-Internal Assessment Marks	Total marks
6	4	68	7	22	3	100

The number of hours for theory and practical per week shall be 6 hours and 4 hours, respectively.

Note: The practical will include survey and its project reports carrying 5 marks, and 20 marks will be allotted to laboratory practical.

Instructions for paper setters:
There will be 9 questions in all, two each from Section I to 1V. All questions will carry equal marks (13 marks each). Question No. I will be short answer type & will cover the whole syllabus. Candidates will attempt five questions in all, selecting one each from Section I to IV and the first compulsory question.

PAPER : SOIL AND WATER POLLUTION

UNIT-I

Lithosphere: Meaning of Soil profile, its components, types of soil, physical-chemical properties of soil.

Soil Fertility: Micro-and macro-nutrients, technique of testing soil sample. Methods of increasing soil fertility, merits and demerits of fertilizers, role of soil microorganisms.

UNIT-II

Degradation of soil: Soil erosion (Water and Wind erosion) causes of effect of erosion. Soil pollution: Different types of soil pollutants (Chemicals, Pesticides, Fertilizers & manure, discarded material. Pollution and control measures.

UNIT-III

Hydrosphere: Major sources and uses of water. Overutilization of surface & ground water, floods, drought. Conflicts over water. Potable water, its characteristics. Water cycle (Global and Biological)

UNIT-IV

Water pollution: Definition, Types & Sources of water pollution, its consequences and control measures. Different types of diseases due to water pollution. Treatment of wastewater by green method (Root-zone technology), Marine pollution - a brief account.

PRACTICAL

Determination of soil pH

Use of Portable Kit

Determination of organic matter in soil

Determination of $CaCO_3$ in soil.

Determination of available Nitrogen in soil.

Identification of different fertilizers.

Determination of pH of water.

Determination of organic carbon.

Determination of microbial carbon.

Determination of available Nitrogen.

Determination of dissolved Oxygen, BOD.

Determination of hardness and alkalinity of water.

Survey reports of different water samples in local and adjoining areas and interpretation of water test report.

MATHEMATICS

SEMESTER – I

Paper-I : PLANE GEOMETRY

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester

Unit-I

Transformation of axes in two dimensions: Shifting of origin, rotation of axes, invariants.

Pair of Straight Lines :
Joint equation of pair of straight lines and angle between them, Condition of parallelism and perpendicularity, Joint equation of the angle bisectors, Joint equation of lines joining origin to the intersection of a line and a curve.

Circle :
General equation of circle, Circle through intersection of two lines, tangents, normals, chord of contact, pole and polar, pair of tangents from a point, equation of chord in terms of mid-point, angle of intersection and orthogonality, power of a point w.r.t. circle, radical axis, co-axial family of circles, limiting points.

Unit-II

Conic :
General equation of a conic, tangents, normals, chord of contact, pole and polar, pair of tangents from a point, equation of chord in terms of mid-point, diameter. Conjugate diameters of ellipse and hyperbola, special properties of parabola, ellipse and hyperbola, conjugate hyperbola, asymptotes of hyperbola, rectangular hyperbola. Indentification of conic in general second degree equations.

4. Gorakh Prasad and H.C. Gupta : *Text Book on Coordinate Geometry, Pothishala Pvt. Ltd., Allahabad, 1955.*

Paper-II : CALCULUS - I

Max. Marks : 30
Time : 3 Hours

Note: 1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester

Unit-I

Properties of real numbers :
Order property of real numbers, bounds, l.u.b. and g.l.b. order completeness property of real numbers, archimedian property of real numbers.

Limits:
ε - δ definition of the limit of a function, basic properties of limits, infinite limits, indeterminate forms.

Continuity:

Continuous functions, types of discontinuities, continuity of composite functions, continuity of $|f(x)|$, sign of a function in a neighborhood of a point of continuity, intermediate value theorem, maximum and minimum value theorem.

Unit-II

Mean value theorems:
Rolle's Theorem, Lagrange's mean value theorem, Cauchy's mean value theorem, their geometric interpretation and applications, Taylor's theorem, Maclaurin's theorem with various form of remainders and their applications.

Hyperbolic, inverse hyperbolic functions of a real variable and their derivatives, successive differentiations, Leibnitz's theorem.

Paper III: TRIGONOMETRY AND MATRICES

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester

Unit-I

D'Moivre's theorem, application of D'Moivre's theorem including primitive n^{th} root of unity. Expansions of $\sin n\theta$, $\cos n\theta$, $\sin^n \theta$, $\cos^n \theta$ $(n \in N)$. The exponential, logarithmic, direct and inverse circular and hyperbolic functions of a complex variable. Summation of series including Gregory Series.

Unit-II

Hermitian and skew-hermitian matrices, linear dependence of row and column vectors, row rank, column rank and rank of a matrix and their equivalence. Theorems on consistency of a system of linear equations (both homogeneous and non-homogeneous). Eigen-values, eigen-vectors and characteristic equation of a matrix, Cayley-Hamilton theorem and its use in finding inverse of a matrix. Diagonalization.

MATHEMATICS

SEMESTER – II

Paper-I : SOLID GEOMETRY

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester

Unit-I

Transformation of axes:
Shifting of origin and rotation of axes.

Sphere:
Section of a sphere and a plane, spheres through a given circle, intersection of a line and a sphere, tangent line, tangent plane, angle of intersection of two spheres and condition of orthogonality, power of a point w.r.t. a sphere, radical axis, radical center, co-axial family of spheres, limiting points.

Cylinder:
Cylinder as a surface generated by a line moving parallel to a fixed line and through a fixed curve, different kinds of cylinders such as right circular, elliptic, parabolic and hyperbolic cylinders in standard forms, enveloping cylinders.

Unit-II

Cone:
Cone with a vertex at the origin as the graph of a homogeneous equation of second degree in x,y,z, cone as a surface generated by a line passing through a fixed curve and a fixed point outside the plane of the curve, reciprocal cones, right circular and elliptic cones, right circular cone as a surface of revolution obtained by rotating the curve in a plane about an axis, enveloping cones.

Conicoid:
Equations of ellipsoid, hyperboloid and paraboloid in standard form. Reduction of second degree equation in three variables in standard form.

References:

1. P.K.Jain and Khalil Ahmad : A Text Book of Analytical Geometry of Three Dimensions, Wiley Eastern Ltd., 1999.

3. R.J.T. Bill : Elementary Treatise on Coordinate Geometry of Three Dimensions, Macmillan India Ltd., 1994.

Paper-II : CALCULUS - II

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester

Unit-I

Concavity, convexity and points of inflexion, Multiple points, Asymptotes, Tracing of curves (Cartesian and parametric co-ordinates only).

Curvature:
Curvature of a curve at a point, radius of curvature of cartesian, parametric, polar curves and for implicit functions , evolute and involute, chord of curvature.

Unit-II

Integral calculus:
Integration of hyperbolic and inverse hyperbolic functions. Reduction Formulae.

Numerical Integration: Trapezoidal, Prismoidal and Simpson Rules.

Application of definite integral: Summation of Series, Quadrature, rectification, volumes and surfaces of solids of revolution (Cartesian co-ordinates only)

4. P. K. Jain and S. K. Kaushik : An Introduction to Real Analysis, S. Chand & Co. New Delhi, 2000.

Paper III: THEORY OF EQUATIONS

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester

Unit-I

Euclid's algorithm, synthetic division, roots and their multiplicity. Complex roots of real polynomials occur in conjugate pairs with same multiplicity. Relation between roots and co-efficients. Transformation of equations. Descartes' Rule of Signs.

Unit-II

Newton's method of divisors, Solution of cubic and bi-quadratic equations, Cardan's method of solving a cubic, discriminant and nature of roots of real cubic, trigonometric solutions of a real cubic with real roots. Descarte's and Ferrari's method for a bi-quadratic.

References:

COMPUTER SCIENCE

SEMESTER-I

SCHEME OF EXAMINATION

FIRST SEMESTER			Exam . Hrs	Ext.	Int.	Max. Marks
Paper – CS01	**Theory-A**	**Computer Fundamentals**	**3**	**30**	**5**	**35**
Paper –CS02	**Theory-B**	**PC Software**	**3**	**30**	**5**	**35**
Paper – PCS01	**Practical-C**	**Practical Based on Paper – CS01**	**3**	**30**	**--**	**30**

Note : Practical marks will include the appropriate weightage for proper maintenance of Lab. Record.

Paper-CS01 : Computer Fundamentals

Objective : To teach the students the fundamentals of computer related to its hardware & software.

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT - I

Computer Appreciation: Introduction to computers, characteristics of computer; History of computers; Classification of computers on size: (Micro, Mini, Mainframe and super computers), Working Principles, Generations; Applications of computers; commonly used terms–Hardware, Software, Firmware. Basic Computer Organization: Block diagram of computer system, Input unit, Processing Unit and Output Unit; Description of Computer input devices: Keyboard, Mouse, Trackball, Pen, Touch screens, Scanner, Digital Camera; Output devices: Monitors, Printers, Plotters.

UNIT –II

Computer Memory: Representation of information: BIT, BYTE, Memory, Memory size; Units of measurement of storage; Main memory: main memory organization, RAM, ROM, PROM, EPROM; Secondary storage devices: Sequential Access Memory, Direct Access Memory Magnetic Tapes, Magnetic disks, Optical disks: CD, DVD; Memory storage devices: Flash Drive, Memory card;

UNIT – III

Types of software: System and Application software; **Programming Languages**: Generation of Languages; Translators - Interpreters, Compilers, Assemblers and their comparison. **Range of Applications**: Scientific, Word Processing, Spread Sheets, E-commerce, Business, Educational, Industrial, National level weather forecasting, Remote Sensing, Planning Multilingual Applications.

UNIT – IV

Operating Systems : Components of Operating System; Functions of Operating System; Types of Operating System; Linux/Dos/Windows. **Computers and Communication**: Single user, multi-user, workstation, and client server systems. Computer networks, Network protocols. LAN, WAN, Services offered by Internet.

Suggested Readings :

1. Basandra, S.K. : Computers Today, Galgotia.
2. Sinha P.K. & Sinha Priti : Computer Fundamentals, BPB Publications

Paper-CS02: PC Software

Objective : To teach the basic functionality of Disk Operating System & Windows. To impart detailed knowledge for creating word processing, spreadsheet & presentation documents.

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT – I

Concept of files and directories; Disk Operating System: DOS, System Files, types of DOS commands: Internal and External commands: Introduction to AUTOEXEC.BAT, Directory commands: XCOPY, DEL, RENAME, ATTRIB, BACKUP, RESTORE, FIND, SYS; General commands: TYPE, DATE, TIME, PROMPT; Batch Files, Wild Cards, Line Editor.

UNIT – II

Introduction to graphical user interface, window operating system, Anatomy of windows, organizing folders and files, recycle bin, my computer, windows explorer, control panel.

UNIT – III

Word Processing : Basics of Word Processing; Opening, Creating, Saving, Printing and Quitting Documents, Using the Interface (Menu Toolbars), Editing Text (Copy, Delete, Move), Finding and Replacing Text, Spell Check, Autocorrect; Auto Text, Character formatting, Page formatting; Document Enhancement; Adding Borders and shading, Adding Headers and Footers, Setting up Multiple columns, Sorting blocks, Adjusting Margins and Hyphenating Documents, Creating Master Documents, Creating Data Source, Merging Documents, Using Mail merge feature for labels and envelops; Inserting Pictures, Tables, Working with equations.

UNIT – IV

Spread Sheet : Worksheet overview, Row, Column, Cells, Menus, Creating Worksheet, Opening, Saving, Printing Worksheets; Calculations, Auto fill, Working with Formulae, Data Formatting (number formatting, date formatting), Working with Ranges, Establishing Worksheet links; Creating, Sorting and Filtering Data Base; Creating chart, Adding Titles, Legends etc. to charts, Printing Charts, Creating Macros, Record Macros, Running Macros, Assigning Macros to Buttons, Functions (Statistical, Financial, Mathematical, String, Date and Time).

MS-Power Point: Creating, Saving, Printing Presentation; Selecting Design Templates, Animations and Transitions, Auto Content Wizard.

Suggested Readings :

1. Ludd Robbins : *Mastering DOS.*
2. Alan R. Miller : *The ABC's of DOS-6.2.*
3. Richard Allen King : *MS-DOS H. B.*
4. Gilbert Held : *IBM PC and PCXT User's Reference Manual.*
5. Cowart, Robert : *Using Microsoft Windows 2000 Professional,* Que Publishing, 2000.
6. Taxali, Ravikant : *PC Software Made Simple,* New Delhi.
7. Mansfield, Ron : *Compact Guide to Windows, Word & Excel.*

Paper – PCS01 : Practical : Practicals Based on Paper CS02

……..

COMPUTER SCIENCE
SEMESTER-II

SCHEME OF EXAMINATION

		SECOND SEMESTER	Exam . Hrs	Ext.	Int.	Max. Marks
Paper – CS03	**Theory-A**	**Operating System Concepts**	**3**	**30**	**5**	**35**
Paper –CS04	**Theory-B**	**C Programming**	**3**	**30**	**5**	**35**
Paper – PCS02	**Practical-C**	**Practical Based on Paper – CS04**	**3**	**30**	**--**	**30**

Paper-CS03: Operating System Concepts

Objective : To teach the students various operating system concepts relating to managing processes, memory and deadlocks.

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT - I

Operating Systems (OS): Introduction, need of operating system and functions of operating system, Types of OS: Multi-user, Multitasking, Multiprocessing and Real time Operating Systems, Parallel systems, Distributed systems; Structure of Operating System;

UNIT - II

Process Management: Introduction to Process, PCB, Process States, CPU Scheduling: Scheduling Criteria and Algorithms: FCFS, SJF, Priority, Round Robin, Multilevel Queue Scheduling, Multilevel Feedback Queue Scheduling.

UNIT - III

Deadlocks: Introduction, Necessary and sufficient conditions for Deadlocks, Resource allocation graph, Introduction to methods for handling deadlocks, deadlock prevention, deadlock avoidance: Banker Algorithm, deadlock detection and recovery.

UNIT - IV

Memory Management: Logical vs Physical address space, Swapping, Introduction to Paging, Segmentation, Virtual Memory-Demand paging, Introduction to Page Replacement algorithms: FIFO, Optimal Page replacement and LRU

Suggested Readings :

Essential :

1. Peterson, J.L.& Silberschatz, A., Operating System Concept, Addison Wesley, reading.

Further Reading :

2. Brinch, Hansen, Operating System Principles, Prentice Hall of India
3. Haberman, A.N., Introducing to Operating System Design Galgotia Publication, New Delhi

Paper-CS04 : C Programming

Objective : To teach the student basic constructs of 'C' programming language and enable them to create 'C' based applications.

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT – I

Programming Process: Steps in developing of a program, Data Flow Diagram, Decision Table, Algorithm development, Flowchart, Pseudo Code, Testing and Debugging.

Fundamentals of C Languages: History of C, Character Set, Identifiers and Keywords, Constants, Types of C Constants, Rules for Constructing Integer, Real and character Constants, Variables, Data Types, rules for constructing variables.

UNIT – II

Operators and Expressions: C Instructions, Arithmetic operators, Relational operators, Logical operators, Assignment Operators, Type Conversion in Assignments, Hierarchy of Operations, Standard and Formatted Statements, Structure of a C program , Compilation and Execution.

Decision Control Structure: Decision making with IF-statement, IF-Else and Nested IF-Else, The else if Clause.

Loop Control Structure: While and do-while, for loop and Nested for loop,

Case Control Structure: Decision using switch, The goto statement.

UNIT – III

Functions: Library functions and user defined functions, Global and Local variables, Function Declaration, Calling and definition of function, Methods of parameter passing to functions, recursion, Storage Classes in C.

Arrays: Introduction, Array declaration, Accessing values in an array, Initializing values in an array, Single and Two Dimensional Arrays, Initializing a 2-Dimensional Array, Memory Map of a 2-Dimensional Array, Passing array elements to a function.

UNIT – IV

String Manipulation in C: Declaring and Initializing string variables, Reading and writing strings, String Handlingfunctions(strlen(), strcpy(), strcmp(), strcat()).

Structures and Unions: Declaration of structures, Structure Initialization, Accessing structure members, Union, Difference between Structure and Union .

Suggested Readings :

Essential :

1. Yashavant P. Kanetkar : Let us C, BPB Publications, New Delhi.

Further Reading :

2. Salaria, R.S. : Test Your Skills in C, Salaria Publications, New Delhi.
3. C. Balaguruswami : Programming with C Language, Tata McGraw Hill, New Delhi.
4. Byron S. Gottfried : Programming in C, McGraw Hills Publishers, New York.
5. M.T. Somashekara : Programming in C, Prentice Hall of India.

Paper – PCS02 : Practical : Practical Based on Paper CS04.

STATISTICS

SEMESTER - I

Note :
1. A candidate shall offer this subject in B.A./B .Sc. only if he/she takes up Mathematics as a subject in B.A./B.Sc.
2. There are two papers code named papers 101 and 102 in the subject of Statistics in B.A./B.Sc. 1st Semester. These are to be taught simultaneously throughout the Semester.
3. 8 lectures (45 minutes each) for theory per week and 4 lectures (45 minutes each) for practical per week amounting in all to 12 lectures per week for two papers (one theory and one practical) shall be allotted for the teaching.

Paper- 101: PROBABILITY THEORY and DESCRIPTIVE STATISTICS-I

Max. Marks	:	75
Theory	:	65
Internal Assessment	:	10
Time	:	3 Hours

Objective: The objective of the course is to make the students conversant with various techniques used in summarization and analysis of data. The focus will be both on theoretical as well as practical approach. This course will lay the foundation to probability theory of outcomes of real life random experiments. The focus will be on theoretical as well as practical approach.

Notes:

1. There will be in all nine (9) questions, all of equal marks. The first question is **compulsory** and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit**.**

2. Simple non-programmable calculator is allowed**.**

3. Statistical tables and log tables will be provided on request.

Unit-I

Important Concepts in Probability: Random experiment, trial, sample point and sample space, definition of an event, mutually exclusive, exhaustive, independent and equally likely events. Definition of probability – classical and relative frequency approach to probability, their demerits and axiomatic approach to probability. Properties of probability based on axiomatic approach, conditional probability, Bayes' theorem and its applications (concepts and simple applications).

Random Variables: Definition of discrete random variables, probability mass function, continuous random variable, probability density function, illustrations of random variables and their properties, distribution function and its properties, expectation of a random variable and its properties – moments, (only definition), moment generating function. Two dimensional random variables- joint, marginal and conditional distributions . Distribution of random variables.

Unit-II

Collection of Data: Primary data – designing a questionnaire and a schedule. Secondary data- its major sources including some government publications. Concept of a Statistical Population and samples from a population; qualitative and quantitative data; discrete and continuous data.

Presentation of Data: Diagrammatic representations of data, frequency distribution, graphical representation, histogram, frequency polygon, frequency curves and ogives, stem-and-leaf-display, Box and whisker plot.

Analysis of Quantitative Data: univariate data concepts of central tendency, dispersion and relative dispersion, skewness and kurtosis and their measures including those based on quartiles and moments. Sheppard's correction for moments (without derivation).

Suggested Readings

1. Meyer P.L (1971) : *Introductory Probability and Statistical applications*. Addison Wesley.

2. Goon A.M., Gupta M.K., Dasgupta.B. (2005) :*Fundamentals of Statistics*, Vol. I, World Press, Calcutta.

3. Daniel, W.W. and Cross C.L.(2013) : *Biostatistics* (7th edition) Wiley.

Additional Readings

1. Mood A.M, Graybill F.A and Boes D.C. (1977) : *Introduction to the Theory of Statistics*, McGraw Hill.

2. Miller, I. and Miller, M. (2002) : John E. Freunds's *Mathematical Statistics* (6th addition, low price edition). Prentice Hall of India.

3. Sheldon M.R. (2000) : *Introduction to Probability Models*, Fourth Edition.

4. Croxton F.E, Cowden D.J and Kelin S (1973) : *Applied General Statistics*, Prentice Hall of India.

5. Lipshut Z, S., Lipson, Lipson, M.L. and Jain, K. (2010) : Schaum's outlines on Probability, Second Special Indian Edition, Tata McGraw Hill Education Private Limited.

6. Spiegel, M.R, Stephens, L.J. and Kumar N. (2010) : Schaum's outlines *Statistics*, (4th edition) Tata McGraw Hill Education Private Limited.

Paper-102 : PRACTICAL (SEMESTER-I)

Maximum Marks : 25
Time Allowed : 3 Hours

(Viva voce: 5 marks; record of the semester; 5 marks; Annual Paper: 15 marks)

Note: The Practical Question Paper will contain five questions from the following topics. A student will be required to attempt three questions, each of 5 marks, in three hours duration.

Viva voce and record of the year will carry 5 marks each.

1. Presentation of data by Frequency tables
2. Diagrams: Bar, Multiple Bar, Stacked Bar, Line and Pie
3. Graphs: histogram, frequency polygon, frequency curves and ogives, stem-and-leaf-display
4. Measures of central tendency
5. Measures of dispersion
6. Measures of Skewness
7. Box and Whisker Plot
8. Measures of Kurtosis.

……..

STATISTICS

SEMESTER-II

Note: 1. A candidate shall offer this subject in B.A./B.Sc. only if he/she takes up Mathematics as a subject in B.A./B.Sc.

2. There are two papers code named papers 103 and 104 in the subject of Statistics in B.A./B.Sc. 2nd semester. These are to be taught simultaneously throughout the semester.

3. 8 lectures (45 minutes each) for theory per week and 4 lectures (45 minutes each) for practical per week amounting in all to 12 lectures per week for two papers (one theory and one practical) shall be allotted for the teaching.

Paper - 103: PROBABILITY THEORY and DESCRIPTIVE STATISTICS-II

Maximum Marks : 75
Theory : 65
Internal Assessment : 10
Time allowed : 3 hours

Objective: This course will lay the foundation to probability theory of outcomes of real life random experiments through various Statistical distributions.
The objective of the course is to make the students conversant with various techniques used in analysis of data.

Notes:

1. There will be in all nine (9) questions, all of equal marks. The first question is compulsory and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit**.**

2. Simple non-programmable calculator is allowed**.**

3. Statistical **tables** and log tables will be provided on request.

Unit-I

Standard Univariate Distributions and their Properties: Discrete uniform, Binominal, Poisson, Hyper geometric, Geometric and negative binomial distributions, uniform, normal , exponential, gamma, beta distributions.

Bivariate normal distribution and associated marginal and conditional probability distributions (without derivation).

Chebyshev's inequality and its applications, statements and applications of weak law of large numbers, and Central Limit Theorems (De-moivre's – Laplace and Lindeberg -Levy).

Unit-II

Bivariate Data: scatter diagram, product moment correlation coefficient, properties and coefficient of determination. Spearman's rank correlation coefficient. Simple linear regression and its properties, principle of least square, fitting of linear regression and related results

Multivariate Data: multiple and partial correlation in three variables. (only results no derivations).

Analysis of Categorical Data (using 2x2 contingency table): consistency of categorical data independence and association of attributes. Various measures of association:-Yule coefficient, coefficient of colligation & coefficient V_{AB}.

Paper - 104: PRACTICAL (Semester-II)

Maximum Marks: 25
Time allowed : 3 hours

(Viva voce: 5 marks; record of the semester; 5 marks; Annual Paper: 15 marks)

Note: The Practical Question Paper will contain five questions from the following topics. A student will be required to attempt three questions, each of 5 marks, in three hours duration.

Viva voce and record of the year will carry 5 marks each.

1. Product Moment Correlation.
2. Spearman's rank correlation
3. Linear Regression of two variables.
4. Fitting of Curves (reducible to linear form) by the least square method.
5. Multiple and Partial correlations
6. Fitting of Binomial, Poisson and Normal distributions

.....

APPLIED STATISTICS

SEMESTER - I

Note: 1. This course shall not be opted for along with courses in B.A. /B.Sc Mathematics and/ or B.A. / B.Sc. Statistics.
2. The candidate opting for this course will not be eligible for admission to M.A./ M.Sc. Statistics.
3. There is one paper with code 101AS in B.A. /B.Sc. Semester-I having a total of 100 marks.
4. 9 Lectures of 45 minutes each per week shall be allotted for the teaching.

Paper- 101AS: MATHEMATICAL METHODS – I

Maximum Marks : 100
Theory : 90
Internal Assessment : 10
Time allowed : 3 hours

Objective: The objective of the course is to provide knowledge of the basic concepts in Calculus, Trigonometry, Algebra and Geometry.

Notes:

1. There will be in all nine (9) questions, all of equal marks. The first question is compulsory and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit**.**

2. Simple non-programmable calculator is allowed.

3. Statistical tables and log tables will be provided on request.

UNIT-I (CALCULUS AND TRIGONOMETRY)

Limits and continuity of functions, derivatives and their geometrical interpretations. Applications of derivatives to maxima and minima, exponential and logarithmic functions, integrals of functions of one variable, geometrical interpretation of integral as area, integration of standard functions, integration by substitution and parts.

Trigonometry: Definition of an angle, its various measures and relations between them, graphs circular functions.

UNIT-II (ALGEBRA AND GEOMETRY)

The solution of linear and quadratic equations in one variable, arithmetic, geometric and harmonic progressions, permutations and combinations, principle of induction, Binomial theorem for positive integral index.

Elementary Analytical Geometry: Equations of straight line, parabola, and hyperbola.

Books Recommended

1. Allen, R.G.D (2006) : Mathematical Analysis for Economists, Chapter-II (Units 2.1, 2.2, 2.8), Chapter-III (Units 3.1, 3.6), Chapter – IV (Units 4.1, 4.7), Chapter VI (Units 6.1 – 6.8), Chapter VII, Chapter VIII (Unit 8.2), Chapter IX (Units 9.1 – 9.4), Macmillan Delhi.

2. Gurhard Tintner (1970) : Mathematics and Statistics for Economists Chapter – VI., Rinehart : New York

3. Loney, S.L. (2010) : Plane Trigonometry, Part – I, Chapter – I (Units I to 22), Part – II, Chapter V (Units 61, 65),Aitbs Publishers, India.

APPLIED STATISTICS

SEMESTER – II

Note: 1. This course shall not be opted for along with courses in B.A. /B.Sc Mathematics and/ or B.A. / B.Sc. Statistics.
2 The candidate opted for this course will not be eligible for admission to M.A./ M.Sc. Statistics.
3. There is one paper with code 102AS in B.A./B.Sc. Semester-II having a total of 100 marks.
4. 9 Lectures of 45 minutes each per week shall be allotted for the teaching.

Paper- 102AS: PROBABILITY

Maximum Marks : 100
Theory : 90
Internal Assessment : 10
Time allowed : 3 hours

Objective:. This course will lay the foundation to probability theory of outcomes of real life random experiments through various Statistical distributions.

Notes:

1. There will be in all nine (9) questions, all of equal marks. The first question is compulsory and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit**.**

2. Simple non-programmable calculators are allowed.

3. Statistical tables and log tables will be provided on request.

UNIT-I

Random experiments, sample space, events probability, Finite sample spaces, equally likely outcomes, conditional probability, Bayes theorem, independent events, random variables, discrete and continuous probability density functions.

UNIT –II

Expectation and variance of random variable.
Binomial, Poisson, geometric, hypergeometric, uniform, exponential and normal distribution

Books Prescribed

PHYSICS

B.Sc. (GENERAL) FIRST YEAR (1st and 2nd Semester) EXAMINATION, 2020-21

General Instructions for teachers, students and paper setters :

1. There will be three papers of theory and one laboratory (practical course). Each of the theory papers is allocated 25 marks including 3 (three) marks for the Internal assessment. **The Practical examination is of 50 marks including 5 (Five) marks for the Internal assessment and will be held along with the second semester examination.**
2. The number of lectures per week will be three for each theory paper and six for practicals.
3. The examination time for each theory paper as well as practical paper will be three hours.
4. Each theory paper will consist of **seven** questions comprising of three sections. First two sections will comprise of **three** questions from each of Units I and II of syllabus, and the third section will comprise of **one compulsory** question of **ten** short answer type parts covering whole syllabus. The question paper will be set for 44 marks - **All the questions in first and second sections will carry 9 (nine) marks each and the compulsory question will carry 8 marks.** Student will attempt two questions from each of the first two sections and any eight parts of the compulsory question. **After evaluation of the answer books out of 44 marks, the marks will be given out of 22 marks.**
5. The numerical problems/exercises in the question paper should be 25-30%.
6. Student will attempt two questions from each Unit (I-II) and any six parts of question seven.
7. The use of Non-programmable calculators will be allowed (paper setter should explicitly mention this in the question paper) in the examination centre but these will not be provided by the University/College. Mobile phones and pagers are not allowed in the examination hall.

Papers, marks and teaching hours allocation :

Paper A :	Mechanics	Total Teaching hrs. 30
Paper B :	Vibrations, Waves and EM Theory	Total Teaching hrs. 30
Paper C :	Electricity and Magnetism	Total Teaching hrs. 30
	Physics Practicals	Total Teaching hrs. 45

* marks allotted for internal assessment.

PHYSICS

SEMESTER – I

Paper A: MECHANICS-I (30 Hrs.)

UNIT-I

Cartesian and spherical polar co-ordinate systems, Two- and three-dimensional coordinate systems, area, volume, displacement, velocity, and acceleration in these systems, solid angle.
Centre of mass, linear momentum, angular momentum, torque, potential energy and kinetic energy of a system of particles.
Relationship of conservation laws of linear momentum, angular momentum and energy, and symmetries of space and time.

UNIT-II

Various forces in nature, relative strengths and spatial dependence,
Motion under force obeying inverse square law, equivalent one body problem.
Motion under central forces, equation of motion under central force, equation of orbit and turning points, Kepler's Laws.
Elastic collision in Lab. and C.M. systems, relationships of velocities, angles, and kinetic energies in these two systems, cross section of elastic scattering, Rutherford scattering.

Books Suggested :

Essential Readings :

1. Mechanics, H.S. Hans & S.P. Puri.
2. Mechanics, Berkeley, Vol. I, C. Kittle.

Further Readings :

1. *An Introduction to Machines,* Daniel Kleppner & Robert J. Kolenkow (TMH).
2. *Introduction of Classical Mechanics,* R.G. Takwale & P.S. Puranik (TMH, 2000).

Paper B: VIBRATIONS, WAVES & E.M. THEORY-I (30 Hrs.)

UNIT-I

Simple harmonic motion, energy of a SHM, Compound Pendulum, Torsional Pendulum, Electrical Oscillations, Transverse Vibrations of a mass on a string, composition of two perpendicular SHM of same period and of period in ratio 1: 2. Decay of free vibrations due to damping, differential equation of motion, types of damping, determination of damping co-efficient; Logarithmic decrement, relaxation time and Q- Factor. Electromagnetic damping (Electrical oscillator).

UNIT-II

Differential equation for forced mechanical and electrical oscillators, Transient and steady state behaviour. Displacement and velocity variation with driving force frequency, variation of phase with frequency, resonance. Power supplied to an oscillator and its variation with frequency. Q-value and band width. Q-value as an amplification factor. Stiffness, coupled oscillators, Normal co-ordinates and normal modes of vibration, Inductance coupling of electrical oscillators.

Books Suggested :

Essential Readings :

1. *Text Book of Vibrations and Waves* by S.P. Puri (Macmillan India Ltd.).
2. *Physics of Vibrations and Waves* by H.J. Pain, ELBS & John Wiley, London.

Further Readings :

1. *Vibrations and Waves* by A.P. French (Arnold Heinemann India, New Delhi).
2. *The Mathematics of Waves and Vibrations* by P.K. Ghosh (Mcmillan India).
3. *Waves and Oscillations* by N. Subrahmanayam & B. Lal (Vikas Pub., Delhi).

Paper–C : ELECTRICITY AND MAGNETISM-I (30 Hrs.)

UNIT-I

Basic ideas of Vector Calculus, Gradient, Divergence, curl in Cartesian coordinates and their useful relations, physical significance and applications, Conservative field, Greens's theorem in a plane, Laplacian in Rectangular coordinates. Stoke's theorem, Gauss's divergence theorem, Coulomb's Law for point charges and continuous distribution of charges, electric field due to dipole, line charge, charged ring, circular disc and sheet of charge, Gauss's Law and its differential form.

UNIT-II

Work and potential difference, Potential difference as line integral of field, Electric potential due to dipole and quadrupole and its applications in Electrostatic field, Electric field as gradient of scalar potential, curl $\mathbf{E} = 0$. Calculation of $\mathbf{E}$ due to a point charge and dipole from potential. Poisson and Laplace's equation, Concept of electrical images. Calculation of electric potential and field due to a point charge placed near an infinitely conducting sheet.

Polarisation of matter, atomic and molecular dipoles, induced dipole moment and atomic polarizability. Electric susceptibility and polarization vector. Relation $K= 1 + \chi$, Gauss's law for dielectrics. Displacement vector, Div. $\mathbf{D} = 0$, Energy stored in dielectric medium.

Books Suggested :

Essential Readings :

1. *Electricity & Magnetism* by A.S. Mahajan & A.A. Rangwala (Tata McGraw Hill).
2. *Fundamentals of Electricity and Magnetism* by Arthur F. Kipp.
3. *Electricity and Magnetism, Berkeley Physics Course, Vol. II* by E.M. Purcell.
4. *Introduction to Classical Electrodynamics* by David Griffith, Prentice Hall.

Further Readings :

1. *Electricity & Magnetism,* 4th Edition, W.J. Duffin.
2. *EM Waves and Radiating Systems,* Edward C. Jordan and K. G. Balmain, Prentice Hall.

PHYSICS PRACTICALS

The activities given in the section "Analysis of Experimental Data" are compulsory for all the students in the First semester.

The students are required to perform all the Nine experiments from each of the Units I and Unit II. The Practical examination will be held along with the second semester examinations.

The aim of project work is to develop the scientific and technical temper in the students and as such it may consist of development of a laboratory experiment, fabrication of a device or electronic circuit etc. The student will prepara a project report of about 10 pages. Assessment of the project work will be done on the basis of effort put in the execution of the project, report prepared, and viva-voce.

General Guidelines for Physics Practical Examinations :

Total : 50 marks

1. The distribution of marks is as follows :

(i)	One full experiment out of section–A requiring the student to take some data, analyse it and draw conclusions. (Candidates are expected to state their results with limits of error).	20
(ii)	One exercise based on experiment or Computer Programming from the Unit assigned to the student for the semester	7
(iii)	Viva-Voce and Record (Practical file)	10
(iv)	Project	8
(v)	Internal Assessment	5

Note for Examiners :

2. The marks scored under each head must be clearly written on the answer sheet.
3. There will be one session of 3 hours duration. The paper will have two sections. Section-A will consist of 4 experiments from each of Unit I and Unit II, out of which an examinee will mark 3 experiments from either of units and one of these is to be allotted by the external examiner.
4. Section–B will consist of exercises which will be set by the external examiner on the spot. The length of the exercises should be such that any of these could be completed in one hour.
5. The examiner should take care that the experiment allotted to an examinee from section–A and exercise allotted from section–B are not directly related to each other.
6. Number of candidates in a group for practical examination should not exceed **12**.
7. In a single group, no experiment to be allotted to more than three examinees in the group.

Analysis of Experimental Data (Compulsory for all students in first semester):

Objectives :

(i) Knowledge of propagation of errors.
(ii) Knowledge of significant figures, Determination of standard deviation and probable error and their use in interpretation of the experimental result.
(iii) Familiarity with the method of least square fitting of experimental data to a curve.

LIST OF EXPERIMENTS :

UNIT-I

MECHANICS

I. Measurements :

Objectives :

(i) Measurements of time, length, thickness and curvature, pressure, humidity
(ii) Concepts of least count, horizontal, vertical and angular alignments

Activities :

(i) To measure internal/external diameter of a hollow cylinder using Vernier calipers
(ii) To measure thickness of wire
(iii) To measure curvature of a lens
(iv) To measure pressure using Barometer
(v) To measure humidity using dry and wet thermometer

II. Rotation :

Objectives :

(i) Study of rotational motion.
(ii) Establishing relationship between different quantities.

Activities :

(i) To study the dependence of moment of inertia on distribution of mass (by noting time periods of oscillations using objects of various geometrical shapes but of same mass).

(ii) To establish relationship between torque and angular acceleration using fly wheel.

III. One-Dimensional Collisions :

Objectives :

(i) Conservation of linear momentum and kinetic energy in elastic collisions.
(ii) Dependence of fraction of kinetic energy transferred on the masses of colliding bodies.
(iii) Idea of coefficient of restitution.

Activities :

To determine energy transfer, coefficient of restitution and verify laws of conservation of linear momentum and kinetic energy in elastic collisions using one dimensional collisions of hanging spheres.

IV. Compound Pendulum :

Objectives :

(i) Idea of equivalent simple pendulum.
(ii) Concepts of centre of suspension and oscillation.
(iii) Dependence of time period on moment of Inertia .
(iv) Radius of gyration.
(v) Determination of g.

Activities :

(i) Measure time period as a function of distance of centre of suspension (oscillation) from centre of mass, plot relevant graphs, determine radius of gyration and acceleration due to gravity.
(ii) Find the value of g by Katers' or Bar pendulum.

V. Torsion Pendulum :

Objectives :

(i) Idea of torsional vibration, dependence of time period on M.O.I. and restoring torque.
(ii) Modulus of rigidity.

Activity :

Measure time period of oscillation of a Maxwell needle and determine modulus of rigidity of the material of a given wire.

VI. Damped Oscillator :

Objectives :

(i) Study damped oscillations.
(ii) Coefficient of damping, quality factor etc.

Activities :

To measure/obtain logarithmic decrement, coefficient of damping, relaxation time, and quality factor of a damped simple pendulum.

VII. Elasticity :

Objective :

Knowledge of elastic constants and related quantities.

Activities :

(i) Study of bending of beams and determination of Young's Modulus.
(ii) Determination of Poisson's ratio for rubber/plastic.

VIII. Standing waves :

Objective :

Standing waves on a string and in air.

Activities :

(i) Melde's experiment.
(ii) Kundt's tube.

IX. Viscosity :

Objective :

Knowledge of viscosity of liquids.

Activity :

Determination of coefficient of viscosity of a given liquid by Stoke's method and study its temperature dependence.

Computer based activities : Elementary C language programs, flowcharts and their interpretation.

1. To print out all natural even/odd numbers from a given series of natural numbers.
2. Numerical solution of equations of motion.
3. To calculate first ten prime numbers.

UNIT-II

ELECTRICITY AND MAGNETISM

I. Objective :

Measurement of resistance, voltage, current and electric energy.

Activities :

(i) To use a multimeter for measuring AC and DC voltage and resistance.
(ii) Measurement of resistance of LDR - To study inverse-square law (concept of solid angle and inverse square law) using linear LDR and light source.
(iii) Observations and measurements using an Electric energy meter. To find wattage of given bulb or heater.
(iv) To study the efficiency of an electric kettle or heater element with varying input voltage.

II. Low Resistance Measurements :

Objectives :

(i) Inadequacy of Wheatstone bridge to measure low resistances.
(ii) Acquaintance with a method of measuring low resistances.

Activity :

To determine low resistance with Carey Fosters Bridge.

III. Magnetic Field :

Objectives :

(i) Familiarity with the magnetic field produced by a solenoid.
(ii) Dependence of solenoidal field on number of turns and current.
(iii) Permeability of air.

Activities :

To study the magnetic field produced by a current carrying solenoid using a search coil and calculate permeability of air.

IV. Electromagnetic Induction :

Objective :

Verification of laws of electromagnetic induction.

Activity :

To study the induced e.m.f. as function of the velocity of the magnet.

V. Magnetism and current :
Objectives and Activities :

Force on a conductor carrying current in a magnetic field.

VI. LCR Circuits :

Objective :

Study of phase relationship between currents and voltages in ac circuits.

Activity :

Study of phase relationships using impedance triangle for LCR circuit and calculate impedance.

VII. Resonant Circuits :

Objective :

Concepts of resonance and Q-value.

Activities :

(i) Resonance in a series LCR circuits for different R-value and calculate Q-value.
(ii) Resonance in a parallel LCR circuits for different R-value and calculate Q-value.
(iii) To determine the dielectric constant of a solid by resonance method.

VIII. Capacitance :

Objectives :

(i) Measurement of capacitance, dielectric constant.
(ii) Concept of time constant and time base circuit.
(iii) Knowledge of a-c Bridges.

Activities :

(i) Capacitance by flashing and quenching of a neon lamp.
(ii) Measurement of capacitance, determination of permittivity of a medium, air and relative permittivity by De-Sauty's bridge.

IX. Self Inductance :

Objectives :

(i) Knowledge of a-c bridges.
(ii) Concept of self-inductance.

Activities :

(i) To determine L using Anderson Bridge.

Computer based activities: Elementary C language programs, flowchart and their interpretation.

1. To rearrange a list of numbers in ascending and descending orders.
2. To compile a frequency distribution and evaluate moments such as mean; standard deviation etc.
3. To evaluate sum of finite series and the area under a curve.

Texts and Reference Books :

1. *"B.Sc. Practical Physics by C.L. Arora, S.Chand & Co. (2014).*
2. *"A Laboratory Manual of Physics for Undergraduate Classes"* by D.P. Khandelwal.
3. *"Programming with C, Schaum series"* by Byron Gottfried & Jitender Chhabra

…….

PHYSICS

SEMESTER–II

Paper A : MECHANICS – II

UNIT-I

Rigid Body motion; Rotational motion, principal moments and Axes, Euler's equations, precession and elementary gyroscope.
Galilean transformations and Invariance, Transformation equations for inertial frames inclined to each other, Non-Inertial frames. Fictitious forces in a rotating frames of reference, Centrifugal and Coriolis forces due to rotation of earth, Foucault's pendulum.
Concept of stationery universal frame of reference and ether, Michelson-Morley experiment and its results.

UNIT-II

Postulates of special theory of relativity, Lorentz transformations, Kinematical consequences of Lorentz transformations – length contraction and time dilation, Twin paradox, Transformation of velocities, Simultaneity of relativity, Velocity of light in moving fluid, Relativistic Doppler effect.
Variation of mass with velocity, mass-energy equivalence, rest mass in an inelastic collision, relativistic momentum & energy, their transformation, concepts of Minkowski space, four vector formulation.

Books Suggested :

Essential Readings :

1. Mechanics, Berkeley, Vol. I, C. Kittle.
2. Mechanics, H.S. Hans & S.P. Puri.

Further Readings :

1. *Mechanics & Relativity (3rd Edition)*, Vidwan Singh Soni (PHI Learning, New Delhi, 2013)
2. *An Introduction to Machines,* Daniel Kleppner & Robert J. Kolenkow (TMH).
3. *Introduction of Classical Mechanics,* R.G. Takwale & P.S. Puranik (TMH, 2000).
4. *Basic Concepts of Relativity,* R.H. Good (East-West Press, New Delhi, 1974).

Paper B: VIBRATIONS, WAVES & E.M. THEORY-II (30 Hrs.)

UNIT-I

Waves in physical media, Wave equation and its solution, Types of waves, particle velocity, acceleration and energy in progressive waves. Longitudinal waves on a rod.
Transverse waves on a string, characteristic impedance of a string, Waves in absorbing media.
Reflection and Transmission of transverse waves on a string at discontinuity, Reflection and transmission of energy.
Reflection and transmission of longitudinal waves at a boundary.
Standing wave ratio, Impedance matching, Energy of vibrating string. Wave and group velocity.

UNIT-II

Physical interpretation of Maxwell's equations, E.M. waves and wave equation in a medium having finite permeability, permittivity and conductivity. Energy flow due to EM wave - Poynting vector, Impedance of a dielectric to EM waves. EM waves in a conducting medium and skin depth. Impedance and Refractive index of a dielectric and a conductor.
Reflection and transmission of EM waves at a boundary of two dielectric media for normal and oblique incidence.
Reflection of EM waves from the surface of a conductor at normal incidence.

Essential Readings :

Books Suggested :

1. *Text Book of Vibrations and Waves* by S.P. Puri (Macmillan India Ltd.).
2. *Physics of Vibrations and Waves* by H.J. Pain, ELBS & John Wiley, London.
3. *EM Waves and Radiating Systems* by Edward C. Jordan and K.G. Balmain, Prentice Hall.

Further Readings :

1. *Vibrations and Waves* by A.P. French (Arnold Heinemann India, New Delhi).
2. *The Mathematics of Waves and Vibrations* by P.K. Ghosh (Mcmillan India).
3. *Waves and Oscillations* by N. Subrahmanayam & B. Lal (Vikas Pub., Delhi).

Paper-C: ELECTRICITY AND MAGNETISM-II (30 Hrs.)

UNIT-I

Current and current density, equation of continuity. Microscopic form of Ohm's Law ($\mathbf{J} = \sigma\mathbf{E}$) and conductivity. Failure of Ohm's Law. Invariance of charge. **E** in different frames of reference. Field of a point charge moving with constant velocity. Force between parallel currents.
Behaviour of various substances in magnetic field. Definition of M and H and their relation to free and bound currents. Permeability and susceptibility and their interrelationship. B-H curve and energy loss in hysteresis, Langevin theory of diamagnetism.

UNIT-II

Lorentz's force. Definition of **B**. Biot Savart's Law and its application to long straight wire, circular current loop and solenoid. Ampere's Circuital law and its application. Divergence and curl of **B**. Hall effect, expression and co-efficient. Vector potential, Definition and derivation, current density— definition, its use in calculation of change in magnetic field at a current sheet. Energy stored in magnetic field, Faraday's Law of EM induction, Displacement current, Mutual inductance and reciprocity theorem. Self inductance for solenoid.

Books Suggested :

Essential Readings :

1. *Electricity & Magnetism,* A.S. Mahajan & A.A. Rangwala (Tata McGraw Hill).
2. *Fundamentals of Electricity and Magnetism* by Arthur F. Kipp.
3. *Electricity and Magnetism, Berkeley Physics Course, Vol. II* by E.M. Purcell.
4. *Introduction to Classical Electrodynamics* by David Griffith, Prentice Hall.

Further Readings :

1. *Electricity & Magnetism,* 4th Edition, W.J. Duffin.
2. *EM Waves and Radiating Systems,* Edward C. Jordan and K. G. Balmain, Prentice Hall.

PHYSICS PRACTICALS

The Practical examination will be held along with the second semester examinations. General Guidelines for Physics Practical Examinations and syllabus is given in syllabus for Semester I.

CHEMISTRY
SEMESTER – I

Scheme of Teaching and Examination

Paper	*Course*	*Teaching Hrs.*		*Max. Marks*
I	Inorganic Chemistry-A	30	3 periods per week	22 + 3 internal assessment
II	Organic Chemistry-A	30	3 periods per week	22 + 3 internal assessment
III	Physical Chemistry-A	30	3 periods per week	22 + 3 internal assessment
IV	Laboratory Practicals		6 periods per week	22 + 3 internal assessment
		Total :	**15 periods/week**	**100**

Paper 1 – INORGANIC CHEMISTRY-A

Time: 3 Hrs.
Max. Marks: 22+3
30 Hrs. (2 Hrs/week)
3 Periods/week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester System) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I (8 Hrs.)

Atomic Structure

Idea of de Broglie matter waves, Heisenberg uncertainty principle, atomic orbitals, Schrodinger wave equation, significance of Ψ and Ψ^2, quantum numbers, radial and angular wave functions and probability distribution curves, shapes of *s*, *p*, *d* orbitals. Aufbau and Pauli exclusion principles, Hund's multiplicity rule. Electronic configurations of the elements and ions.

UNIT-II (7 Hrs.)

Periodic Properties

Position of elements in the periodic table; effective nuclear charge and its Calculations Atomic and ionic radii, ionization energy, electron affinity and electronegativity – definition, methods of determination or evaluation, trends in periodic table and applications in predicting and explaining the chemical behaviour.

UNIT-III (7 Hrs.)

Chemistry of Noble Gases and *s*-Block Elements

Chemical properties of the noble gases, chemistry of xenon, structure and bonding in xenon compounds. Comparative study, diagonal relationships, salient features of hydrides, solvation and complexation tendencies including their function in biosystems, an introduction to alkyls and aryls.

UNIT-IV (8 Hrs.)

Chemical Bonding-I

Covalent Bond – Valence bond theory and its limitations, directional characteristics of covalent bond, various types of hybridization and shapes of simple inorganic molecules and ions. BeF_2, BF_3, CH_4, PF_5, SF_6, IF_7, $SnCl_2$, XeF_4, BF_4^-, PF_6^-, $SnCl_6^{2-}$. Valence shell electron pair repulsion (VSEPR) theory to NH_3, H_3O^+, SF_4, ClF_3, ICl_2^- and H_2O. MO theory, homonuclear (elements and ions of 1st and 2nd row), and heteronuclear (BO, CN, CO^+, NO^+, CO, CN^-), diatomic molecules. Percentage ionic character from dipole moment and electronegativity difference.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Books suggested

9. Puri, B.R., Sharma, L.R., Kalia, K.K., Principles of Inorganic Chemistry; 30th edition, Pubs: Milestones Publisher, 2006-07.

Paper-II: ORGANIC CHEMISTRY-A

Time: 3 Hrs.
Max. Marks: 22+3
30 Hrs. (2 Hrs/week)
3 Periods/week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester System) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I (8 Hrs.)

Structure and Bonding:
Hybridization, bond lengths and bond angles, bond energy, localized and delocalized chemical bond, Van der Waals interactions, resonance, hyperconjugation, aromaticity, inductive and field effects, hydrogen bonding.

Mechanism of Organic Reactions:
Curved arrow notation, drawing electron movements with arrows, half-headed and double-headed arrows, homolytic and heterolytic bond breaking. Types of reagents-electrophiles and nucleophiles. Types of organic reactions. Energy considerations.

Reactive intermediates-Carbocations, carbanions, free radicals, carbenes, arynes and nitrenes (with examples). Assigning formal charges on intermediates and other ionic species.

Methods of determination of reaction mechanism (product analysis, intermediates, isotope effects, kinetic and stereochemical studies).

UNIT –II (7 Hrs.)

Alkanes and Cycloalkanes:
Isomerism in alkanes, sources, methods of formation (with special reference to Wurtz reaction, Kolbe reaction, Corey-House reaction and decarboxylation of carboxylic acids), physical properties and chemical reactions of alkanes
Mechanism of free radical halogenation of alkanes: Orientation, reactivity and selectivity. Cycloalkanes – nomenclature, methods of formation, chemical reactions, Baeyer's strain theory and its limitation. Ring strain in small rings (cyclopropane and cyclobutane), theory of strainless rings. The case of cyclopropane ring: banana bonds

UNIT-III (8 Hrs.)

Stereochemistry of Organic Compounds I:
Concept of isomerism, Types of isomerism.
Optical isomerism – Elements of symmetry, molecular chirality, enantiomers, stereogenic center, optical activity, properties of enantiomers, chiral and achiral molecules with two stereogenic centers, diastereomers, threo and erythro diastereomers, meso compounds, resolution of enantiomers, inversion, retention and racemization.

Relative and absolute configuration, sequence rules, D & L and R & S systems of nomenclature.

UNIT-IV **(7 Hrs.)**

Stereochemistry of Organic Compounds II:

Geometric isomerism: Determination of configuration of geometric isomers. E & Z system of nomenclature, geometric isomerism in oximes and alicyclic compounds.

Conformational isomerism – Conformational analysis of ethane and n-butane; conformations of cyclohexane, axial and equatorial bonds, conformation of mono and disubstituted cyclohexane derivatives. Newman projection and Sawhorse formulae, Fischer and flying wedge formulae.
Difference between configuration and conformation.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.

ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.

iii. Compulsory question carries six marks and remaining all questions carry four marks each.

5. Carey, F.A., Sundberg, R.J., Advanced Organic Chemistry Part B: Reactions and Synthesis; 5th edition, Pubs: Springer, 2007.

Paper-III: PHYSICAL CHEMISTRY-A

Time: 3 Hrs.
Max. Marks: 22+3
30 Hrs. (2 Hrs/week)
3 Periods/week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Physical Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester System) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance may be given to requisite intellectual and laboratory skills**.**

UNIT-I (8 Hrs.)

Mathematical Concepts and Evaluation of Analytical Data:

Logarithmic relations, curve sketching, linear graphs and calculation of slopes, differentiation and integration of functions like e^x, x^n, sin x, log x; maxima and minima, partial differentiation and reciprocity relations.

Terms of mean and median, precision and accuracy in chemical analysis, determining accuracy of methods, improving accuracy of analysis, data treatment for series involving relatively few measurements, linear least squares curve fitting, types of errors, standard deviation.

UNIT-II (7 Hrs.)

Gaseous States:

Postulates of kinetic theory of gases, deviation from ideal behavior, Van der Waal's equation of state.

Critical Phenomena: PV isotherms of real gases, continuity of states, the isotherms of Van der Waal's equation, relationship between critical constants and Van der Waal's constants, the law of corresponding states, reduced equation of state.

Molecular Velocities*:* Root mean square, average and most probable velocities. Qualitative discussion of the Maxwell's distribution of molecular velocities, collision number, mean free path and collision diameter. Liquification of gases (based on Joule-Thomson effect).

UNIT-III (8 Hrs.)

Chemical Kinetics-I

Chemical kinetics and its scope, rate of a reaction, factors influencing the rate of a reaction- concentration, temperature, pressure, solvent, light, catalyst. Concentration dependence of rates, mathematical characteristics of simple chemical reactions – zero order, first order, second order, pseudo order, half life and mean life. Determination of the order of reaction – differential method, method of integration, method of half life period and isolation method.

Radioactive decay as a first order phenomenon.

UNIT-IV (7 Hrs.)

Chemical Kinetics-II

Theories of Chemical Kinetics: Effect of temperature on rate of reaction, Arrhenius equation, concept of activation energy.

Simple collision theory based on hard sphere model, transition state theory (equilibrium hypothesis). Expression for the rate constant based on equilibrium constant and thermodynamic aspects.

Catalysis and general characteristics of catalytic reactions, Homogeneous catalysis, acid-base catalysis and enzyme catalysis including their mechanisms, Michaelis Menten equation for enzyme catalysis and its mechanism.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-IV: LABORATORY PRACTICALS **Max. Marks: 22+3**
6 Periods/week

INORGANIC CHEMISTRY

(a) QUALITATIVE ANALYSIS:

Semimicro Analysis, cation analysis, separation and identification of ions from groups I, II, III, IV, V and VI. Anion analysis (4 ions).

Instruction to Examiners: Four ions with no interference (anions such as PO_4^{3-}, BO^{3-}_3 and similar anions like Cl^-, Br^-, I^- etc. and cattons from the same group) may not be given.

(b) QUANTITATIVE ANALYSIS:

Volumetric titrations involving acid-base, $KMnO_4$ and $K_2Cr_2O_7$.

There are three experiments - one involving acid-base titrations, one involving $KMnO_4$ and one involving $K_2Cr_2O_7$.

1. Determination of strength of Na_2Co_3 solution by titrating it against a standard solution of HCl.
2. Determination of molarity of $KMnO_4$ solution by titrating it against a standard solution of Oxalic acid.
3. Standarise the given $K_2Cr_2O_7$ solution by titrating it against a standard solution of Mohr's Salt.

General Instruction to the Examiners:

Note: Practical examination will be of four hours duration & shall consist of the following questions:

Q.No. I. Qualitative Analysis : 10 marks

Q.No. II. Quantitative Analysis : 06 marks

Q.No. III. Viva-Voce :03 marks

Ask three questions (1 marks each) related to chemistry practicals. :03 marks

Q.No. IV. Note Book

CHEMISTRY
SEMESTER –II

Scheme of Teaching and Examination

Paper	*Course*	*Teaching Hrs.*		*Max. Marks*
V	Inorganic Chemistry-B	30	3 periods per week	22 + 3 internal assessment
VI	Organic Chemistry-B	30	3 periods per week	22 + 3 internal assessment
VII	Physical Chemistry-B	30	3 periods per week	22 + 3 internal assessment
VIII	Laboratory Practicals		6 periods per week	22 + 3 internal assessment
		Total :	**15 periods/week**	**100**

Paper V – INORGANIC CHEMISTRY –B

Time: 3 Hrs.
Max. Marks: 22+3
30 Hrs. (2 Hrs/week)
3 Periods/week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester System) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I (7 Hrs.)

Chemical Bonding-II

Ionic Solids – Concept of close packing., Ionic structures, (NaCl type, Zinc blende, Wurtzite, CaF_2 and antifluorite), radius ratio rule and coordination number, limitation of radius ratio rule, lattice defects, semiconductors.

UNIT-II (8 Hrs.)

Chemical Bonding-III

Lattice energy and Born-Haber cycle, solvation energy and solubility of ionic solids, polarizing power and polarisability of ions, Fajan's rule. Metallic bond-free electron, valence bond and band theories. Weak Interactions – Hydrogen bonding, Van der Waals forces.

UNIT-III (7 Hrs.)

***p*-Block Elements-I**

Comparative study (including diagonal relationship) of groups 13-14 elements, compounds like hydrides, oxides, oxyacids and halides of groups 13-14, hydrides of boron-diborane and higher boranes, borazine, borohydrides, fullerenes, carbides, fluorocarbons.

UNIT-IV (8 Hrs.)

***p*-Block Elements-II**

Comparative study of groups 15-17 elements, compounds like hydrides, oxides, oxyacids and halides of groups 15-17, silicates (structural principle), tetrasulphur tetranitride, basic properties of halogens, interhalogens and polyhalides.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-VI: ORGANIC CHEMISTRY-B

Time: 3 Hrs.
Max. Marks: 22+3
30 Hrs. (2 Hrs/week)
3 Periods/week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester System) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I (8 Hrs.)

Alkenes, Cycloalkenes

Nomenclature of alkenes, methods of formation, mechanisms of dehydration of alcohols and dehydrohalogenation of alkyl halides, regioselectivity in alcohol dehydration. The Saytzeff's Rule, Hofmann elimination, physical properties and relative stabilities of alkenes.

Chemical reactions of alkenes – mechanisms involved in hydrogenation, electrophilic and free radical additions, Markownikoff's rule, hydroboration – oxidation, oxymercuration-reduction. Epoxidation, ozonolysis, hydration, hydroxylation and oxidation with $KMnO_4$. Polymerization of alkenes. Substitution at the allylic and vinylic positions of alkenes. Industrial applications of ethylene and propene.

UNIT-II (7 Hrs.)

Dienes and Alkynes

Methods of formation, conformation and chemical reactions of cycloalkenes.

Nomenclature and classification of dienes : Isolated, conjugated and cumulated dienes. Structure of allenes and butadiene, methods of formation, polymerization. Chemical reactions – 1,2 and 1,4 additions, Diels-Alder reaction.

Nomenclature, structure and bonding in alkynes. Methods of formation. Chemical reactions of alkynes, acidity of alkynes. Mechanism of electrophilic and nucleophilic addition reactions, hydroboration-oxidation, metal-ammonia reductions, oxidation and polymerization.

UNIT-III (8 Hrs.)

Arenes and Aromaticity:

Nomenclature of benzene derivatives. The aryl group, Aromatic nucleus and side chain, Structure of benzene : Molecular formula and Kekule structure. Stability and carbon-carbon bond lengths of benzene, resonance structure, MO picture.

Aromaticity: The Huckel rule, aromatic ions.

Aromatic electrophilic substitution – General pattern of the mechanism, role of σ and π – complexes. Mechanism of nitration, halogenation, sulphonation, mercuration and Friedel-Crafts reaction. Energy profile diagrams. Activating and deactivating substituents, orientation and ortho/para ratio. Side chain reactions of benzene derivatives. Methods of formation and chemical reactions of alkylbenzenes, alkynyl benzenes and biphenyl.

UNIT-IV **(7 Hrs.)**

Alkyl and Aryl Halides

Nomenclature and classes of alkyl halides, methods of formation, chemical reactions. Mechanisms of nucleophilic substitution reactions of alkyl halides, S_N2 and S_N1 reactions with energy profile diagrams.
Polyhalogen compounds : chloroform, carbon tetrachloride.
Methods of formation of aryl halides, nuclear and side chain reactions. The addition-elimination and the elimination-addition mechanisms of nucleophilic aromatic substitution reactions.
Relative relativities of alkyl halides vs. allyl, vinyl and aryl halides.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.
ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-VII: PHYSICAL CHEMISTRY-B

Time: 3 Hrs.
Max. Marks: 22+3
30Hrs.
(2 Hrs/week)
3 Periods/week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Physical Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester System) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance may be given to requisite intellectual and laboratory skills.

UNIT-I (8 Hrs.)

Thermodynamics-I:

Definition of Thermodynamic Terms: System, surroundings etc. Types of systems, intensive and extensive properties. State and path functions and their differentials. Thermodynamic process. Concept of heat and work.

First Law of Thermodynamics: Statement, definition of internal energy and enthalpy, Heat capacity, heat capacities at constant volume and pressure and their relationship. Joule's Law-Joule-Thomson coefficient and inversion temperature. Calculations of w, q, dU & dH for the expansion of ideal gases under isothermal and adiabatic conditions for reversible process.

UNIT-II (7 Hrs.)

Thermochemistry:

Standard state, standard enthalpy of formation-Hess's Law of constant Heat Summation and its applications. Heat of reaction at constant pressure and at constant volume. Enthalpy of neutralization. Bond dissociation energy and its calculation from thermo-chemical data, temperature dependence of enthalpy. Kirchoff's equation.

UNIT- III (7 Hrs.)

Colloidal State:

Definition of colloids, classification of colloids.

Solids in liquids (sols): Properties –kinetic, optical and electrical; stability of colloids, protective action, Hardy-Schulze rules, gold number.

Liquids in liquids (emulsions) : Types of emulsions, preparation. Emulsifier.

Liquids in solids (gels): Classification, preparation and properties, inhibition, general applications of colloids.

UNIT-IV (8 Hrs.)

Solutions, Dilute Solutions and Colligative Properties:

Ideal and non-ideal solutions, methods of expressing concentrations of solutions, activity and activity coefficient.

Dilute solution, colligative properties, Raoult's law, relative lowering of vapour pressure, molecular weight determination. Osmosis, law of osmotic pressure and its measurement, determination of molecular weight from osmotic pressure. Elevation of boiling point and depression of freezing point, Thermodynamic derivation of relation between molecular weight and elevation in boiling point and depression of freezing point. Experimental methods for determining various colligative properties.

Abnormal molar mass, degree of dissociation and association of solutes.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-VIII: LABORATORY PRACTICALS **Max. Marks: 22+3**
6 Periods/week

ORGANIC CHEMISTRY AND GREEN CHEMISTRY PRACTICALS
Crystallization and determination of melting points

Concept of induction of crystallization
1. Phthalic acid from hot water (using fluted filter paper and stemless funnel).
2. Acetanilide from boiling water.
3. Benzoic acid from water

PHYSICAL CHEMISTRY

1. Refractive indices
   Determine the Refractive indices of given liquids (water, acetone, methanol, ethylacetate, cyclohexane) by Abbe's refractometer & calculate their specific refractions.
2. Viscosity
   To determine the viscosity of Brine Solution (20%), n-Butyl alcohol, cyclohexane
3. Surface Tension
   To determine the surface tension of Brine Solution (20%), n-Butyl alcohol, cyclohexane

General Instruction to the Examiners:

Note: Practical examination will be of four hours duration & shall consist of the following questions:
Q.No. I. Physical Chemistry : 10 marks
Q.No. II. Organic Chemistry : 06 marks
Q.No. III. Viva-Voce : 03 marks
Ask three questions (1 marks each) related to chemistry practicals.

Q.No. IV. Note Book : 03 marks

BOTANY

SEMESTER-I

First Semester		Time	Theory	Int Assess.	Max Marks
Theory Paper- A	Plant Diversity-I	3 hrs.	36	04	40
Theory Paper-B	Cell Biology	3 hrs.	36	04	40
One practical pertaining to entire syllabus included in both theory papers		3 hrs.	18	02	20
Second Semester					
Theory Paper –A	Plant Diversity-II	3hrs	36	04	40
Theory Paper-B	Genetics	3hrs	36	04	40
One practical pertaining to entire syllabus included in both theory papers		3hrs.	18	02	20
		Total			**200**

Note: 1. The number of teaching hours for theory and practical per semester shall be 60 hrs. and 100 hrs. respectively.

2. There will be two theory papers (A&B) in each semester. Each paper will consist of nine questions. Question No.1 will be compulsory and will consist of 12 parts (one mark each) comprising 6 MCQ and the rest 6 parts will be of fill-in the blanks covering the entire syllabus in both the theory papers A&B. The remaining 8 questions in papers A&B shall include two questions from each unit. Candidates shall be required to attempt one question from each Unit. Question No. 1 will carry 12 marks and the rest of 8 questions will be of 6 marks each.

Paper-A: PLANT DIVERSITY-I

Objective: The basic objective of this paper is to make students aware about the diversity in various life forms of plant kingdom. It gives an idea about the most simple group of plants. A systematic study of algae and fungi included in this group would familiarize students not only with structural differentiation but also provide an insight about the heterotrophic and autotrophic modes of nutrition in the plant kingdom. This paper in fact forms the basis of any advance study in Botany.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT – I

Bacteria: Salient features, types and cell structure.

Algae: General Characters; systematic position, structure and life history of *Oscillatoria* (Cyanophyceae) *Volvox*, *Cladophora* (Chlorophyceae); *Vaucheria* (Xanthophyceae).

UNIT-II

Systematic position, structure and life history of *Dictyota* (Phaeophyceae); *Batrachospermum* (Rhodophyceae) and economic importance of algae.

UNIT-III

Fungi: General characters; systematic position, structure and life history of *Albugo* (White rust of crucifers: *Albugo candida*), *Rhizopus* and *Saccharomyces*.

UNIT-IV

Systematic position, structure and life history of *Agaricus*, *Ustilago* (Loose smut of wheat: *Ustilago tritici*), *Puccinia* (Black rust of wheat: *Puccinia graminis tritici*), *Colletotrichum* (Red rot of sugarcane: *Colletotrichum falcatum*); general account of Lichens and their economic importance.

Paper-B: Cell Biology

Objective: This paper deals with the basic structural unit of life i.e. Cell & its organelles. It provides an insight into structural and cytological basis of functional differentiation in plants. Coupled with the study of prokaryotic and eukaryotic diversity of life forms included in Paper-A, the course material of this paper gives an idea about cellular, molecular and biochemical basis of such differentiation.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT – I

Ultrastructure and functions of a typical plant cell and its organelles: Nucleus, Mitochondrion, Plastids, Ribosome, Endoplasmic reticulum, Golgi apparatus, Lysosomes; Structure and functions of cell wall and plasma membrane: fluid mosaic model only.

UNIT-II

Physical structure of chromosome; Giant chromosomes: Polytene and Lampbrush chromosomes; Chromosomal alterations (deletion, duplication, inversion, translocation) and their importance; Variations in chromosome number, (aneuploidy and polyploidy) introduction and their importance.

UNIT-III

Cell divisions: Mitosis and Meiosis in plants and their significance, Synaptonemal complex, DNA: Structure (Watson and Crick model), Nucleosome, types of DNA and role of DNA, Replication of DNA.

UNIT-IV

Structure and concept of gene: One gene-one enzyme hypothesis; Genetic Code: Characteristics, exceptions, Wobble hypothesis; RNA: Structure and types; Transcription and translation; Regulation of gene expression in prokaryotes (Lac operon and Tryptophan operon) and in eukaryotes (a brief account).

7. Wolfe, S.L. 1993. Molecular and Cell Biology. Wadsworth Publishing Co., California, USA.

Suggested laboratory exercises for First Semester :

1. Study of morphology of various genera included in algae and fungi.
2. Study of Crustose, Foliose and Fructicose types of Lichen thalli.
3. Histopathological study of White rust of crucifers, Loose smut of wheat, Black rust of wheat and Red rot of sugarcane.
4. To study cell structure from onion leaf peels; demonostration of staining and mounting method.
5. Preparation of temporary slides to show different stages of mitosis from root tips of *Allium cepa* and *A. sativum.*
6. Preparation of temporary slides to show different stages of meiosis from floral buds of *Allium/Brassica*.

Guidelines for Botany Practical Examination:

Max. Marks	:	20
Practical	:	18
Internal Assessment	:	02
Time	:	3 hrs

1.	Identify and write illustrated morphological note on specimens A and B.	05
2.	Prepare a squash mount of specimen C to show the stage of cell division visible in the slide and show it to the examiner. Identify it giving at least one reason. Draw the stage of cell division and show it to the examiner.	05
3.	Identify and the slides D and E giving at least two reasons for each.	04
1.	Practical Note-book	02
2.	Viva-voce	02

……..

BOTANY

SEMESTER – II

Paper-A: Plant Diversity-II

Objective: The basic objective of this paper is to make the students aware about the diversity in various life forms of plant kingdom. It gives an idea about how different life forms have evolved from simpler to complex ones. A sequential study ranging from Bryophytes (the amphibians of plant kingdom) and then to Pteridophytes -the first vascular land plants, would enable students to have a broad prospective of evolutionary trends in plant kingdom.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT – I

Bryophyta: General characters; systematic position, structure, reproduction and life cycle of *Marchantia* and *Riccia* (Hepaticopsida) excluding developmental stages.

UNIT-II

Systematic position, structure, reproduction and life cycle of *Anthoceros* (Anthocerotopsida) and *Funaria* (Bryopsida) excluding developmental stages.

UNIT–III

Pteridophyta: General characters; systematic position, structure, reproduction and life cycle of *Rhynia* (Psilophytopsida) and *Selaginella* (Lycopsida) excluding developmental stages.

UNIT-IV

Systematic position, structure, reproduction and life cycle of *Equisetum* (Sphenopsida) and *Pteris* (Pteropsida) excluding developmental stages.

Suggested Readings

1. Goyal, J. P. Dhand, Neelam and Saini, Aruna 2011. Foundations of Botany. Trueman Book Company Jalandhar.
2. Pandey, B.P. 2009. Botany for Degree Students. S. Chand & Co. Ltd., New Delhi
3. Puri, P. 1980. Bryophyta. Atma Ram & Sons, Delhi.
4. Sharma, O.P. 1990. Text Book of Pteridophyta, McGraw Hill Publishing Co., New Delhi.
5. Singh, V. Pandey, P.C. and Jain, D.K. 2012. Text Book of Botany, Diversity of Microbes and Cryptogams. Rastogi Publications, Meerut & New Delhi.
6. Smith, G.M. 1971. Cryptogamic Botany. Vol. II, Bryophytes and Pteridophytes, Tata McGraw Hill Publishing Co., New Delhi.
7. Srivastava, H.N. 2013.Pradeep's Botany Vol. I (Diversity of Microbes and Cryptogams), Pradeep Publications, Jalandhar (India).
8. Vishishta, B. R. 1999. Botany for Degree Students. Bryophyta. S. Chand and Company Ltd., New Delhi.

Paper-B : Genetics

Objective: This paper deals with various aspects of hereditary trends observed in successive generations. It provides an insight into genetic basis of such evolutionary trends in plants. Coupled with the study of variations in life forms included in Paper A, the course material of Paper B provides an idea about the important role that genetics plays in structural and functional differentiation of plants.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I

Mendelism : Mendel's experiments and results, Mendel's Laws of Dominance, Segregation and Independent assortment; Linkage: complete and incomplete linkage, linkage groups, linkage maps, importance of linkage, cytological interpretation of Mendelism.

UNIT-II

Non-allelic Gene Interactions: Dominant and recessive epistasis, supplementary genes, complementary genes, quantitative or polygenic inheritance, duplicate genes. Allelic gene interactions: Incomplete dominance, codominance, multiple alleles, pleiotropic genes.

UNIT-III

Chromosome theory of heredity, parallelism between chromosome and Mendelian factors, Sex linked inheritance; Characteristics and examples (Haemophilia, colour-blindness); Cytoplasmic or extranuclear inheritance: mitochondrial and plastid DNA; plastid inheritance in *Mirabilis*, mitochondrial inheritance in Yeast.

UNIT–IV

Genetic variations: Continuous and Discontinuous; Mutations: characteristics, types, importance, factors affecting mutations; Mutagens: Physical and chemical, mechanism of gene mutations; DNA damage and repair: Types of damage (Single base change and structural distortion), types of repair system in prokaryotes and eukaryotes.

Suggested Readings :

1. Atherly, A.G., Girton, J.R. and McDonald, J.F. 1999. The Science of Genetics. Saunders College Publishing, Fort Worth, USA.
2. Bhatia, K. N. and Dhand Neelam 2013.. Cell Biology and Genetics. Trueman Book Company, Jalandhar.
3. Gupta, P.K. 1999. Genetics. Rastogi Publications, Meerut, India.
4. Russel, P.J. 1998. Genetics. The Benjamin/Cummings. Publishing Co. Inc., USA.
5. Snustad, D.P. and Simmons, M.J. 2000. Principles of Genetics, John Wiley & Sons, Inc., USA.
6. Srivastava, H. N. 2013. Pradeep's Botany Vol. II Cell Biology and Genetics, Pradeep Publications, Jalandhar (India).
7. Stent, G.S. 1986. Molecular Genetics. CBS Publications.

Suggested laboratory exercises for Second Semester:

1. Study of morphology of various genera mentioned in Bryophyta and Pteridophyta.

2. I. Preparation of permanent stained slides of :

Marchantia	(V.S. Thallus)	*Selaginella*	(T.S. Stem)
Riccia	(V.S. Thallus)		
Anthoceros	(V.S. Thallus)	*Equisetum*	(T.S. Aerial stem passing through internode)
Funaria	(T.S. Stem)	*Pteris*	(T.S. Petiole and leaflet)

II. Study through permanent slides:

Marchantia

i) L.S. Antheridiophore
ii) L.S. Archegoniophore
iii) L.S. Mature sporogonium

Riccia

L.S. Mature sporogonium

Anthoceros

i) T.S. Thallus passing through antheridia
ii) T.S. Thallus passing through archegonia
iii) L.S. Mature sporogonium.

Funaria

i) L.S. Male receptacle
ii) L.S. Female receptacle
iii) L.S. Capsule
iv) Primary protonema

Selaginella

L.S. Sporangiferous spike

Equisetum

i) L.S. Strobilus
ii) T.S. Strobilus

Pteris

Mature prothallus

3. Problems related to Mendalism and gene interactions.

Guidelines for Botany Practical Examination:

Max. Marks	:	20
Practical	:	18
Internal Assessment	:	02
Time	:	3 hrs

1. Cut T.S., stain and make a permanent mount of specimen A. Identify, draw its labelled diagram and show the slide to the examiner. 06

2. Problem related to Mendalism or gene interaction (to be announced by the examiner). 04

3. Identify the slides B and C giving at least two reasons for each. 04

4. *Viva-voce* & Practical Note-book. 2+2= 04

ZOOLOGY

FIRST SEMESTER

	Time	Theory	Internal Assessment	Marks
Paper-I : Biodiversity & Cell Biology – I	3 hrs.	36	4	40
Paper-II: Biodiversity & Cell Biology – II	3 hrs.	36	4	40
Practical: One paper covering entire syllabus of both the papers.	4 hrs.	18	2	20
			Total marks :	100

SECOND SEMESTER

	Time	Theory	Internal Assessment	Marks
Paper-I : Biodiversity & Ecology - I	3 hrs.	36	4	40
Paper-II: Biodiversity & Ecology - II	3 hrs.	36	4	40
Practical: One paper covering entire syllabus of both the papers.	4 hrs.	18	2	20
			Total marks :	100

Note : The number of hours for Theory and Practical per week shall be 6 and 4 hours, respectively.

OBJECTIVES OF THE COURSE

The syllabus pertaining to B.Sc. (General) Semester-I and Semester-II in the subject of Zoology has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Zoology working in the Panjab University, Chandigarh and affiliated colleges.

The syllabus contents are duly arranged section wise as well as unit wise. The contents are included in such manner so that due importance may be given to skill oriented components.

The course contents are also given due stress for excursion/field trips to Zoological Parks, Sea-shores, Hill Stations, Museum, Fossil Park and Apiary/godowns for better academic outlook. The Department of Zoology, P.U., Chandigarh usually organizes workshop/seminars from time to time for updating the teachers.

ZOOLOGY

FIRST SEMESTER

PAPER–I : BIODIVERSITY & CELL BIOLOGY-I (ZOO. 01)

Max. Marks	: 40 marks
Theory	: 36 marks
Internal Assessment	: 4 marks
Time	: 3 Hrs.

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT – I

Detailed study of the following protozoan types :
Amoeba, Paramecium and Plasmodium.

Classification up to orders with ecological notes and economic importance (if any) of the following :
Entamoeba, Trypanosoma, Giardia, Noctiluca, Eimeria, Opalina,Vorticella, Balantidium and Nyctotherus.

UNIT – II

Detailed study of the following animal types :

Parazoa (Porifera)	:	Sycon (*Scypha*)
Cnidaria (Coelenterata)	:	*Obelia*

Classification upto orders with brief ecological note and economic importance (if any) of the following:

Parazoa (Porifera)	:	*Grantia, Euplectella, Hyalonema and Spongilla*
Cnidaria (Coelenterata)	:	*Hydra, Sertularia, Plumularia, Obelia, Tubularia, Bougainvillea, Porpita, Velella, Physalia, Rhizostoma Millipora, Aurelia, Alcyonium, Tubipora, Zoanthus, Metridium, Madrepora, Favia, Fungia and Astrangia.*

UNIT – III

Methods in Cell Biology	:	Principles and applications of light (simple, compound & phase contrast) and electron (SEM & TEM) microscopes Fixation & fixatives, staining techniques. (simple and double staining)
Organisation of Cell	:	Concept of Prokaryotic and Eukaryotic cell, extra nuclear and nuclear organization of cell.
Plasma membrane	:	Structure with particular references to Fluid Mosaic Model, Osmosis, active and passive transport, endocytosis and exocytosis.

UNIT – IV

Endoplasmic reticulum	:	Structure, types, associated enzymes and functions.
Mitochondria	:	Structure, mitochondrial enzymes and the role of mitochondria in respiration. Mitochondrial DNA.
Golgi complex	:	Structure, associated enzymes and functions.

Books Recommended :

1. Essential Cell Biology – Alberts, Garland Publishers, New York, 3rd edition, 1997.
2. The Cell : A molecular approach – G. M. Cooper, Robert & Hausman Sinauer Associates Inc., 4th edition, 2007.
3. Molecular Cell Biology – Harvey Lodish, Arnold Berk, Chris A. Kaiser, Monty Kriegr, Mathew P. Scott. Anthony Bretscher, Hiddle Ploegh, W.H. Freeman, 6th edition, 2007.
4. Cell & Molecular Biology – G. Karp. John Wiley & Sons, 2001.
5. Cell & Molecular Biology - De Robertis, E.D.P. & De Robertis, E.M.F., W.B. Saiunders Co., Philadelphia, 8th edition, 1995.
6. Cell Biology - Powar, C.B., Himalaya Publishing House, Bombay, 1999.
7. Invertebrates Vol.I-VI- L.H. Hyman, Mcgraw Hill, 1955.
8. Invertebrate Zoology – E.L. Jorden, S. Chand, 2001.
9. Modern Text Book of Zoology : Invertebrate – R.L. Kotpal, Rastogi Publications, 10th edition, 2009.
10. A Manual of Practical Zoology : Invertebrate – P.S. Verma by S. Chand, 2005.
11. Practical Zoology Invertebrate – S.S. Lal – Rastogi Publications, 2009.
12. Text Book of Zoology – Dhami & Dhami, Pardeep Publications, 1983.
13. Zoology for Degree Students – V.K. Aggarwal, S. Chand Publications, 2011.

PAPER–II : BIODIVERSITY & CELL BIOLOGY - II (ZOO. 102)

Max. Marks	: 40 marks
Theory	: 36 marks
Internal Assessment	: 4 marks
Time	: 3 Hrs.

UNIT – I

Detailed study of the following animal types :

Platyhelminthes : *Fasciola,Taenia*

Aschelminthes : *Ascaris*

Parasitic adaptations in Helminths

Classification upto orders with brief ecological note and economic importance (if any) of the following:

Platyhelminthes : *Dugesia, Schistosoma and Echinococcus.*

Aschelminthes : *Ascaris, Oxyuris, Wuchereria.*

UNIT – II

Detailed study of the following animal type :

Annelida : *Pheretima*

Classification upto orders with brief ecological note and economic importance (if any) of the following:

Annelida : *Nereis, Polynoe, Eunice, Arenicola, Aphrodite, Amphitrite, Chaetopterus, Tubifex and Pontobdella.*

UNIT – III

Lysosomes : Lysosomal enzymes, Polymorphism and functions.

Ribosomes : Types of ribosomes, their structure and functions.

Centrosome : Structure and functions.

UNIT-IV

Nucleus : Structure and functions of nuclear membrane, nucleolus and chromosomes. Euchromatin & Heterochromatin

An elementary idea of cell transformation in Cancer : Introduction, difference between normal and Cancer cells, types of cancer, basic idea of transformation.

An elementary idea of cellular basis of immunity : Cellular & Humoral immunity. Elementary idea of cells & organs of immune system .

Books Recommended :

1. Essential Cell Biology – Alberts, Garland Publishers, New York, 3rd edition, 1997.
2. The Cell : A Molecular approach – G.M. Cooper, Robert & Hausman Sinauer Associates Inc., 4th edition, 2007.
3. Molecular Cell Biology – Harvey Lodish, Arnold Berk, Chris A. Kaiser, Monty Kriegr, Mathew P. Scott. Anthony Bretscher, Hiddle Ploegh, W.H. Freeman, 6th edition, 2007.
4. Cell & Molecular Biology – G. Karp. John Wiley & Sons, 2001.
5. Cell & Molecular Biology - De Robertis, E.D.P. & De Robertis, E.M.F., W.B. Saiunders Co., Philadelphia, 8th edition, 1995.
6. Cell Biology - Powar, C.B., Himalaya Publishing House, Bombay, 1999.
7. Invertebrates Vol.I-VI- L.H. Hyman, Mcgraw Hill, 1955.
8. Invertebrate Zoology – E.L. Jorden, S. Chand, 2001.
9. Modern Text Book of Zoology : Invertebrate – R.L. Kotpal, Rastogi Publications, 10th edition, 2009.
10. A Manual of Practical Zoology : Invertebrate – P.S. Verma by S. Chand, 2005.
11. Practical Zoology Invertebrate – S.S. Lal – Rastogi Publications, 2009.
12. Text Book of Zoology – Dhami & Dhami, Pardeep Publications, 1983.
13. Zoology for Degree Students – V.K. Aggarwal, S. Chand Publications, 2011.

PRACTICALS : Practical based on Theory Papers ZOO-101 & ZOO-102 (ZOO-151)

1. Examination of cultures of *Euglena* and *Paramecium.*
2. Classification upto orders with ecological notes and economic importance, if any, of the following animals :
   Slides : *Amoeba, Euglena, Trypanosoma, Noctiluca, Eimeria, Monocystis, Paramoecium* (Binary fission and conjugation), *Opalina, Vorticella, Balantidium, Nyctotherus & Polystomella.*

Parazoa (Porifera) :	Specimens: *Sycon, Grantia, Euplectella, Hyalonema, Spongilla, Euspongia.*	
Cnidaria (Coelenterata)	(a)	Specimens : *Porpita, Velella, Physalia, Aurelia, Rhizostoma Metridium, Millipora, Alcyonium, Tubipora, Zoanthus, Madrepora, Favia, Fungia and Astrangia.*
	(b)	Slides : *Hydra* (W.M.) *Hydra* with buds. *Obelia* (colony and medusa). *Sertularia, Plumularia, Tubularia, Bougainvillea* and *Aurelia larva.*
Aschelminthes	:	*Ascaris* (male and female), *Trichinella, Ancylostoma.*
Platyhelminthes	(a)	Specimens : *Dugesia, Fasciola, Taenia, Echinococcus.*
	(b)	Slides : Miracidium, Sporocyst, Redia, Cercaria of *Fasciola*, Scolex and Proglottids of *Taenia* (mature and gravid).
Annelida	:	*Pheretima, Nereis, Heteronereis, Polynoe, Eunice, Aphrodite, Chaetopterus, Arenicola, Tubifex* and *Pontobdella.*

3. Study of the following permanent stained preparations :
   - L.S. and T.S. *Sycon,* gemmules, spicules and spongin fibres of a sponge.
   - T.S. *Hydra* (Testis and ovary region).
   - T.S. *Pheretima* (Pharyngeal and typhlosolar regions); setae, septal nephridia, spermathecae and ovary of *Pheretima*
   - T.S. *Fasciola* (Different regions).
   - T.S. *Ascaris* (Male & female).

4. Preparation of the following slides :
   Temporary preparation of *Paramecium*, Euglena and vorticella.

5. Demonstration of dissection of earthworm through video clipping/models/charts ets.

6. Make a preparation of sex-chromatin from buccal smear.

7 . Introduction to the following through photographs/lab. visits :
   - Gel electrophoresis, TEM & SEM, ultrastructure of cell organelles.

8. Study of slide of striated muscle fibre and Animal cell.

Note : . Candidates will be required to submit their original note books containing record of their laboratory work (Drawing etc.) initialed and dated by their teachers at the time of practical examination.

Guidelines for the conduct of Practical Examination

Max. Marks	:	20
Practical Exam.	:	18 marks
Internal Assessment	:	2 marks
Time	:	3 hours

1. Draw a labelled sketch of the any given system and show to examiner/Spot any four parts of anatomy in given models/charts. 2 marks

2. Make a temporary mount of the material "A". Identify and draw its labelled sketch and show it to the examiner. 1 marks

3.Identify the slides (B-C) and give two important reasons for each identification. 3 marks

4.Identify and classify the specimens (D-G) up to orders. Write a short note on the habitat, special features, feeding habit and economic importance. 6 marks

5. Identify the cell organelle through photograph and give two important reasons for Identification/Buccal smear/striated muscle fibre/paper chromatography. 2 marks

6.Viva voce 2 marks

7.Practical records and chart 2 marks

.....

ZOOLOGY

SECOND SEMESTER

Paper- I : BIODIVERSITY & ECOLOGY - I (ZOO-201)

Max. Marks	:	40
Theory Exam.	:	36 marks
Internal Assessment	:	4 marks
Time	:	3 hours

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type Questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT -I

Detailed study of the following animal types :

Arthropoda : *Periplaneata*
Social organizations in insects (honey bee and termite).

Classification upto orders with brief ecological note and economic importance (if any) of the following:

Arthropoda : *Apis, Lepisma* (Silver Fish), *Schistocerca* (Locust), *Poecilocerus* (Ak Grasshopper) *Gryllus* (Cricket), *Mantis* (Preying Mantis), *Cicada, Forficula* (Earwig), *Cimex*, *Scarabaeus (*Dung beetle*), Agrian* (Dragon fly), *Odontotermes* (Termite queen), *Cimex* (bed bug), *Cicindela* (Tiger beetle), *Polistes* (Wasp), *Bombyx* (Silk moth).

UNIT –II

Detailed study of the following animal types :

Arthropoda : Prawn (*Palaemon*)
Life cycle of *Anopheles* and *Culex*.

Classification upto orders with brief ecological note and economic importance (if any) of the following:

Peripatus, Prawn, Lobster, *Cancer* (Crab), *Sacculina, Eupagurus* (Hermit crab), *Lepas, Balanus, Julus* (Millipede), *Scolopendra* (Centipede), *Palamnaeus* (Scorpion), *Aranea* (Spider) *and Limulus* (King crab).

UNIT – III

Ecology	:	Subdivisions and Scope of ecology.
Ecosystem	:	Components, ecological energetics, food web, introduction to major ecosystems of the world.
Ecological factors	:	Temperature, light and soil as ecological factors.

UNIT – IV

Nutrients	:	Biogeochemical cycles & concept of limiting factors.
Ecological Adaptations	:	Morphological, physiological and behavioural adaptations in animals in different habitats.
Population	:	Characteristics and regulation of population.

Books Recommended:

1. Invertebrates Vol.I-VI- L.H. Hyman, Mcgraw Hill, 1955.
2. Invertebrate Zoology – E.L. Jorden, S. Chand, 2001.
3. Modern Text Book of Zoology : Invertebrate – R.L. Kotpal, Rastogi Publications, 10th edition, 2009.
4. A Manual of Practical Zoology : Invertebrate – P.S. Verma by S. Chand, 2005.
5. Practical Zoology Invertebrate – S.S. Lal – Rastogi Publications, 2009.
6. Text Book of Zoology – Dhami & Dhami, Pardeep Publications, 1983.
7. Zoology for Degree Students – V.K. Aggarwal, S. Chand Publications, 2011.
8. Fundamentals of Ecology – E.P. Odum, Akash Publications, Indian Reprint, 2008.
9. Concepts of Ecology – E.J. Kormondy, Prentice – Hall of India, 1999.
10. Zoogeography – P.J. Darlington, John Willy & Sons Inc., 1957.
11. Ecology & Environment – P.D. Sharma by Rastogi Publications, 2007.
12. Adaptation – Bruce Wallace & Adrian, Prentice – Hall, 1961.
13. Introduction to Animal Ecology & Environmental Biology – H.R. Singh, Vishal Publications, 2001.

Paper-II BIODIVERSITY & ECOLOGY - II (ZOO-202)

Max. Marks	:	40
Theory Exam.	:	36 marks
Internal Assessment	:	4 marks
Time	:	3 hours

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT – I

Detailed study of the following animal type :

Mollusca : *Pila*

Classification up to orders with ecological notes and economic importance (if any)

Mollusca : *Chiton, Anodonta, Mytilus, Ostrea, Cardium, Pholas, Solen* (Razor Fish), *Pecten, Haliotis, Patella, Aplysia, Doris, Limax, Loligo, Sepia, Octopus, Nautilus and Dentalium*

UNIT – II

Detailed study of the following animal types :

Echinodermata : *Asterias*, Echinoderm Larvae.
Hemichordata : *Balanoglossus*, External characters and affinities.

Classification up to orders with ecological notes and economic importance (if any)

Echinodermata : *Echinus, Cucumaria, Ophiothrix, Antedon and Asterias.*
Hemichordata : *Balanoglossus.*

UNIT – III

Inter and intra ecological relationships : Competition, predation, parasitism, commensalism, ammensalism & mutualism

Biotic community : Characteristics, ecological succession, ecological niche.

UNIT – IV

Natural resources : Renewable and nonrenewable natural resources and their conservations.

Environmental Degradation : Causes, impact and control of environmental pollution. (Air, Water, Land, Noise)

Wildlife conservation : Basic concepts

Books Recommended:

1. Invertebrates Vol.I-VI- L.H. Hyman, Mcgraw Hill, 1955.
2. Invertebrate Zoology – E.L. Jorden, S. Chand, 2001.
3. Modern Text Book of Zoology : Invertebrate – R.L. Kotpal, Rastogi Publications, 10th edition, 2009.
4. A Manual of Practical Zoology : Invertebrate – P.S. Verma by S. Chand, 2005.
5. Practical Zoology Invertebrate – S.S. Lal – Rastogi Publications, 2009.
6. Text Book of Zoology – Dhami & Dhami, Pardeep Publications, 1983.
7. Zoology for Degree Students – V.K. Aggarwal, S. Chand Publications, 2011.
8. Fundamentals of Ecology – E.P. Odum, Akash Publications, Indian Reprint, 2008.
9. Concepts of Ecology – E.J. Kormondy, Prentice – Hall of India, 1999.
10. Zoogeography – P.J. Darlington, John Willy & Sons Inc., 1957.
11. Ecology & Environment – P.D. Sharma by Rastogi Publications, 2007.
12. Adaptation – Bruce Wallace & Adrian, Prentice – Hall, 1961.
13. Introduction to Animal Ecology & Environmental Biology – H.R. Singh, Vishal Publications, 2001.

PRACTICALS : Practical based on Theory Papers ZOO-201 & ZOO-202 (ZOO 152)

1. Classification upto orders with ecological notes and economic importance, if any, of the following animals :

   Arthropoda : *Peripatus, Palaemon, Lobster, Cancer* (Crab), *Sacculina, Eupagurus* (Hermit crab), *Lepas, Balanus, Apis, Lepisma* (Silver Fish), *Schistocerca* (Locust), *Poecilocerus* (Ak Grasshopper), *Gryllus* (Cricket), *Mantis* (Praying Mantis) *Cicada, Forficula* (Earwig), *Scarabaeus (*Dung beetle*),* *Agrian* (Dragon fly), *Odontotermes* (Termite queen), *Cimex* (bed bug), *Cicindela* (Tiger beetle), *Polistes* (Wasp), *Bombyx* (Silk moth), *Julus* (Millipede), *Scolopendra* (Centipede), *Palamnaeus* (Scorpion), *Aranea* (Spider) *and Limulus* (King crab).

   Mollusca : *Anodonta, Mytilus, Ostrea, Cardium,Pholas, Solen* (Razorfish) *Pecten, Haliotis, Patella, Aplysia, Doris, Limax, Loligo, Sepia, Octopus, Nautilus shell* (Complete and T.S.), *Chiton and Dentalium.*

   Echinodermata : *Asterias, Echinus, Ophiothrix* and *Antedon Cucumaria*

   Hemichordata : *Balanoglossus*.

2. Study of the following permanent stained preparations :
   Trachea, mouth parts of *Periplaneta*
   Radula and osphradium of *Pila*.
   T.S. Star fish (Arm).

3. Demonstration of dissection of the following animals through video clippings/charts/models:
   Periplaneta : Digestive and nervous systems; mouth parts and trachea.
   Pila : Pallial complex, digestive and nervous systems, Radula.
4. Study of animal adaptations with the help of specimens, charts and models.
5. Study of Zoogeographical regions and their fauna.
6. Study of biotic components of an ecosystem.
7. Study of different types of nests in birds.
8. Study & preparation of zoogeographical charts/maps.

Note: Candidates will be required to submit their original note books containing record of their laboratory work (Drawing etc.) initialed and dated by their teachers at the time of practical examination.

Guidelines for the conduct of Practical Examination

Max. Marks : 20
Practical Exam. : 18 marks
Internal Assessment : 2 marks
Time : 3 hours

1. Draw a labeled diagram of any given system of an animal and explain it to the examiner Sketch and demonstrate it to the examiner. 2 marks
2. Identify the slides (A-C) and give two important reasons for each identification. 3 marks
3. Identify and classify the specimens (D-G) up to orders. Write a short note on the habitat, special features, feeding habit and economic importance. 6 marks
4. Identify the type of adaptation/type of nest/biotic components with a short note. 1 marks
5. Mark Zoogeographical region on the given physical map along with endemic fauna and climate. 2 marks
6. Viva voce 2 marks
7. Practical record, charts/maps and project report of excursion to a place of zoological interest 2 marks

---

BIOCHEMISTRY
Semester I

INSTRUCTIONS FOR PAPER SETTER AND STUDENTS:

1. Total No. of questions will be nine. All questions carry equal marks.
2. Q. No. 1 will be compulsory. It will consist of short questions covering the entire syllabus
3. Besides question Number 1, there will be 4 sections of 2 questions each.
4. All other questions may contain 2-3 parts.
5. Questions should be uniformly spread over the entire syllabus.
6. Students will be required to attempt 5 questions in all including Q. No. 1 and at least one question from each of the 4 sections.

Paper-A: Carbohydrates and Lipids **Marks: 45+5**

(*Three periods per week)*

Objective: To learn about biomolecules, their structure and functional significance.

SECTION-I

(Lectures: 6)

Introduction to biochemistry and its scope. Water: physical properties, as a biological solvent and structure of water,dissociation of water. pH and pOH, buffer solution. Henderson Hasselbalch equation, acid-base indicators, buffers and physiologically important buffers, dialysis and osmosis.

SECTION-II

(Lectures: 8)

Definition and classification of carbohydrates. Fischer and Haworth structures of carbohydrates. Stereoisomerism, and mutarotation. Anomeric forms of monosaccharides. Derivatives of monosaccharides (glycosides, deoxysugars,amino sugars and other derivatives of biological importance). Oligosaccharides of biological importance (structure of maltose, lactose, sucrose, cellobiose, trehalose, raffinose). Characteristic reactions of monosaccharides: reactions with hydrazine, hydrogen cyanide, hydroxylamine; reduction and oxidation of sugars; periodic acid oxidation; action of alkali upon sugars; acylation and methylation of sugars. Homo-and hetero-polysaccharides (structures of amylose, amylopectin, starch, inulin, pectins, dextrins, glycogen, cellulose, chitin). GAGs as components of connective tissue.Polysaccharides of bacterial cell wall, glycoproteins

SECTION-III

(Lectures: 8)

Definition and classification of fatty acids (saturated and unsaturated). Essential fatty acids. Important reactions of functional groups present in fatty acids. Characteristics of fatty acids and fats (saponification, iodine, acid, acetyl and peroxide values). Refractive index, m. p., b.p. and their relation to molecular size. Properties of glycerol. Fats as source of energy. Waxes.Structures, characteristics and functions of lipids: triacylglycerols, phospholipids: lecithins (Phosphotidylcholines), lysolecithins, cephalins (phosphotidylethanolamines), phosphatidylserines, Phosphatidyl inositol, sphingomyelins, plasmalogens), cerebrosides, gangliosides, sulfatides.

SECTION-IV

(Lectures: 6)

Lipoproteins– composition, classification and biological functions. Liposomes.
Terpenes and steroids – Terpenes of biological significance e.g. carotenes, phytol. Cholesterol and other animal sterols. Colour reactions of sterols. Sterols of yeast and fungi (mycosterols). Phytosterols. Steroidal hormones. Bile acids.
Structure and properties of eicosanoids-prostaglandins, leukotrienes, thromboxanes, prostacyclins

Suggested Books:

1. Nelson D.L.Cox M M	:	Biochemistry, Worth Publishers Inc., New York. (4th Edition, 2005)
2. Conn E.E&Stumpf. P.K.	:	Outlines of Biochemistry, John Wiley & Sons, U.S.A.
3. G.Zubay Edition,	:	Biochemistry, Maxwell Macmillan Pub. Com., New York. (4th 1998).
4. Robert K. Murrary P.A. D.K. Granner and V.W. Rodwell	:	Harper's Illustrated Biochemistry, Prentice Hall Int., London (27th Edition, 2006).

PRACTICALS: **Marks: 25**

One practical of 3 hours per week

1. Qualitative tests for carbohydrates.
2. Estimation of carbohydrate by anthrone method.
3. Estimation of ascorbic acid by dye method.
4. Verification of Beer-Lambert law for nitrophenol or cobalt chloride.
5. Qualitative tests for cholesterol and lipids
6. Determination of saponification value of fats
7. Determination of iodine value of fats.
8. Estimation of phospholipids by vanillin method.

Paper-B: Nitrogen containing Biomolecules Marks: 45+5

SECTION–I

(Lectures: 7)

Amino acids: common structural features. Stereoisomerism and RS system of designating optical isomers. Classification based on the nature of "R" groups. Amino acids present in proteins and non-protein amino acids. Specialized role of amino acids. Physical and chemical properties of amino acids. Titration of amino acids. Rigid and planar nature of a peptide bond. Folding of peptide chains into regular repeating structures (α helix, β pleated sheets). β -turn in polypeptides. Chemical synthesis of polypeptides. Biologically active peptides.

SECTION–II

(Lectures: 8)

Proteins: levels of protein structure. Determination of primary structure of proteins. Forces stabilizing structure and shape of proteins. Native proteins and their conformations. Behaviour of proteins in solutions. Salting in & salting out of proteins. Denaturation of proteins. Structural and functional diversity of proteins, fibrous proteins (keratins, collagen & elastin), globular proteins (hemoglobin, myoglobin) and conjugated proteins.

SECTION-III

(Lectures: 8)

Nucleic Acids: structure and properties of purine and pyrimidine bases. Nucleosides and nucleotides. Biologically important nucleotides. Double helical model of DNA and forces responsible for it. Different forms of DNA (A,B and Z type), denaturation of DNA. Physical and chemical properties of nucleic acids. Chemical and enzymatic hydrolysis of nucleic acids. Sequencing of polynucleotides. Types of RNA and ribozyme.

SECTION-IV

(Lectures: 6)

Porphyrins: porphyrin nucleus and classification of porphyrins. Heme and other metalloporphyrins occurring in nature. Detection of porphyrins spectrophotometrically and by fluorescence. Chemical nature and physiological significance of bile pigments.

Suggested Books:

1. Nelson D.L.Cox M M	:	Biochemistry, Worth Publishers Inc., New York. (4th Edition, 2005)
2. Conn E.E&Stumpf. P.K.	:	Outlines of Biochemistry, John Wiley & Sons, U.S.A.
3. G.Zubay Edition,	:	Biochemistry, Maxwell Macmillan Pub. Com., New York. (4th 1998).
4. Robert K. Murrary P.A. D.K. Granner and V.W. Rodwell	:	Harper's Illustrated Biochemistry, Prentice Hall Int., London (27th Edition, 2006).

PRACTICALS: **Marks: 25**
One practical of 3 hours per week

1. Qualitative tests for Amino acids and proteins
2.Titration curve for amino acids and determination of pKa value.
3. Estimation of:
   (a) Amino acids by ninhydrin method.
   (b) Protein by biuret and Lowery method
   (c) DNA by diphenylamine method
   (d) RNA by orcinol method
4. Spectrophotometic measurements of DNA and RNA solutions

BIOCHEMISTRY
Semester II

INSTRUCTIONS FOR PAPER SETTER AND STUDENTS:

1. Total No. of questions will be nine. All questions carry equal marks.
2. Q. No. 1 will be compulsory. It will consist of short questions covering the entire syllabus
3. Besides question Number 1, there will be 4 sections of 2 questions each.
4. All other questions may contain 2-3 parts.
5. Questions should be uniformly spread over the entire syllabus.
6. Students will be required to attempt 5 questions in all including Q. No. 1 and at least one question from each of the 4 sections.

Paper- A: Biochemical Techniques **Marks: 45+5**

Credit: 3+0+0
Objective: To learn various biochemical techniques

Section-I

(Lectures: 7)

Beer-Lambert's law. Light absorption and its transmittance. Determination and application of extinction coefficient. Applications of following spectroscopic techniques in elucidating structure of Biomolecules:- visible, U.V., Infra-red and fluorescence spectroscopy

Section-II

(Lectures: 8)

Chromatography: general principles, distribution coefficient, partition chromatography-normal phase and reverse phase liquid chromatography. Modes of chromatography-column, thin layer and paper chromatography. Principles, matrices and applications of gel permeation, adsorption, ion exchange and affinity chromatography.Gas chromatography (GC) and High Performance Liquid Chromatography (HPLC).

Section-III

(Lectures: 7)

Various centrifugation techniques and their applications in Biochemistry.Preparative and analytical ultracentrifugation procedures.Application of partial specific volume, diffusion coefficient and viscosity measurements in the study of macromolecules of biochemical importance.

Section-IV

(Lectures: 8)

Electrophoresis: General principle, support media, types of electrophoresis.
Electrophoresis of proteins: native and SDS-PAGE. Isoelectric focusing, 2D-PAGE, detection and recovery of proteins.Molecular weight determination.Immuno electrophoresis. Electrophoresis of nucleic acid: agarose-gel electrophoresis of DNA and RNA, pulsed-field gel electrophoresis, Northern and Southern transfer procedure.

SUGGESTED BOOKS

1. Biochemical Techniques: Theory and practice by Robyt, J.F. and White, B.J, 1987, Brooke/Cole Publishing Company, California.
2. Principles and techniques of Biochemistry & Molecular biology by K Wilson & J Walker 6th Ed.Cambridge University press
3. Fundamentals of analytical chemistry by Skoog /West/Holter/Crouch Thompson/Brooks/Cole

PRACTICALS: **Marks: 25**

One practical of 3 hours per week

I. Estimation of proteins using UV absorbance and biuret method.
II. Estimation of proteins using Lowry/Bradford method.
III. Isoelectric pH of casein.
IV. Ammonium sulphate fractionation of serum proteins.
V. Separation of albumin from serum using anion-exchange chromatography.
VI. SDS-PAGE analysis of proteins.

Paper-B: Enzymes and Bioenergetics **Marks: 45+5**

Objective: To learn principles of thermodynamics, nature of enzymes, their mode of action and enzyme kinetics

SECTION-I

(Lecture: 7)

Introduction to enzymes.General characteristics of enzymes.IUB system of nomenclature and classification of enzymes.Prosthetic group.Holoenzyme, apoenzyme, cofactors, isoenzymes and their clinical significance and zymogens, coenzymes (NAD/NADP,FMN/FAD, coenzyme A,TPP, pyridoxal phosphate, tetrahydrofolate) and their biochemical functions, assay of enzyme activity, units of enzyme activity. Active site of enzymes

SECTION-II

(Lectures: 8)

Enzymes as catalysts. Theories of enzymes catalysis: proximity and orientation effects, acid base catalysis, covalent catalysis. Role of metals in enzyme catalysis
Monomeric enzymes, oligomeric enzymes & multienzyme complexes.Mechanism of action of chymotrypsin and pyruvate dehydrogenase.

SECTION-III

(Lectures: 8)

Factors affecting velocity of enzyme catalysed reactions: enzyme concentration, pH and temperature. Michaelis-Menten equation.Determination of Km and its significance.
Enzyme inhibition: Various types of enzyme inhibitions. Determination of Ki value.Enzyme inhibitors and their importance.Introduction to multisubstrate enzymes. Allosteric enzymes and enzyme regulation.

SECTION-IV

(Lectures: 8)

Concepts of bioenergetics, principles of thermodynamics & their application in Biochemistry, concept of free energy.Biological oxidations.Redox potential. ATP and High energy phosphate compounds: introduction, phosphate group transfer potential, enzymes and co-enzymes involved in oxidations and reductions. Mitochondrial electron transport chain and oxidative phosphorylation.Substrate level phosphorylation, mechanism of oxidative phosphorylation.

Books Recommended:

1. J.R. Whitaker : Principles of Enzymology for the Food Sciences, 2nd Ed., Marcel Dekker, Inc., New York.
2. J.E. Bell and E.T. Bell : Protein and Enzymes, Prentice Hall Inc, New Jersey.
3. Berg J. M, LubertStryer : Bio-chemistry, W.F. Freeman and Co., New York, Edition 7th, 2002.
4. Nelson D.L & Cox M. M. : Principles of Bio-chemistry, Worth Publishers, Inc., New York, edition 4th 2005.
5. Conn E.E &Stumpf P.K. : Outlines of Bio-chemistry, Bruening & Doi John Wiley & Sons.
6. T. Palmer : Enzymes: Biochemistry, Biotechnology and Clinical chemistry, 2nd Ed. (2008) Affiliated East-West press Pvt. Ltd. New Delhi.

PRACTICALS: **Marks: 25**
One practical of 3 hours per week

I. Preparation of casein from milk
II. Determination of achromatic point of saliva
III. (a) Assay of serum alkaline phosphatase activity.
(b) Effect of pH on enzyme activity.
(c) Effect of temperature on enzyme activity and determination of energy of activation.
(d) Effect of substrate concentration on enzyme activity and determination of Km.
IV. Inhibition of alkaline phosphatase by EDTA.
V. Demonstration of potato polyphenoloxidase activity.

……..

INTRODUCTION TO COMPUTER SCIENCE
(Additional Optional Subject)

Note : The students with no background of Computer knowledge will opt for Module I while those familiar with the use of Computer system at the operating system level and application level, may opt either Module II or Module III.

Course Duration for each semester: 60 hours for Theory and 60 hours for Practical

Sr. No.	Paper	Name of Paper	Lecturers per week	Max. Marks			Exam Hours
	First Semester			Ext.	Int.		
1	A	Fundamentals of Information Technology	6	25	5	30	3
2	C	Practical on Paper – A	6	-	-	20	3
	Second Semester			Ext.	Int.		
3	B	Computer Programming Using C	6	25	5	30	3
4	D	Practical on Paper – B	6	-	-	20	3

SEMESTER I

Paper A
Paper Title: Fundamentals Of Information Technology
Max. Marks : 25 **Time : 3 Hrs.**

Theory : Ext. 25 + Int. 5 = 30
Practical : Ext. 20 -- = 20

Total Periods (6 Periods/week): 60

Objective : To familiarize students with basic concepts of Computer and Information Technology, Students will get understanding of concepts related to operating systems and application softwares.

Note:

i. The Question Paper will consist of Four Units.

ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.

iii. The students are required to attempt ONE question from each Unit and the Compulsory question.

iv. All questions carry equal marks unless specified.

UNIT-I

1. **Basics of Computers: C**haracteristics of computer; History of computers; classification of computers based on size, architecture, and chronology; Applications of computers; Hardware, Software, and Firmware. Types of software: System and Application software; Input, Process and Output, Block diagram of a computer.
2. **Representation of information:** BIT, BYTE, Memory, Memory size; RAM, ROM, PROM, EPROM, Magnetic tapes, Disks, Organization of data on disks: Tracks, sectors, cylinders, heads, access time, seek time and latency time.
   ASCII and EBCDIC Codes, Binary, Octal, Decimal and Hexadecimal Number Systems and their Conversion, Integer and Floating Point Representation. Input/Output devices.

UNIT-II

3. **Disk Operating System:** Booting sequence; Warm and Cold Booting;Concept of File and directory, Types of DOS commands: Internal and External; Internal Commands: DIR, MD, CD, CLS, COPY, DATE, DEL, PATH, PROMPT, REN, RD, TIME, TYPE, VER, VOL; External Commands: XCOPY, ATTRIB, BACKUP, RESTORE,FORMAT, DISKCOPY, Introduction to CONFIG.SYS and AUTOEXEC.BAT files.
4. **Windows:** GUI, Icons, Toolbar, Control panel, Files and folder management under windows , Accessories, Network Neighborhood, System Tools, Recycle Bin
5. **LINUX**: Overview of LINUX structure, Basic Linux commands such as date, echo, cal, bc, passwd, File and Directory commands such as ls, mkdir, pwd, cd, rmdir, cat, cp, mv, rm Understanding File Access Permissions using chmod, chown, chgrp.
   Comparison of main features of DOS, LINUX and Windows Operating Systems.

UNIT-III

6. **Word Processing Software**:
   Basics of Word Processing: creating, opening, saving, and printing document, Menu Toolbars.
   Editing Text: Copy, Paste, Delete, Move etc., Finding and Replacing Text, Spell Check, Autocorrect feature, language setting and thesaurus
   Formatting: Character, Paragraph and Page formatting, working with indents, Bulleted and numbered lists, adding Headers and Footers, setting up Multiple Columns
   Working with tables: Inserting/creating table using toolbar and drawing, formatting table, adding/deleting rows/columns, Applying borders to tables
   Clipart: Using clip art, Creating Word Art
   Mail merge: Creating merged envelops, creating merged mailing labels

UNIT-IV

7. **Spreadsheet Software:**
   Worksheet overview: Row, Column, Cells, Menus, creating, opening, saving, and printing worksheet; working with Range

   Editing information: Entering text, numbers and formulae, AutoSum, AutoFill, spell checking

   Working with Functions: Statistical, Mathematical and String functions, date and Time functions, Trigonometric functions

   Working with charts: Line graphs, Pie charts, Bar graphs, adding Titles, Legends etc. to charts, Printing Charts
8. **Presentation Software**:
   Basic features, selecting design templates, creating, saving and printing a simple presentation, various views, Adding pictures, shapes, clipart, audio and movie.

Paper – C : Practical on Paper - A

Total Periods (6 Periods/week): 60 Max Marks: 20 Exam Hours: 4

Note for the Paper setter: Paper will be set at the time of examination. Due weightage may be given to practical note-book and assignments.

INTRODUCTION TO COMPUTER SCIENCE

SEMESTER II

Paper B
Paper Title: Computer Programming Using C

Max. Marks : 25 **Time : 3 Hrs**
Theory: Ext. 25 + Int. 5 = 30
Practical : Ext. 20 -- = 20

Total Periods (6 Periods/week): 60
Objective : To make student understand programming concepts of 'C' language including functions, arrays, input/output etc.

Note:

i. The Question Paper will consist of Four Units.

ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.

iii. The students are required to attempt ONE question from each Unit and the Compulsory question.

iv. All questions carry equal marks unless specified.

UNIT-I

1. **Problem Solving**: Problem Identification, Analysis, Flow charts, Decision Tables, Pseudo code and algorithms, Program Coding, Program Testing and Execution.
2. **C Language Fundamentals**: 'C' Language: History, Structure of a C program, Data types, Constants and variables, Operators and Expressions, Type casting, Type conversion, Scope Rules:Local and Global variables, I/O functions, Input/Output, Control constructs(Sequencing, alteration and iteration)
3. **Header files**: stdio.h, ctype.h, string.h, math.h, stdlib.h, time.h
4. **Storage classes:** automatic, external, static, register
5. **Preprocessor:** #define, #include, #undef, #conditional compilation directives (#if, #else, #elif, #endif, #ifdef and #ifndef)

UNIT-II

6. **Functions:** library functions, user defined functions, scope rule of functions, Parameter passing: call by value and call by reference, Recursion
7. **Arrays**: One dimensional and two dimensional arrays, declaring arrays, initializing arrays, processing of arrays, passing arrays as arguments to functions

UNIT-III

8. **Strings**: Declaring String, built-in string functions-strlen(),strcpy(), strcat(), strcmp(), array of strings, two dimensional array of characters, Array of Pointers to Strings
9. **Structure:** Defining a structure type, declaring variables of structure type, initializing structures. Accessing Structure Elements, array of structures, Array in Structures, Difference between array and structure, nested structures

UNIT-IV

10. **Console Input/Output**: Console I/O Functions, Formatted Console I/O Functions, sprintf( ) and sscanf( ) Functions, Unformatted Console I/O Functions, gets(), puts()
11. **File Input/Output**: File Operations, Opening a File, File Opening Modes, Reading from a File, Trouble in Opening a File, Writing to a File, Closing the File, Text Files and Binary Files.

Paper – D : Practical on Paper - B

Total Periods (6 Periods/week): 60 Max Marks: 20 Exam Hours: 4

Note for the Paper setter: Paper will be set at the time of examination. Due weightage may be given to practical note-book and assignments.

MICROBIOLOGY

B.Sc. (GENERAL) FIRST YEAR (SEMESTER SYSTEM) EXAMINATION (2020-21)

Note : 1. A student who has passed the + 2 examination under 10+2+3 system of education of a recognized University/Board/Council or any other examination recognized by the Panjab University as equivalent thereto shall be eligible to offer the subject of Microbiology at the B.Sc. level, if he/she has passed the +2 examination with Physics, Chemistry, Mathematics, Biology as his/her subjects.

2. Only such colleges which have all necessary infrastructure or equipment and staff shall admit students to the subject of Microbiology. The infrastructure must be approved by the University as per usual practice.

Scheme of Examination		*Duration*	*Marks*
	FIRST YEAR		
	Semester I		
THEORY		6 hrs	75 (66+9*)
MIC 101:	**Fundamentals of Microbiology -I**	3 hrs.	37.5 (33 + 4.5*)
MIC 102 :	**Microbial Physiology—Metabolism – I**	3 hrs.	37.5 (33 + 4.5*)
PRACTICAL			
One Practical examination pertaining to the entire syllabus included in Theory Papers MIC 101 and MIC 102		6 hrs	25 (22+3*)
	Semester II		
THEORY		6 hrs	75 (66+9*)
MIC 201:	**Fundamentals of Microbiology -II**	3 hrs.	37.5 (33 + 4.5*)
MIC 202 :	**Microbial Physiology—Metabolism –II**	3 hrs.	37.5 (33 + 4.5*)
Practical			
One Practical examination pertaining to the entire syllabus included in Theory Papers MIC 201 and MIC 202		6 hrs	25 (22+3*)

Note : * Denotes marks for the Internal Assessment.

MICROBIOLOGY

OUTLINES OF TESTS AND SYLLABI
MICROBIOLOGY
B.Sc. (GENERAL) FIRST YEAR EXAMINATION
MIC 101 : FUNDAMENTALS OF MICROBIOLOGY (I)

Semester-I

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note : The question paper will consist of four sections (A-D). There will be **nine** questions, out of which **five** questions have to be attempted. Question I will span the complete syllabus and will be compulsory. Rest of the eight questions will be from different sections of the syllabus. There will be four questions from each of the two sections and two is to be attempted from each section. Each question should be sub-divided into 2-4 sub parts.

Objective :

To provide basic knowledge about the fundamental concepts of Microbiology including history of Microbiology, Microscopic examination of microbes and providing information in frontier areas of genetic engineering, environmental science and agriculture.

SECTION-A

1. History, development, scope and applications of Microbiology.
2. Methods of Microbiology, isolation of pure cultures, theory and practice of sterilization.
3. Nature of Microbial World : Prokaryotes and eukaryotes, growth pattern in microbes.

SECTION-B

1. Morphology and fine structure of bacteria, fungi, actinomycetes and algae.
2. Organization of cell wall, cell membrane, flagella and capsules in bacteria.
3. Morphogenesis in bacteria, formation of spores and cysts.

SECTION-C

1. Recombinant DNA technology: genetic engineering and gene cloning in microorganisms.
2. Strategies of genetic engineering: Restriction enzymes, vectors and plasmids.

SECTION-D

1. Microorganism Association with Vascular Plants: Rhizosphere and Rhizoplane microorganisms and Mycorrhizae.
2. Nitrogen fixation: Symbiotic and nonsymbiotic and biofertilizers.
3. Biopesticides.

Recommended Books :

1. Fox, S.W., Dose, K. (1994), Molecular Evolution and the Origin of Life, University of Chicago Press.
2. Stanier, R.Y., Doudoroff, M., Adelberg, E.A. (1999), General Microbiology, Mc Millan Press, London.
3. Pelczar, M.J., Sun Chan E.C., Krieg, N.R. (1986), Microbiology, Tata Mc Graw Hill Publication, New Delhi.
4. Davis, (1996), Fundamental of Microbiology.
5. Reard, (1995), Introduction of Microbiology.
6. Robert, L. (1995), Soil Microbiology, John Wiley and Sons.
7. Alexander, M. (2003), Soil Microbiology, Wiley, 2003.
8. Waksman, S.A. (2003), Introduction to Soil Microbiology, John Wiley, 2003.
9. Prescott, Harley, and Klein's Microbiology by Joanne M.Willey, Linda M. Sherwood and Christopher J. Woolverton, Mc Graw Hill (2008)

MICROBIOLOGY
B.Sc. (GENERAL) FIRST YEAR EXAMINATION
MIC 102 : MICROBIAL PHYSIOLOGY—METABOLISM (I)

Semester-I

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note : The question paper will consist of four sections (A-D). There will be **nine** questions, out of which **five** questions have to be attempted. Question I will span the complete syllabus and will be compulsory. Rest of the eight questions will be from different sections of the syllabus. There will be four questions from each of the two sections and two is to be attempted from each section. Each question should be sub-divided into 2-4 sub parts.

Objective :

The paper provides basic information on complex integrated network of biochemical reactions that make up the metabolism of the micro-organisms including nutrition, growth, and enzymes.

SECTION-A

1. Microbial Nutrition : Requirements for Growth. Physical requirement (temperature, pH, osmotic pressure), chemical requirements (C, N, S, P, O).
2. Culture Media : Chemically defined media, complex media, anaerobic growth media, selective & differential media, and enrichment culture. Cultivation of Aerobes and Anaerobes.

SECTION-B

1. Enzymes : Chemical and physical properties of enzymes.
2. Classification and nomenclature of Enzymes.
3. Factors affecting enzyme activity.

SECTION-C

Microbial Metabolism :

1. Respiration and fermentation.
2. Glycolysis.
3. Pentose Phosphate pathway,
4. The Entner Doudoroff pathway.
5. Tricarboxylic acid cycle.
6. Glyoxylate cycle.

SECTION-D

Bacterial Genetics :

1. Conjugation.
2. Transformation.
3. Transduction (generalized transduction, specialized transduction).
4. The Regulation of Gene Expression : Lac operon, tryptophan operon. Recommended

Recommended Books :

1. Stanier R.Y., Doudoroff M., Adelberg, E.A. (1999), General Microbiology, McMillan Press, London.
2. Pelczar, M.J., Sun Chan, E.C., Krieg, N.R. (1986), Microbiology, Tata Mc Graw Hill Publication, New Delhi.
3. Tortora, G.J., Funke, B.R., Case, C.L. (2009), Microbiology : An Introduction, Benjamin/Cummings Publishing Company inc.
4. Postgate, J.R. (2000), Microbes and Man, Cambridge University Press.
5. Dubey, R.C., Maheshwari, D.K., (2005), A Textbook of Microbiology, S. Chand and Company.

MICROBIOLOGY
B.Sc. (GENERAL) FIRST YEAR EXAMINATION
Semester I

MAX. MARKS: 25 MARKS
PRACTICAL: 22 MARKS
INTERNAL ASSESSMENT: 3 MARKS
TIME: 3 HRS.

PRACTICALS

1. Preparation of culture media, spread plates, pour plates, selective media, differential media.
2. Separation of pure cultures and study the effect of selective nutrients on prokaryotes.
3. Isolation of Soil Bacteria, Soil Fungi, Soil Actinomycetes.
4. Selective media for Soil microflora and use of growth factors, Study of Rhizosphere interactions, Quantitative measurements of Soil nutrients and Rhizosphere microflora and preparation of starter cultures of Rhizobium, Azotobacter.
5. Measurement of Soil Enzymes.
6. Use of ultraviolet light for its germicidal effect.
7. The replica plating technique.
8. Effect of temperature, Osmotic pressure, energy source etc. on growth of prokaryotes.

MICROBIOLOGY
B.Sc. (GENERAL) FIRST YEAR EXAMINATION
MIC 201 : FUNDAMENTALS OF MICROBIOLOGY (II)

Semester-II

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note : The question paper will consist of four sections (A-D). There will be **nine** questions, out of which **five** questions have to be attempted. Question I will span the complete syllabus and will be compulsory. Rest of the eight questions will be from different sections of the syllabus. There will be four questions from each of the two sections and two is to be attempted from each section. Each question should be sub-divided into 2-4 sub parts.

Objective :

To provide basic knowledge about the fundamental concepts of Microbiology including history of Microbiology, Microscopic examination of microbes and providing information in frontier areas of genetic engineering, environmental science and agriculture.

SECTION-A

1. Microscopic examination of micro-organism, bright field microscopy, dark field microscopy, phase contrast microscopy and electron microscopy.
2. Staining of microbes, theory of Gram staining.

SECTION-B

1. Animal Viruses : Morphology, cultivation and viral disease cycle.
2. Bacteriophages : Morphology, multiplication, detection and enumeration.
3. Biotransformation of
   (a) D-Sorbitol to L-Sorbose.
   (b) Antibiotics.
   (c) Steroids.

SECTION-C

Genetic engineering for human welfare:

1. Production of pharmaceuticals.
2. Insect pest control.
3. Use of Genetically Engineered Microorganisms (GEMs) for control of pollution.

SECTION-D

1. Biogeochemical Cycling—Carbon cycle, Nitrogen cycle, Phosphorus and Sulphur cycle with role of microorganisms.
2. Sewage (waste-water) treatment, chemical characteristics, microbiological characteristics, waste water treatment processes.

Recommended Books :

1. Fox, S.W., Dose, K. (1994), Molecular Evolution and the Origin of Life, University of Chicago Press.
2. Stanier, R.Y., Doudoroff, M., Adelberg, E.A. (1999), General Microbiology, Mc Millan Press, London.

MICROBIOLOGY
B.Sc. (GENERAL) FIRST YEAR EXAMINATION
MIC 202 : MICROBIAL PHYSIOLOGY—METABOLISM (II)
Semester – II

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note : The question paper will consist of four sections (A-D). There will be **nine** questions, out of which **five** questions have to be attempted. Question I will span the complete syllabus and will be compulsory. Rest of the eight questions will be from different sections of the syllabus. There will be four questions from each of the two sections and two is to be attempted from each section. Each question should be sub-divided into 2-4 sub parts.

Objective :

The paper provides basic information on complex integrated network of biochemical reactions that make up the metabolism of the micro-organisms including nutrition, growth, and enzymes.

SECTION-A

1. Microbial Growth : Growth in population, bacterial growth curve, mathematical nature and expression.
2. Factors affecting growth in microorganisms.
3. Methods for measurement of growth in microorganisms. .

SECTION-B

1. Mechanisms of enzymes action.
2. Inhibition, control and regulation of enzyme activity .
3. Enzyme kinetics: Michaelis-Menten equation.

SECTION-C

Microbial Metabolism :
1. Catabolism of lipids and proteins.
2. Beta oxidation
3. Electron transport chain.
4. Biochemical mechanisms of generation of ATP.

SECTION-D

Microbial Utilization of Energy & Biosynthesis :
1. Transport of nutrient by bacteria.
2. Synthesis of Amino Acids : Glutamate, lysine, glutamine, serine, arginine family.
3. Structures and biosynthesis of cell wall peptidoglycan.
4. Biosynthesis of Carbohydrates (gluconeogenesis) & Phospholipids.
   Replication of DNA molecules, Transcription & Translation (process of protein synthesis).

Recommended Books :

1. Stanier R.Y., Doudoroff M., Adelberg, E.A. (1999), General Microbiology, McMillan Press, London.
2. Pelczar, M.J., Sun Chan, E.C., Krieg, N.R. (1986), Microbiology, Tata Mc Graw Hill Publication, New Delhi.
3. Tortora, G.J., Funke, B.R., Case, C.L. (2009), Microbiology : An Introduction, Benjamin/Cummings Publishing Company inc.
4. Postgate, J.R. (2000), Microbes and Man, Cambridge University Press.
5. Dubey, R.C., Maheshwari, D.K., (2005), A Text Book of Microbiology, S. Chand and Company.

MICROBIOLOGY
B.Sc. (GENERAL) FIRST YEAR EXAMINATION
Semester -II

MAX. MARKS: 25 MARKS
PRACTICAL: 22 MARKS
INTERNAL ASSESSMENT: 3 MARKS
TIME: 3 HRS.

PRACTICALS

1. Use of microscope in examination of unstained bacteria, fungi, algae, parasites and stained cell preparations including simple staining, Gram's staining, acid fast staining, capsule staining, spore staining using prokaryotic and eukaryotic cells, hanging drop preparation.
2. Presumptive, confirmed and completed tests for safety of water supplies.
3. Relation of free oxygen to microbial growth, monitoring of dissolved oxygen in various effluents.
4. Determination of COD in Industrial effluents.
5. Effects of antimetabolites on Microbial culture (Inhibition by Sulfanilamide).
6. Determination of Water Activity of various substrates and assay of surface active agents.
7. Turbidimetric/spectrophotometric monitoring of growth using liquid cultures.
8. Efficiency of photosynthesis in photoautotrophs.

Environment, Road Safety Education, Violence against Women/Children and Drug Abuse

SEMESTER II

Instructions :

- The total duration of the whole paper (consisting of four parts) shall be of 2 hours carrying 100 marks in whole, divided into the ration of 40:20:20:20
- The teaching hours for the Environment portion of this paper, would be 20 and of Road Safety, Violence against Women/Children and Drug Abuse shall be 10 hours each.

Part - I (Environment)

Note: *The syllabus has 15 topics to be covered in 20 hour lectures in total, with 2 lectures in each topic from 2 to 11 and one each for the topics 1 and 12 to 15.*

1. **Environment Concept :**
Introduction, concept of biosphere—lithosphere, hydrosphere, atmosphere; Natural resources—their need and types; principles and scope of Ecology; concepts of ecosystem, population, community, biotic interactions, biomes, ecological succession.

2. **Atmosphere :**
Parts of atmosphere, components of air; pollution, pollutants, their sources, permissible limits, risks and possible control measures.

3. **Hydrosphere :**
Types of aquatic systems. Major sources (including ground water) and uses of water, problems of the hydrosphere, fresh water shortage; pollution and pollutants of water, permissible limits, risks and possible control measures.

4. **Lithosphere :**
Earth crust, Soil—a life support system, its texture, types, components, pollution and pollutants, reasons of soil erosion and possible control measures.

5. **Forests :**
Concept of forests and plantations, types of vegetation and forests, factors governing vegetation, role of trees and forests in environment, various forestry programmes of the Govt. of India, Urban Forests, Chipko Andolan.

6. **Conservation of Environment :**
The concepts of conservation and sustainable development, why to conserve, aims and objectives of conservation, policies of conservation; conservation of life support systems—soil, water, air, wildlife, forests.

7. **Management of Solid Waste :**
Merits and demerits of different ways of solid waste management—open dumping, landfill, incineration, resource reduction, recycling and reuse, vermicomposting and vermiculture, organic farming.

8. **Indoor Environment :**
Pollutants and contaminants of the in-house environment; problems of the environment linked to urban and rural lifestyles; possible adulterants of the food; uses and harms of plastics and polythene; hazardous chemicals, solvents and cosmetics.

9. **Global Environmental Issues :**
Global concern, creation of UNEP; Conventions on climate change, Convention on biodiversity; Stratospheric ozone depletion, dangers associated and possible solutions.

10. **Indian Laws on Environment :**
Indian laws pertaining to Environmental protection : Environment (Protection) Act, 1986; General information about Laws relating to control of air, water and noise pollution. What to do to seek redressal.

11. **Biodiversity :**
What is biodiversity, levels and types of biodiversity, importance of biodiversity, causes of its loss, how to check its loss; Hotspot zones of the world and India, Biodiversity Act, 2002.

12. **Noise and Microbial Pollution :**
Pollution due to noise and microbes and their effects.

13. **Human Population and Environment :**
Population growth and family welfare programme, Human Health, HIV/AIDS, Human rights.

14. **Social Issues :**
Environmental Ethics : Issues and possible solutions, problems related to lifestyle, sustainable development; Consumerisms and waste generation.

15. **Local Environmental Issues :**
Environmental problems in rural and urban areas, Problem of Congress grass & other weeds, problems arising from the use of pesticides and weedicides, smoking etc.

Practicals:

Depending on the available facility in the college, a visit to Vermicomposting units or any other such non-poluting eco-friendly site or planting/caring of vegetation/trees could be taken.

Examination Pattern :

A qualifying paper of 40 marks comprising of 40 multiple choice questions (with one correct and three incorrect alternatives and no deducation for wrong answer or unattempted question), and of 1 hour duration.

The students have to obtain 33% marks to quality the paper. The marks are not added/included in the final mark sheet.

Part - II (Road Safety Education)

1. Concept and Significance of Road Safety.
2. Role of Traffic Police in Road Safety.
3. Traffic Engineering – Concept & Significance.
4. Traffic Rules & Traffic Signs.
5. How to obtain Driving License.
6. Traffic Offences, Penalties and Procedures.
7. Common Driving mistakes.
8. Significance of First-aid in Road Safety.
9. Role of Civil Society in Road Safety.
10. Traffic Police-Public Relationship.

Note : Examination Pattern :

- The Environment and Road Safety paper is 60 marks.
- Sixty multiple choice questions (with one correct and three incorrect alternatives and no deduction for wrong or un-attempted questions).
- The paper shall have two units: **Unit I (Environment) and Unit II (Road Safety).**
- Unit II shall comprise of 20 questions with minimum of 1 question from each topics 1 to 10.
- The entire syllabus of Unit II is to be covered in 10 hours.
- All the questions are to be attempted.
- Qualifying Marks 33 per cent
- Duration of examination : 60 minutes
- The paper setter is requested to set the questions strictly according to the syllabus.

Suggested Readings

1. The Motor Vehicle Act, 1988 (2010), Universal Law Publishing Co. Pvt. Ltd., New Delhi.
2. Road Safety Signage and Signs (2011), Ministry of Road Transport and Highways, Government of India.

Websites:

(a) www.chandigarhpolice.nic.in

(b) www.punjabpolice.gov.in

(c) www.haryanapolice.gov.in

(d) www.hppolice.nic.in

Part - III (Violence against Women / Children)

1. Concept and Types of Violence: Meaning and Definiton of violence; Types of Violence against women – domestic violence, sexual violence (including rape), sexual harassment, emotional/psychological violence; Types of Violence against children – physical violence, sexual violence, verbal and emotional abuse, neglect & abandonment.

2. Protective Provisions of IPC on Domestic Violence & Sexual Violence against Women:

Dowry Death – Section 304B;
Rape – Sections 375, 376(1), 376(A), 376B, 376C, 376D and 376E;
Cruelty - Section 498A;
Insult to Modesty – The Indian Penal Code does not define the word eve-teasing; there are three sections which deal with crime of eve- teasing. These are Sections 294, 354 and 509 of Indian Penal Code. Section 509 of the Indian Penal Code defines (Word, gesture or act intended to insult the modesty of a women), Section 294 – (Obscene acts and songs) and Section 354 (Assault or criminal force to woman with intent to outrage her modesty).
Hurt & Grievous Hurt Provisions – Sections 319 to 326;
Acid Attacks – Sections 326A and 326B;
Female Infanticide – Section 312, Section 313 of Indian Penal Code (Causing miscarriage without women's consent) and section 314;
Sexual Harassment – For providing protection to working women against sexual harassment, a new section 354 A is added; 354 B (Assault or use of criminal force to women with intent to disrobe); 354 C Voyeurism; 354 D (Stalking). All these provisions are added in IPC to protect women against acts of violence through Criminal Law (Amendment) Act, 2013; Human Trafficking and Forced Prostitution- Sections 370 and 370A

3. **Protective Laws for Women:**

3.1 Provisions of Protection of Women Against Domestic Violence Act 2005 – Definition, Powers of the Magistrate and Protection Officers, Protection order, Residence order, Monetary relief, Custody order and Compensatory order.

3.2 The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 – Definition, Internal Complaint Committee, Local Complaint Committee, Procedure adopted by Committee for punishing accused.

4. Protective Provisions of IPC regarding Sexual Violence against Children:

Section 293(sale etc. of obscene objects to young persons); 294 (obscene acts & songs); 305(abetment of suicide of child); 315 to 317 (act causing death after birth of a child etc.); 361(kidnapping from lawful guardianship); 362 (abduction); 363 (punishment for kidnapping); 363A (kidnapping or maiming a minor for purposing of begging); 364A (kidnapping for ransom etc.); 366 (kidnapping etc. to compel woman for marriage etc.); 366A (procuration of minor girl for illicit forced intercourse); 366B (importation of girl from foreign country); 367 (kidnapping/abduction in order to subject person to grievous hurt, slavery etc.); 369 (kidnapping adductive child under 10 year with intent to steal from its person); 372 & 373 (selling & buying minor for purposes of prostitution etc.).

4.1 **The Protection of Children from Sexual Offences Act, 2012:** An overview of the POCSO, relevant legal provisions and guidelines for the protection of children against sexual offences along with punishments; role of doctors, psychologists & mental experts as per rules of POCSO.

Note: Instructions for Examination:

- Unit III of the paper dealing with Violence against Women and Children is of 20 Marks.
- It shall have 20 multiple-choice questions (with one correct and three incorrect choice options and no deduction of marks for wrong or un-attempted questions).
- Minimum two questions from each topic must be covered.
- All the questions are to be attempted
- Qualifying Marks 33 percent
- Duration of Examination 30 Minutes
- The Paper Setter is requested to set the questions strictly according to the syllabus.

Pedagogy:

- The entire syllabus of Unit III is to be covered in ten hours in total, with each lecture of one-hour duration.
- The purpose behind imparting teaching-learning instructions is to create basic understanding of the contents of the Unit III among the students.

UNIT IV (Drug abuse: problem, prevention and management)

1. Problem of drug abuse
   Meaning and concept; types of drugs often misused;antibiotics, steroids and their misuse with suitable examples;habit forming drugs and their effects; drug addiction; drug tolerance and withdrawal symptoms;various signs and symptoms of drug abuse;vulnerable groups (age, gender and socio-economic status)
2. Prevention and management of drug abuse
   Medical treatment through deaddiction center, support of family, media and school education; Government policies, programs and laws to prevent drug abuse.

Instructions to the examiners

1. Unit IV of the paper dealing with Drug abuse would be of 20 marks comprising of twenty multiple choice questions carrying one mark each having four options a, b, c, d with one correct and three incorrect alternatives.
2. The question paper shall be set strictly according to the syllabus uniformly
3. All the questions are to be attempted

Note: The teaching hours for the Unit IV will be 10 hours

PANJAB UNIVERSITY, CHANDIGARH

OUTLINES OF TESTS, SYLLABI AND COURSES OF READING IN VARIOUS SUBJECTS FOR B.A./B.Sc. (GENERAL) SECOND YEAR (SEMESTER SYSTEM) i.e. THIRD SEMESTER NOVEMBER/DECEMBER 2020 AND FOURTH SEMESTER APRIL/MAY 2021, EXAMINATIONS.

ENGLISH (Compulsory)

SEMESTER – III

(FOR B.A. CANDIDATES ONLY)

Max. Marks	:	50
Theory	:	45 marks
Internal Assessment	:	05 marks
Time	:	03 Hours

Objective:

- To teach finer nuances of language through an integrated approach.
- To acquire extensive knowledge of English as a language in its various textual forms and to become thoughtful, imaginative and effective communicators in a diverse and changing society.
- To write an effective business document (such as notice, advertisement etc.) which enable them to think analytically.
- To enhance their writing skill
- To acquire knowledge about various literary aspects through the text which capacitates them to enrich their literary and cultural values.
- To empower an average student in such a way that English learning becomes a pleasurable endeavour.

TEXT PRESCRIBED:

English for Empowerment, Eds., G Damodar, D Venkateshwarlu, M. Narendra, M. Sarat Babu, G. M. Sunderavalli, Hyderabad: Orient Blackswan, 2009.

Poetry Section:

i. Ode to Autumn

ii. The Road Not Taken

iii. Money Madness

iv. I, Too

Prose Section:

i. Mr. Know All

ii. Film Making

iii. Not Just Oranges

iv. A Tale on Advertising

TESTING SCHEME:

Section – A

Q.1. Reference to the context from Poetry. **One** out of **two** passages to be attempted. 5 marks

Q.2. Short answer type question from Poetry (in about 50-60 words). **Five** out of **eight** are to be attempted. 10 marks

Q.3. Long answer type questions from Prose (in about 100-120 words). **Two** out of **Four** are to be attempted. 6 marks

Section-B

Q.4. Note making (**one** out of **two** is to be attempted) 4 marks
(The examiner will set **two** paragraphs based on the prescribed text for note making. The students be asked to attempt any **one** of the **two**).

Q.5. Grammer:

i. Non finite verbs 5 marks
ii. Punctuation (A short paragraph) 5 marks
iii. Do as directed (based on transformation of sentences) 10 marks

(The examiner will set **three** different grammar excercises for every section of Q.5 based on the prescribed text in such a way that most of the activities, students have done in the class are adequately covered.)

ENGLISH (Compulsory)

SEMESTER – IV

(FOR B.A. CANDIDATES ONLY)

Max. Marks	:	50
Theory	:	45 marks
Internal Assessment	:	05 marks
Time	:	3 Hours

Objective:

- To Teach Finer nuances of language through an integrated approach.
- To acquire extensive knowledge of English as a language in its various textual forms and to become thoughtful, imaginative and effective communicators in a diverse and changing society.
- To write an effective business document (such as notice, advertisement etc.) which enable them to think analytically.
- To enhance their writing skill.
- To acquire knowledge about various literary aspects through the text which capacitates them to enrich their literary and cultural values.
- To empower an average student in such a way that English learning becomes a pleasurable endeavour.

TEXT PRESCRIBED:

English for Empowerment, Eds., G. Damodar, D. Venkateshwarlu, M. Narendra, M. Sarat Babu, G. M. Sunderavalli, Hyderabad: Orient Blackswan, 2009.

Poetry Section:

i. Goodbye Party for Miss Pushpa T.S.

ii. I Will Embrace Only the Sun

iii. Refugee Mother and Child

iv. This is a Photograph of Me

Prose Section:

i. On Shaking Hands

ii. No Man is an Island

iii. Freedom of the Press

iv. An Except From Decolonizing the Mind

TESTING SCHEME:

Section – A

Q.1. Reference to the context from Poetry. **One** out of **two** passages to be attempted. 5 marks

Q.2. Short answer type question from Poetry (in about 50-60 words). **Five** out of **eight** are to be attempted. 10 marks

Q.3. Long answer type questions from Prose (in about 100-120 words). **Two** out of **Four** are to be attempted. 6 marks

Section – B

Q.4. Paragraph writing (based on post-reading activities suggested in the prescribed texts)
One out of **three** is to attempted. 5 marks
(The examiner will set **three** topics for paragraphs writing from the post reading activities suggested in the prescribed texts. While selecting this question, special care must be taken to borrow ideas from the text or suitably modify them so as to identify viable topics that the students of B.A.(compulsory)can easily handle.)

Q.5. Report writing (with internal choice) 4 marks
(The examiner will give information about some social issue, an event/incident, some topic of current affairs etc. and will ask the students to write a report in about 100 words on the given topic. The information can also be given in form of a dialogue on some issue of general interest. The examiner will set this question with an internal choice).

Q.6. Grammer:
i. Using nouns as verbs or vice-versa 5 marks
ii. Combining pairs of sentences using words given in the brackets 5 marks
iii. Text-based Idioms and Phrases 5 marks
(The examiner will set **four** different grammar excercises for every section of Q.5 based on the prescribed text in such a way that most of the activities students have done in the class are adequately covered.)

****

ENGLISH (Compulsory)
(FOR B.Sc. CANDIDATES ONLY)

SEMESTER-III

Note:

(i) There will be one paper of 40 marks, 5 marks are reserved for the Internal Assessment and 5 for the Practical Work. Total is 50.

(ii) The paper shall consist of Two Units. Unit I will be text specific and Unit II shall deal with different aspects of Communication and Language skills.

(iii) For Unit I, the prescribed text is **Varieties of Expression,** Ed. A. H. Tak, Foundation Books. Only four prose chapters and two dramas have been recommended for the study. The relevant sections, however, are as follows:

Unit I

Prose : Chapters 1-4
Drama : Dramas 1-2

Unit II

Note (iv) No text book is recommended for Unit II, but a few books that may be used for this Unit are listed towards the end. Unit II shall consist of the following:

Business Communication: It shall focus on different aspects of communication in general and business communication in particular, communication within organizations, types of communication and significance of positive attitude in improving communication.

Writing Skills: This section shall focus on letters of all kinds, tender notices, auction notices, public notices; and memos.

Practical work:-

Teacher should assign some project or practical work to the students. This should be in the nature of guided activity, which the students shall have to complete under the direct supervision of the teacher. The students may be given projects on a variety of subjects relating to their discipline i.e. business, commerce, accounts etc. Preferably, they should be given minor projects (to be completed within less than two weeks, and length not exceeding 20 pages) in consultation with teachers of commerce. However, the evaluation of the projects should be done only by the Language Teachers, who must keep all the basic criteria of good writing in mind while doing so.

(Note*: In case of private candidates and students of University School of Open Learning, the marks obtained by them out of 40 will be proportionately increased out of 50).*

Testing Scheme:

The examination paper shall be divided into two sections, corresponding to two units already proposed in the syllabus. The distribution of questions and marks in Unit I shall be as follows:

Section I (It is text-based and corresponds to Unit I in the syllabus)

Q.1. It shall consist of six short questions. Three from Prose and three from drama (not exceeding 50-60 words) out of which a student will be expected to attempt any **two** from **Prose** and **two** from **Drama**. This question shall be based upon the prescribed text **Varieties of Expression** and cover a wide range of issues, topics and problems.

10 marks

Q.2. It shall consist of four long questions – **Two** from **Prose** and **two** from **Drama** (not exceeding 100-150 words) out of which a student will be expected to attempt **two**- one from Prose and one from Drama.

5 marks

Note: The question 1 & 2 should be so designed as to cover all the chapters prescribed (Prose & Drama)

Q.3. It shall exclusively be a test of vocabulary, but designed strictly on the lines of various exercises given at the end of each chapter in the prescribed text. The candidate shall be given **five** words in one column and asked to match them with words/meanings in the next column. **5 marks**

Unit II

Q.4. This question shall test a student's ability to write letter of various kinds (not more than 200 words). Again, there will be internal choice here. **5 marks**

Q.5. Memos/Tender Notices/Auction Notices/Public Notices. **10 marks**

Q.6. One short question to test the students' understanding of various aspects of Business Communication.

5 marks

.....

ENGLISH (Compulsory)
(FOR B.Sc. CANDIDATES ONLY)

SEMESTER-IV

Note:

(i) There will be one paper of 40 marks, 5 marks are reserved for the Internal Assessment and 5 for the Practical Work. Total is 50.

(ii) The paper shall consist of Two Units. Unit I will be text specific and Unit II shall deal with different aspects of Communications and Language skills.

(iii) For Unit I, the prescribed text is **Varieties of Expression,** Ed. A. H. Tak, Foundation Books. Only four prose chapters and two dramas have been recommended for the study. The relevant sections, however, are as follows:

Unit I

Prose : Chapters 5-8
Drama : Dramas 3-4

Unit II

Note (iv) No text book is recommended for Unit II, but a few books that may be used for this Unit are listed towards the end. Unit II shall consist of the following:

Writing Skills: This section shall focus on précis-writing, curriculum vitae, short, formal reports (not exceeding 200 words) and advertisements relating to product promotion etc.

Modern Forms of Communication: Here special emphasis shall be given to teaching the format of E-mails, Fax Messages, Audio-Visual Aids and Power-Point Presentations.Apart from this, the students shall also be given basic lessons in Effective Listening, Non-Verbal Communication. How to Prepare for an Interview & Group Discussion etc.

Practical Work:

Teacher should assign some project or practical work to the students. This should be in the nature of guided activity, which the students shall have to complete under the direct supervision of the teacher. The students may be given projects on a variety of subjects relating to their discipline i.e. business, commerce, accounts etc. Preferably, they should be given minor projects (to be completed within less than two weeks, and length not exceeding 20 pages) in consultation with teachers of commerce. However, the evaluation of the projects should be done only by the Language Teachers, who must keep all the basic criteria of good writing in mind while doing so.

(Note*: In case of private candidates and students of University School of Open Learning, the marks obtained by them out of 40 will be proportionately increased out of 50).*

Testing Scheme:

The examination paper shall be divided into two sections, corresponding to two units already proposed in the syllabus. The distribution of questions and marks in Section I shall be as follows:

Unit I (It is text-based and corresponds to Unit I in the syllabus)

Q.1. It shall consist of six short questions. Three from Prose and three from drama (not exceeding 50-60 words) out of which a student will be expected to attempt any four, **Two** from **Prose** and **two** from **Drama**. This question shall be based upon the prescribed text **Varieties of Expression** and cover a wide range of issues, topics and problems.

10 marks

Q.2. It shall consist of four long questions – **Two** from **Prose** and **two** from **Drama** (not exceeding 100-150 words) out of which a student will be expected to attempt **two**- one from Prose and **one** from Drama.

5 marks

Note: The question 1 & 2 should be so designed as to cover all the chapters prescribed (Prose & Drama)

Q.3. It shall exclusively be a test of vocabulary, but designed strictly on the lines of various exercises given at the end of each chapter in the prescribed text. The candidate shall be given **five** words in one column and asked to match them with words/meanings in the next column. **5 marks**

Unit II

Q.4. Short Survey Report (150-200 words) with internal choice. **5 marks**

Q.5. Precis of 200 words. **10 marks**

Q.6. Definition/Format of modern forms of communication to be tested.
(e-mail, fax, videoconferencing) **5 marks**

HISTORY AND CULTURE OF PUNJAB

(For B.A. candidates only)

SEMESTER-III

Objectives: To introduce the students to the history of the history of the region during medieval times.
Pedagogy: Lectures, library work and discussions.

INSTRUCTIONS FOR THE PAPER –SETTER AND CANDIDATES: (FOR PAPER IN SEMESTER III AND IV)

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 10 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type questions carrying 5 marks i.e. 1 marks for each. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit-IV in all. Each question will carry 10 marks.

2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. **One question from Unit-IV shall be set on the map.**

Explanation:

1. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
2. The distribution of marks for the map question would be as under:

Map	:	6 Marks
Explanatory Note	:	4 Marks

   In case a paper setter chooses to set a question of map on important historical places, the paper setter will be required to ask the students to mark 06 places on map of 01 marks each and write explanatory note on any 02 of 02 marks each.

3. The paper-setter would avoid repetition between different types of question within one question paper.

Paper: HISTORY AND CULTURE OF PUNJAB 1200-C- 1700 A.D

50 टिप्पणियाँ

1.	A brief note is placed below	**संक्षिप्त टिप्पणी नीचे प्रस्तुत है ।**
2.	Acknowledge receipt of this	**इसकी पावती भेजिए ।**
3.	Action as proposed may be taken	**यथा प्रस्तावित कार्यवाही की जाए।**
4.	Agenda of the meeting is put up	**बैठक की कार्यसूची प्रस्तुत है ।**
5.	Application may be rejected	**आवेदन अस्वीकार कर दिया जाए ।**
6.	Approved as proposed	**प्रस्ताव के अनुसार अनुमोदित**
7.	Administrative approval may be obtained	**प्रशासनिक अनुमोदन प्राप्त किया जाए ।**
8.	Await reply	**उत्तर की प्रतीक्षा करें ।**
9.	Await further report	**और विवरण की प्रतीक्षा करें ।**
10.	Ascertain this position please	**कृपया स्थिति का पता लगायें ।**
11.	Amended draft is submitted for approval	**संशोधित प्रारूप अवलोकनार्थ प्रस्तुत हैं ।**
12.	Brief resume of the case is given below	**मामले का संक्षिप्त सार नीचे दिया गया है।**
13.	Call for explanation	**स्पष्टीकरण माँगे**
14.	Call for report	**रिपोर्ट मँगवाए ।**
15.	Comply with the orders	**आदेशों का पालन करें ।**
16.	Clarify the position please	**कृपया स्थिति का स्पष्ट करें ।**
17-	Copy enclosed for ready reference	**सुलभ संदर्भ के लिए प्रतिलिपि संलग्न है ।**
18.	Copy is enclosed	**प्रतिलिपि संलग्न है ।**

19.	Copy forwarded for information and Necessary action	प्रतिलिपि सूचनार्थ एवं आवश्यक कार्यवाही के लिए प्रषित है ।
20.	Case may be kept pending	मामले को अभी अनिर्णीत रखा जाए ।
21.	Delay should be avoided	विलम्ब न किया जाए।
22.	Disciplinary proceedings may be initiated	आनुशासनिक कार्यवाही शुरू की जाए ।
23.	Draft reply is put up	उत्तर का मसौदा प्रस्तुत है
24.	Enquiry may be conducted	जाँच की जाएं
25.	Expedite action	शीघ्र कार्यवाही करें ।
26.	Explanation may be called for	स्पष्टीकरण माँगा जाए ।
27.	Facts for the case may be put up	मामलों के तथ्य प्रस्तुत करें ।
28.	For perusal and return	देखकर लौटाने के लिए
29.	For comments please	कृपया टिप्पणी दें ।
30.	For sympathetic consideration	सहानुभुतिपूर्ण विचार के लिए।
31.	Forwarded and recommended	प्रेषित और संस्तुत।
32.	I concur with the proposal	मैं इस प्रस्ताव से अपनी सहमति प्रकट करता हूँ।
33.	I have no remarks to offer	मुझे कोई टिप्पणी नहीं करनी हैं ।
34.	Inform all concerned	सभी संबंधित व्यक्तियों को सूचित करें ।
35.	Issue a circular	परिपत्र जारी करें ।
36.	Keep pending	निर्णय के लिए रोक रखें ।
37.	Kindly accord sanction	कृपया स्वीकृति दीजिए ।
38.	Kindly confirm	कृपया पुष्टि करें।
39.	Matter is under consideration	मामला विचाराधीन है ।
40.	No action is necessary	कोई कार्यवाही अपेक्षित नहीं है
41.	Needful has been done	आवश्यक कार्यवाही की गई है ।
42.	Order may be issued	आदेश जारी किया जाए ।
43.	Please see the proceeding notes	कृपया पिछली टिप्पणियाँ देख लें ।
44.	Put up the relevant papers	संबधित कागज प्रस्तुत करें ।
45.	Reminder may be sent	अनुस्मारक भेजा जाए ।
46.	Report compliance immediately	अनुपालन करके तुरन्त सूचित करें ।
47.	Specific reason may be given	विशिष्ट कारण दिया जाए ।
48.	Submitted for information	सूचना के लिए प्रस्तुत है ।
49.	This may be treated as confident	इसे गोपनीय समझा जाए ।
50.	Verified and found correct	जाँचा और सही पाया ।

Test 2 : STRENGTH : Standing broad jump test.

***Division of Practical Marks**:* Marks for each activity shall be divided as under:

Athletics 10 Marks, Participation and achievement in sports/games 5 marks, Physical fitness 5 marks, viva voce/ practical file 10 marks and internal assessment 5 marks based on overall performance of a student during the current semester which will be assessed by the teacher concerned.

Note : 1. Polevault, Hammer Throw Hurdles, Relay Races and steeple chase men are not included in the practical syllabus/course due to the fact that these events are highly technical. Moreover in the absence of proper facilities required for the events mentioned above may prove to be injurious /fatal to the students.

2. 12 periods per week (6 periods each for theory and practical) shall be allotted to a class.
3. The theory and practical class shall consist of 60-80 students and 30-40 students respectively.
4. The theory and practical papers shall consist of 65 and 35 marks each.
5. As per the Panjab University Calendar, Chapter XIX (Page 324) Volume III, 1990, the maximum teaching work load for an Assistant Professor in Physical Education for B.A. Pass Course is 24 periods per week, which includes theory as well as practical.
6. The choice of games by the students shall be confined to games approved by the Association of Indian Universities.
7. A student is required to prepare a practical notebook on athletics with complete marking of standard track and starting points for various races and an event (long jump) mentioned in the syllabus.

Mandatory Instructions for the Colleges:

1. ***Admission Criteria:***

(i) Any student opting to have Physical Education as an Elective Subject irrespective of the background of the students (sports or non-sports students) must appear in the physical fitness test. Ranking should be prepared and the top 60-80 students should be offered this subject.

(ii) This subject should be offered to the normal students (not to disabled one).

(iii) To measure Physical Fitness through Cardiovascular Fitness Test, Cooper's 9 Minutes or 12 Minutes Run-Walk Test should be conducted.

(iv) The date of Physical Fitness Test must be mentioned in the prospectus of the College.

2. ***Periodical Physical Inspections :***

The University/Authorities with the collaboration of the Department of Physical Education, Panjab University, shall make Periodical Physical inspections of the various colleges to ensure that the teacher student ratio is maintained by all the affiliated colleges for this subject **as per the University Guidelines**, and for them to ensure that infrastructure (facilities), equipment, books/professional journals and groundmen, a game boy are provided as per the requirements of the subject and directions of the Panjab University, Chandigarh.

3. ***Strength of Students :***

For imparting effective teaching, the strength of students in a theory class shall be between 60-80 while it shall be 30-40 students in practical class.

4. Infrastructure/facilities and Supporting personnel:

For the introduction/to continue with this subject, a college must fulfil the following mandatory requirements:

(i) A track atleast of 200 mtrs., it should, however, preferable be raised to 400 mtrs. track.

(ii) Bare minimum two Malies-cum-Groundmen for maintenance of the grounds and other infrastructure facilities etc.

(iii) A game boy to supply the sports equipments and water to the students/ teachers on the ground/playfield/arena.

(iv) A store-keeper for the proper maintenance/accountability of sports equipments in the stores.

5. ***Number of Periods :***

The number of periods for theory and practical shall be 12 periods per week (6 periods each for theory and practical) for classes i.e. B.A. First to sixth semester.

Practical period shall be projected in the college time table itself.

6. ***Teaching Work Load :***

(i) As per the Panjab University Calendar Chapter XX (Page 298) Volume-III, 1996, the Maximum teaching work load for an Assistant Professor in Physical Education for B.A. Pass course is 24 periods per week which includes theory as well as practical.

(ii) Teachers who are preparing 6 teams for the Panjab University Inter College Competition, their work load shall be counted by including six periods per week in the teaching load of concerned teachers in Physical Education.

7. ***Division of Marks (Theory and Practical) :***

65% and 35% weightage shall be given to each theory and practical papers.

Note : **STRICT ACTION SHALL BE TAKEN BY THE UNIVERSITY AGAINST THE COLLEGE(S) WHICH VIOLATES THE ABOVE INSTRUCTIONS.**

PHYSICAL EDUCATION
B.A. (GENERAL) FOURTH SEMESTER EXAMINATION, 2020-2021

Max. Marks	:	65
Theory	:	60 marks
Internal Assessment	:	05 marks
Time	:	3 Hrs.

INSTRUCTIONS FOR THE PAPER-SETTER AND STUDENTS :

(i) There shall be nine questions in all, spread over five units.

(ii) First question/unit is compulsory. It will contain six short answer type questions, spread over the whole syllabus to be answered in brief. It will carry 12 marks.

(iii) Rest of the paper shall contain four units for descriptive questions. Each unit shall have two questions and the students shall be given internal choice i.e. the students shall attempt one question from each unit.

(iv) All questions/units will carry equal marks.

(v) Private candidates and the students of the University School of Open Learning (USOL) will not be allowed to take this subject.

UNIT-I 12 Marks

Entire syllabus given in the Units II to V will be covered to set six short answer type questions in first question/unit of the question paper which is compulsory.

UNIT-II 12 Marks

Respiratory System :

- Meaning of Respiration, types of Respiration, Organs of the Respiratory System.
- Functions of the Respiratory System. Vital capacity and its measurement.
- Mechanism and Neural Control of Respiration.

Digestive System :

- Meaning, Importance and Organs of Digestive System.
- Functions, processes, mechanism and nerve regulators of Digestive System.

UNIT-III

12 Marks

Circulatory System :

- Meaning of the circulatory system.
- Heart, its structure, functions and control of the heart rate.
- Various types of blood vessels and their functions.
- Cardiac Cycle.

Blood :

- Meaning, functions and composition of blood.
- Maintenance of blood supply.
- Blood groups and their importance.
- Blood Clotting.

UNIT-IV

12 Marks

Communicable Diseases :

Meaning of a communicable disease. Communicable diseases such as HIV/AIDS, Viral Hepatitis—A, B & C and Tetanus, their modes of transmission and methods of prevention.

Yoga:

- Meaning and aim of Yoga.
- Meaning, Principles and Importance of Asanas.
- Meditative poses (Padamasna, Vajrasana, and Sukhasana), their technique, precautions and effects/advantages.
- Cultural poses (Savasna, Halasana, Bhujangasana Sarvangasana, and Dhanurasana), their technique, precautions and effects/advantages.

Basics of Tennis :

- History of the game.
- Basic fundamentals.
- Equipment and specifications.
- Marking / layout of court.
- Rules and regulations (number of players, duration of game, number of officials required and general rules of play).
- Major tournaments and Arjuna awardees of the game.

UNIT-V 12 Marks

Sports Injuries :

- Basis of Sports Injuries.
- Common Sports Injuries, such as sprains, strains, fracture, dislocation, abrasions, contusion, bruise, tennis elbow. Their causes, preventive and remedial measures.
- Treatment and care (RICE) of sports injuries.

Disability and Rehabilitation :

- Meaning, types, causes and preventive measures of disability.
- Problems of the disabled. Physical Activity and health for disabled.
- Meaning and scope of Rehabilitation.

EDUCATION

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

Paper-III : FOUNDATIONS OF EDUCATION

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

GENERAL INSTRUCTIONS FOR THE PAPER-SETTER :
The question paper will consist of five units : I, II, III, IV and V. Unit I, II, III and IV will have two questions from the respective unit of the syllabus and will carry 18 marks each. Unit V will consist of **eight** short answer type questions which will cover the entire syllabus uniformly and will carry 18 marks. The students are required to attempt 6 short answer type questions out of 8 in unit V which will be compulsory. The question paper should preferably carry internal division of marks for all the sub-questions of one main question. Preferably set the words limit for answer (300-350 words for units I, II, III, IV and 75 words for each short answer type question in Unit V).

INSTRUCTIONS FOR THE CANDIDATE :
The students will be required to attempt one question each from Units I, II, III and IV. Unit V will be compulsory. Students are required to attempt 6 short answer type questions out of 8 in Unit V. The words limit will be 300-350 words for Unit I, II, III and IV; and 75 words for each short answer type in Unit V.

Objectives :

1. To acquaint the students with major foundations underlying Education.
2. To enable the students to understand the concept of Philosophy of Education.
3. To enable the students to understand the concept of Educational Sociology and Educational Technology.
4. To enable the students to understand major Philosophies and their Educational implications.

COURSE CONTENTS :

UNIT-I

Philosophical, Sociological, and Technological Foundations of Education—Concept and their Role in Education.

UNIT-II

Philosophy of Education – Definition, Nature and Scope.

Difference between Educational Philosophy and Philosophy of Education.

UNIT-III

Educational Sociology – Definition, Nature and Scope.

Information and Communication Technology—Role in Education.

UNIT-IV

Major Philosophies of the World—Idealism, Naturalism and Pragmatism—Main Features and their Contribution to Education.

Time	**:**	**03 Hours**

GENERAL INSTRUCTIONS FOR THE PAPER SETTER.

The question paper will consist of five units. Unit I, II, III & IV will have 2 questions in each unit from the syllabus out of which students have a choice to attempt 1 question in each unit. Unit V is compulsory. It will consist of 3 questions and will cover the entire syllabus uniformly. Each short question in Unit V will carry 3 marks (3X3=9). All units (I, II, III , IV, V) are of 9 marks each (9X5=45).

GENERAL INSTRUCTIONS FOR THE CANDIDATE.

The students will be required to attempt at least one question from each unit I, II, III and IV. Unit V is compulsory and it will consist of 3 questions and will cover the entire syllabus uniformly. All questions carry equal marks.

OBJECTIVES OF THE COURSE:

The main objectives of the paper are:

1. To acquaint students with the psychology of adult learner and the strategies employed to motivate them.
2. To impart knowledge to students on adult characteristics and their psychology.
3. To impart knowledge on suitability of teaching- learning material and audio visual material used by new –Literates, Prerakes and Nodal Prerakes.
4. To acquaint students with various agencies involved in adult education program.
5. To provide knowledge to students regarding concept, need, methods and procedures involved in monitoring process.
6. To impart knowledge to students on the concept, meaning, scope and significance of Adult Education.
7. To acquaint students with the knowledge, how adult education play an important role in social and economic development

Unit-I

- Characteristics of Adult and Psychology of Adult Learners involved in Adult Literacy Program, Learning Styles and Learning Principles.
- Adult Education in Modern Society: Goals, Work-based Adult Education.
- Role of Motivational Strategies in Adult Educational Program.
- Adult Education for Equity and Social Transformation.

Unit-II

- Suitability of Teaching – Learning and Audio- Visual Material used for Neo-Literates.
- Low Cost Teaching Aids, Skill in using Aids, Literacy and Numeracy Games,
- Recruitment of Prerak and Nodal Preraks, Training program, Production of Literature.
- Role of Play and Simulation.
- Suitability of Training Material for Preraks and Nodal Preraks.

Unit-III

- Agencies of Adult Education: Government and Private.
- Indian Adult Education Association: Its Role in Promotion of Adult Education Programme and Research.
- Monitoring of Adult Education Program: The Paradigm Content, General Consideration, Need for Monitoring.
- Evaluation of Adult Learners and Adult Literacy Programme.

Unit-IV

- Meaning of Adult Education, its Scope, Aims and Significance.
- Role of Mass-Media in Adult and Continuing Education and Life Long Learning.
- Role of Adult Education in Social, Community and Economic Development.

Practical/ Field Work:

Max Marks : 50 Marks.
External : 45 Marks.
Internal : 05 Marks.

Participation of the Students in the following:
1. Survey of the Area- A brief report.
2. Planning and Organization of Awareness Generating Activities for Adults.

ADULT EDUCATION

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021
Semester –IV

Theory			**Time**	**Practical**		
Marks	+	Internal Assessment	3 Hours	Marks	+	Internal Assessment
45	+	05		45	+	05

GENERAL INSTRUCTIONS FOR THE PAPER SETTER :

The question paper will consist of five units. Unit I, II, III & IV will have 2 questions in each unit from the syllabus out of which students have a choice to attempt I question in each unit. Unit V is compulsory. It will consist of 3 questions and will cover the entire syllabus uniformly. Each short question in Unit V will carry 3 marks (3x3=9). All units (I, II, III & IV) are of 9 marks (9x5=45).

GENERAL NSTRUCTIONS FOR THE CANDIDATE :

The students will be required to attempt at least one question from each unit I, II, III and IV. Unit V is compulsory and it will consist of 3 questions and will cover the entire syllabus uniformly. All questions carry equal marks.

[OBJECTIVES OF THE COURSE :

The main objective of the paper are:

1. To provide an overview on History of Adult Education in India.
2. To impart knowledge to students on various Target Groups involved Under Adult Literacy Programs.
3. To expose students with the Teaching Learning Methodologies for teaching Adults.
4. To acquaint students with the Role and Responsibilities assumed by Preraks and Nodal Preraks.
5. To expose students with Concepts and Strategies involved under Total Literacy Campaign.
6. To acquaint students with the Knowledge of various agencies involved in Adult Education Programs.
7. To expose students with the Preparation and Planning of Continuing Education and Awareness Generating Programs.
8. To impart knowledge to students on Linkage of Adult Education with Development.

THEORY

UNIT-I

(i) History of Adult Education in India.
(ii) Target Groups involved under Adult Education Programs.
(iii) Adult Education in Rural Setup.
(iv) Adult Education in Modern Society.

UNIT-II

(i) Methodology of Teaching Adults in Adult Literacy Programs.
(ii) Role of Library Services in Promotion of Post Literary, Follow-up and Continuing Education.
(iii) Role of Mass-Media in promotion of Post Literary, Follow-up and Continuing Education.
(iv) Role of Preraks and Nodal Preraks in Adult Education.

UNIT-III

(i) Total Literacy Campaign : Its Concept and Strategies.
(ii) Post Literacy Project: Planning, Administration, Suppression.
(iii) Agencies Involved under Adult Education : Government and Non-Government.
(iv) Global Perspectives on Adult Education.

UNIT-IV

(i) Preparation and Planning of Adult Education Programs: Continuing Education, Awareness Generating Programs, Skill Development and Individual Interest Programs.
(ii) Adult Education and its Linkage with Development.
(iii) Life wide Dimension of Life-Long Learning.
(iv) Governing of Life Long Learning: Private Sector, Quality Assurance Mechanism, Accreditation of Institutions.

Max Marks	:	50 Marks
External	:	45 Marks
Internal	:	5 Marks

Participation of the Students in the following:

1. Visits to the 5 Government and Non-Government Agencies – A brief Report in the form of file to be submitted in the practical exam.
2. Preparation of Teaching – Learning Aids used for Teaching Adults.

Books Recommended:

1. Datta, S.C. : Adult Education in India, Indian Adult Education Association, New Delhi, 1986.

The ninth question of unit V is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of 01 marks each.

THEORY (Time duration 3 hours)	:	45 Marks
PRACTICAL (20 minutes duration)	:	45 Marks
Internal Assessment (Theory and Practical) (5+5)	:	10 Marks

Paper-A: THEORY

Unit-I

1. Definition of the following:
   Kasak-Masak, Bhramari, Chari, Stuti
2. Present status of Kathak Dance.
3. Survey of essential characteristics of Manipuri Dance.

Unit-II

1. Life Sketch of Pt. Shambhu Maharaj
2. Importance of Gayan and Vadan in Kathak Dance
3. Guru Shishya Prampra

Unit-III

1. Comparision of Classical and Folk Dance.
2. Folk Dance of Himachal.
3. Brief. Study of Rasa.

Unit-IV

1. Theka and Bol Tatkar in Ekgun,Dugun and Chaugun layakaries of Ada Chautal, Ektaal and Teental
2. Notation of Salami, Amad,Tora and Tihai in Ada Chautaal.
3. Notation of Thaat, Amad, Tora and Paran in Teentaal.
4. Write Nagma in Teental and Adachautaal.
5. Theka and Tatkar of Ektaal in Ekgun, Dugun and Chougun layakaries.

Unit-V

1 The ninth question of unit v is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions carrying 01 marks each.

Paper-B : PRACTICAL

I. Ada Chautal:

1.	Theka and Tatkar with Ekgun, Dugun and Chaugun Layakaries.		
2.	Salami	:	1
3.	Tora	:	2
4.	Amad	:	1
5.	Nagma	:	1
6.	Tihai	:	1

II. Teentaal

1.	Tatkar with Ekgun, Dugun and Chaugun Layakaries		
2.	Thaat	:	1
3.	Amad	:	1
4.	Tora	:	2
5.	Paran	:	2
6.	Nagma	:	1

III Ektaal:

a. Theka with Ekgun and Dugun Layakari

2 Tatkar with Ekgun and Dugun Layakari

III. One Gat of Ghunghat

IV. Padhant of above mentioned material on hand in teen taal and Ada chautaal

V. Ability of play Nagma in teentaal

VI. Theka of Ektaal in Ekgun Layakari on hand

VII. Practical Demonstration of Gidha.

Music (Indian Classical Dance)

THEORY (Time duration 3 hours)	:	45 Marks
PRACTICAL (20 minutes duration)	:	45 Marks
Internal Assessment (Theory and Practical) (5+5)	:	10 Marks

Paper-A: THEORY

Unit-I

1. Definition of the following:
   Gati, Paran, Tisrajali Paran, Chatusrajati Paran, Premlu.
2. Brief knowledge of Kathakali.
3. Importance of Ghungroo in Kathak Dance

Unit-II

1. Gharanas of Kathak Dance and their comparison
2. Merits and demerits of Kathak Dance
3. Contribution of Pt. Rajender Gangani ji in the field of Kathak Dance

Unit-III

1. Knowledge of thumri
2. Knowledge of Chhau Nritya.
3. Knowledge of different Instruments used in Kathak Dance.

Unit-IV

1. Notation of Theka and Bol-Tatkar in Ekgun, Dugun and chaugun layakaries in Ada chautaal, Teentaal and Ektaal.
2. Notation of Chakardar Tora Chakardar paran, Kavit, Tihai and Nagma in Teentaal.
3. Write Tihai, Thaat, Paran, Chakardar Paran, Kavit and Nagma.in Ada Chautal
4. Theka of Ektaal in Ekgun, Dugun and Chaugun layakaries with Tihai, Tora and Amad.

Unit-V

1. The ninth question of unit v is compulsory & it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 questions of carry 01 marks each.

Paper-B: PRACTICAL

I. **Adachautal :**

1. Tatkar with Ekgun, Dwigun and Chaugun Layakari
2. Paran : 1
3. Chakardary Paran : 1
4. Thaat : 1
5. Tihai : 1
6. Kavit : 1
7. Nagma : 1

II. **Teentaal :**

1. Tatkar with Ekgun, Dugun, Chaugun and Athgun layakaries.
2. Kavit : 1
3. Chakardar Tora : 1
4. Chakardar Paran : 1
5. Tihai : 1
6. Nagma : 1

III **Ektaal**

a. Amad Tatkar with Ekgun, Dugun and Chaugun Layakari : 1
b. Tora : 1
c. Tihai : 1

IV One Gat Nikas of Mataki
V. Padhant of above mentioned technical terms in teen taal and Ada Chautaal and Ektal on hand
VI. Ability to play Nagma in Ada Chautaal
VII. Theka of Ekgun and Dwigun Layakaries of above mentioned taals.
VIII. Practical Demonstration of a Bhangra steps.

ANCIENT INDIAN HISTORY, CULTURE & ARCHAEOLOGY

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-IV

Paper-IV : HISTORY AND CULTURE OF INDIA FROM 650 A.D. TO 1200 A.D.

Max.Marks	: 100
Theory	: 90 Marks
InternalAssessment	: 10 Marks
Time	: 3Hours

Objectives :

The primary objective of this paper is to acquaint the students with the historical development in India after the death of Harsha. A detailed study of the various dynasties ruling in the different parts of our country will be taken up.

Pedagogy of the Course Work :

The students should be given an outline of the original sources which help to reconstruct the history of the period. Slides and transparencies should be used in the class room lectures to help the students to comprehend the developments in different fields.

INSTRUCTIONS FOR THE PAPER-SETTERS AND CANDIDATES :

1. The paper-setter is required to **9** questions in all. All questions shall carry equal marks.

2. The first question shall be of short answer type containing 15 short questions spread over the entire syllabus. The candidate is required to answer any 9 short answer type questions. Each short answer type question shall be of 2 marks **OR** A question on map. The map work shall consist of 12 marks for the map and 06 marks for the explanatory notes.

3. The map question shall have the following topics :
   (a) Extent of Pratihara Empire.
   (b) Distribution of Temples—Lingaraja, Konark, Jagannath, Kandariya Mahadev, Parsvanath, Lakshman, Osian and Mahabalipuram.
   (c) Important Centres of Education—Nalanda, Ujjain, Pushpagiri and Nagarjunakonda.

4. The rest of the paper shall contain 4 Units. The entire syllabus has been divided into 4 Units. The paper- setter shall set 2 questions from each unit and the candidate shall be given internal choice i.e. the candidate shall attempt one question from each unit. Each question shall carry 18 marks.

5. For Private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

   The paper-setter must put note (5) in the question paper.

UNIT-I :

1. Pratiharas
2. Palas

UNIT-II :

1. Paramaras
2. Chahamanas

UNIT-III :

1. Gahadavalas
2. Chandellas

UNIT-IV :

1. Rashtrakutas
2. Cholas.

Essential Readings :

1. Altekar, A.S. : *Rastrakutas and Their Times,* 2nd ed. Oriental Book Agency, Poona, 1967.
2. Bhatia, Pratipal : *The Paramaras,* Munshiram Manoharlal, New Delhi, 1970.
3. Chakravarti, Ranbir : *Exploring Early India upto C. AD 1300,* Machmillan, 2010
4. Majumdar, R.C. : *Ancient India,* rpt., Manohar, Delhi, 2003
5. Majumdar, R.C. : *History & Culture of Indian People,* Vol. IV, *The Age of Imperial Kanauj,* Bhartiya Vidya Bhawan, Bombay, 1955 (Relevant Chapters) Vol. V, *The Struggle for Empire,* Bombay 1957 (Relevant Chapters).

The first question is compulsory and shall be short answer type containing 15 short questions spread over the whole syllabus to be answered in about 10-20 words each. The candidates are required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two** essay type questions, and the candidate shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (ii) in the question paper.

Unit-I

1. Nature of party system in India : A critical evaluation.
2. National Political Parties [Indian National Congress, BJP, CPI, CPI(M), BSP] : Ideology, Policy and Programmes
3. Regional Political Parties (SAD, DMK, AIDMK) : Ideology, Policy and Programmes.

Unit-II

1. The Election Commission : A critical evaluation and electoral reforms in India.
2. Pressure Groups in Indian Politics- Types & Role
3. Voting Behaviour in India – its Determinants.

Unit-III

1. Emerging Trends in Indian Politics.
2. Role of Caste, Religion in Indian Politics.
3. Regionalism in Indian Politics-its causes & impact.

Unit-IV

1. Basic principles and determinants of Indian Foreign Policy.
2. Non-alignment : Meaning and Nature.
3. Non-alignment Movement- its Relevance.

ECONOMICS

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

Paper : PUBLIC FINANCE AND INTERNATIONAL ECONOMICS

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Course Objective : The primary course objective is to introduce the students to the basics of public finance and international trade. The first two units aim to introduce students to the primary functions of government to generate resources from the people and to spend money improving their lives. The last two units are concerned with basic theories of international trade and commercial policies, balance of payments, determination of exchange rates and role of international financial institutions.

INSTRUCTIONS FOR THE PAPER-SETTERS AND CANDIDATES :

(i) *The syllabus has been divided into four units.*

There shall be 9 questions in all. The first question is **compulsory** and shall be short answer type containing 12 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain **4** units. Each unit shall have **two** essay type questions, and the candidates shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
The paper setter must put note (ii) in the question paper.

Unit-I

Introduction to Public Finance : Nature, Scope and its Importance.

Public Expenditure: Canons, Principle of Maximum Social Advantage, Wagner's Law, Wiseman Peacock Hypothesis. Causes for the Recent Growth of Public Expenditure in India.

Taxation : Classification and Canons, Characteristics of a Good Tax System.

Unit-II

Incidence and Impact of Taxation : Demand and Supply Theory.
Taxable Capacity : Absolute and Relative Capacity, Determinants of Taxable Capacity.
Public Debt : Its types and Role, Burden of debt and Methods of its Redemption.
Deficit Financing : Objectives and Limitations.

Unit-III

Pure Theory of International Trade : Classical and Heckscher - Ohlin Theories, The Theory of Reciprocal Demand.

Terms of Trade : Concept and Types

Commercial Policy : Free Trade Vs. Protection, Regional Blocks: ASEAN, SAFTA Problems and prospects. Impact of W.T.O. on Less Developed Countries.

Unit-IV

Balance of Payments: Meaning, Concept and Components of Balance of Payments. Disequilibrium in the Balance of Payments : Causes and Measures to corret the disequilibrium

Exchange Rate : Meaning and its Determination, Fixed Vs. Flexible Rate of Exchange and Purchasing Power Parity Theory.

IMF and IBRD : Objectives, Working and Achievements.

Recommended Readings :

1. Musgrave, A.R. & Musgrave, P.B. (2011) : *Public Finance in Theory and Practice,* McGraw Hills, International Students' Edition.
2. Kindleberger, C.P. (1987) : *International Economics,* Richard Irwin Homewood, Illiois, Indian Edition
3. Sharma, O.P. (latest edition) : *Sarvjnik Vit,* Punjabi University, Patiala.
4. Ghuman, Ranjit Singh (latest edition) : *Antar-Rashtriya Arth Vigyan,* Punjabi University, Patiala.
5. Soderston B.O. (1994) : *International Economics,* McMillan Press Ltd.

Supplementary Reading :

1. Bhatia, H.L. (2008) : *Public Finance*, Vikas Publishing House Pvt. Ltd.
2. Dalton, H. (1978) : *Principles of Public Finance,* Routledge and Kegan Paul, London.
3. Tyagi, B.P. (1994) : *Public Finance,* Jai Prakash Math & Co, Meerut.

ECONOMICS

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

Semester-IV

Paper : QUANTITATIVE METHODS

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Course Objective :

The objective of the course is to train the students in the use of basic mathematical and statistical tools in analyzing various economic phenomenons. It deals with the design of how data is presented, the analysis of the data, and the drawing of conclusions from the data. The course aims to improve decision-making accuracy of the students and enabling them to test new ideas.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus has been divided into four units.

1. There shall be **9** questions in all. All questions carry equal marks. The first question shall be short answer type containing 12 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 09 short answer type questions i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question. Rest of the paper shall contain **4** units. Each unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all.
2. Use of simple calculator is allowed.
3. The paper setter may in general stick to the distribution of marks of 1/3 to theory and 2/3 to numericals.

Unit-I

Elementary Idea of Sets and Functions : Simple and Partial Derivatives, Differentiation of Simple functions – Polynomial (x) and Exponential functions. Maxima and Minima of functions of one variable only. Their Applications of Micro and Macro Economics.

Unit-II

Matrices : Definition and Types, Operations (Sum, Difference, Product and Transpose), Adjoint and Inverse of a matrix (upto 3 · 3), Solution of Equations (upto 3) by Matrix Methods and Crammer's rule.
Measures of Central Tendency : Mean, Median, Partition Values, Mode, Measures of Dispersion, Skewness.

Unit-III

Correlation Analysis—Karl Pearson's (except grouped data) and Spearman's formula, Simple Regression Analysis.
Interpolation – Binomial, Expansion, Newton's (Advancing Difference Method) and Lagrange's Method.

Unit-IV

Index Numbers : Concepts, Problems and Importance, Simple Index Number, Lespeyre's and Fisher's Index Numbers only (among weighted index numbers), Reversibility Tests.
Time Series Analysis : Components of Time Series, Determination of Trend, Least Square and Moving Average Method.

Books Recommended

SOCIOLOGY

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

SOCIAL STRUCTURE AND SOCIAL CHANGE

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

(i) For written paper, the students will be required to attempt five questions in all. Question No. I will be **compulsory** comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt 9 short answer type questions out of 12 i.e. $9 \times 2 = 18$ marks.

In addition to it, Question Nos. II to IX will consist of long answer (essay type) questions, two questions from each unit with internal choice carrying 18 marks each i.e. $4 \times 18 = 72$ marks.

(ii) On an average, 15 hours are to be devoted for each unit.

(iii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (iii) in the question paper.

Objective :

This paper basically introduces students both to conceptual and some theoretical understanding of social structure and social change. Students are introduced to characteristics and elements of social structure and to understand the meaning, process and factors of social change.

Course Content

Unit-I

Social Structure : Meaning, Characteristics, Elements – Status, Role, Power and Prestige. Norms and Values.

Unit-II

Social Change : Meaning and Features.
Types of Social Change : Evolution (Comte), Revolution (Marx), Development – Changing Connotations.

Unit-III

Factors of Social Change: Economic, Demographic, Education, Legislative, Scientific and Technological

Unit-IV

Processes of Social Change : Sanskritization, Westernization, Modernization and Secularization, Globalization and its impact on Society.

Essential Readings :

1. Bierstedt, Robert (1970) : *Social Order,* New York : McGraw Hill.
2. Haferkand, H. and Smelser, N.J. (1992) : *Social Change and Modernity,* Berkeley : University of California Press.

SEMESTER IV

SOCIAL INSTITUTIONS

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

(i) For written paper, the students will be required to attempt five questions in all. Question No. I will be **compulsory** comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt 9 short answer type questions out of 12 i.e. $9 \times 2 = 18$ marks.

In addition to it, Question Nos. II to IX will consist of long answer (essay type) questions, two questions from each unit with internal choice carrying 18 marks each i.e. $4 \times 18 = 72$ marks.

(ii) On an average, 15 hours are to be devoted for each unit.

(iii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (iii) in the question paper.

Objective:

In this paper, social institution as a concept is introduced to the students. Study of various institutions which are foundations of human society, will help students to look at society in an objective and analytical way.

Course Work

Unit-I

Institutions – Meaning, Features; Normative and Relational aspects of Institutions.
Types – Social, Political, Economic and Cultural.
Difference of Institutions with Society Community and Association

Unit-II

Social Institutions :
Marriage –Types : Monogamy and Polygamy; Rules of Mate Selection, Contemporary Trends.
Family – Meaning, Types, Structure, Function; Development Cycle and Changing Trends.
Kinship – Meaning, Significance and a Brief Understanding of Incest, Consanguinity, Affinity, Clan, Lineage, Contemporary Trends.

Unit-III

Political Institutions – State, Government and Political Parties – Features and Functions.
Economic Institutions – Features and Functions, Property, Division of Labour (Emile Durkheim).

Unit-IV

Cultural Institutions – Religion : Meaning elements, Types, Functions (Emile Durkheim & Max Weber),Dysfunctions

PUBLIC ADMINISTRATION

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER – III

PAPER : PERSONNEL ADMINISTRATION (WITH SPECIAL REFERENCE TO INDIA)

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objective of the Paper:

The objective of this paper is to give the student an in-depth understanding of various aspects of public personnel administration particularly recruitment, training and promotion. Contemporary issues like grievance redressal machinery, corruption, morale etc. concerning administration of human resources in government will also be examined.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES :

For Private/University School of Open Learning (USOL) students who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.
The Paper-Setter must put note in question paper in this regard.

The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Unit-I

Personnel Administration – Meaning and Significance.
Bureaucracy: Meaning, Characteristics, Demerits and Remedies.
Civil Service: Meaning, Features and Role.
Position and Rank Classification Systems: Significance and Features

Unit-II

Recruitment: Meaning, Methods and Problems.
Recruitment System of Higher Civil Services in India.
UPSC: Composition, Functions and Role.
SPSC: Composition, Functions and Role.

Unit-III

Training – Meaning, Types, Methods, Training of Higher Civil Services in India.
Conduct, Discipline and Ethics in Public Services.
Promotion: Meaning, Significance and Principles.

Unit-IV

Morale, Causes of Low Morale and Measures for Improvement.
Corruption in Administration - Causes and Remedies.
Administrative Tribunals: Meaning, Types, Advantages and Disadvantages.

Essential Readings :

Davar , R.S.(1976). *Personnel Management and Industrial Relations* . NewDelhi : Vikas Publishers.

PUBLIC ADMINISTRATION

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-IV

PAPER : FINANCIAL ADMINISTRATION (WITH SPECIAL REFERENCE TO INDIA)

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours

Objectives of the Paper:

The objective of this paper is to give the student an in-depth understanding of various aspects of financial administration like budgeting, auditing, centre-state financial relations etc. It would also make them aware of: institutions like ministry of finance, union finance commission, parliamentary committees; and concepts like direct taxes, indirect taxes, deficit financing, public debt.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Unit-I

Financial Administration: Meaning and Significance .
Aspects of Public Finance.
Budget: Meaning, Types and Principles.
Budget: Preparation and Enactment.

Unit-II

Union Ministry of Finance: Organisation, Functions and Role.
Centre-State Financial Relations.
Union Finance Commission: Composition and Functions.

Unit-III

Audit: Concept, Objectives and Types.
Comptroller and Auditor General of India(CAGI) : Appointment, Functions and Role.
Concepts: Deficit Financing, Fiscal Deficit, Public Debt and Public Expenditure.

Unit-IV

Legislative Control over Finance.
Public Accounts Committee:Composition, Functions and Role.
Estimates Committee:Composition, Functions and Role.

PHILOSOPHY

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

Outlines of tests, syllabi and courses of reading

SEMESTER-III

Paper : INDIAN ETHICS (Theory)

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours
Lectures	:	75

Aims and Objectives :

This paper highlights the ethical philosophies propounded in the different Indian Philosophical Systems. It exposes the students to the main tenets of Buddhism, Sikhism, Gandhism, Gita and Vedic Culture.

This paper gives an insight into the nature of Ethics, moral notions and basic moral theories as propounded by Western Ethical Philosophers. This paper also deals with problems of applied ethics.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

(i) *The syllabus has been divided into four units.*
There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 15 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain 4 units. Each unit shall have two essay type questions, and the candidate shall be given internal choice of attempting one question from each Unit – 4 in all. Each question will carry 18 marks.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper-setter must put note (ii) in the question paper.

Unit-I

- Salient Features of Indian Ethics with reference to Purusartha : Yuga Dharma and Sanatan Dharma.
- Varna Vyastha and Ashrama Dharma : A Contemporary Analysis.
- Concept of Sreyas and Preyas.

Unit-II

- Buddhist Ethics : Four Noble Truths, Eight Noble Paths, Ahimsa and Karma Bhava Chakra, Sila.
- Jaina Ethics : Triratnas.
- Sikh Ethics : Hukum, Nirbhau, Nirvair, Parupkar, Sewa and Sahaj.

Unit-III

- Gita : Anasakta Karma, Lok Samgraha, Sva-Dharma
- Gandhi : Ahimsa, Satyagraha and Antyodaya.

Unit-IV

- Yoga and Stress Management .
- Yoga : Yama, Niyama, Asana, Pranayama, Pratyahara, Dharna, Dhyan, Samadhi.

Essential Readings :

Maitra S. K. (1956) The Ethics of the Hindus, New Delhi: Asian Publication Services

Singh Avtar (1970) Ethics of the Sikhs, Patiala: Punjabi University.

Sharma I.C. (1965) Ethical Philosophies of India London: George Allen and Unwin

Vivekananda (1992) Raja Yoga, Calcutta: Advaita Ashram

Suggested Readings :

Dasgupta Surama (1994) Development of Moral Philosophy in India, New Delhi : Munshi Ram Manoharlal Pub.,

- Moral Rights of Foetus and Female Foeticide.
- Sexual harassment and Gender Justice.
- Environmental Ethics : Pollution, Land Degradation and Organic Farming and Global Warming.

Essential Readings :

1. Aristotle (2001) Nicomachean Ethics, Dordrecht : D. Reidel, Penguin Harmondsworth
2. Lillie William (1957) An Introduction to Ethics : London, Matheun
3. Singer Peter (1995) Practical Ethics (Second Edition), Cambridge University Press
4. Verma Ved Parkash (1987), Neeti Shastra (in Hindi), New Delhi : Allied Publishers

Suggested Readings :

1. Hospers John, Human Conduct: An introduction to the Problems of Ethics
2. Hursthome Rosaline (1061), Virtue Ethics, Harcourt: New York.
3. Frankena W., (1994) Ethics, New Delhi: Englewood Cliffs, Prentice Hall, India
4. Macbott J.D. (1966) An Introduction to Ethics Hutchinson: London

PSYCHOLOGY

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

Objectives:

(I) The course introduces to the students the general concepts and historical viewpoints in experimental psychology. The students would also get an understanding of the Nervous System, Psychophysics, Learning. This course will also give an insight into psychophysics, statistics and cognitive aspects of Psychology.

(II) Pedagogy of the Course Work :
80% Lectures (including expert lectures).
20% assignments, discussion and seminars and tests.

Paper: EXPERIMENTAL PSYCHOLOGY

Max. Marks	:	80
Theory	:	70 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

There shall be **9** questions in all. The first question shall be short answer type containing 12 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 7 short answer type questions i.e. 2 marks of each. It shall carry 14 marks and shall be **Compulsory** question. Rest of the paper shall contain **4** Units. Each Unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all. Each question will carry 14 marks.

Unit I

The Nervous System: Structure and functioning of the neuron; division of nervous system – Central Nervous System and Peripheral Nervous System; Structure and functioning of the brain.

Unit II

Sensation

Concept and types; Vision-The Visual Stimulus, Structure and Functioning of the Eye , Theories of Colour Vision; Audition: The Auditory Stimulus,Structure and Functioning of the Ear, Theories of Hearing.

Unit III

Psychophysics

Thresholds; Psychophysical Methods of Limits, Constant stimuli and Average Error.

Unit IV

Learning

Concept, Classical Conditioning, Operant Conditioning, Observational Learning.

PSYCHOLOGY PRACTICALS

Max. Marks : 20
Time : 3 Hrs.

Four practicals have to be performed out of six :

1. Two Point Threshold
2. Muller Lyer Illusion
3. Differential Threshold
4. Method of Paired Comparison
5. Maze Learning
6. Bilateral Transfer of Training

Suggested Readings :

1. Baron, R.A. (2003): Psychology. New Delhi : Pearson Education.
2. Ciccarelli, D. (2008): Introduction to Psychology. Delhi: Pearson.
3. Das, J.P. (1998): The Working Mind: An Introduction to Psychology. New Delhi: Sage.
4. Feldman, R.S. (1998) : Understanding Psychology. New Delhi : Tata McGraw Hill.
5. Garrett, H.E. (1966) : Statistics in Psychology and Education. New Delhi : Vakils, Feffer and Simons.
6. Garrett, H.E. (1966) : Statistics in Psychology and Education. New Delhi : Vakils, Feffer and Simons.
7. Guilford, J.P. and Fruchter, B. (1981) : Fundamental Statistics in Psychology and Education. Singapore: McGraw Hill.
8. Kerlinger, F. N. (1964) : Foundations of Behavioural Research. New York: Rinehart and Winston.
9. Morgan, C.T., King, R.A., Weisz, J.R. and Schopler, J. (1987) : Introduction to Psychology. Singapore: McGraw Hill.

PSYCHOLOGY

SEMESTER-IV

Objectives:

(I) The course introduces to the students the general concepts and historical viewpoints in General Psychology. The students would also get an understanding of the principles and theories in different areas like Sensation, Perception and Thinking. The course also introduces the elementary statistics.

(II) Pedagogy of the Course Work :
80% Lectures (including expert lectures).
20% assignments, discussion and seminars and tests.

Paper : EXPERIMENTAL PSYCHOLOGY

Max. Marks	:	80
Theory	:	70 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

There shall be **9** questions in all. The first question shall be short answer type containing 12 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 7 short answer type questions i.e. 2 marks of each. It shall carry 14 marks and shall be **Compulsory** question. Rest of the paper shall contain **4** Units. Each Unit shall have **two** questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit – 4 in all. Each question will carry 14 marks.

Unit I

Memory
Sensory Register; Short-Term and Long -Term Memory; Levels of Processing; Measurement of Memory; Forgetting with special reference to retro-active and pro-active inhibition

Unit II

Perception:Concepts , Types of Perception of Form,Space and Movement
Attention: Nature, Types anf Factors.

Unit III

Thinking :Nature, Tool & Types and Factors
Problem Solving: Nature ,Stages and Factors.
Creativity: Concept; Torrance's Theory of Creativity.

Unit IV

Statistics
Normal Probability Distribution: Properties and Applications: Hypothesis Testing – Type I and Type II Errors; Chi-square Test Application to one – way and Two-way classifications.

Note : The use of non-programmable calculators and statistical tables are allowed in the examination.

PSYCHOLOGY PRACTICALS

Max Marks : 20
Time : 3 Hrs.

Four practicals have to be performed out of the following :

1. Division of Attention
2. Span of Attention
3. Comparing Recall and Recognition as Measures of Memory
4. Retroactive Interference
5. Concept Formation.

Suggested Readings:

1. Baron, R.A. (2003): *Psychology,* New Delhi : Pearson Education.
2. Ciccarelli, D. (2008): Introduction to Psychology, Delhi: Pearson.
3. Das , J.P. (1998):The Working Mind: An Introduction to Psychology, New Delhi: Sage.
4. Feldman, R.S. (1998) :Understanding Psychology, New Delhi: Tata McGraw Hill.
5. Garrett, H.E. (1966): Statistics in Psychology and Education, New Delhi Vakils, Feffer And Simons.
6. Guilford, J.P., and Fruchter, B. (1981):Fundamental Statistics in Psychology and Education Singapore: McGraw Hill.
7. Jain, S. (2000) : Introduction to Psychology, New Delhi: Kalyani
8. Kerlinger, F.N. (1964): Foundations of Behavioural Research, New York Holy, Rinehart and Wintson
9. Morgan, C.T., King, R.A., Weisz, J.R. and Schopler, J. (1987): Introduction to Psychology, Singapore: McGraw Hill

****

GEOGRAPHY

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021
SEMESTER-III

Paper –V: GEOGRAPHY OF INDIA

Max. Marks	:	70
Theory	:	60 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Objectives:

To foster an understanding of the physical and cultural landscape of India and its spatial diversity

Course Content

Unit-I

Introduction: India in the context of South Asia, Asia and the World. (05 lectures)
Physiography: Relief, drainage, climate, vegetation, soils. (15 lectures)

Unit-II

Agriculture: Characteristics and problems of Indian agriculture; irrigation, major crops (rice, wheat, maize, sugarcane, cotton, jute and tea), Food security with special reference to India. (15 lectures)
Natural hazards in India: Flood, Drought and Earthquake. (05 lectures)

Unit III

Population: Distribution and density, Growth, Migration, Urbanization (05 lectures)
Mineral and Power Resources: Iron ore, manganese, mica, copper and gold; Coal, Petroleum, Hydroelectricity and Non- conventional Power resources. (15 lectures)

Unit IV

Industries: Distribution and localization factors of major industries (Iron and Steel, Cotton Textiles, Sugar, Fertilizers, Automobile). (15 lectures)
Trade &Transport: Rail, Road, Airways and Waterways; International Trade (05 lectures)

Note :

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 10 parts. The answer of each part should be in about 25 words. Each part will carry 2 marks (Total 20 marks).
2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, two from each Unit. The students will be required to attempt one question from each Unit. Each question will carry 10 marks (Total 40 marks). These will be in addition to the compulsory question.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Six hours Theory Classes in a week are compulsory.
5. Internal assessment will be based on (i) class tests,(5%) (ii) academic activities, Seminar, Project, Assignment (3%) and (iii) attendance(2%).
6. For USOL, reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned. **The paper-setter must put note (6) in the question paper.**

List of Readings:

Essential Reading:

1. Deshpande, C.D. : *India: A Regional Interpretation,* Indian Council of Social Science Research, New Delhi, 1992.
2. Johnson, B.L.C. : *India: Resources and Development,* Arnold Heinemann, London, 1980.
3. Johnson, B.L.C. : *South Asia,* Heinemann, London, 1981.
4. Khullar, D.R. : *India: A Comprehensive Geography,* Kalyani Publishers, New Delhi, 2011.
5. Majid Hussain : *Geography of India*, Tata McGraw-Hill, Delhi, 2013.
6. Spate, O.H.K. and ATA : *India & Pakistan*: *Land, People and Economy,* Methuen, London, Learmonth, 1967.
7. Tiwari, R.C : *Geography of India,* Pravalika Publications, Allahabad, 2013.

Further Readings :

1. Singh, Gopal : *A Geography of India,* Atma Ram & Sons, New Delhi, 1995
2. Singh, Jagdish : *India: A Comprehensive Systematic Geography,* Gyanodaya Prakashan, Gorakhpur, 2nd Edition, 2003.
3. Singh, R.L. : *India: A Regional Geography (Ed.),* National Geographical Society of India, Varanasi, 1971.
4. Singh, Savindra : *Environmental Geography,* Pravalika Publications, Allahabad, 2014
5. Sharma, T.C. and O. : *Economic and Commercial Geography of India,* Vikas Publishing, House, New Delhi, 2005.
6. Tirtha, Ranjit & Gopal Krishan : *Emerging India,* Conpub Ann Arbour Publishers, Michigan, 1992.

Pedagogy:

- Use of visual aids especially maps.
- Students should be encouraged to use an atlas in the classrooms.
- Audio-video shows on different parts of India.

Paper-VI: CARTOGRAPHY-III

Max. Marks : 30
Time : 3 Hours

Distribution of Marks:

Written paper of 3 hours duration	:	20 marks
Viva and Practical record (5 + 5)	:	10 marks

Objectives:

- To apprise the students with symbolization of different types of geographical data and depiction of various spatial data.
- To provide training in application of various graphical methods of depicting geographic data.
- To train the students to interpret the topographical sheets at different scales.

Course Content:

UNIT-I

Nature of Geographic Data: Spatial and Attribute (Climatic, Population, Agriculture and Industrial)
Symbolization & Scaling of Geographical Data: Point, Line and Area

(4 lectures, 4 lab sessions)

UNIT-II

Choice, Use and Representation of Data using Point Symbols: Columnar Diagrams (Simple, Multiple, Compound, Percentage); Dot, Circle and Sphere

(6 lectures, 12 lab sessions)

UNIT-III

Choice, Use and Representation of the following Point Symbols: Graphs (Line Graph, Climograph, Hythergraph, Ergograph, Wind Rose, Combined and Bar Graph)

(8 lectures, 20 lab sessions)

UNIT-IV

Choice, Use and Representation of Data using: Line Symbols (Isopleth and Flow Lines); and Area Symbols (Choropleth)

(6 lectures, 12 lab sessions)

Note:

1. The written and practical examination including viva-voce shall be conducted at the respective college itself except USOL. However, the format of the question paper shall be uniform. A separate paper of 20 marks shall be prepared on the spot by the examiners from the prescribed syllabus.

2. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the Principal of the respective colleges in consultation with the senior most teachers of Geography in the college.

3. For students of USOL, a written theory paper for 20 marks shall be conducted by the University along with the University examination. A separate paper of 20 marks shall be prepared for USOL students from the prescribed syllabus.

4. A compulsory question containing 6 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 4 parts. The answer of each part should not exceed 25 words. Each part will carry 1 mark (Total 4 Marks).

5. The whole syllabus has been divided into 4 Units. Eight questions will be set out of the whole syllabus, i.e. 2 from each Unit. Each question will carry 4 marks (Total 16 marks). The students will be required to attempt one question from each Unit. These will be in addition to the compulsory question.

6. Three hours Practical Classes in a week are compulsory.

7. Evaluation of Practical Record will be done at the time of viva-voce examination. A minimum of 12 sheets are to be prepared by the students. There will be no laboratory exercise at that time.

8. There will be no viva-voce examination for the candidates appearing through USOL. They will be required to submit their Practical Note Book (Practical files) with the University School of Open Learning (Department of Geography) at least 10 days before the commencement of their examination. Their Note Books (Practical files) will be evaluated by two examiners (including at least one from the USOL).

9. For the students of University School of Open Learning, there will be an internal assessment of 10 marks in lieu of the viva-voce examination.

10. A fresh practical note book shall be prepared by failed/improvement/reappear candidates.

11. For practical classes, the number of students in one group shall not exceed fifteen.

12. For USOL, reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned. **The paper-setter must put note (12) in the question paper.**

List of Readings

Essential Readings:

1. Khullar, D.R. : *Essentials of Practical Geography, New Academic Publishig Co.*, Jalandhar, 2009.
2. Robinson, A.H. : *Elements of Cartography, 6th Edition*, John Wiley, New York, 2009.
3. Sarkar, Asish : *Practical Geography*: A Systematic Approach, 2nd Edition, Orient BlackSwan, Hyderabad, 2011.
4. Singh, Gopal : *Mapwork & Practical Geography*, Vikas Publishing House Pvt. Ltd., New Delhi, 2009.
5. Singh, R.L. & P.B. Singh : *Map Work and Practical Geography*, Central Book Depot, Raghunandan Allahabad, 2007.

Further Readings:

1. Birch, T.W. : *Maps: Topographical & Statistical*, Clarendon Press, Oxford, 1949.
2. Garnett, A. : *Geographical Interpretation of Topographical Maps*, George Harrap & Co., London, 1953.
3. Monkhouse, F.J. : *Maps and Diagrams*, Methuen & Co., London, 1994 reprint.
4. Rather, G.M. : *A Text of Practical Geography,* Arina Publishers, New Delhi, 2011

Pedagogy:

- The students need to be trained in the use of symbols to depict various geographic data.
- A well equipped cartographic laboratory with necessary instruments to prepare exercises.
- Students should be encouraged to use computers while preparing practical exercises.

GEOGRAPHY

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-IV

Paper-VII: GEOGRAPHY OF PUNJAB

Max. Marks	:	70
Theory	:	60 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Objectives:

- To understand the regional setting of Punjab state in detail through physical and political maps.
- To examine the cultural patterns of the regions.
- To study the distribution of major crops, industries and transport links in the state.
- To understand the intra regional variations in select aspects.

Course Content:

Unit –I

Introduction: Location, Evolution, Cultural Regions (Majha, Doaba & Malwa) and Administrative Divisions of the State. (15 lectures)

Unit –II

Physical Base: Relief, Drainage, Climate, Soils and Vegetation (12 lectures)
Resources: Mineral and Power; Water with special reference to river water sharing. (8 lectures)

Unit-III

Agriculture: Main Characteristics and Problems; Agro-climatic Regions; Green Revolution & its Ecological Implications; Irrigation; Main crops (wheat, rice, cotton, sugarcane) and their distribution, Livestock and dairying. (20 lectures)

Unit –IV

Population: Distribution, Density, Growth, Migration, Sex Ratio, Urbanization. (7 lectures)
Industries: Main characteristics, Distribution Patterns of Major Industries (Cotton Textile, Sugar, Hosiery Engineering) Industrial Concentration, Problems of Industrialization. (15 lectures)
Trade &Transport: Road, Rail and Air Transport; Inter-State Trade. (3 lectures)

Note :

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 10 parts. The answer of each part should be in about 25 words. Each part will carry 2 marks (Total 20 marks).
2. The whole syllabus will be divided into 4 Units. Eight questions will be set out of the whole syllabus, two from each Unit. The students will be required to attempt one question from each Unit. Each question will carry 10 marks (Total 40 marks). These will be in addition to the compulsory question.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Six hours Theory Classes in a week are compulsory.
5. Internal assessment will be based on (i) class tests, (5%) (ii) academic activities, Seminar, Project, Assignment (3%) and (iii) attendance (2%).

6. For USOL, reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned. **The paper-setter must put note (6) in the question paper.**

List of Readings

Essential Readings:

1. Mankoo, Darshan Singh : *Geography of Punjab, 4th Edition,* Kalyani Publishers, Ludhaina 2009.
2. Mavi, H.S. & Tiwana, D.S. : *Geography of Punjab*, National Book Trust, Delhi, 1993.
3. Singh, Jaspal : *Geography of Punjab,* Twenty First Century Publications, Patiala, 2014
4. Singh, Malkit : *Geography of Punjab*, Rashmeet Parkashan, Jalandhar, 2004

Further Readings:

1. Deshpande ,C.D. : *India: A Regional Interpretation* , Indian Council of Social Science Research, New Delhi, 1992.
2. Economic and Statistical Organization of Punjab : *Statistical Abstract of Punjab*, Economic and Statistical Organization of Punjab, Chandigarh, 2014
3. Gosal, G.S. & Gopal Krishan : *Regional Disparities in Level of Socio-Economic Development in Punjab*, Vishal Publications, Kurukshetra , 1984.
4. Gupta S.P. : *The Punjab: An Overview*, ESS PEE Publications, Chandigarh, 2004.
5. Kahlon, Simrit : *Punjab: regional reflections,* Man and Development, 29 (2), 2007.
6. Singh Pritam : *Punjab Economy: The Emerging Patterns*, Enkay Publishers, New Delhi, 1995.
7. Singh, R.L. : *India: A Regional Geography (Ed)*, National Geographical Society of India, 1990, Reprint.
8. Spate, O.H.K. & Learmonth A.T.A. : *India and Pakistan: A General and Regional Geography*, Methuen, London, 1967

Pedagogy

- Extensive and intensive use of maps to understand the regional setting.
- A component of field visit to some areas of each region may be planned for effective understanding of the region.

Paper-VIII: CARTOGRAPHY-IV

Max. Marks : 30
Time : 3 Hours

Distribution of Marks:

Written paper of 3 hours duration	:	20 marks
Viva and Practical record (5 + 5)	:	10 marks

Objectives :

- To apprise the students with symbolization of different types of geographical data and depiction of various spatial data.
- To provide training in application of various graphical methods of depicting geographic data.
- To train the students to interpret the topographical sheets at different scales.

Course Content:

UNIT-I

Topographical Maps: Nomenclature (Classification), Study and Interpretation; Significance and Application in Geographical Studies

(4 lectures, 4 lab sessions)

UNIT-II

Profiles: Serial, Composite, Superimposed and Projected
Longitudinal and Transverse; Profiles of rivers

(8 lectures, 16 lab sessions)

UNIT-III

Elementary Remote Sensing : Definition, Concept, History, Application Areas and Types of platforms

(10 lectures, 8 lab sessions)

UNIT-IV

Introduction to Concept of GIS and Computer Cartography.
Definition, Development, Database (Spatial and Non Spatial) GIS Components (Hardware & Software) and Application.
Preparation of Line Graphs, Bars and Pie Charts using Computers.

(10 lectures, 10 lab sessions)

Note:

1. The written and practical examination including viva-voce shall be conducted at the respective college itself except USOL. However, the format of the question paper shall be uniform. For college students, a separate paper of 20 marks shall be prepared on the spot by the examiners from the prescribed syllabus.
2. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the Principal of the respective colleges in consultation with the senior most teachers of Geography in the college.
3. For students of USOL, a written theory paper for 20 marks shall be conducted by the University along with the University examination. A separate paper of 20 marks shall be prepared by the University for USOL students from the prescribed syllabus.

4. A compulsory question containing 6 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 4 parts. The answer of each part should not exceed 25 words. Each part will carry 1 mark (Total 4 Marks).
5. The whole syllabus has been divided into 4 Units. Eight questions will be set out of the whole syllabus, i.e. 2 from each Unit. Each question will carry 4 marks (Total 16 marks). The students will be required to attempt one question from each Unit. These will be in addition to the compulsory question.
6. Three hours Practical Classes in a week are compulsory.
7. Evaluation of Practical Record will be done at the time of viva-voce examination. A minimum of 12 sheets are to be prepared by the students. There will be no laboratory exercise at that time.
8. There will be no viva-voce examination for the candidates appearing through USOL. They will be required to submit their Practical Note Book (Practical files) with the University School of Open Learning (Department of Geography) at least 10 days before the commencement of their examination. Their Note Books (Practical files) will be evaluated by two examiners (including at least one from the USOL).
9. For the students of University School of Open Learning, there will be an internal assessment of 10 marks in lieu of the viva-voce examination.
10. A fresh practical note book shall be prepared by failed/improvement/reappear candidates.
11. For practical classes, the number of students in one group shall not exceed fifteen.
12. For USOL, reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned. **The paper-setter must put note (12) in the question paper.**

List of Readings

Essential Readings:

1. Bhatta, Basudeb : *Remote Sensing and GIS,* Oxford, 2nd Edition, New Delhi, 2011
2. Guha, P.K. : *Remote Sensing For The Beginner,* East-West Press, 3rd Edition, New Delhi, 2013..
3. Khullar, D.R. : Essentials of Practical Geography, New Academic Publishing Co., Jalandhar, 2009.
4. Robinson, A.H. : *Elements of Cartography, 6th Edition,* John Wiley, New York, 2009.
5. Sarkar, Asish : *Practical Geography*: A Systematic Approach, 2nd Edition, Orient BlackSwan, Hyderabad, 2011.
6. Singh, Gopal : *Mapwork & Practical Geography*, Vikas Publishing House Pvt. Ltd., New Delhi, 2009.
7. Singh, R.L. & Singh, P.B. : *Map Work and Practical Geography, Central Book Depot, Raghunandan Allahabad, 2007.*

Further Readings:

1. Birch, T.W. : *Maps: Topographical & Statistical*, Clarendon Press, Oxford, 1949.
2. Garnett, A. : *Geographical Interpretation of Topographical Maps*, George Harrap & Co., London, 1953.
3. Joseph, George : *Fundamentals of Remote Sensing,* Universities Press (India) Private Limited, 2nd Edition, Hyderabad, 2005
4. Monkhouse, F.J. : *Maps and Diagrams*, Methuen & Co., London, 1994 reprint.
5. Panda, B.C. : *Remote Sensing: Principles and Applications,* Viva Books, New Delhi, 2008
6. Rather, G.M. : *A Text of Practical Geography,* Arina Publishers, New Delhi, 2011

Pedagogy:

- They should learn to comprehend the topographical maps by deriving slopes and drawing profiles.
- A well equipped cartographic laboratory with necessary instruments to prepare exercises.
- Students should be encouraged to use computers while preparing practical exercises.

****

GANDHIAN STUDIES

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

SOCIAL THOUGHT OF MAHATMA GANDHI

Max. Marks	:	100 marks
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Course Objectives :

The paper is designed to acquaint the students with the Social Thought of Mahatma Gandhi.

Pedagogy of the Course Work :

90% Lectures (including expert lectures)

10% Unit tests, Snap tests, assignments, attendance and class room participation

Note :

1. The syllabus has been divided into four (4) units.
2. There shall be **9** questions in all.
3. The first question is compulsory and shall be short answer type containing 15 short answer type questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any **9** short answer type questions carrying 18 marks i.e. 2 marks of each. It shall carry 18 marks and shall be **compulsory** question.
4. Rest of the paper shall contain four (4) units and each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each unit – 4 in all. All questions shall carry 18 marks.
5. For the private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (5) in the question paper.

UNIT-I

Fundamentals of Gandhi's Social Thought

1. Truth
2. Non-violence
1. Sarvodaya

UNIT-II

Man and State

4. Human Rights
5. Ideal Society, State and Rama Rajya

UNIT-III

Gandhi and Ethics

6. Education
7. Theory of Civilization
8. Morality and Religion

UNIT-IV

Gandhi and Social Justice

9. Drive against Untouchability :
   (a) Caste System
   (b) Communal Award
   (c) Poona Pact

10. Women Empowerment

Essential Readings :

1. Bandyopadhyaya, J. : *Social and Political Thought of Mahatma Gandhi,* (Bombay : Allied Publisher) 1969.
2. Bharathi, K.S. : *Social and Political Thought of Mahatma Gandhi* (New Delhi : Concept) 1995.
3. Gandhi, M.K. : *An Autobiography or The Story of My Experiments with Truth* (Ahmedabad: Navjivan Publishing House), 2001
4. Gandhi, M.K. : *Satyagraha in South Africa* (Ahmedabad: Navajivan Publishing House), 1992
5. Gandhi, M.K. : *Hind Swaraj* (Ahmedabad: Navajivan Publishing House), 1999
6. Mishra, Anil Dutta : *Reading Gandhi,* (New Delhi : Pearson), 2012
7. Varma, V.P. : *Political Philosophy of Mahatma Gandhi & Sarvodaya,* Agra (Laxmi Narain Aggarwal), 1998.

Further Readings :

1	Bandyopadhyaya, Jayantaja	:	*Social and Political Thought of Mahatma Gandhi,* (Allied Publishers, Bombay), 1969.
2	Nanda, B.R.	:	*Making of a Nation : India's Road to Independence* (New Delhi: Harper Collins), 1998.
3.	Suda, J.P.	:	*Main Currents of Social and Political Thought of Modern India,* Vol. II, Meerut (K. Nath & Co.) 1973.
4.	Unnithan, T.K.N.	:	*Gandhi and Social Change,* New Delhi (Arnold Heinemann India), 1973.

RELIGIOUS & SIKH STUDIES

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

PAPER- III, SIKH RELIGION AND HISTORY

Max. Marks :100
Written : 90
Internal : 10
Time : 03 hrs.

Objectives:

The course is designed for the students who want to pursue semester based graduate degree programme with Religious Studies as an elective subject. It is open to any student drawn from multiple disciplinary backgrounds after completion of 10+2 course. As one of the elective subject at the graduate level curriculum, it purports to develop a broad understanding of Indian Religions and awareness about the origin, features and purpose of different religions.

INSTRUCTIONS FOR PAPER-SETTER AND CANDIDATES:

Note: (i) For written paper, the students will be required to attempt five questions in all. Question No. I will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine answer type questions out of twelve. Question No. I would carry 18 marks (9X2).

In addition to it, Questions No. II to IX will consist of **eight** long answer (Essay Type) questions which will be further divided into four units with each Unit having **two questions** to ensure internal choice to the candidate. In all, each question in this section shall carry 18 marks and this section shall carry 72 marks (4X18).

Course Contents

Unit - I

Life, Teachings and Contribution: Guru Nanak Dev, Guru Angad Dev, Guru Amar Das, Guru Ram Das and Guru Arjun Dev; Martyrdom of Guru Arjan Dev.

Unit - II

Life, Teachings and Contribution: Guru Hargobind, Guru Har Rai, Guru Harkrishan,Guru Teg Bahadur and Guru Gobind Singh; Martyrdom of Guru Tegh Bahadur.

Unit - III

Life, Teachings and Contribution:Bhagats and Bhatts

Unit - IV

Compilation of the *Adi Granth*; Foundation of the Khalsa

Essential Readings

- ਅੰਮ੍ਰਿਤਪਾਲ ਕੌਰ, ਡਾ. (ਮੁਖ ਸੰਪਾ.) ਖੋਜ ਪਤ੍ਰਿਕਾ, ਬਾਣੀਕਾਰ ਵਿਸ਼ੇਸ਼ ਅੰਕ-57 ਮਾਰਚ 2●●3, ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਅਜਮੇਰ ਸਿੰਘ, ਡਾ. (ਸੰਪਾ.) ਖੋਜ ਪਤ੍ਰਿਕਾ, ਪ੍ਰਗਟਯੋ ਖਾਲਸਾ ਵਿਸ਼ੇਸ਼ ਅੰਕ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਰਾਜਿੰਦਰ ਸਿੰਘ ਜਾਲੀ, ਸਿਖ ਇਤਿਹਾਸ ਦੀਆਂ ਝਲਕੀਆਂ, ਜਾਲੀ ਲਿਟਰੇਟਚਰ ਹਾਊਸ ਦਿੱਲੀ-ਅਮਰੀਕਾ
- ਹਰਚਰਨ ਸਿੰਘ, ਡਾ., ਖੋਜ ਪਤ੍ਰਿਕਾ, ਗੁਰੂ ਨਾਨਕ ਵਿਸ਼ੇਸ਼ ਅੰਕ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਊਰੋ ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਅੰਮ੍ਰਿਤਪਾਲ ਕੌਰ , ਡਾ. , ਖੋਜ ਪਤ੍ਰਿਕਾ, ਬਾਣੀ ਸੰਪਾਦਨਾ ਵਿਸ਼ੇਸ਼ ਅੰਕ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਊਰੋ ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਡਾ. ਹਰਜਿੰਦਰ ਸਿੰਘ ਢਿਲੋ, ਗੁਰੂ ਰਾਮਦਾਸ, ਰੂਹੀ ਪ੍ਰਕਾਸ਼ਨ, ਗੁਰੂ ਤੇਗ ਬਹਾਦਰ ਨਗਰ, ਅੰਮ੍ਰਿਤਸਰ
- ਡਾ. ਅੰਮ੍ਰਿਤ ਲਾਲ ਪਾਲ, ਗੁਰੂ ਅਰਜਨ ਦੇਵ- ਜੀਵਨ ਤੇ ਬਾਣੀ, ਸੰਗਮ ਪਬਲੀਕੇਸ਼ਨ
- ਗੁਰਮੁਖ ਸਿੰਘ, ਗੁਰੂ ਅਰਜਨ ਦੇਵ: ਜੀਵਨ ਦਰਸ਼ਨ ਤੇ ਬਾਣੀ, ਰੂਹੀ ਪ੍ਰਕਾਸ਼ਨ, ਅੰਮ੍ਰਿਤਸਰ
- ਸਤਿਬੀਰ ਸਿੰਘ, 'ਗੁਰ ਭਾਰੀ' ਜੀਵਨੀ ਗੁਰੂ ਹਰਿਗੋਬਿੰਦ ਜੀ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਊਰੋ ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਖੋਜ ਪਤ੍ਰਿਕਾ, ਗੁਰੂ ਅਮਰਦਾਸ- ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- Banerjee, I.B., *Evolution of the Khalsa*, 2 vols., A. Mukherjee & Co., 1972 (2nd edn.).
- Grewal, J.S., *Guru Nanak in History*, Chandigarh: Panjab University, 1979.
- Mcleod, W.H., *Guru Nanak and the Sikh Religion*, Oxford: Oxford University Press, 1968.
- G.S. Talib: *Guru Nanak; His personality & Vision*

Further Reading

- ਇੰਦੂਭੂਸ਼ਨ ਬੈਨਰਜੀ, ਖਾਲਸੇ ਦੀ ਉਤਪਤੀ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਊਰੋ ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਪਿਆਰ ਸਿੰਘ, (ਸੰਪਾ.) ਸ੍ਰੀ ਗੁਰੂ ਤੇਗ ਬਹਾਦਰ (ਫਾਰਸੀ ਸਰੋਤ), ਗੁਰੂ ਨਾਨਕ ਦੇਵ ਯੂਨੀਵਰਸਿਟੀ, ਅੰਮ੍ਰਿਤਸਰ
- ਡਾ. ਰਤਨ ਸਿੰਘ ਜੱਗੀ, ਡਾ. ਗੁਰਸ਼ਰਨ ਜੱਗੀ, ਗੁਰੂ ਤੇਗ ਬਹਾਦਰ ਬਾਣੀ, ਗੁਰਮਤ ਪ੍ਰਕਾਸ਼ਨ, ਪਟਿਆਲਾ
- Grewal, J.S., *The Sikhs of the Punjab, The New Cambridge History of India*, New Delhi: Cambridge University Press, 1999 (2nd ed.).
- Teja Singh and Ganda Singh, *A Short History of the Sikhs: 1469-1765,* Vol.I, Patiala: Punjabi University, 1983 (rep.).
- Mann, Gurinder Singh, *The Making of the Sikh Scripture*, New York: 2001.

RELIGIOUS & SIKH STUDIES

B.A. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-IV

PAPER- IV SIKH LITERATURE AND INSTITUTIONS

Max. Marks :100
Written : 90
Internal : 10
Time : 03 hrs

Objectives:

The course is designed for the students who want to pursue semester based graduate degree programme with Religious Studies as an elective subject. It is open to any student drawn from multiple disciplinary backgrounds after completion of 10+2 course. As one of the elective subject at the graduate level curriculum, it purports to develop a broad understanding of Indian Religions and awareness about the origin, features and purpose of different religions.

INSTRUCTIONS FOR PAPER-SETTER AND CANDIDATES:

Note: (i) For written paper, the students will be required to attempt five questions in all. Question No. I will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine answer type questions out of twelve. Question No. I would carry 18 marks (9X2).

In addition to it, Questions No. II to IX will consist of **eight** long answer (Essay Type) questions which will be further divided into four units with each Unit having **two questions** to ensure internal choice to the candidate. In all, each question in this section shall carry 18 marks and this section shall carry 72 marks (4X18).

Course Contents

Unit - I

Unity of Guruship; Institution of Gurdwara

Unit -II

Different sects within the Sikh Movement (Udasis, Minas, Dhirmalya , Ram Raiyas) origin and development

Unit - III

Study of *Japji* and *Chandi Di Var* (Message and Formation)

Unit - IV

Study of Janam Sakhis; Tika; Parmarath; Gost. (Definition and Features) (Two out of three)

Essential Readings

- ਨਰਿੰਦਰ ਕੌਰ ਭਾਟੀਆ ਅਤੇ ਜਸਵਿੰਦਰ ਕੌਰ ਢਿਲੋਂ, ਡਾ. (ਸੰਪਾ.) ਪ੍ਰਮੁੱਖ ਸਿੱਖ ਸੰਸਥਾਵਾਂ, ਗੁਰੂ ਨਾਨਕ ਦੇਵ ਯੂਨੀਵਰਸਿਟੀ, ਅੰਮ੍ਰਿਤਸਰ
- ਤਾਰਨ ਸਿੰਘ, ਗੁਰਬਾਣੀ ਦੀਆਂ ਵਿਆਖਿਆ ਪ੍ਰਣਾਲੀਆਂ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਦਰਸ਼ਨ ਸਿੰਘ, ਡਾ., ਧਰਮ ਅਧਿਐਨ ਅਤੇ ਸਿੱਖ ਅਧਿਐਨ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਬ੍ਰਹਮ ਜਗਦੀਸ਼ ਸਿੰਘ, ਜਪੁਜੀ, ਵਿਚਾਰਧਾਰਾ, ਪ੍ਰਬੰਧ ਤੇ ਪਾਠ, ਵਾਰਸ ਸ਼ਾਹ ਫਾਊਡੇਸ਼ਨ, ਅੰਮ੍ਰਿਤਸਰ
- ਰਾਮ ਸਿੰਘ, ਡਾ. ਜਪੁਜੀ ਦੇ ਪੰਜ ਖੰਡ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਊਰੋ, ਪੰਜਾਬੀ ਯੂਨੀਵਰਸਿਟੀ, ਪਟਿਆਲਾ
- ਪਰਮਿੰਦਰ ਸਿੰਘ, ਕਿਰਪਾਲ ਸਿੰਘ, ਚੰਡੀ ਦੀ ਵਾਰ, ਲਾਹੌਰ ਬੁਕ ਸ਼ਾਪ, ਲੁਧਿਆਣਾ
- ਰਤਨ ਸਿੰਘ ਜੱਗੀ, ਚੰਡੀ ਦੀ ਵਾਰ, ਗੁਰਮਤਿ ਪ੍ਰਕਾਸ਼ਨ ਪਟਿਆਲਾ
- ਹਰਬੰਸ ਸਿੰਘ ਗਿਆਨੀ, ਚੰਡੀ ਦੀ ਵਾਰ ਸਟੀਕ, ਸਹਿਗਲ ਪ੍ਰਿੰਟਿਰਜ਼ ਜਲੰਧਰ

Further Reading

- Grewal, J.S., *The Sikhs of the Punjab, The New Cambridge History of India*, New Delhi: Cambridge University Press, 1999 (2nd ed.).
- Grewal, J.S., *Sikh Ideology, Polity and Social Order*, New Delhi: Manohar, 1996.
- Mcleod, W.H., *Sikhs and Sikhism*, Oxford: Oxford University Press, 1999.
- Jagraj Singh: A complete guide to Sikhism, Unistar Chandigarh, 2011

ENVIRONMENT CONSERVATION

B.A. /B.Sc.(GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

Paper : Air Pollution and Climate Change

Theory Hours	Practical Hours	Theory Marks	Internal Assessment Marks	Practical Marks	Practical Internal Assessment Marks	Total Marks
6	4	65	10	20	5	100

The number of hours for theory and practical per week shall be 6 hours and 4 hours respectively.

Note: The practical will include survey and its project reports carrying 5 marks, and 20 marks will be allotted to laboratory practicals.

Instructions for paper setters :-

There will be 9 questions in all, two each from section I to 1V. All questions will carry equal marks (13 marks each). Question No. I will be short answer type & will cover the whole syllabus. Candidates will attempt five questions in all, selecting one each from section I to IV and the first compulsory question.

Paper : AIR POLLUTION AND CLIMATE CHANGE

Unit-I

Atmosphere: Composition of atmosphere, Air Pollution: Sources, Classification (Natural and anthropogenic sources; primary and secondary pollutants), Smoke, Smog, Particulate Matter and Acid rain. Effects of air pollution on human health, plants, animals and material. Air (Prevention and Control of Pollution) Act, 1981.

Unit-II

Green House Effect: Definition, Green house gases, Sources of green house effect, Global Warming.

Stratospheric ozone layer depletion. Role of agriculture to green house effect (paddy and livestock, biomass burning) in GHE.

Unit-III

Noise pollution: Definition, Sources, Noise standards, Silence Zones, Consequences of noise pollution.

Radioactive Pollution: Definition**,** Sources, effect on human health.

Mineral Resources: Types and Importance of minerals; Mineral extraction and environmental problems (limestone mining in Moussourie hills, coal mining in Jharkhand).

Unit-IV

Control: Measures and techniques to control air pollution in vehicles and industries, Green building concept, CDM (Clean Development Mechanism), Carbon sequestration. Control of noise pollution.

PRACTICAL

To monitor the level of Dust fall, SPM in surrounding atmosphere.

To monitor the level of NOx and SO_2 in surrounding atmosphere.

To prepare a survey report on different sources causing air pollution in local area.

To prepare a survey report on noise pollution in your locality.

To visit, collect data and prepare report regarding air and water pollution from sugar mill, thermal plant, cement factory in the adjoining area like Nawanshahr, Ropar, and Hoshiarpur.

ENVIRONMENT CONSERVATION

B.A. /B.Sc.(GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-IV

Paper : SOLID WASTE AND DISASTER MANAGEMENT

Theory Hours	Practical Hours	Theory Marks	Internal Assessment Marks	Practical Marks	Practical Internal Assessment Marks	Total Marks
6	4	65	10	20	5	100

The number of hours for theory and practical per week shall be 6 hours and 4 hours respectively.

Note: The practical will include survey and its project reports carrying 5 marks, and 20 marks will be allotted to laboratory practicals.

Instructions for paper setters :-

There will be 9 questions in all, two each from section I to 1V. All questions will carry equal marks (13 marks each). Question No. I will be short answer type & will cover the whole syllabus. Candidates will attempt five questions in all, selecting one each from section I to IV and the first compulsory question.

Unit-I

Solid waste: Sources, nature and characteristics; categories of solid waste, Biodegradable and non-biodegradable waste; Plastic nuisance. Solid waste disposal: Sanitary landfills, Composting, optimum conditions for composting, Pyrolysis, Incineration and Refuse Derived Fuels. Fly Ash utilization, MSW Handling Rules, 2000.

Unit-II

Natural disasters: Floods, earthquakes, Tsunami, land slides, drought, forest fire and Tropical cyclones.

Disaster management: pre-disaster phase, actual disaster phase, post- disaster phase.

Unit-III

Bioenergy and waste water treatment: Biogas plant: Construction and working of biogas plants, its advantages and disadvantages. Vermi-culture and Vermi-composting, Biofertilisers, Biofuels.

Waste water treatment (STP and ETP), A brief account of primary, secondary and tertiary treatment.

Unit-IV

Organic farming: Definition, Need of Organic Farming, Methods: Soil management, weed management, control of pests. Its advantages. Organic Food, its benefits.

Waste lands: Definition, Categories of waste lands, Desertification, ways of reclamation.

PRACTICAL

A visit to Composting/Vermicomposting Unit.

To prepare a survey report of municipal waste of your city (Generation to disposal).

Classify the waste of your municipality waste (Source based and Waste based)

To visit any landfill site and prepare a tour report.

To prepare a list of herbicides / pesticides / insecticides commonly used in this area

To make a list of various botanical pesticides available in the market

Assignments/project as assigned by the teacher

MATHEMATICS
B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021
SEMESTER-III

Paper-I : ADVANCED CALCULUS-I

Max. Marks	:	30
Time	:	3 Hours
Int. Assesment	:	4 Marks

Note : 1. The syllabus has been split into two Units : Unit-I and Unit-II. Four questions will be set from each Unit.

2. A student will be asked to attempt five questions in all selecting at least two questions from each unit. Each question will be of 6 marks.

3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorials.

4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

Unit-I

Limit and continuity of functions of two and three variables. Partial differentiation. Change of variables. Partial derivation and differentiability of real-valued functions of two and three variables. Schwarz and Young's theorem. Statements of Inverse and implicit function theorems and applications.

Vector differentiation, Gradient, Divergence and Curl with their properties and applications.

Unit-II

Euler's theorem on homogeneous functions. Taylor's theorem for functions of two and three variables. Jacobians. Envelopes. Evolutes. Maxima, minima and saddle points of functions of two and three variables. Lagrange's multiplier method.

Paper II : DIFFERENTIAL EQUATIONS- I

Max. Marks	:	30
Time	:	3 Hours
Int. Assesment	:	3 Marks

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

Unit-I

Exact differential equations. First order and higher degree equations solvable for x, y, p. Clairaut's form. Singular solution as an envelope of general solutions. Geometrical meaning of a differential equation. Orthogonal trajectories. Linear differential equations with constant coefficients.

Unit-II

Linear differential equations with variable coefficients- Cauchy and Legendre Equations. Linear differential equations of second order- transformation of the equation by changing the dependent variable/the independent variable, methods of variation of parameters and reduction of order. Simultaneous Differential Equations

Paper III : STATICS

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination per paper in a Semester

Unit-I

Basic notions. Composition and resolution of concurrent forces – Parallelogram law of forces, Components of a force in given directions, Resolved parts of a force, Resultant of any number of coplanar concurrent forces, Equilibrium conditions for coplanar concurrent forces, equilbrium of a body resting on a smooth inclined plane. Equilibrium of three forces acting at a point – Triangle law of forces, $\lambda - \mu$ theorem, Lami's theorem. Parallel Forces.

Unit-II

Moments and Couples – Moment of a force about a point and a line, Centre of Parallel forces, theorems on moment of a couple, Equivalent couples, Varignon's theorem, generalized theorem of moments, resultant of a force and a couple, resolution of a force into a force and a couple, reduction of a system of coplanar forces to a force and a couple. Equilibrium conditions for any number of coplanar non-concurrent forces.

Friction: definition and nature of friction, laws of friction, equilibrium of a particle on a rough plane, Problems on ladders, rods, spheres and circles.

MATHEMATICS

B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-IV

Paper I: ADVANCED CALCULUS II

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination per paper in a Semester

Unit-I

Definition of a sequence, Bounds of a sequence, Convergent, divergent and oscillatory sequences, Algebra of limits, Monotonic Sequences, Cauchy's theorems on limits, Subsequences, Bolzano-Weirstrass Theorem, Cauchy's convergence criterion.

Sequential continuity and Uniform continuity of functions of single variable.

Unit-II

Series of non-negative terms. P-Test. Comparison tests. Cauchy's integral test. Cauchy's Root test. Ratio tests : Kummer's Test, D'Alembert's test, Raabe's test, De Morgan and Bertrand's test, Gauss Test, Logarithmic test. Alternating series. Leibnitz's theorem. Absolute and conditional convergence, Rearrangement of absolutely convergent series, Riemann's rearrangement theorem

Paper II : DIFFERENTIAL EQUATIONS- II

Max. Marks	:	30
Time	:	3 Hours
Int. Assesment	:	3 Marks

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

Unit-I

Series solution of differential equations-Power Series method, Bessel and Legendre equations.

Bessel functions of First and Second kind. Legendre function. Generating function. Recurrence relation and orthogonality of Bessel and Legendre function.

Partial Differential Equations: Origin of first order Partial Differential Equations, Linear Equation of first order, Integral surfaces passing through a given curve, surfaces orthogonal to a given system of surfaces.

Unit-II

Inverse Laplace transforms- Linearity property, Shifting properties, Change of Scale Property. Inverse Laplace transforms of derivatives and integrals, Convolution theorem.

Applications of Laplace Transforms - Solution of differential equations with constant coefficients, Solution of differential equations with variable coefficients, Solution of simultaneous differential equations.

Laplace Transformation-Linearity of the Laplace transformation. Existence theorem for Laplace transformations, Shifting Theorems, Laplace transforms of derivatives and integrals, Multiplication of t^n, Division by t.

Paper III : DYNAMICS

Max. Marks : 30
Time : 3 Hours

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination per paper in a Semester

Unit-I

Motion of a particle with constant acceleration, acceleration of falling bodies, motion under gravity, motion of a body projected vertically upwards: Newton's Laws of Motion, Motion of two particles connected by a string, motion along a smooth inclined plane, constrained motion along a smooth inclined plane. Variable acceleration: Simple harmonic motion, elastic string.

Unit-II

Curvilinear motion of a particle in a plane: Definition of velocity and acceleration, projectiles, motion in a circle.

Work, power, conservative fields and the potential energy, work done against gravity, potential energy of a gravitational field.

Relative motion, relative displacement, velocity and acceleration, motion relative to a rotating frame of reference.

Linear momentum, angular momentum, conservation of angular momentum, impulsive forces, principle of impulse and momentum, motion with respect to centre of mass of a system of particles, collisions of elastic bodies, loss of energy during impact.

5. M . Ray : A Text Book on Dynamics , S. Chand and Company- 1989

COMPUTER SCIENCE
SEMESTER-III

SCHEME OF EXAMINATION

THIRD SEMESTER			Exam . Hrs	Ext.	Int.	Max. Marks
Paper – CS05	**Theory-A**	**Computer Organization**	**3**	**30**	**5**	**35**
Paper –CS06	**Theory-B**	**Object Oriented Programming using (C++)**	**3**	**30**	**5**	**35**
Paper – PCS03	**Practical-C**	**Practical Based on Paper – CS06**	**3**	**30**	**--**	**30**

Note : Practical marks will include the appropriate weightage for proper maintenance of Lab. Record.

Paper-CS05 : Computer Organization

Objective : To teach the students the basics of computer organization, Microprocessor & basic know how about system maintenance.

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT - I

Representation of Information : Number system: Binary, Decimal, Hexadecimal, Octal; Conversions; integer and floating point representation, character codes (ASCII, EBCDIC), error detection and correction codes: Parity bit method, Hamming code; Boolean algebra.

UNIT – II

*Basic Building Blocks :*Combinatorial logic design : Gates, Half Adder, Full Adder, Encoder, Decoder, Multiplexer : Sequential Building Block : Flip-Flops, Registers, Counters: Synchronous and Asynchronous Counters, Bus.

Microinstructions : Register Transfer, Arithmetic, Logical and Shift Operations; Instruction : Instruction Format, Instruction Cycle; Interrrupt: Interrupt types, Interrupt Cycle.

UNIT – III

Micrprocessor : Architecture of 8086/8088 Processor Model; Instruction Set; Addressing Modes: Registgers used in Mircoprocessor.

Assembly Language : Features of Assembly Language, Machine Language vs Assembly Language, Pseudo Instruction; use of Assembly for programs: Addition, Subtraction, Multiplication using Subroutines and Basic Input/Output.

UNIT – IV

System Maintenance : Introduction to various physical components of a computer, Physical Inspection and Diagnostics on PC, types of displays and other peripheral devices, installing software; Functional description of various Internal and External cards; Viruses: Types of Computer Viruses, Detection of Viruses, Protection from Viruses.

Suggested Readings :

Essential :

1. Mano, M.M. : *Computer System Architecture,* 3rd Ed., Dec., 1998, PHI.

Further Reading :

2. Tannenbaum, A.S. : *Structured Computer Organization,* 3rd Ed., Oct., 1993, PHI.

3. Gear, C.W. : *Computer Organisation and Programming,* McGraw Hill, 1975.

4. Langholz, G., Grancioni, J. & Kandel, A. : *Elements of Computer Organization,* Prentice Hall International, 1988.

5. Hayes : *Computer Architecture and Organization,* McGraw Hill, International Edition.

6. Sloan, M.E. : *Computer Hardware and Organization,* 2nd Edition, Galgotia Pvt. Ltd.

Paper-CS06 : Object Oriented Programming (using C++)

Objective : To teach the students the implementation of various object oriented programming concepts through C++ programming

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT – I

Basic Concepts of Object Oriented Programming(OOP) : Object, Class, Encapsulation, Data Hiding, Inheritance, Polymorphism. Analysis and design of system using Object Oriented Approach, Benefit of OOPs.

Structure of a C++ Program : Include files, Declaration of class, Main function, I/O streams.

Classes : Class Declaration : Data Members, Member Functions, Private and Public members, data hiding and encapsulation, arrays within a class.

Objects : Creating Objects, Accessing class data members, Accessing member functions, Methods of passing arguments to functions.

UNIT – II

Object Concepts: Arrays of Objects, Objects as function arguments: Pass by value, Pass by Reference, Pointers to Objects.

Functions in C++ : Member function definition inside the class declaration and outside the class declaration, scope resolution operator, Private and Public member function, Nesting of member functions, Static and Friend functions.

UNIT – III

Constructors and Destructors: Constructors: Declaration and Definition, Default Constructors, Parameterized Constructors, Copy Constructors. *Destructors*: Definition and use.

Inheritance – Extending Classes : Concept of inheritance, base class, derived class, defining derived classes, visibility modes, private, public, protected; single inheritance : privately derived, publicly derived; making a protected member inheritable, access control to private and protected members by member functions of a derived class, multilevel inheritance, nesting of classes.

UNIT – IV

Polymorphism : Definition, types, Function overloading, Operator Overloading, Virtual functions and pure virtual functions.

Suggested Readings :

Essential :

1. Stroustrup : ***The C ++ Programming Language,*** **Addison Wesley.**
2. E. Balaguruswamy : ***Object Oriented Programming with C++,*** **TMH.**

Further Reading :

3. Robert Lafore : ***OOP in Turbo C++,*** **Galgotia.**
4. Herbert Schildt : ***Schildt's Advanced Win 95 Prog. in C & C++,*** **TMH.**
5. Herbert Schildt : ***C++ The Complete Reference,*** **TMH.**

Paper – PCS03 : Practical Based on Paper CS06

****

COMPUTER SCIENCE
SEMESTER-IV

SCHEME OF EXAMINATION

FOURTH SEMESTER			Exam . Hrs	Ext.	Int.	Max. Marks
Paper – CS07	**Theory-A**	**Database Concepts**	**3**	**30**	**5**	**35**
Paper –CS08	**Theory-B**	**Data Structures**	**3**	**30**	**5**	**35**
Paper – PCS04	**Practical-C**	**Practical Based on Paper – CS08**	**3**	**30**	**--**	**30**

Note : Practical marks will include the appropriate weightage for proper maintenance of Lab. Record.

Paper-CS07: Database Concepts

Objective : To teach the underlying concepts of database system in depth to students.

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT – I

Basic Concepts: A Historical perspective, File Systems vs. DBMS, Characteristics of the Data Base Approach, Abstraction and Data Integration, Database users, Advantages and Disadvantages of DBMS, Implication of Database approach; Data Independence.

UNIT – II

Relational Data Model: Relational model concepts, Integrity constraints over Relations, Conventional Data Models : An overview of Network and Hierarchical Data Models. The 12 Rules (Codd's Rule) for an RDBMS; Entity Relationship model.

UNIT – III

Relational Algebra and Calculus: Storage Organization for Relations, Relational Algebra: Operations - union, intersection, difference, Cartesian product, projection, selection, division and relational algebra queries; Relational Calculus: Tuple oriented and domain oriented relational calculus and its operations.

UNIT – IV

Advance concepts: Client-Server Architecture, 3-tier Architecture of database, Distributed databases, Normalization: First, second and third Normal Form, Boyce Codd Normal Form; Database Integrity: entity and referential; Security: , Concurrency, Recovery

Suggested Reading

Essential :

1. Date, C.J., 1981 : *An Introduction to Data Base Systems,* Vols. I and II, Addison-Wesley.

Further Readings

2. Ullman, Jeffrey D., : *Principles of Data Base Systems,* 2nd Edition, Galgotia Publ. Pvt. Ltd. 1982.
3. Whittington, R.P. : *Data Base System Engineering,* Clavendon Press.
4. Pratt, P., 1987 : *Data Base Systems Management and Design,* Boyd and Fraser Publ. Comp.

Paper-CS08 : Data Structures

Objective : To teach the students various data structures and operations performed on them using algorithms. The students will be capable to implement these operations using any programming language.

Note : (i) The question paper will consist of Four units.

(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each unit and **ONE** compulsory question of short answer type covering the whole syllabi.

(iii) The students are required to attempt **ONE** question from each unit and the compulsory question.

(iv) All questions carry equal marks unless specified.

UNIT – I

Basic Concepts: Introduction to Complexity, Data Structure and Data Structure operations. Applications of Data Structure, Basic data Structures; **Arrays**: Introduction, Types of Array, Memory representation, Applications and operations. **Stacks**: Introduction, memory representation, Applications and operations

UNIT – II

Linked List: Operations:-traversing, searching, inserting, deleting, operations on header linked list, circular linked list, doubly linked list, memory representation, Applications, polynomial manipulation; **Queue**: Introduction, Types, Memory Representation and Applications.

UNIT – III

Trees – Definition and Basic concepts, Representation in Contiguous Storage, Binary Tree, Binary Tree Traversal, Binary Search tree; **Graphs**: Introduction, Memory Representation, Graph Traversal (DFS and BFS).

UNIT – IV

Searching: Binary and Linear Search; **Sorting**: Bubble sort, Insertion sort, Selection sort, Merge Sort, Quick sort.

Suggested Readings :

Essential :

1. Lipschuitz L. Seymour, 2001 : Data Structure, Schaum Outline Series, TMH, New Delhi.

Further Readings :

2. Tannenbaum, Aaro M., 1990 : Data Structure Using C, Pearson.

Paper – PCS04 : Practical Based on Paper CS08 – Implement Data Structures Operations using C / C++.

****

STATISTICS

B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

Note :

1. A candidate shall offer these subjects in B.A./B.Sc. only if he/she takes up Mathematics as a subject in B.A./B.Sc.
2. A candidate shall offer B.A./B.Sc. 2nd year only if he/she had taken up the corresponding subject in B.A./B.Sc. 1st year.
3. There are two papers with codes 201 and 202 in the subject of Statistics in B.A./B.Sc. 3rd semester. These are to be taught simultaneously throughout the semester.
4. 8 lectures (of 45 minutes each) for theory per week and 4 lectures (of 45 minutes each) for practical per week amounting in all to 12 lectures per week for two papers (one theory and one practical) shall be allotted for the teaching.

Paper- 201 : STATISTICAL INFERENCE

Maximum Marks	**:**	**75**
Theory	**:**	**65**
Internal Assessment	**:**	**10**
Time allowed	**:**	**3 hours**

Objective: The objective of the course is to provide a systematic account of testing and closely related theory of point estimation and confidence sets, together with their applications.

Notes :

1. There will be in all nine (9) questions, all of equal marks. The first question is **compulsory** and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit.
2. Simple non-programmable calculator is allowed.
3. Statistical tables and log tables will be provided on request.

UNIT-I

Concept of a statistic and its sampling distribution. Point estimate of a parameter, concept of unbiasedness, consistency, efficiency and sufficiency (only the definitions and examples). Maximum likelihood estimation (standard distributions) Standard errors of sample mean and sample proportion. Sampling distribution of sum of independent binomial and Poisson random variables. Independence of sample mean and variance in random sampling from a normal distribution (without derivation).

Statements and sampling distributions of chi-square, t & F distributions and their relationships.

UNIT-II

Statistical Tests and Interval Estimation : Null and alternative hypothesis, two types of errors, level of significance and p-value. Testing for the mean and variance of a normal distribution, testing of equality of means and variances of two univariate normal distributions, and their related confidence intervals. Testing the significance of sample correlation coefficient.

Large Sample Tests : Use of central limit theorem for testing and interval estimation of a single mean and a single proportion, difference of two means and two proportions. Fisher's Z-transformation and its uses. Chi-square test for goodness of fit and testing of independence of attributes, Yale's correction.

4. Spiegel, M.R , Stephens, L.J. and Kumar N. (2010) : Schaum's outlines *Statistics*, (4^{th} edition) Tata McGraw Hill Education Private Limited

Paper- 202: PRACTICAL (SEMESTER-III)

Maximum Marks : 25
Time allowed : 3 hours

(Viva voce : 5 marks; record of the year : 5 marks; Annual Paper : 15 marks)

Note : The Practical Question Paper will contain five questions from the following topics. A student will be required to attempt three questions, each of 5 marks, in three hours duration.

1. Drawing random samples from standard distributions : Uniform, Exponential and Normal.
2. Tests of significance based on t, chi-square and F for one sample, two samples and paired sample problems; significance of correlation coefficient. Use of Z-Transformation for testing $\rho = \rho_0$.
3. Large sample tests for means and proportions, tests of goodness of fit and independence of attributes in contingency tables.
4. Confidence intervals for one and two sample problems (mean, variance and proportion).

STATISTICS

B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021
SEMESTER-IV

Note : 1. A candidate shall offer this subject in B.A./B.Sc. only if he/she takes up Mathematics as a subject in B.A./B.Sc.

2. A candidate shall offer this subject in B.A./B.Sc. 2nd year only if he/she had taken up the corresponding subject in B.A./B.Sc. 1st year.

3. There are two papers code named papers 203 and 204 in the subject of Statistics in B.A./B.Sc. 4th semester. These are to be taught simultaneously throughout the semester.

4. 8 lectures (45 minutes each) for theory per week and 4 lectures (45 minutes each) for practical per week amounting in all to 12 lectures per week for two papers (one theory and one practical) shall be allotted for the teaching.

Paper - 203 : SAMPLE SURVEYS, DESIGN AND ANALYSIS OF EXPERIMENTS

Maximum Marks	**:**	**75**
Theory	**:**	**65**
Internal Assessment	**:**	**10**
Time allowed	**:**	**3 hours**

Objective: The objective of this course is to acquaint the students about the need & merits of sampling over census and the implementation of various sampling schemes along with their merits, demerits and comparisons in appropriate practical situations. The students will get exposure to various statistical designs leading to the analysis of variance, elimination of heterogeneity of the data and construction of designs.

Notes :

1. There will be in all nine (9) questions, all of equal marks. The first question is **compulsory** and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit.

2. Simple non-programmable calculator is allowed.

3. Statistical tables and log tables will be provided on request.

UNIT-I

Concepts of population and sample, need for sampling, census and sample surveys, basic concepts in sampling. Sample selection and sample size. Sampling and non-sampling errors.

Some basic sampling methods for estimation of population mean, variance and standard error of estimates : simple random sampling (SRS) with and without replacement, stratified random sampling under various allocations and systematic sampling.

UNIT-II

Linear Models : concepts of fixed effect, random effect and mixed effect models. Analysis of variance for one way, two-way (with one observation per cell and with multiple but equal observations per cell) classifications under the fixed effect models.

Need for design of experiment, three fundamental principles of design, basic designs-CRD, RBD, LSD and their analysis.

5. Cochran W.G. and Cox G.M (1992) : Experimental Designs, John Wiley and Sons.
6. Montgomery, D. C. (2000) : Design and Analysis of Experiment, John Wiley, New York.

Paper - 204: PRACTICAL (SEMESTER-IV)

Maximum Marks : 25
Time allowed : 3 hours

(Viva voce : 5 marks; record of the year : 5 marks; Annual Paper : 15 marks)

Note : The Practical Question Paper will contain five questions from the following topics. A student will be required to attempt three questions, each of 5 marks, in three hours duration.

1. Selection of sample and determination of sample size : Simple random sampling (SRS), stratified SRS, allocation problems in stratified SRS and systematic sampling.
2. Analysis of variance for one-way and two-way classifications. Analysis of CRD, RBD and LSD.

****

APPLIED STATISTICS

SEMESTER-III

Note :
1. This course shall not be opted for along with courses in B.A./B.Sc Mathematics and/or B.A./B.Sc. Statistics.
2. The candidate opting for this course will not be eligible for admission to M.A./M.Sc. Statistics.
3. There is one paper with code 201AS in B.A./B.Sc. Semester-III having a total of 100 marks.
4. 9 Lectures of 45 minutes each per week shall be allotted for the teaching.

PAPER - 201AS: MATHEMATICAL METHODS - II

Maximum Marks	**:**	**100**
Theory	**:**	**90**
Internal Assessment	**:**	**10**
Time allowed	**:**	**3 hours**

Objective: The objective of the course is to provide an exposure to the Coordinate Geometry of three dimensions, Calculus of several variables and theory of Matrices.

Note : There will be in all nine (9) questions. The first question is compulsory and will be of short answer type covering the whole syllabus. This question will have (9) parts of 2 marks each. Of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidates will be required to attempt five (5) questions in all including the compulsory first question and two questions from each Unit.

UNIT-I

Coordinate Geometry of 3 Dimensions : Cartesian, spherical coordinates, equations of line, plane, sphere and ellipsoid.

Matrices and Linear Algebra : Determinants, algebra of matrices, rank of a matrix, inverse of a matrix, symmetric matrices (upto 4×4 matrices only).

UNIT-II

Matrices and Linear Algebra : Systems of Linear equations and their solutions.

Calculus of Several Variables : Functions of two variables, Partial derivatives and double integrals. Applications to evaluation of area.

Books Prescribed

1. Ayres F. (1999) : First Year College Mathematics, Schaum Series, Mc Graw Hill, New York.

2. Ayres F. (1980) : Matrices, Schaum Series, Mc Graw Hill, New York.

Books suggested for supplementary Reading

1. Kindle J.H. (1990) : Analytical Geometry, Schaum Series, Mc Graw Hill, New York.

2. Ayres F. (1999) : Calculus, Schaum Series, Mc Graw Hill, New York.

3. Spiegel M.R. (2002) : Advanced Calculus, Schaum Series, Mc Graw Hill, New York.

APPLIED STATISTICS

SEMESTER-IV

Note :
1. This course shall not be opted for along with courses in B.A./B.Sc Mathematics and/or B.A./B.Sc. Statistics.
2. The candidate opting for this course will not be eligible for admission to M.A./M.Sc. Statistics.
3. There is one paper with code 202AS in the subject of Applied Statistics in B.A./B.Sc. Semester IV, having a total of 100 marks.
4. 9 Lectures of 45 minutes each per week shall be allotted for the teaching.

PAPER- 202 AS: STATISTICAL METHODS

Maximum Marks	**:**	**100**
Theory	**:**	**90**
Internal Assessment	**:**	**10**
Time allowed	**:**	**3 hours**

Objective: The objective of the course is to make the students conversant with various techniques used in summarization and analysis of data. The focus will be both on theoretical as well as practical approach.

Note :
1. There will be in all nine (9) questions. The first question is compulsory and will be of short answer type covering the whole syllabus. This question will have (9) parts of 2 marks each. Of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidates will be required to attempt five (5) questions in all including the compulsory first question and two questions from each Unit.
2. Simple non-programmable calculator is allowed.
3. Statistical tables and log tables will be provided on request.

UNIT-I

Compilation, classification, tabulation and diagrammatic representation of statistical data. Concepts of Statistical population, random sample and frequency curve, measures of location, dispersion, skewness and kurtosis.

Two dimensional random variable, joint probability distributions, marginal and conditional probability distributions, conditional expectation, covariance and correlation coefficient.

UNIT-II

Measures of association and contingency, correlation and linear-regression involving two variables. Bivariate normal distributions.

Statement of weak law of large numbers and central limit theorem for independent and identical random variables. Sampling distributions of means, chi-square, t and F in sampling from normal populations (without proof).

Books recommended

1. Goon, A.M., Gupta, M.K. and Dasgupta, B (2005). : Fundamentals of Statistics, Vol.1 Chapter 1 to 6, 9, 10, 13 (only the relevant portion from these chapters as suggested by the body of the syllabus).

2. P.L.Meyer, (1971) : Introductory Probability and Statistical Applications, Addison Wesley. American Pub. Co.

****

PHYSICS

B.Sc. (GENERAL) SECOND YEAR (3rd and 4th Semester) EXAMINATION, 2020-2021

General Instructions for teachers, students and paper setters:

1. There will be three papers of theory and one laboratory (practical course). Each of the theory papers is allocated 25 marks including 3(three) marks for the Internal Assessment. The Practical examination is of 25 marks including 3 (three) marks for the Internal assessment. The exams will be conducted every semester.

2. The number of lectures per week will be three for each theory paper and six for practicals.

3. The examination time for each theory paper as well as practical paper will be three hours.

4. Each theory paper will consist of seven questions comprising of three sections. First two sections will comprise of three questions from each of Units I and II of syllabus, and the third section will comprise of one compulsory question of ten short answer type parts covering whole syllabus. The question paper will be set for 44 marks - All the questions in first and second sections will carry 9 (nine) marks each and the compulsory question will carry 8 marks. Student will attempt two questions from each of the first two sections and any eight parts of the compulsory questions. After evaluation of the answer books out of 44 marks, the marks will be given out of 22 marks.

5. The numerical problems/exercises in the question paper should be 25-30%.

6. The use of Non-programmable calculators will be allowed (paper setter should explicitly mention this in the question paper) in the examination centre but these will not be provided by the University/College. Mobile phones and pages are not allowed in the examination hall.

7. External examiners will be sent for Practical examinations.

PHYSICS

SEMESTER-III

Papers, marks and teaching hours allocation:

Paper A	:	Statistical Physics and Thermodynamics – I	Total Teaching hrs. 30
Paper B	:	Optics and Lasers –I	Total Teaching hrs. 30
Paper C	:	Quantum Physics-I	Total Teaching hrs. 30
		Physics Practicals	Total Teaching hrs. 45

Paper A : STATISTICAL PHYSICS AND THERMODYNAMICS-I (30 Hrs.)

UNIT-I

Basic ideas of Statistical Physics, Scope of Statistical Physics, basic ideas about probability, distribution of four distinguishable particles in two compartments of equal size. Concept of macrostates, microstates, thermodynamic probability, effects of constraints on the system, distribution of n particles in two compartments, deviation from the state of maximum probability, equilibrium state of dynamic system, distribution of distinguishable n particles in k compartments of unequal sizes.

UNIT-II

Phase space and its division into elementary cells, three kinds of statistics. The basic approach in the three statistics. Maxwell-Boltzman statistics applied to an ideal gas in equilibrium, experimental verification of Maxwell-Boltzman's law of distribution of molecular speeds.
Need of quantum statistics--B.E. statistics, derivation of Planck's law of radiation, deduction of Wien's displacement law and Stefan's law from Planck's law, F.D. statistics, Comparison of M.B., B.E. and F.D. statistics.

Books Suggested :

Essential Readings :

1. "*Statistical Physics and Thermodynamics*", V.S. Bhatia, (Shoban Lal Nagin Chand, Jalandhar).
2. "*A Treatise on Heat*" Saha and Srivastava (Indian Press, Ahmedabad, 1972).

Further Readings:

1. *Thermal Physics* by C. Kittel & H. Kroemer, CBS Pub., 1987.
2. *Thermal Physics*, S.C. Garg, R.M. Bansal, and C.K. Ghosh, TMH, 2000.

Paper-B : OPTICS AND LASERS-I **(30 Hrs.)**

UNIT-I

Interference : Concept of coherence, spatial and temporal coherence, coherence time, coherence length, area of coherence. Conditions for observing interference fringes. Interference by wavefront division and amplitude division. Young's double slit experiment. Lloyd's mirror and Fresnel's biprism, phase change on reflection. Newton's rings,Michelson interferometer—working, principle and nature of fringes. Interference in thin films, Role of interference in anti-reflection. Multiple beam interference, Fabry-Perot interferometer, nature of fringes, finesse.

UNIT-II

Diffraction : Huygen-Fresnal theory half period zones, zone plates. Distinction between Fresnel and Fraunhofer diffraction. Fraunhofer diffraction due to single slit and intensity distribution,double slits & multiple slits(qualitative). Fraunhofer diffraction at rectangular (qualitative discussion)and circular apertures. Effects of diffraction in optical imaging, resolving power of microscope and telescope, diffraction grating, its use as a spectroscopic element, resolving power, Moire's fringes.

Polarization : Concept and analytical treatment of unpolarised, plane polarized and elliptically polarized light. Double refraction, Nicol prism, sheet polarisers, retardation plates. Production and analysis of polarized light (quarter and half wave plates).

Books Suggested :

Essential Readings:

1. *Optics*, Jenkins and White, McGraw Hill.
2. *Optics*, Ajoy Ghatak, McMillan India.
3. *Physics for Degree Students,* C. L. Arora and P .S. Hemne, S. Chand & Co., 2014.

Further Readings:

1. *Optics*, Born and Wolf, Pergamon.

Paper-C : QUANTUM PHYSICS-I (30 Hrs.)

UNIT-I

Formalism of Wave Mechanics :

(i) Plancks's formula of Black body radiation and energy quantization,
Wave-particle duality – Photoelectric effect, X-ray diffraction, Compton effect, Pair production, Photon and gravity.
De Brogile waves, wave packet, Phase velocity and Group velocity, Electron microscope, Particle in a box, Particle diffraction, Davisson-Germer experiment, Interferferometry with particles.
Uncertainty principle with illustrations, Principle of complementarity. (Chapters 2 and 3 of book 1 or Chapters 1-3 of book 2)

(ii) Quantum mechanics, Wave equation, Plausible arguments leading to time-dependent Schrodinger equations, Born's interpretation of Wave function, complex character, continuity and boundary conditions, probability interpretation, normalization, Probabilty current, Probability conservation equation, Principle of superposition.

(iii) Fundamental postulates of quantum mechanics. Eigenvalues and eigenfunctions. Operator formalism, Position, momentum and energy operators, expectation values, Ehrenfest theorem, Hermitian operators.

(Chapter 5 of book 1 and book 2)

UNIT-II

Problems in One and Three Dimensions :

(a) Steady-state Schrodinger equation, Appliction to stationary states for one dimension, Potential step. potential barrier, Tunnel effect examples, Scanning Tunneling microscope, rectangular potential well, Linear harmonic oscillator.

(Chapter 5 of book 1 and book 2)

(ii) Schrödinger equation for spherically symmetric potential, spherical harmonics, hydrogen atom energy levels and eigenfunctions, Principal, Orbital and Magnetic quantum numbers, Electron probability density.

(Chapter 6 of book 1 and book 2)

Books Suggested :

Essential Readings :

1. *Concept of Modern Physics, A. Beiser, S. Mahajan and S. R. Choudhury, Tata McGraw Hill, 6th Edition.*
2. *Quantum Physics of Atoms, Molecular, R. Eisberg & R.Resnick, Second Edition, John Wiley, 2002.*
3. *Physics for Degree Students, C.L. Arora and P.S. Hemne, S. Chand & Co., 2014*

Further Readings :

1. *Modern Physics,* J. Bernstein, P.M. Fishbane, S.G. Gasiorowicz, Pearson, 2000.
2. *Elements of Modern Physics*, S.H. Patil, McGraw Hill, 1998.
3. *Quantum Mechanics*, E. Merzbacaher, II Ed., John Wiley.

PHYSICS PRACTICALS

The students are required to perform all the Nine experiments from each of the Units I and Unit II .The Practical examination will be held along with the fourth semester examination.

The aim of the project work is to develop the scientific and technical temper in the students and as such it may consist of development of a laboratory experiment,fabrication of a device or electronic circuit etc. The student will prepare a project report of about 10 pages. Assessment of the project work will be done on the basis of the effort put in the execution of the project, report prepared and viva-voce.

General Guidelines for Physics Practical Examinations :

Total : 50 marks

1. The distribution of marks is as follows :

(i) One full experiment out of section–A requiring the student to take some data, analyse it and draw conclusions. (Candidates are expected to state their results with limits of error).	20
(ii) One exercise based on experiment or Computer Programming from the Unit assigned to the student for the semester	7
(iii) Viva-Voce and Record (Practical file)	10
(iv) Project	8
(v) Internal Assessment	5

Note for Examiners :

2. The marks scored under each head must be clearly written on the answer sheet.
3. There will be one session of 3 hours duration. The paper will have two sections. Section–A will consist of 4 experiments from each of Units I and Unit II, out of which an examinee will mark 3 experiments from either of units and one of these is to be allotted by the external examiner.
4. Section–B will consist of exercises/computer based activities which will be set by the external examiner on the spot. The length of the exercises should be such that any of these could be completed in one hour.
5. The examiner should take care that the experiment allotted to an examinee from section-A and exercise allotted from section–B are not directly related to each other.
6. Number of candidates in a group for practical examination should not exceed **20**.
7. In a single group, no experiment be allotted to more than three examinees in the group.

List of Experiments :

UNIT-I

A. Statistical Physics and Thermodynamics :

I. To study adiabatic expansion of a gas.

II. To measure thermal expansion of crystal using interference fringes.

III. To measure thermal conductivity in poor conductor by Lee's method.

IV. Thermo emf calibration, comparison.

V. Total radiation law, temperature dependence of radiation.

VI. To study Probability distribution using coloured dice, coins.

B. Optics and Lasers :

VII. To determine the refractive index of a liquid using spectrometer.

VIII. To determine the Cauchy's constants.

IX. To study the refractive index of a doubly refracting prism.

X. Study of rotation of plane of polarization with a polarimeter.

XI. To determine the wave length of a given light using biprism.

Exercises :

1. To measure the thermo e.m.f.
2. To determine the heating efficiency of an electric kettle with varying voltages.
3. To measure the angle of rotation of plane of polarization for the given liquid.
4. To determine the least count and setup the spectrometer for minimum deviation position of the prism.

Computer Based Activities : Elementary C language programs.

1. Motion of particle in a central force field.
2. Calculation of days between two dates of a year.
3. To check if triangle exists and the type of the triangle.

UNIT-II

C. Optics and Lasers :

I. To determine the wave length and dispersive power using plane diffraction grating (use Hg source).

II. To determine the resolving power of a telescope.

III. To determine the resolving power of a grating.

IV. Set up Newton's rings to determine wave length of sodium light.

V. To measure an inaccessible height using sextant.

VI. To determine the principal points of a lens system.

VII. To determine the divergence and wave length of a given laser source.

D. Quantum Physics:

VIII. To study the Photoelectric effect and determine the value of Planck's constant.

IX. To study the gas discharge spectrum of hydrogen.

X. To study the absorption spectra of iodine vapours.

XI. To determine the ionization potential of mercury.

Exercises :

1. To measure the diameter of Newton's rings.
2. Study of variation of light intensity using photovoltaic cell/inverse square law.
3. To determine the angle of wedge using interference method.
4. To measure the angle of elevation of a tall building.

Computer Based Activities : Elementary C language programs.

1. To find the sum of the sine and cosine series and print out the curve.
2. To find Sum and Product of Matrices
3. Motion of a projectile using computer simulation.

Text and Reference Books :

1. *A Laboratory Manual of Physics for Undergraduate Classes,* D.P. Khandelwal.
2. *B.Sc. Practical Physics, C.L.* Arora (S. Chand) & Co. (2014)
3. *Numerical Analysis* by C. Dixon.
4. *Programming with C, Schaum series* by Byron Gottfried & Jitender Chhabra.

PHYSICS

SEMESTER – IV

Papers, marks and teaching hours allocation:

Paper A	:	Statistical Physics and Thermodynamics – II	Total Teaching hrs. 30
Paper B	:	Optics and Lasers –II	Total Teaching hrs. 30
Paper C	:	Quantum Physics-II	Total Teaching hrs. 30
		Physics Practicals	Total Teaching hrs. 45

Paper A : STATISTICAL PHYSICS AND THERMODYNAMICS-II (30 Hrs.)

UNIT-I

Statistical definition of entropy, change of entropy of a system, additive nature of entropy, law of increase of entropy, reversible and irreversible processes with examples. Work done in a reversible process. Examples of increase of entropy in natural processes. Entropy and disorder.
Brief review of the terms and Laws of Thermodynamics, Carnot's Cycle. Entropy changes in Carnot's Cycle. Applications of thermodynamics to thermoelectric effect, change of entropy along a reversible path in a P.V. diagram, entropy of a perfect gas. Equation of state of ideal gas from simple statistical consideration. Heat death of the universe.

UNIT-II

Derivation of Maxwell's thermodynamical relations and applications, cooling produced by adiabatic stretching, adiabatic compression, change of internal energy with volume. Expression for (C_p-C_v), change of state and Clayperon Equation. Thermodynamical treatment of Joule-Thomson effect. Use of Joule-Thomson effect for liquification of helium. Production of very low temperature by adiabatic demagnetisation.

Books Suggested :

Essential Readings:

1. *"Statistical Physics and Thermodynamics",* V.S. Bhatia, (Shoban Lal Nagin Chand, Jalandhar)
2. *"A Treatise on Heat"* Saha and Srivastava (Indian Press, Ahmedabad, 1972.)

Further Readings :

1. *Thermal Physics by C.* Kittel & H. Kroemer, CBS Pub., 1987
2. *Thermal Physics,* S.C. Garg, R.M. Bansal, and C.K. Ghosh, TMH, 2000.

Paper-B : OPTICS AND LASERS-II **(30 Hrs.)**

UNIT-I

Laser Fundamentals :
Interacation of light with matter : Absorption, spontaneous emission, stimulated emission, Wave mechanical explanation, Properties of Spectral Lines, Temporal and spatial coherence, Charatertistics of stimulated emission, Einstein coefficients and their relations, Light amplification and threshold condition ,Population inversion, Kinetics of optical absorption (qualitative account only), Qualitative account of Collisional broadening, Doppler broadening & Natural broadening, Mechanism of Luminescence.
Lasing action, Components of Laser, Elementary theory of optical cavity, longitudinal and transverse modes, Principal pumping schemes, Three level and four level laser schemes.

UNIT-II

Laser Systems : Types of lasers, Ruby and Nd : YAG lasers. He–Ne, Dye and CO_2 lasers – construction, mode of creating population inversion and output characteristics.
Applications of lasers—a general outline, Holography. Principle, recording of hologram and reconstruction of image.
Fiber Optics : Photonics, Optical fibre, Construction, Numerical aperture, acceptance angle, skip distance, Step index fibre – single mode and multimode, Graded index fibre, Losses in optical fibre, Material losses and Rayleigh scattering, bending losses, Intermodal and intramodal dispersion.
Splicing techniques, Optical fibre based communication system, Medical applications.

Books Suggested :

Essential Readings :

1. *Laser Fundamentals,* W.T. Silfvast, Foundation Books.
2. *Lasers and Non-linear Optics,* B.B. Laud, Wiley Eastern Limited.
3. *A text book of Optics,* Subtahmanyam N., Lal B. and Avadhanulu, M. N., S. Chand & Co., 2012.
4. *Optical Fiber Communication,* Keiser, MH.

Further Readings :

1. *Lasers,* Svelto Pergmon.

Paper-C : QUANTUM PHYSICS-II (30 Hrs.)

UNIT-I

Radiative transitions, selection rules and life times,
Spectrum of hydrogen atom.
Normal Neeman effect and experiment, Degeneracy of H-atom energy levels, fine structure, Electron angular momentum, Larmor's frequency, electron spin angular momentum, Exclusive principle, Stern-Gerlach experiment, spin-orbit coupling, electron magnetic moment, total angular momentum, Hyperfine structure, examples of one electron systems, Anomalous Zeeman effect, Lande-g factor (sodium D-lines). Paschen-Back Effect, Stark Effect.

(Chapters 6 & 7 of Book 1, Chapters 8-10 of Book 2)

UNIT-II

Symmetric and Antisymmetric wave functions, exclusion principle, Many electron atoms, Slater determinant, Electronic configurations, Hund's rule, Spin-Orbit coupling, L-S coupling, J-J couplings, term symbols. Atomic spectra of H, Na, He and Hg, selection rules.

X-ray spectra, nomenclature, Selection rules, Mosley law, Auger effect.

Molecular bonding, H_2^+ ion and H_2 molecules, Complex molecules, molecular spectra, selection rules, symmetric structures, rotational vibrational levels and spectra of diatomic molecules,vibration-rotation spectra, electronic spectra of molecules, Franck Condon principle, fluorescence and phosphorescence, Raman Effect, Magnetic resonance experiments.

(Chapters 7 & 8 of Book 1, Chapter 12 of Book 2)

Books Suggested :

Essential Readings :

1. *Concepts of Modern Physics,* A. Beiser, S. Mahajan and S. R. Choudhary, Tata McGraw Hill, 6th Edition.
2. *Quantum Physics of Atoms, Molecular,* R. Eisberg & R. Resnick, Second Edition, John Wiley, 2002.
3. *Physics for Degree Students,* C.L. Arora and P.S. Hemne, S.Chand & Co., 2014.
4. *Elements of Modern Physics,* S.H. Patil, McGraw Hill, 1998.

Further Readings :

1. *Fundamentals of Molecular Spectroscopy,* C.N . Banwell, T.M.H., 1972
2. *Atomic and Molecular Spectra*, Rajkumar (Kedarnath Ramnath Prakashan, Meerut).
3. *Atomic Spectra,* H.G. Kuhn, Academic Press, N.Y.

PHYSICS PRACTICALS

The Practical examination will be held along with the fourth semester examinations. General Guidelines for Physics Practical Examinations and syllabus is given in syllabus for Semester III.

****

CHEMISTRY

B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

Scheme of Teaching and Examination

SEMESTER-III

Paper	Course	Teaching Hrs.		Max. Marks
IX	Inorganic Chemistry-A	30	3 periods per week	22+3 internal assessment
X	Organic Chemistry-A	30	3 periods per week	22+3 internal assessment
XI	Physical Chemistry-A	30	3 periods per week	22+3 internal assessment
XII	Laboratory Practicals		6 periods per week	22+3 internal assessment
		Total	**15 periods/week**	**100**

SEMESTER-IV

Paper	Course	Teaching Hrs.		Max. Marks
XIII	Inorganic Chemistry-B	30	3 periods per week	22+3 internal assessment
XIV	Organic Chemistry-B	30	3 periods per week	22+3 internal assessment
XV	Physical Chemistry-B	30	3 periods per week	22+3 internal assessment
XVI	Laboratory Practicals		6 periods per week	22+3 internal assessment
		Total	**15 periods/week**	**100**

Total Marks

SEMESTER-III- 100

SEMESTER-IV- 100

200

CHEMISTRY

SEMESTER-III

Paper	Course	Teaching Hrs.		Max. Marks
IX	Inorganic Chemistry-A	30	3 periods per week	22+3 internal assessment
X	Organic Chemistry-A	30	3 periods per week	22+3 internal assessment
XI	Physical Chemistry-A	30	3 periods per week	22+3 internal assessment
XII	Laboratory Practicals		6 periods per week	22+3 internal assessment
	Total	**15 periods/week**		**100**

Paper-IX: INORGANIC CHEMISTRY-A

Time : 3 Hrs
Max. Marks : 22+3
60 Hrs. (2 Hrs/Week)
3 Periods/Week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(8 Hrs.)**

Chemistry of Elements of First Transition Series:
Characteristic properties of *d*-block elements.

Properties of the elements of the first transition series, their simple compounds and complexes, illustrating relative stability of their oxidation states, coordination number and geometry.

UNIT-II **(7 Hrs.)**

Chemistry of Elements of Second and Third Transition Series:
General characteristics, comparative treatment with their 3*d*-analogues in respect of ionic radii, oxidation states, magnetic behaviour, spectral properties and stereochemistry.

UNIT-III **(8 Hrs.)**

Chemistry of Coordination Compounds-I
Werner's coordination theory and its experimental verification, effective atomic number concept, chelates, nomenclature of coordination compounds, isomerism in coordination compounds

UNIT-IV **(7 Hrs.)**

Chemistry of Coordination Compounds-II
Valence bond theory of transition metal complexes. Properties of Coordination compounds i.e. magenetic properties, colours (Qualitative approach only), use of coordination compounds.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.
ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.
iii. Compulsory question carries six marks and remaining all questions carry four marks each.

Books Suggested

1. Cotton, F.A., Wilkinson, G., Gaus, P.L., Basic Inorganic Chemistry; 3rd edition, Pubs: John Wiley Sons. 1995.

2. Lee, J.D., Concise Inorganic Chemistry; 4th edition, Pubs: Chapman Hall Ltd., 1991.

3. Shriver, D.E., Alkins, P.W., Langford, C.H., Inorganic Chemistry; 4th edition, Oxford Publisher: Oxford University Press, 2006.

4. Douglas, B. McDamiel, D., Alexander, J., Concepts and Models of Inorganic Chemistry; 3rd edition, Pubs: John Wiley and Sons Inc., 1994.

5. Porterfield, W.W., Wesley, A., Inorganic Chemistry; Pubs: Addison-Wesley Publishing Company, 1984.

6. Miessler, G.L., Larr, D.A., Inorganic Chemistry; 3rd edition, Pubs: Pearson Education Inc., 2004.

7. Jolly, W.L., Modern Inorganic Chemistry; 2nd edition, Pubs: McGraw-Hill Publishing Company Limited, 1991.

8. Purcell, K.F., Kotz, J.C., Inorganic Chemistry; Pubs: W.B. Saunders Company, 1977.

9. Puri, B.R., Sharma, L.R., Kalia, K.C., Principles of Inorganic Chemistry; 30th edition, Pubs: Milestones Publisher, 2006-07.

Paper-X: ORGANIC CHEMISTRY-A **Time : 3 Hrs**
Max. Marks : 22+3
60 Hrs. (2 Hrs/Week)
3 Periods/Week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(8 Hrs.)**

Alcohols and Phenols:

Classification and nomenclature

Monohydric alcohols-Nomenclature, methods of formation by reduction of aldehydes, ketones, carboxylic acids and esters. Hydrogen bonding. Acidic nature. Reactions of alcohols. Dihydric and Trihydric alcohols-Nomenclature, methods of formation, chemical reactions of vicinal glycols and glycerol.

Preparation of phenols, physical properties and acidic character. Comparative acidic strengths of alcohols and phenols, resonance stabilization of phenoxide ion. Reactions of phenols-electrophilic aromatic substitution, acylation and carboxylation. Mechanisms of Fries rearrangement, Claisen rearrangement, Gatterman synthesis, and Reimer-Tiemann reaction.

UNIT-II **(8 Hrs.)**

Aldehydes and Ketones I

Nomenclature and structure of the carbonyl group. Synthesis of aldehydes and ketones with particular reference to the synthesis of aldehydes from acid chorides, synthesis of aldehydes and ketones using 1,3-dithianes, synthesis of ketones from nitriles and from carboxylic acids. Physical properties.

UNIT-III **(7 Hrs.)**

Aldehydes and Ketones-II

Mechanism of nucleophilic additions to carbonyl group with particular emphasis on benzoin, aldol, Perkin and Knoevenagel condensations. Condensation with ammonia and its derivatives. Wittig reaction, Mannich reaction.

Use of acetals as protecting group. Oxidation of aldehydes, Baeyer-Villiger oxidation of ketones, Cannizzaro reaction, MPV, Clemmensen, Wolff-Kishner, $LiAlH_4$ and $NaBH_4$ reductions.

UNIT-IV

Carboxylic Acids: **(7 Hrs.)**

Nomenclature, structure and bonding, physical properties, acidity of carboxylic acids, effects of substitutions on acid strength. Preparations of carboxylic acids. Reactions of carboxylic acids. Hell-Volhard-Zelinsky reaction. Synthesis of acid chlorides, esters and amides, Reduction of carboxylic acids. Mechanism of decarboxylation. Methods of formation and chemical reactions of halo acids. Hydroxyl acids: Malic, tartaric and citric acids(structural features only).

Methods of formation and chemical reactions of unsaturated monocarboxylic acids.

Dicarboxylic acids: Methods of formation and effects of heat and hydrating agents.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

4. Solomons, T.W., Fryhle, C.B., Organic Chemistry; 9th edition, Pubs: Wiley India, 2007.

5. Carey, F.A., Organic Chemistry; 4th edition, Pubs: McGraw-Hill, 2000.

6. Streitwieser, A., Clayton, Jr., Heathcock, H., Introduction to Organic Chemistry; 3rd edition, Pubs: Macmillan Publishing Company, 1989.

Paper-XI: PHYSICAL CHEMISTRY-A

Time : 3 Hrs.
Max. Marks:22+3
60 Hrs. (2 Hrs./Week)
3 Periods/Week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(8 Hrs.)**

Liquid State:
Intermolecular forces, structure of liquids (a qualitative description).
Structural differences between solids, liquids and gases.
Liquid Crystals : Difference between liquid crystal, solid and liquid. Classification, structure of nematic and cholestric phases. Thermography and seven segment cell.

UNIT-II **(7 Hrs.)**

Chemical Equilibrium:
Equilibrium constant and free energy. Thermodynamic derivation of law of mass of mass action. Le - Chatelier's principle.
Reaction isotherm and Reaction isochore-Clapeyron equation and Clausius –Clapeyron equation, applications.

UNIT-III **(8 Hrs.)**

Thermodynamics-II:
Second Law of Thermodynamics: Need for the law, different statements of the law, Carnot cycle and its efficiency, Carnot theorem. Thermodynamic scale of temperature.

Concept of Entropy: Entropy as a state function, entropy as a function of V & T, entropy as a function of P & T, entropy change in physical change, Clausius inequality, entropy as a criteria of spontaneity and equilibrium. Entropy change in ideal gases and mixing of gases.

UNIT-IV **(7 Hrs.)**

Thermodynamics-III:
Third Law of Thermodynamics: Nernst heat theorem, statement and concept of residual entropy, evaluation of absolute entropy from heat capacity data. Gibbs and Helmholtz functions; Gibbs function (G) and Helmholtz functions (A) as thermodynamic quantities, A & G as criteria for thermodynamic equilibrium and spontaneity, their advantage over entropy change. Variation of G and A with P, V and T.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***

ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***

iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

10. Metz, C.R., Theory and problems of Physical Chemistry; Schaum's outline series, 2nd edition, Pubs: McGraw-Hall Book Company, 1989.

Paper-XII: LABORATORY PRACTICALS

Max. Marks:22+3

Inorganic Chemistry **6 Periods/week**

Quantitative Analysis

Volumetric Analysis:

a) Estimation of calcium content in chalk as calcium oxalate by permanganometry.
b) Estimation of hardness of water by EDTA.
c) Estimation of ferrous and ferric by dichromate method.
d) Estimation of copper using sodium thiosulphate

Gravimetric Analysis

Analysis of Cu as CuSCN and Ni as Ni (dimethylgyoxime)$_2$.

Physical Chemistry

Thermochemistry:

a) To determine the solubility of benzoic acid at different temperatures and to determine ΔH of the dissolution process.
b) To determine the enthalpy of neutralization of a weak acid/weak base versus strong base/strong acid and determine the enthalpy of ionization of the weak acid/weak base. pH of a Buffer solution, Determination of ionization constant of a weak acid.

General Instruction to the Examiners:

Note: Practical examination will be of four hours duration & shall consist of the following questions:

Q.No. I. Inorganic Chemistry	: 09 marks
Q.No. II. Physical Chemistry	: 06 marks
Q.No. III. Viva-Voce	: 04 marks
Ask four questions (2 marks each) related to chemistry practicals.	
Q.No. IV. Note Book	: 03 marks

Books Suggested (Laboratory Courses)

XIV	Organic Chemistry-B	30	3 periods per week	22+3 internal assessment
XV	Physical Chemistry-B	30	3 periods per week	22+3 internal assessment
XVI	Laboratory Practicals		6 periods per week	22+3 internal assessment
		Total	**15 periods/week**	**100**

Paper-XIII: INORGANIC CHEMISTRY-B

Time : 3 Hrs
Max. Marks : 22+3
60 Hrs. (2 Hrs/Week)
3 Periods/Week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I (8 Hrs.)

Chemistry of Lanthanide Elements:
Electronic structure, oxidation states and ionic radii and lanthanide contraction, complex formation, occurrence and isolation, lanthanide compounds.

Chemistry of Actinides:
General features and chemistry of actinides, chemistry of separation of Np, Pu and Am from U, similarities between the later actinides and the later lanthanides.

UNIT-II (7 Hrs.)

Acids and Bases:
Arrhenius, Bronsted-Lowry, the Lux-Flood, solvent system and Lewis concepts of acids and bases.

UNIT-III (8 Hrs.)

Oxidation and Reduction:
Use of redox potential data – analysis of redox cycle, redox stability in water – Frost, Latimer and Pourbaix diagrams. Principles involved in the extraction of the elements.

UNIT-IV **(7 Hrs.)**

Non-aqueous Solvents:
Physical properties of a solvent, types of solvents and their general characteristics, reactions in non-aqueous solvents with reference to liquid NH_3 and liquid SO_2.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.

ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.

iii. Compulsory question carries six marks and remaining all questions carry four marks each.

Paper-XIV: ORGANIC CHEMISTRY-B

Time : 3 Hrs
Max. Marks : 22+3
60 Hrs. (2 Hrs/Week)
3 Periods/Week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I (8 Hrs.)

Carboxylic Acid Derivatives:
Structure and nomenclature of acid chlorides, esters, amides and acid anhydrides. Relative stability & reactivity of acyl derivatives. Physical properties, interconversion of acid derivatives by nucleophilic acyl substitution.

Preparation of carboxylic acid derivatives, chemical reactions. Mechanisms of esterification and hydrolysis (acidic and basic).

UNIT-II (8 Hrs.)

Ethers , Epoxides Fats, Oils and Detergents:
Nomenclature of ether and methods of their formation, physical properties. Chemical reaction-cleavage and autoxidation, Ziesel's method.

Synthesis of epoxides. Acid and base-catalyzed ring opening of epoxides, orientation of epoxide ring opening, reactions of Grignard and organolithium reagents with epoxides.

Natural fats, edible and industrial oils of vegetable origin, common fatty acids, glycerides, hydrogenation of unsaturated oils. Saponification value, iodine value, acid value. Soaps, synthetic detergents; alkyl and aryl sulphonates.

UNIT-III (7 Hrs.)

Organic Compounds of Nitrogen:
Preparation of nitroalkanes and nitroarenes. Chemical reactions of nitroalkanes. Mechanisms of nucleophilic substitution in nitroarenes and their reductions in acidic, neutral and alkaline media. Picric acid.

Structure and nomenclature of amines, physical properties. Stereochemistry of amines, Separation of a mixture of primary, secondary and tertiary amines. Structural features effecting basicity of amines. Amine salts as phase-transfer catalysis. Preparation of alkyl and aryl amines (reduction of nitro compounds, nitriles), reductive amination of aldehydic and ketonic compounds. Gabriel-phthalimide reaction, Hofmann bromamide reaction.

UNIT-IV

Heterocyclic Compounds: **(7 Hrs.)**

Introduction: Moleculer Orbital picture and aromatic character of pyrrole, furan, thiophene, pyridine. Methods of synthesis and chemical reactions with particular emphasis on the mechanism of electrophilic substitution. Mechanism of nucleophilic substitution reactions in pyridine derivatives.Comparision of basicity of pyridine, piperidine and pyrrole.

Introduction to condensed-five and six-membered heterocycles. Preparation and reactions of indole, quinoline and isoquinoline with special reference to Fisher indole synthesis. Skraup synthesis and Bischler-Napieralski synthesis. Mechanism of electrophilic substitution reactions of indole, quinoline and isoquinoline.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.

ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.

iii. Compulsory question carries six marks and remaining all questions carry four marks each.

Paper-XV: PHYSICAL CHEMISTRY-B

Time : 3 Hrs
Max. Marks : 22+3
60 Hrs. (2 Hrs/Week)
3 Periods/Week

OBJECTIVE OF THE COURSE

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I (8 Hrs.)

Phase equilibrium:

Statement and meaning of the terms – phase, component and degree of freedom, derivation of Gibbs phase rule, phase equilibria of one component system—water, CO_2 and S systems.

Phase equilibria of two component system –solid –liquid equilibria, simple eutectic – Bi-Cd system, desiliverisation of lead.

Solid solutions—compound formation with congruent melting point (Mg-Zn) and incongruent melting point, (NaCl-H_2O) system. Freezing mixtures, acetone-dry ice.

Partially Miscible Liquids –Phenol-water, trimethylamine – water, nicotine –water systems.

Nernst distribution law-thermodynamic derivation, applications.

UNIT-II (7 Hrs.)

Electrochemistry –I:

Electrical transport –Conduction in metals and in electrolyte solutions, specific conductance and equivalent conductance, measurement of equivalent conductance, variation of equivalent and specific conductance with dilution.

Migration of ions and Kohlrausch Law, Arrhennius theory of electrolyte dissociation and its limitations, weak and strong electrolytes, Ostwald's dilution law, its uses and limitations. Debye-Huckel-Onsager's equation for strong electrolytes (elementary treatment only). Transport number, definition and determination by Hittorf method and moving boundary method.

UNIT-III (8 Hrs.)

Electrochemistry-II:

Types of reversible electrodes – gas metal – ion, metal –insoluble salt – anion and redox electrodes. Electrode reactions, Nernst equation, derivation of cell E.M.F. and single electrode potential, standard hydrogen electrode – reference electrodes – standard electrode potential, sign conventions, electrochemical series and its significance.

UNIT-IV **(7 Hrs.)**

Electrolytic and Galvanic cells – reversible and irreversible cells, conventional representation of electrochemical cells.

E.M.F. of a cell and its measurements. Computation of cell E.M.F. Calculation of thermodynamic quantities of cell reactions (ΔG, ΔH and K), Polarization, over potential and hydrogen overvoltage.
Concentration cell with and without transport, liquid junction potential, application of concentration cells, valency of ions, solubility product and activity coefficient, potentiometric titrations.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.

ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.

iii. Compulsory question carries six marks and remaining all questions carry four marks each..

Paper-XVI LABORATORY PRACTICALS

Max. Marks: 22+3
6 Periods/week

Organic Chemistry

Laboratory Techniques:

a) Determination of R_f values and identification of organic compounds. Separation of isometric mixture of Ortho and paranitroaniline using hexane and ethyl acetate (8.5 : 1.5) by thin layer chromatography.

b) Extraction of caffeine from tea leaves.

Qualitative Analysis:

Detection of elements (N, S and halogens) and functional groups (phenolic, carboxylic, carbonyl, esters, carbohydrates, amines, amides, nitro and anilide), in simple organic compounds.

General Instruction to the Examiners:

Note: Practical examination will be of four hours duration & shall consist of the following questions:

Q.No. I. Organic Chemistry: (analysis of organic compound) : 09 marks
Q.No II. TLC experiment, Extraction of caffeine) : 06 marks
Q.No. III. Viva-Voce : 04 marks
Ask four questions (2 marks each) related to chemistry practicals.
Q.No. IV. Note Book : 03 marks

BOTANY

B.Sc. (GENERAL) SECOND YEAR (3rd and 4th Semester) EXAMINATION, 2020-2021

Third Semester		**Time**	**Theory**	**Int Assess.**	**Max Marks**
Theory Paper-A:	Diversity of Seed Plants and their Systematics-I	**3 hrs.**	**36**	**04**	**40**
Theory Paper-B:	Structure, Development and Reproduction in Flowering Plants-I	**3 hrs**	**36**	**04**	**40**
One practical pertaining to entire syllabus included in both theory papers		3 hrs.	18	02	20
Fourth Semester					
Theory Paper-A:	Diversity of Seed Plants and their Systematics-II	3 hrs.	36	04	40
Theory Paper-B:	Structure, Development and Reproduction in Flowering Plants-II	3 hrs	36	04	40
One practical pertaining to entire syllabus included in both theory papers		3 hrs.	18	02	20
		Total			**200**

Note:

1. The number of teaching hours for theory and practical per semester shall be 60 hrs. and 100 hrs. respectively.

2. There will be a two theory papers (A & B) in each semester. Each paper will consist of 9 questions. Question No. 1 will be compulsory and will consist of 8 parts (one mark each) comprising 4 MCQ and the rest 4 parts will be of fill-in the blanks covering the entire syllabus in both the theory papers A & B. The remaining 8 questions in papers A & B shall include two questions from each unit. Candidates shall be required to attempt one question from each Unit. Question No. 1 will carry 8 marks and the rest of 8 questions will be of 7 marks each.

BOTANY

B.Sc.(General) Third Semester (Examination December, 2020)

THEORY PAPER- A: DIVERSITY OF SEED PLANTS AND THEIR SYSTEMATICS- I

Objective: This paper deals with highly advance and evolved group of plants with naked seeds i.e. Gymnosperms. The course work of this paper gives a fair idea about the general features, economic importance and study of fossil as well as living gymnosperms.

Teaching Methodology: Teaching methodology includes series of lectures making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc. Students will be taken for field excursions to various hill stations/forests to familiarize them with the flora of the area covering various plant forms.

UNIT-I

General characteristics and economic importance of gymnosperms; differences between gymnosperms and angiosperms; differences between manoxylic and pycnoxylic wood.

UNIT-II

Fossil gymnosperms : Geological time Scale, Brief account of fossils, their formation and types (excluding details).

Lyginopteris: Introduction, external structure of stem; internal structure of primary stem, root and leaf; reproduction.

Williamsonia: Introduction, external morphology; internal structure; reproductive organs, male and female flowers.

UNIT-III

Structure, reproduction (male and female strobilus; structure of ovule; development of male and female gametophytes; pollination, fertilization, development of embryo and structure of seed) and life cycle of Cycas.

UNIT-IV

Structure, reproduction (male and female strobilus; structure of ovule; development of male and female gametophytes; pollination, fertilization, development of embryo and structure of seed) and life cycle of:

a) Pinus
b) Ephedra

Suggested Reading:

1. Bhatnagar, S.P. and Moitra, A. Gymnosperms, New Age International Limited, New Delhi, 1996.
2. Chopra, G.L. Text book of Gymnosperms, S. Nagin, Delhi, 1976.
3. Dhand, N. Systematics of Spermatophyta. Trueman Publications, Jalandhar, 2012
4. Pandey, B.P. College Botany, Vol. II. S. Chand & Company Ltd., New Delhi, 1994.
5. Singh, V., Pande, P.C. and Jain, D.K. A Text Book of Botany: Diversity and Systematics of Seed Plants, Rastogi Publications, Meerut, 2013.
6. Sporne, K.R. The Morphology of Gymnosperms, Hutchinson & Co (Publishers) Ltd., London, 1965.
7. Srivastava, H.N. Diversity of Seed Plants and their Systematics, Vol. III. Pradeep Publications, Jalandhar, 2014.

PAPER –B: STRUCTURE, DEVELOPMENT AND REPRODUCTION IN FLOWERING PLANTS-I

Objective: This paper deals with the basic body plan and diversity in flowering plant forms. The course work of this paper covers vegetative and reproductive morphology of these plants and will familiarize the students with plants bearing the enclosed seeds.

Teaching Methodology: Teaching methodology includes series of lectures making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I

The basic body plan of a flowering plant.
Diversity in plant form in annuals, biennials and perennials.
Root system: Tap root and adventitious root system and their various types; structural and anatomical modifications for storage, respiration and reproduction.

UNIT-II

Stem : Modifications of aerial and underground stem.
Leaf: Venation, phyllotaxy, simple and compound leaves, functions and modifications; internal structure (dicot and monocot leaves).

UNIT-III

Flower : As a modified shoot, functions; structure of anther and pistil; structure and development of male and female gametophytes.

UNIT-IV

Double fertilization and its significance; different types of ovules and embryo-sacs.

Suggested Readings :

1. Bhojwani, S.S. and Bhatnagar, S.P. The Embryology of Angiosperms, 5th edition. Vikas Publishing House Pvt. Ltd., Delhi, 2009.

2. Goyal J.P. and Saini, A. Angiosperms: Structure Development and Reproduction, Trueman Book Co. Jalandhar & New Delhi, 2006.

3. Pandey, S.N., Chadha, A. Plant Anatomy and Embryology, Vikas Publishing House Pvt. Ltd., Delhi, 1996.

4. Singh, V. Plant Anatomy and Embryology of Angiosperms, Global Media Publications, Delhi 2010.

5. Singh, V., Pande, P.C. and Jain, D.K. A Text Book of Botany: Structure Development and Reproduction in Angiosperms, Rastogi Publications, Meerut, 2013.

6. Srivastava, H.N. Structure, Development and Reproduction in Flowering Plants, Vol. IV. Pradeep Publications, Jalandhar, 2014.

Suggested laboratory exercises:

1. *Cycas*:
   - i) Habit, armour of leaf bases on the stem, young and old foliage leaves, scale leaves, male cone, megasporophyll, seed.
   - ii) Preparation of permanent stained slides of *Cycas* (T.S. leaflet, rachis and coralloid root).

2. *Pinus*:
   - i) Dwarf shoot; Male cone; Female cones (first year, second year and third year); Seed.
   - ii) Preparation of permanent slide of T.S. needle and pollen grains.
   - iii) Study through permanent slides :
     - a) L.S. male cone
     - b) L.S. female cone
     - c) L.S. ovule

3. *Ephedra*:
   - i) Habit and structure of male and female cones
   - ii) Preparation of permanent slide of T.S. stem (young).
   - iii) Study through permanent slides:
     - a) L.S. female cone
     - b) L.S. male cone

4. Modifications of **root, stem and leaf**.

5. Study through preparation of permanent slides :
   i) V.S. dicot leaf
   ii) V.S. monocot leaf

Guidelines for Botany Practical Examination:

Max. Marks:	**20**
Practical:	**18**
Int. Assessment:	**2**
Time:	**3 hours**

1. Cut T.S. of specimen A. Make its permanent stained slide. Identify, draw its well labeled diagram and show it to the examiner. 6
2. Identify, write illustrated morphological note on specimen B (from gymnosperms) and C from root/stem/leaf modifications. 4
3. Identify slides D and E giving at least two reasons. 4
4. Practical note book and Viva-voce 2+2=4

****

BOTANY

B.Sc. (GENERAL) Fourth Semester (Examination May, 2021)

PAPER-A: DIVERSITY OF SEED PLANTS AND THEIR SYSTEMATICS-II

Objectives: This paper deals with highly advance and evolved group of plants i.e. Angiosperms. The study of gradual transition from seedless plants to seed plants would make students familiar with origin of structural and functional complexity in plant kingdom. The systematics part of this paper is in fact backbone of the study of Botany. Without having knowledge of taxonomy and species concept, no further research work can be pursued. The identification, nomenclature and classification of the concerned plants make the first step of any research work in Botany.

Teaching Methodology: Teaching methodology includes series of lectures making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc. Students will be taken for field excursions to various hill stations/forests to familiarize them with the flora of the area covering various families of flowering plants.

UNIT-I

General characters of Angiosperms. Plant nomenclature and International Code of Botanical Nomenclature : Common names and scientific names, principles and rules; taxonomic ranks; type concept (Holotype, Isotype, Syntype, Paratype, Lectotype, Neotype and Topotype); principle of priority, aims and objectives of plant taxonomy.

A brief account of Bentham and Hooker's System of classification, its merits and demerits.

UNIT-II

Terminology pertaining to floral description.

General account and diagnostic features of the following families (excluding economic importance) :

Liliaceae	:	*Asphodelus/Asparagus*
Gramineae (Poaceae)	:	*Triticum*
Ranunculaceae	:	*Ranunculus* and *Delphinium*
Brassicaceae	:	*Brassica*

UNIT-III

General account and diagnostic features of the following families (excluding economic importance):

Rutaceae	:	*Citrus* and *Murraya*
Malvaceae	:	*Hibiscus*
Fabaceae	:	*Lathyrus, Cassia* and *Acacia*
Umbelliferae (Apiaceae)	:	*Coriandrum*

UNIT-IV

General account and diagnostic features of the following families (excluding economic importance) :

Compositae (Asteraceae)	:	*Helianthus/Ageratum*
Asclepiadaceae	:	*Calotropis*
Solanaceae	:	*Solanum* and *Petunia*
Labiatae (Lamiaceae)	:	*Ocimum*
Chenopodiaceae	:	*Chenopodium*

Suggested Readings:

1. Chopra, G.L. Angiosperms: Systematic and Life Cycle, Pradeep Publications, Jalandhar, 1987.
2. Dhand, N. Systematics of Spermatophyta, Trueman Publications, Jalandhar, 2012.
3. Maheshwari, J.K. Flora of Delhi, CSIR, New Delhi, 1963.
4. Singh, G. Plant Systematics: Theory and Practice, Oxford and IBH Pvt. Ltd., New Delhi, 1999.
5. Singh, V., Pande, P.C. and Jain, D.K. A Text Book of Botany: Diversity and Systematics of Seed Plants, Rastogi Publications, Meerut, 2013.
6. Srivastava, H.N. Diversity of Seed Plants and their Systematics, Vol. III, Pradeep Publications, Jalandhar, 2006.
7. Vasishta, P.C. Taxonomy of Angiosperms. R. Chand & Co., New Delhi, 1997.

PAPER-B: **STRUCTURE, DEVELOPMENT AND REPRODUCTION IN FLOWERING PLANTS-II**

Objectives: This paper deals with structure development and reproduction in flowering plants – the most fascinating group of plants on earth. The course material of this paper deals with internal structure of various plant parts, their growth patterns and abnormalities in structural development. The vast range of variation found in this group of plants provides a platform to students for acquiring basic knowledge of flowering plants which makes a foundation of applied branches like horticulture, floriculture, olericulture and arboriculture.

Teaching Methodology: Teaching methodology includes series of lectures, making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I

Tissue systems: Meristematic, shoot apex, root apex; simple and complex permanent tissues, special tissues; internal structure of primary dicot stem & root (*Helianthus*); secondary growth in dicot stem & root (*Helianthus*); internal structure of monocot stem & root (*Zea mays*); differences between dicot stem and monocot stem; differences between dicot root and monocot root.

UNIT-II

Anomalous stem structure in *Boerhaavia*, *Nyctanthes*, *Mirabilis* and *Dracaena*.
Various methods of vegetative propagation; micropropagation, basic technique and its importance.

UNIT-III

Types of pollination, advantages and disadvantages of self and cross-pollination; contrivances for self and cross-pollination, various agencies to bring about cross-pollination, characters of flowers pollinated by different agencies.

UNIT-IV

Seed formation: Development of endosperm and embryo. Fruit development, maturation and parthenocarpy. Significance of seed: Suspended animation; ecological adaptation and dispersal strategies.

Suggested Readings:

1. Esau, K. Anatomy of Seed Plants, 2nd edition, John Wiley & Sons, New York, 1977.
2. Fahn, A. Plant Anatomy, 2nd Edition, Pergamon Press, Oxford, 1974.
3. Goyal J.P. and Saini, A. Angiosperms: Structure Development and Reproduction, Trueman Book Co. Jalandhar & New Delhi, 2006.
4. Singh, V. Pande, P.C. and Jain, D.K. A Text book of Botany: Structure Development and Reproduction in Angiosperms, Rastogi Publications, Meerut, 2013.
5. Srivastava, H.N.. Structure, Development and Reproduction in Flowering Plants, Vol. IV. Pradeep Publications, Jalandhar, 2014.
6. Vasishta, P.C. A Text book of Plant Anatomy, S. Nagin & Co., Delhi, 1979.

Suggested Laboratory Exercises:

1. Preparation of permanent stained slides to show:

    a. Anomalous internal structure of stem in *Boerhaavia, Nyctanthes, Mirabilis* and *Dracaena*.
    b. T.S. dicot stem & root (*Helianthus*)
    c. T.S. monocot stem & root (*Zea mays*)
    d. Types of Placentation

2. Description of flowers in technical terms, drawing F.D., V.S., T.S. ovary, writing F.F. and reference to their respective families of the genera mentioned in different families in theory syllabus.

Guidelines for Botany Practical Examination

Max. Marks: 20
Practical : 18
Int. Assess. 02
Time : 3 hours

1. Cut T.S. of specimen A. Make its permanent stained slide. Identify and draw its well labeled diagram and show it to the examiner. 5

2. Describe specimen B or C in technical terms and proper sequence. Draw F.D. and V.S. of flower B or C. Cut T.S. of ovary and V.S. of flower and show them to the examiner. Write F.F. also. Refer specimen B or C to its respective family. 5

3. Identify slides D and E giving at least one reason. 2

4. Practical note book 2

5. Plant Album 2

6. *Viva-voce* 2

****

ZOOLOGY

B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

Paper I	:	Biodiversity (Chordates) & Evolution-I	40	(36+ 4) marks
Paper II	:	Biochemistry & Physiology-I	40	(36 + 4) marks
Practical		(Covering the entire syllabus) of 4 hours duration	20	(18+ 2) marks
		Total :	**100 marks**	

Note : The number of hours for Theory and Practical per week shall be 6 hours and 4 hours respectively.

OBJECTIVES OF THE COURSE

The syllabus pertaining to B.Sc. (General) Part-II, in the subject of Zoology has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Zoology working in the Panjab University, Chandigarh and affiliated colleges.

The syllabus contents are duly arranged section wise as well as unit wise. The contents are included in such manner so that due importance may be given to skill oriented components.

The course contents are also given due stress for excursion/field trips to Zoological Parks, Sea-shores, Hill Stations, Museum, Fossil Park and Apiary/godowns for better academic outlook. The Department of Zoology, P.U., Chandigarh usually organizes workshop/seminars from time to time for updating the teachers.

PAPER–I : BIODIVERSITY (CHORDATES) & EVOLUTION-I (ZOO 301)

Max. Marks	:	40
Theory Exam.	:	36 Marks
Internal Assessment	:	4 Marks
Time	:	3 Hours

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT-I

Chordates – Origin, Parental care and migration.
Protochordates –Urochordata-Type Study – *Herdmania* except development,
Cephalochordata- Type Study – *Amphioxus* (except development)

Classification of the animals up to orders relating to the following groups along with brief ecological notes of the following :

Protochordates	:	*Herdmania, Molgula, Pyrosoma, Doliolum, Salpa, Oikopleura & Branchiostoma (*excluding development*).*

UNIT-II

Cyclostomata – External Characters of *Petromyzon* & affinities of Cyclostomata
Pisces- Scales & fins, Type study-*Labeo*.

Cyclostomata	:	*Myxine, Petromyzon* & *Ammocoetes* larva.
Chondrichthyes	:	*Zygaena*(Hammer headed shark), *Pristis* (saw fish), *Narcine* (electric ray), *Trygon*, *Rhinobatus* and *Chimaera*(rabbit fish).
Actinopterygii	:	*Polypterus, Acipenser, Lepisosteus, Muraena, Mystus, Catla, Hippocampus, Syngnathus, Exocoetus, Anabas, Diodon, Tetradon, Echeneis* and *Solea.*
Dipneusti (Dipnoi)	:	*Protopterus* (lung fish)

UNIT-III

Amphibia – Type study-Hoplobatrachus Tigerinus.

Classification of the animals up to orders relating to the following groups along with brief ecological notes of the following :

Amphibia	:	*Uraeotyphlus, Necturus, Amphiuma, Amblystoma* and its Axolotl Larva, *Triton, Salamandra, Hyla, Rhacophorus.*

UNIT-IV

Concept and evidences of organic evolution.
Theories of organic evolution.
Origin of life.

Suggested Readings

1. Parker, T.J. and Haswell, W.A : Text Book of Zoology, Vol. II (Verterbrates), ELBS and Macmillan Press Ltd., 1981.
2. Dobzhansky, T., Ayala, F.J., Stebbins, G.L. and Valentine, J.W. : Evolution, WH Freeman, 1952.
3. Colbert, E.H. : Evolution of Vertebrates, IInd edition, Wiley Eastern Ltd., 1989.

4. Dhami, P.S. and Dhami, J.K. : Vertebrates, R. Chand & Co., New Delhi, 1998.

5. Bhamrah, H.S. and Juneka, K. : Cytogenetics & Evolution, Anmol Publication Pvt. Ltd., 1993.

PAPER II : BIOCHEMISTRY AND PHYSIOLOGY-I (ZOO 302)

Max. Marks	:	40
Theory Exam.	:	36 marks
Internal Assessment	:	4 marks
Time	:	3 hours

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT-I

Biochemistry and its scope;
Carbohydrates, proteins, lipids and nucleic acids: their classifications and functions.

UNIT-II

Enzymes : Nature, nomenclature, mode of action, their classification, coenzymes and cofactors.

Carbohydrate metabolism : The Embden Meyerhoff, Parnas pathway (glycolysis), the tricarboxylic acid cycle, the hexose monophosphate shunt**,** glycogenesis and glycogenolysis.

UNIT-III

Digestion : Digestion of dietary constituents, regulation of digestive processes and absorption. extra and intra cellular digestion, enzymatic digestion and symbiotic digestion.

Respiration : Exchange and transport of respiratory gases, Oxygen dissociation curve of haemoglobin, Bohr effect, chloride shift, Haldane effect and control of breathing.

UNIT-IV

Blood : Composition and functions of blood and lymph. Function of hemoglobin, blood clotting. Blood groups including Rh. Factor.

Heart : Origin and regulation of heart beat, cardiac cycle, electrocardiogram, cardiac output, blood pressure and micro-circulation.

Suggested Readings

1. Taneja, S.K. : Biochemistry & Animal Physiology, Trueman Book Co.,1997.
2. Guyton, A.S. : Text Book of Medical Physiology, 7th edition, W.B. Saunders Company, 1994.
3. Robert, K., Murray, R.K., Daryl, M., Granner, K., Victor, W. and Woodwell. : Harper's Biochemistry, 22nd edition, Prentice – Hall International, Inc.,1990
4. Nelson, D.L. and Cox, M.M. : Lehninger Principles of Biochemistry, 5th edition, W.H., Freeman and Company, New York, 2008.

PRACTICALS : Practical based on Theory Papers ZOO 301 & 302 (ZOO 251)

1. Classification up to orders habits, habitats, distinctive characters and economic importance(if any) of the following animals :

Urochordata	:	*Herdmania, Molgula, Pyrosoma, Doliolum, Salpa & Oikopleura.*
Cephalochordata	:	*Amphioxus.*
Cyclostomata	:	*Myxine, Petromyzon & Ammocoetes* Larva.
Chondrinchthyes	:	*Zygaena* (Hammer headed shark), *Pristis* (Saw fish), *Narcine* (Electric ray), *Trygon*, *Rhinobatus* and *Chimaera* (Rabbit fish).
Actinoptergii	:	*Polypterus, Acipenser, Lepisosteus, Muraena, Mystus, Catla, Hippocampus, Syngnathus, Exocoetus, Anabas, Diodon, Tetradon, cheneis* and *Solea.*
Dipneusti (Dipnoi)	:	*Protopterus*
Amphibia	:	*Uraeotyphlus, Necturus, Amphiuma, Ambystoma* and its Axolotl larva, *Triton, Salamandra, Hyla, Rhacophorus.*

2. Demonstrate the dissection of following animals through video clipping, charts, models etc.

Herdmania	:	General anatomy
Labeo	:	Digestive**,** reproductive systems, heart, afferent and efferent branchial arteries and cranial nerves.

3. Study of the skeleton of *Labeo, Hoplobatrachus Tigerinus*(frog)
4. Study of the following prepared slides :
   T.S. *Amphioxus* through various regions.
   Spicules & pharynx of *Herdmania* & pharynx of *Amphioxus.*
5. Study of the following prepared slides :
   Histology of frog (compound tissues).
6. Recording of blood pressure of man
7. Demonstration of equipment used for estimating haemoglobin content.
8. Demonstrate the presence of amylase in saliva, denaturation by pH and temperature.
9. Field study : Visit to a fossil Park/Museum. Familarity with the local vertebrate fauna and report.

Guidelines for conduct of Practical Examination

Max. Marks : 20
Practical Exam. : 18 marks
Internal Assessment : 2 marks
Time : 3 hours

1. Draw a labeled sketch of --------system of given animal and explain it to the examiner. (2)
2. Identify the given bones A & B. Make labelled sketches of their respective _____views. (2)
3. Minor experiment of physiology related to blood /osmosis /diffusion. (1½)
4. Perform the given physiology experiment, write the procedure and show it to the examiner such as identification of some food stuffs/presence of chloride or glucose in urine etc./Salivary Amylase/Blood. (2)
5. Identify the slides F-H giving two reasons for each identification. (2)
6. Identify and classify the specimens F to I upto orders. Write a short note on habitat of F, special feature of G, feeding habit of H and economic importance of specimen I. (4½)
7. Viva-voce. (2)
8. Note book and Project Report. (2)

ZOOLOGY

B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021
SEMESTER-IV

Paper I: Biodiversity (Chordates) & Evolution – II	40 (36 + 4) marks
Paper II : Biochemistry & Animal Physiology-II	40 (36 + 4) marks
Practical (Covering the entire syllabus) of 4 hours duration	20 (18 +2) marks
	--------
	Total : 100 marks

Note : The number of hours for Theory and Practical per week shall be 6 hours and 4 hours respectively.

OBJECTIVES OF THE COURSE

The syllabus pertaining to B.Sc. (General) Part-II, in the subject of Zoology has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Zoology working in the Panjab University, Chandigarh and affiliated colleges.

The syllabus contents are duly arranged section wise as well as unit wise. The contents are included in such manner so that due importance may be given to skill oriented components.

The course contents are also given due stress for excursion/field trips to Zoological Parks, Sea-shores, Hill Stations, Museum, Fossil Park and Apiary/godowns for better academic outlook. The Department of Zoology, P.U., Chandigarh usually organizes workshop/seminars from time to time for updating the teachers.

PAPER – I : BIODIVERSITY (CHORDATES) & EVOLUTION- II (ZOO 401)

UNIT-I

Reptilia- Type study-*Uromastix*, Poisonous and non-poisonous snakes, Poison apparatus in snakes.

Classification of the animals up to orders relating to the following groups along with brief ecological notes of the following :

Reptilia : *Chelone*(turtle) and *Testudo*(Tortoise), *Hemidactylus* (wall lizard), *Calotes, Draco, Varanus, Phrynosoma, Chamaeleon, Typhlops, Python, Eryx, Bungarus, Naja, Hydrus, Vipera, Crocodilus, Gavialis* and Alligator.

UNIT-II

Aves-Type study-Pigeon, Flight adaptations in birds.

Classification of the animals up to orders relating to the following groups along with brief ecological notes of the following :

Aves : *Ardea, Milvus, Pavo, Tyto, Alcedo, Eudynamis* and *Casuarius*.

UNIT- III

Mammals-Type study-Rat, Dentition in mammals.

Mammalia : *Ornithorhynchus, Echidna, Didelphis, Macropus* (Kangaroo), *Loris, Macaca, Manis* (Scaly ant eater), *Hystrix* (porcupine), *Funambulus* (Squirrel) *Panthera, Canis,Herpestes* (Mongoose), *Capra, Pteropus*.

UNIT-IV

Concept of micro, macro and mega-evolution.
Biological concept of species.
Fossils and dating of fossils.
Evolution of man.

Suggested Readings

1. Parker, T.J. and Haswell, W.A : Text Book of Zoology, Vol. II (Verterbrates), ELBS and Macmillan Press Ltd., 1981.
2. Dobzhansky, T., Ayala, F.J., Stebbins, G.L. and Valentine, J.W. : Evolution, WH Freeman, 1952.
3. Colbert, E.H. : Evolution of Vertebrates, IInd edition, Wiley Eastern Ltd., 1989.
4. Dhami, P.S. and Dhami, J.K. : Vertebrates, R. Chand & Co., New Delhi, 1998.
5. Bhamrah, H.S. and Juneka, K. : Cytogenetics & Evolution, Anmol Publication Pvt.Ltd., 1993.

PAPER II : BIOCHEMISTRY AND PHYSIOLOGY-II (ZOO 402)

Max. Marks	:	40
Theory Exam.	:	36 marks
Internal Assessment	:	4 marks
Time	:	3 hours

Note : Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, Five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

UNIT-I

Lipid metabolism : B-oxidation of fatty acids, fate of glycerol and gluconeogenesis, interaction of carbohydrates and lipids, lipogenesis in tissues, ketosis.

UNIT-II

Protein metabolism : Metabolism of amino acids (Oxidative deamination, transamination and decarboxylation), hydrolysis of proteins and Ornithine cycle).

UNIT-III

Excretion : Structure and types of nephron, urine formation, osmoregulation and counter current mechanism, composition of urine.

Muscles : Ultrastructure, chemical and physiological basis of skeletal muscle contraction.

UNIT-IV

Neural Integration : Structure of neuron, resting membrane potential, origin and propagation of impulse along the axon, synapse and myoneural junction.

Endocrine System : Structure, hormones and functions of thyroid, parathyroid, adrenal, pineal, hypothalamus, pituitary, pancreas, gonads, thymus, hormones of alimentary canal and kidney.

Suggested Readings

1. Taneja, S.K. : Biochemistry & Animal Physiology, Trueman Book Co.,1997.

2. Guyton, A.S. : Text Book of Medical Physiology, 7th edition, W.B. Saunders Company, 1994.

3. Robert, K., Murray, R.K., Daryl, M., Granner, K., Victor, W. and Woodwell. : Harper's Biochemistry, 22nd edition, Prentice – Hall International, Inc.,1990

4. Nelson, D.L. and Cox, M.M. : Lehninger Principles of Biochemistry, 5th edition, W.H., Freeman and Company, New York, 2008.

PRACTICALS : Practical based on Theory Papers ZOO 401 & 402 (ZOO 252)

1. Classification up to orders habits, habitats, distinctive characters and economic importance(if any) of the following animals :

Reptilia	:	*Chelone*(Turtle) and *Testudo* (Tortoise), *Hemidactylus, Calotes, Draco, Varanus, Phrynosoma, Chamaeleon, Typhlops, Python, Eryx, Ptyas, Bungarus, Naja, Hydrus, Vipera,Crocodilus, Gavialis.*
Aves	:	*Casuarius, Ardea, Anas, Milvus, Pavo, Eudynamis, Tyto* and *Alcedo*.
Mammalia	:	*Ornithorhynchus, Echidna, Didelphis, Macropus,Loris, Macaca, Manis, Hystrix, Funambulus,Panthera, Canis, Herpestes,Capra,Pteropus.*

2. Demonstrate the dissection of following animals through video clipping, charts, models etc.

Chick	:	Digestive, arterial, venous and urinogenital systems.
White Rat	:	Digestive, arterial, venous and urinogenital systems.

3. Study of the skeleton of *Varanus, Gallus* and Rat/ *Oryctolagus* (Rabbit).
4. Study of the following prepared slides :
   Histology of rat/rabbit (compound tissues)
5. Study of blood smear of a mammal.
6. Identification of food stuffs:starch, glucose, proteins and fats in solution.
7. Demonstration of osmosis and diffusion.
8. Analysis of urine for urea, chloride, glucose and uric acid.
9. An idea of location of endocrine glands in mammals through charts / models/ video clippings
10. Tracing of human evolution through models.

Field study : Visit to a fossil Park/Museum. Familarity with the local vertebrate fauna and report.

Guidelines for conduct of Practical Examination

Max. Marks	:	20
Practical Exam.	:	18 marks
Internal Assessment	:	2 marks
Time	:	3 hours

1. Draw a labeled sketch of --------system of given animal and explain it to the examiner. (2)

2. Identify the given bones A & B. Make labelled sketches of their respective _____views. (2)

3. Minor experiment of physiology related to blood /osmosis /diffusion. (1½)

4. Perform the given physiology experiment, write the procedure and show it to the examiner such as identification of some food stuffs/presence of chloride or glucose in urine etc./Salivary Amylase/Blood. (2)

5. Identify the slides D & E giving two reasons for each identification. (2)

6. Identify and classify the specimens F to I upto orders. Write a short note on habitat of F, special feature of G, feeding habit of H and economic importance of specimen I. (4½)

7. Viva-voce. (2)

8. Note book and Project Report. (2)

****

BIOCHEMISTRY

B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021

SEMESTER-III

INSTRUCTIONS FOR PAPER SETTER AND STUDENTS:

1. Total No. of questions will be nine. All questions carry equal marks.
2. Q. No. 1 will be compulsory. It will consist of short questions covering the entire syllabus.
3. Besides question Number 1, there will be 4 sections of 2 questions each.
4. All other questions may contain 2-3 parts.
5. Questions should be uniformly spread over the entire syllabus.
6. Students will be required to attempt 5 questions in all including Q. No. 1 and at least one question from each of the 4 sections.

Paper A: Carbohydrate & Lipid metabolism **Marks: 45+5**

Objective: To learn about digestion and absorption of carbohydrates and lipids and major metabolic pathways pertaining to them.

SECTION-I

(Lectures 8)

Metabolic pathways of carbohydrates, glycolysis and alcoholic fermentation, the pentose phosphate pathway, metabolism of fructose, galactose, TCA cycle and pyruvate dehydrogenase complex.

SECTION-II

(Lectures 8)

Glucuronate and glyoxylate pathway, gluconeogenesis,cori cycle, glycogenolysis & glycogenesis, biosynthesis of starch and ascorbic acid.

SECTION-III

(Lectures 7)

beta-Oxidation of fatty acids including odd chain fatty acids. Alpha and omega oxidation of fatty acids. Formation and utilization of ketone bodies. Biosynthesis of saturated and unsaturated fatty acids.

SECTION-IV

(Lectures 7)

Biosynthesis and degradation of phospholipids and triglycerides.Cholesterol biosynthetic pathway. Biosynthesis of cerebrosides; sulfatides and gangliosides. Biosynthesis of prostaglandins, thromboxanes, leukotrienes, lipooxins and prostacyclins.

Books:

1. Biochemistry by LubertStryer, Ed.7th 2013, W.F. Freeman and Co., New York.
2. Lippincott's Illustrated Reviews: Biochemistry by P.C.Champe, R.A. Harvey& D.R. Ferrier, Indian Edition, 2005.
3. Harper's Illustrated Biochemistry by R.K. Murray, P.A. Mayes, D.K. Grannerand V.W. Rodwell, 29th Ed. 2012, Prentice Hall International Ltd. (U.K.).
4. Voet D and Voet JG. Biochemistry 4th Edition, John Wiley and Sons Inc., 2011.

Paper B: Protein & Nucleic acid metabolism **Marks: 45+5**

Objective: To learn major metabolic pathways pertaining to nitrogenous compounds proteins & nucleic acids.

SECTION-I

(Lectures 6)

Digestion & absorption of proteins, nitrogen balance, general reactions of amino acids: deamination, transamination and decarboxylation. Urea cycle.

SECTION-II

(Lectures 8)

Catabolism of carbon skeletons of amino acids: glycine, alanine, serine and threonine, phenylalanine and tyrosine, tryptophan, histidine, leucine, valine and isoleucine, cysteine and methionine, lysine, glutamic acid and glutamine, aspartic acid and asparagine.

SECTION-III

(Lectures7)

Biosynthesis of nutritionally non-essential amino acids : glutamate and glutamine, aspartate and asparagine, proline, alanine, cysteine & selenocysteine, tyrosine, serine, glycine. conversion of amino acids to specialized products : polyamines, catecholamines, glutathione, creatinine, melanin, serotonin.

SECTION-IV

(Lectures 9)

Nucleic Acids

Degradation and biosynthesis of purines and pyrimidines nucleotides, salvage pathway, formation of deoxyribonucleotides, biosynthesis and degradation of heme. Disorders of purine & pyrimidine metabolism, anticancer drugs.

Books:

1. Biochemistry by LubertStryer, Ed.7th 2013, W.F. Freeman and Co., New York.
2. Lippincott's Illustrated Reviews: Biochemistry by P.C.Champe, R.A. Harvey & D.R. Ferrier, Indian Edition, 2005.
3. Harper's Illustrated Biochemistry by R.K. Murray, P.A. Mayes, D.K. Granner and V.W. Rodwell, 29th Ed. 2012, Prentice Hall International Ltd. (U.K.).
4. Voet D and Voet JG. Biochemistry 4th Edition, John Wiley and Sons Inc., 2011.

PRACTICALS: **Marks : 25**

One Practical of three hours per week

1. Separation of serum and plasma.

2. Estimation of blood glucose by the methods of (i) Folin Wu (ii) Nelson Somogyi.

3. Separation and identification of amino acids by Paper chromatography

4. Seperation of lipids by Thin layer chromatography.

5. Estimation of Ca2+ in serum.

6. Estimation of total cholesterol in serum.

7. Estimation of total lipids in serum by Vanillin method.

8. Estimation of pyruvic acid.

9. Estimation of creatinine

10.Colorimetric estimation of inorganic phosphate

BIOCHEMISTRY

B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-2021
SEMESTER-IV

INSTRUCTIONS FOR PAPER SETTER AND STUDENTS:

1. Total No. of questions will be nine. All questions carry equal marks.
2. Q. No. 1 will be compulsory. It will consist of short questions covering the entire syllabus.
3. Besides question Number 1, there will be 4 sections of 2 questions each.
4. All other questions may contain 2-3 parts.
5. Questions should be uniformly spread over the entire syllabus.
6. Students will be required to attempt 5 questions in all including Q. No. 1 and at least one question from each of the 4 sections.

Paper A: Advanced Biochemical Techniques **Marks: 45+5**

Objective: To understand the principles and applications of cell biology techniques, spectroscopic, radioisotopic & spectrometry techniques.

SECTION-I

(Lectures: 8)

General Laboratory Techniques:

Membrane/ultra filtration, dialysis, diffusion, surface tension, viscosity and their applications to biological systems. Cell biology techniques: microbial, animal and plant cell/tissue culture, cell disruption/homogenization/sonication, cell sorting, cell counting, cryopreservation.

SECTION-II

(Lectures: 6)

Fluorescence spectroscopy: principle, applications of fluorescence activated cell sorting (FACS), different fluorescence in situ hybridization (FISH), fluorescence immunoassay.

SECTION-III

Radio isotopic techniques: **(Lectures: 10)**

Nature of isotopes and radioisotopes. Radioactive decay. Properties of radioactive emissions. Units of radioactivity. Techniques used to measure radioactivity; GM counter and liquid scintillation counting and gamma counter. Labelling of biochemical compounds and autoradiography. Use of radioactive tracers in the study of enzyme reaction mechanisms and metabolic pathways. Radioimmuno assay. Biological hazards of radiation and safety measures in handling radioisotopes.

SECTION-IV

(Lectures: 6)

Nuclear magnetic resonance (NMR) and Electron spin resonance (ESR) : theory, applications. atomic spectrometry; mass spectrometry: matrix assisted desorption ionization (MALDI)

Books Suggested:

1. Biochemical Techniques – Theory and Practice by John. F. Robyt and Bernard J. White Cole Publishing Co. (U.S.A.).
2. Physical Biochemistry: Application to Biochemistry and Molecular Biology by David Freifelder W.H. Freeman and Company (U.S.A.).
3. A Biologist's Guide to Principles and Techniques of Practical Biochemistry by K.H. Goulding and Keith Wilson, Edward Arnold (U.K.), Ltd.

Paper B: Membrane Biochemistry **Marks: 50**

Objective: to make students aware of structural and functional aspects of membranes. Highlighting the significance of their compositional heterogeneity and to various cell functions.

SECTION-I

(Lectures 7)

Introduction: membrane structure and organization: physical and biological models of membranes structure. Protein- lipid interactions in membranes, fluid mosaic model of membrane structure, its merits and demerits. Constituents of biological membranes in prokaryotes and eukaryotes. Asymmetry of biomembranes. Structure of RBC membrane.

SECTION –II

(Lectures 7)

Membrane dynamics: Physical properties of membrane lipids, membrane fluidity, Phase transitions, cytological biochemical probes and methods to study membrane fluids. Membrane transport: Typical properties of membrane transport, passive diffusion, facilitative diffusion, Carrier mediated active transport. Role of Na, K- ATPase.Ca-ATPase & H^+-ATPase. Ionophores and siderophores, structure and functions.

SECTION –III

(Lectures 8)

Membrane analysis: isolation and characterization of cell membrane, criteria of membrane purity. Solubilization of membranes and their reconstitution. Labeling of membrane probes and determination of transbilayer distribution of membrane components. Liposomes: unilamelar and multilamelar vesicles. Methods of their preparation, characterization and their applications in targeting drugs and gene therapy.

SECTION –IV

(Lectures 8)

Biogenesis and turnover of membranes: Synthesis of membrane components and their trafficking, signal hypothesis, coated vesicles. Regulation and coordination of membrane component synthesis. Membrane disorders: erythrocyte deformities, transport disorders. Disorders of membrane lipids

Books Suggested

1. Jain, MK. Introduction to Biological membranes, John Wiley and sons New York, 1988
2. Vance, DE & Vance JE, Biochemistry of lipids and Biomembranes, Benzamin Cummings, 1985
3. Jones MN & Chapman D. Micelles monolayers and biomembranes, Wiley-Lis New York, 1995
4. Lodish H. Molecular Cell biology, WH Freeman and Company, 2013
5. Various review articles.

PRACTICALS: **Marks : 25**

One Practical of three hours per week

1. Electrophoresis of nucleic acids.
2. Gram staining of cells.
3. Cell fractionation and cell isolation estimation of marker enzyme
4. Paper chromatography of carbohydrates.
5. Cell counting/counting viability.
6. Demonstration of hypotonic ,hypertonic and osmotic media.
7. Preparation of starch from potato and its hydrolysis by salivary amylase.
8. Haemocytometer

****

MICROBIOLOGY

B.Sc. (GENERAL) SECOND YEAR (3rd and 4th Semester) EXAMINATION, 2020-2021

Note: 1. A student who has passed the + 2 examination under 10+2+3 system of education of a recognized University/Board/Council or any other examination recognized by the Panjab University as equivalent thereto shall be eligible to offer the subject of Microbiology at the B.Sc. level, if he/she has passed the +2 examination with Physics, Chemistry, Mathematics, Biology as his/her subjects.

2. Only such colleges which have all necessary infrastructure or equipment and staff shall admit students to the subject of Microbiology. The infrastructure must be approved by the University as per usual practice.

SEMESTER-III

Scheme of Examination		Duration	Marks
THEORY		**6** hrs	75 (33+33+9*)
MIC 301:	**Introduction to Medical Microbiology-I**	3 hrs.	37.5 (33+4.5*)
MIC 302 :	**Introductory Immunology – I**	3 hrs.	37.5 (33+4.5*)
PRACTICAL			
One Practical examination pertaining to the entire syllabus included in Theory Papers MIC 301 and MIC 302		3 hrs	25 (22+3*)

Semester IV

THEORY		6 hrs	75 (33+33+9*)
MIC 401:	**Introduction to Medical Microbiology-II**	3 hrs.	37.5 (33+4.5*)
MIC 402 :	**Introductory Immunology –II**	3 hrs.	37.5 (33+4.5*)
PRACTICAL			
One Practical examination pertaining to the entire syllabus included in Theory Papers MIC 401 and MIC 402		3 hrs	25 (22+3*)

Note : * Denotes marks for the Internal Assessment.

MICROBIOLOGY
SEMESTER-III

MIC 301 : INTRODUCTION TO MEDICAL MICROBIOLOGY-I

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Brief introduction to terminology of infectious diseases, Frequency of disease, Recognition of infectious disease, Infectious disease cycle.

Section B

Nomenclature and classification of microbes of medical importance, criteria of classification

Section C

Microbial adherence, Active penetration into body, Passive penetration into body, Microbial production of enzymes in the body

Section D

Development of chemotherapy, General characteristics of antimicrobial drugs, Determining level of antimicrobial activity, Mechanism of action of antimicrobial drugs, Factors influencing the effectiveness of antimicrobial drugs.

Recommended Books :

1. Bergey's Manual of Systematic Bactriology. Vol-I (2001), The Archae and the Deeply Branching Phototrophic Bacteria, David, R. Boone and Richard, W. Castenholz (author) George Garrity (editor).

2. Prescott, L.M., Harley, J.P., Klein, D.A. (2002), Microbiology, Mc Graw Hill.

3. Tortora, G.J., Funke, B.R., Case C.L (2004), Microbiology, An Introduction, Pearson Education.

4. Mims, C., Playfair J., Roitt I., Wakelin D., Williams R., (2000), Medical Microbiology , Mosby, London, St. Louis.

MIC 302 : INTRODUCTORY IMMUNOLOGY-I

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Introduction and history of immunology, Non-specific defence; Physical barriers, Chemical barriers, Cellular, Phagocytosis, Inflammatory barriers, Inflammation, Fever, Types of Immunity, Active and Passive Immunity, Immunological memory

Section B

Humoral Immune Response, Antibodies/ Immunoglobulins, Structure, function and type of antibodies

Section C

Cell Mediated Immune System (CMI), Mechanism of CMI, Types of effector T cells, Helper T cells, Suppressor T cells, Cytotoxic T cells, Killer T cells, Interactions between T and B lymphocytes

Section D

Antigen-antibody interactions,: Precipitation reaction, Immunodiffusion test, Counter current Immuno electrophoresis, Complement fixation tests

Recommended Books :

1. T.J. Kindt, R.A.G.B.A. Osborne, J. Kuby (2006), Immunology, W.H. Freeman and Company, USA.
2. N.Shetty (2005), Immunology, Introductory Text Book, New Age International (P.) Limited, (Formerly Wiky Eastern Limited).
3. Paul, W.E (2008), Fundamental Immunology, Lippincott Williams & Wilkins.
4. Roitt, I.M., Brostoff, J., Male D.K. (2001), Immunology, Illustrated Publishers, Mosby.
5. Lydyard, P.M., Whelan, A., Fanger, M.W. (2003), Instant Notes in Immunology, Viva Books Private Limited.
6. Kannan, I. (2007), Immunology, M.J.P. Publishers.
7. Hannigan, B.M. (2008), Immunology, Viva Books Private Limited.

MICROBIOLOGY
PRACTICAL
B.Sc. (GENERAL) SECOND YEAR EXAMINATION
Semester-III

MAX. MARKS: 25 MARKS
PRACTICAL: 22 MARKS
INTERNAL ASSESSMENT: 3 MARKS
TIME: 3 HRS.

1 Staining- Gram staining, Albert and ZNCF staining
2 Isolation and maintenance of pure cultures
3 Physiological characteristics of bacteria and its use for their identification
4 Assay of antimicrobials
5 Preparation of serum/plasma

MICROBIOLOGY
B.Sc. (GENERAL) SECOND YEAR EXAMINATION
MIC 401 : INTRODUCTION TO MEDICAL MICROBIOLOGY-II

Semester IV

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Virulence and mode of transmission, Emerging and reemerging infectious diseases, Global travel and health considerations, Nosocomial infections

Section B

Origin of normal flora, Germ free and gnotobiotic life, Distribution and occurrence of Normal flora of skin, eye, respiratory tract, mouth, intestinal tract and genitourinary tract

Section C

Events in infection following penetration, Microbial virulence factors

Section D

Antibacterial drugs viz. sulphonamides, Quinolones, Penicillins, Cephalosporins, Tetracyclines, Erythromycin, and Chloramphenicol, Drug resistance, Antifungal and antiviral drugs

Recommended Books :

1. Bergey's Manual of Systematic Bactriology. Vol-I (2001), The Archae and the Deeply Branching Phototrophic Bacteria, David, R. Boone and Richard, W. Castenholz (author) George Garrity (editor).

2. Prescott, L.M., Harley, J.P., Klein, D.A. (2002), Microbiology, Mc Graw Hill.

3. Tortora, G.J., Funke, B.R., Case C.L (2004), Microbiology, An Introduction, Pearson Education.

MICROBIOLOGY
B.Sc. (GENERAL) SECOND YEAR EXAMINATION
MIC 402 : INTRODUCTORY IMMUNOLOGY-II

Semester IV

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Primary and secondary lymphoid organs, Mucosa associated lymphoid tissues (MALT), Cutaneous associated lymphoid tissues (CALT), Lymphocyte traffic, Cells of Immune system, Antigens; Factors affecting Immunogenicity, Epitopes, Haptens

Section B

Antigenic combining regions of antibodies, Factors influencing antibody production, Genetic model, Multigene organisation, Generation of antibody diversity

Section C

Cytokines, Lymphokines, Colony stimulating factors, Tumour necrosis factors, Interferons, Accessory cells (Macrophages), the complement system, Classical and alternate pathway, HLA, Monoclonal antibody technology and its applications

Section D

Antigen-antibody Interactions: Widal test, Wasserman's test, Weil-Felix reaction, Western blotting, Types of Vaccines

Recommended Books :

1. T.J. Kindt, R.A.G.B.A. Osborne, J. Kuby (2006), Immunology, W.H. Freeman and Company, USA.
2. N.Shetty (2005), Immunology, Introductory Text Book, New Age International (P.) Limited, (Formerly Wiky Eastern Limited).

ELECTRONICS

(KEPT IN ABEYANCE)

****

AGRICULTURE

B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATIONS, 2020-2021

SEMESTER-III

Paper – III : Agricultural Diversification and Machinery

Max. Marks	:	75 Marks
Theory	:	70 Marks
Internal Assessment	:	5 Marks
Time	:	3 Hours

Period per week : 1. Theory – Six of 45 minutes duration each.
2. Practical – Two of three hours duration.

INSTRUCTIONS FOR THE PAPER SETTER AND THE STUDENTS :

1. The syllabus of this paper has been diveided into Four Units.
2. Question paper shall comprise of 9 questions in all.
3. Question 1 shall comprise of 10 short answer type questions covering the whole syllabus and will be **compulsory**. Each question will carry 1 (one) mark.
4. Units I, II, III and IV shall have two questions each from respective units, out of which one question from each unit is to be attempted. Each question will be of 15 (fifteen) marks.
5. Total five questions are to be attempted.

Unit-I

Agricultural aid on works :
Dairy
Poultry
Fishery
Mushroom Cultivation
Animal Husbandry
Bee Keeping

Unit-II

Maintenance of grassy lawns and flower beds.
Raising of winter and summer ornamental flowers (rose, gladioli, dahlias, dianthus, foliage plants).
Fundamentals of landscape of an educational institute, factory, panchayat lands and office buildings.

Unit-III

Introduction to medicinal, aromatic and spice plants.
Growing of non-conventional plants.
Basic idea of Gentically Modified crops.
Fundamentals of land measurements and land revenue.

Unit-IV

Important parts of the tractor, combine, thresher and their maintenance.
Study of various agricultural tools and implements.

PRACTICAL

Max. Marks	:	25 Marks
Practical	:	20 Marks
Internal Assessment	:	5 Marks
Time	:	3 hours

Visit to Poultry Farms, Fish Ponds, Apiary, Dairy Farms
Raising various ornamental flowers of different seasons
Maintenance of grassy lawns
Study the parts of engines, tractor and combine

Books :

1. Agriculture Engineering Vol.I and Vol. II, A. M. Michae, T.P. Ojha, 2006, Jain Brothers, New Delhi.
2. Mushroom Growing, 1997, H. S. Garcha, P. A. U., Ludhiana.
3. Hand Book of Agriculture, 2008, ICAR, New Delhi.
4. Farm Machinery, An Approach, S.C. Jain and Grace Philips, 2006, Standard Publishers, Distributors, New Delhi.
5. Fundamentals of Dairy Chemistry, Wong, Jenness, Keeney and Marth, 1998, CBS Publishers and Distributors, New Delhi.
6. Milk and Milk Products, Clarence Henry Eckles, Willes Barnes Combs and Harold Macy, Delhi, 2006, Tata McGraw Hill Publishing Company Limited, New Delhi.
7. Introduction to Plant Biotechnology, H. S. Chawla, 2008, Oxford and IBH Publishing Company Pvt. Ltd., New Delhi 2.
8. Plant Biotechnology, B. D. Singh, 2009, Kalyani Publishers, Ludhiana.
9. Aquarium and Fish Keeping, C. B. L. Srivastava, 2006, Kitab Mahal Allahabad.

11. Spices and Condiments, J. S. Pruthi, 2008, National Book Trust, New Delhi.

AGRICULTURE

B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATIONS, 2020-2021
SEMESTER-IV

Paper – IV : Cultivation Practices of Vegetables, Timber and basic statistical methods

Max. Marks	:	75 Marks
Theory	:	70 Marks
Internal Assessment	:	5 Marks
Time	:	3 Hours

Period per week : 1. Theory – Six of 45 minutes duration.
2. Practical – Two of three hours duration.

INSTRUCTIONS FOR THE PAPER SETTER AND THE STUDENTS :

1 The syllabus of this paper has been divided into four units.

2 Question paper shall comprise of 9 question in all.

3 Question 1 shall comprise of 10 short answer type questions covering the whole syllabus and will be **compulsory**. Each question will carry 1 (one) mark.

4 Units I, II, III and IV shall have two questions each from respective Units, out of which one question from each unit is to be attempted. Each question will be of 15 (fifteen) marks.

5 Total five questions are to be attempted.

Unit – I

Tillage, Fundamentals and Principles of Tillage, Zero Tillage, Tillage Implements.

Unit – II

Cultivation Practices of Potato, Tomato; Bhindi, Cabbage; Onion and Asparagus

Unit – III

What are Timbers and Lumbers ?
Raising of Dalbergia; Tectona; Poplar; and Eucalyptus

Unit- IV

Statistical Methods for Agricultural workers including Mean, Mode, Median, Chi-Square, Standard Deviation.

PRACTICAL

Max. Marks	:	25 Marks
Practical	:	20 Marks
Internal Assessment	:	5 Marks
Time	:	3 hours

Visit to Agricultural Farms for Fundamental Aspects of Tillage
Raising Forest Nursery
Cultivation of Seasonal Vegetables
Numerical Problems of Statistics

Books :

1. Principles of Agronomy**,** T. Yellamanda Reddy and G. H. Sankara Reddy, 2008, Kalyani Publishers, Ludhiana.

2. Statistical Methods for Agricultural Workers, V.G. Panse and P.V. Sukhatme, 1997, ICAR, New Delhi.

3. Modern Techniques for Raising Field Crops, Chidda Singh, Prem Singh and Rajbir Singh, 2009, Oxford and IBH Publishing Co. Pvt. Ltd., New Delhi.

4. Vegetable Crops of India, P.C. Das, 1998, Kalyani Publishers, Ludhiana.

5. Potato Cultivation, 1998, Nandpuri and Kumar, P.A.U., Ludhiana.

HOME SCIENCE

B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATION, 2020-21
SEMESTER- III

Scheme of Examination

Theory						**Practical**				
Sr. No.	*Name of Paper*	*No. of Papers*	*Time in hrs.*	*Marks allotted*	*Int. Ass.*	*No. of Papers*	*Time in hrs.*	*Marks Allotted*	*Int. Ass.*	*Total Marks*
1.	Clothing & Textiles	1	3	45	05	1	3	45	05	100

Total : **100**

Note : 1. Each Practical group will have 12-15 students.

SEMESTER-III

CLOTHING & TEXTILE (THEORY)

Max. Marks : 50
Theory : 45
Int. Ass. : 05
Hours : 6 Hours per week

INSTRUCTIONS FOR THE PAPER SETTER :

The question paper will consist of five Sections: A, B, C, D and E. Sections A, B, C and D will have **two** questions from the respective sections of the syllabus and will carry 9 marks each. Section E will consist of objective type questions covering the entire syllabus uniformly and will carry 9 marks.

INSTRUCTIONS FOR THE CANDIDATES :

Candidates are required to attempt one question each from the Sections A, B, C & D of the question paper and the entire section E.

Note: 1. Internal assessment should be based on: Assignment/test/Seminars & Attendance for Theory & Practical.

2. Practical examination will be held before the final Theory Exams.

3. Practical group should have 12-15 students.

SECTION-A

1. Equipment & supplies used for Clothing construction - their use & care
2. Sewing Machine :
   (a) Parts of Sewing Machine and its accessories.
   (b) Common defects in sewing machine & their remedies.
   (c) Care of Sewing Machine.

SECTION-B

1. Recording of body measurements & care to be taken while taking body measurements.
2. Preparation of fabric for construction- shrinking and straightening.
3. Tools of Drafting, Steps involved in drafting from measurement to garment construction, points to be kept in mind while making a draft.
4. Terms used in construction i.e. Seam Allowance, Ease, Selvedge, Dart, Grain line, Stay stitching.

SECTION-C

1. Classification of textile fibres
2. Manufacture and Properties of fibres:
   Cotton, Silk, Wool, Nylon.

SECTION-D

1. Different types of yarns:

   Simple, Novelty and Textured Yarns.

2. Fabric Construction –

   (A) Weaving - Parts of a loom, Process of weaving & Types
   a. Simple weaves – Plain, Rib, Basket
   b. Twill weaves
   c. Satin weave & Sateen weave

   (B) Knitting, Felting and Bonding.

(SEMESTER-III)

CLOTHING & TEXTILE (PRACTICAL)

Maximum Marks : 50
Paper : 45
Internal Assessment: 05
Time : 6 Hours per week

1. Make samples of the following :
   (a) Tacking, running stitch, hemming, Back Stitch, Fasteners using buttonhole stitch
   (b) Seams—Flat seam, Counter hem, Mantua maker, French Seam & Run & Fell seam.
   (c) Processes—Continuous wrap, two piece placket opening, pleats, gathers into a band, tucks.
   (d) Joining- shaped facing on V neck line & piping on round neck.

2. Embroidery—any "10" fancy stitches.

3. Drafting of the following:
   (a) Jangia
   (b) Bloomer
   (c) Child's bodice block
   (d) Sleeve- Plain sleeve, Puff sleeve
   (e) Collars- Baby, Cape & Peter Pan

4. Construction of following :
   (a) Jangia
   (b) Bloomer
   (c) Gathered frock with any sleeve and collar.

HOME SCIENCE

B.A./B.Sc. (GENERAL) SECOND YEAR EXAMINATION,2020-21
SEMESTER- IV

SEMESTER-IV

Scheme of Examination

Theory						**Practical**				
Sr. No.	*Name of Paper*	*No. of Papers*	*Time in hrs.*	*Marks allotted*	*Int. Ass.*	*No. of Papers*	*Time in hrs.*	*Marks Allotted*	*Int. Ass.*	*Total Marks*
1.	Clothing & Textile	1	3	45	05	1	3	45	05	100

Total : **100**

Note : 1. Each Practical group will have 12-15 students.

SEMESTER-IV

CLOTHING & TEXTILE (THEORY)

Max. Marks : 50
Theory : 45
Int. Ass. : 05
Hours : 6 Hours per week

INSTRUCTIONS FOR THE PAPER SETTER :

The question paper will consist of five Sections : A, B, C, D and E. Sections A, B, C and D will have **two** questions from the respective sections of the syllabus and will carry 9 marks each. Section E will consist of 8 objective type questions covering the entire syllabus uniformly and will carry 9 marks.

INSTRUCTIONS FOR THE CANDIDATES :

Candidates are required to attempt one question each from the Sections A, B, C & D of the question paper and the entire section E.

SECTION-A

1. Elements of art such as colour, form, texture, shape and line
2. Principles of design such as Harmony, Balance, Rhythm, Emphasis, Proportion in relation to clothing

SECTION-B

1. Introduction to Fashion, Fad and Style.
2. Selection of suitable clothes for following age groups :
   Infants, Toddlers, School going children, Adolescents, Adults, Elderly.
3. Care & Storage of garments of cotton, wool, silk.

SECTION-C

1. Bleaches- Oxidising, reducing bleaches & their suitability to different fabrics.
2. Finishing- types & importance. Different Finishes- Sizing, Desizing, Calendering, Sanforising, Mercerization, Crease resistant, Water proof & Water repellent, Flame resistant & Flame proof.

SECTION-D

1. Application of colour on fabrics
   (a) Dyeing-Simple dyeing of cotton
   (b) Resist-Tie, Dye and Batik
2. Printing-Block printing, screen printing, roller printing
3. Methods of Laundry/Washing.

(SEMESTER-IV)

CLOTHING & TEXTILE (PRACTICAL)

Maximum Marks : 50
Paper : 45
Internal Assessment: 05
Time : 6 Hours per week

1. Laundry :
   a) Testing of cotton, wool silk and nylon by burning test.
   b) Stain Removal : Rust, Coffee, Tea, Paint, Nail Polish, Lipstick, Perfume, Blood, Boot Polish, Ink (Ball Pen), Curry and Juice.
2. Laundry & finishing of following garments :
   * Cotton : Salwar, Kameez.
   * Synthetic : Gathered Frock/Pleated Skirt.
   * Woollen : Cardigan/Pullovers.
   * Spot cleaning of a Shawl.

3. Preparation of samples of Tie and Dye & Block Printing.
4. Drafting and construction of the following garments:
   a. Petticoat
   b. Lady's kameez and salwar
5. Project on Care Labels of Garments or Market survey of Laundry Products.

Reference Books :

INTRODUCTION TO COMPUTER SCIENCE

(Additional Optional Subject)

Note : The students with no background of Computer knowledge will opt for Module 1 while those familiar with the use of Computer system at the operating system level and application level, may opt either Module II or Module III

Course Duration for each semester: 60 hours for Theory and 60 hours for Practical

Sr. No.	Paper	Name of Paper	Lectures per week		Max. Marks			Exam. Hours
		Third Semester			Ext.	Int.		
1	A	Programming In C++	6		25	5	30	3
2	C	Practical on Paper – A	6		-	-	20	3
		Fourth Semester						
3	B	Web Applications And Java	6		25	5	30	3
4	D	Practical on Paper – B	6		-	-	20	3

THIRD SEMESTER

Paper – A
Paper Title : Programming in C++

Max. Marks : 25 **Time : 3 Hrs.**

Theory : Ext. 25 + Int. 5 = 30
Practical : Ext. 20 -- = 20

Total Periods (6 Periods/week): 60

Objective: The course enables the students to get familiar with the features of Object Oriented programming language and develop programs using different concepts.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. **Concepts of Object Oriented Programming**: Object, Class, Encapsulation, Data hiding, Inheritance, Polymorphism. Analysis and design of system using object oriented approach
2. **Introduction to C++**: Structure of a C++ Program, Include files, Declaration of an object, main function, I/O streams.
3. **Introduction to Classes:** Class Declaration, Data Members, Member Functions, Private and Public members, data hiding and encapsulation.

UNIT - II

4. **Classes and Objects**: Member Function definition inside the class declaration and outside the class declaration, Scope resolution operator, Private and Public member function, Nesting of Member functions. Creating Objects, Accessing class data members, Accessing member functions, Arrays of Objects, Objects as function arguments: Pass by value, Pass by Reference, Pointers to Objects.

UNIT - III

5. **Constructors**: Declaration and Definition, Default Constructors, Parameterized Constructors, Copy Constructors. Destructors: Definition and use
6. **Polymorphism**: Function Overloading, Operator overloading, virtual functions.
7. **Inheritance**: Extending Classes, Concept of inheritance, Base class, Derived class, Defining derived classes, Visibility modes: Private, Public, Protected; Single inheritance: Privately derived, Publicly derived; Making a protected member inheritable, Access Control to private and protected members by member functions of a derived class, Multilevel inheritance, Nesting of classes.

UNIT - IV

8. **Data Structures**: Basic Concepts and notations, introduction to Complexity, Data Structure operations, applications of Data Structure ;
9. **Arrays**: Introduction, Types of Array, Memory representation, applications and operations.
10. **Linked List**: introduction, declaration, operations:-traversing, searching, inserting, deleting; Introduction to circular list.
11. **Stacks:** Array representation of a stack, operations- initialization, push, pop, empty, and full; applications;
12. **Queue**: introduction, memory representation, operations- add, remove, initialization; applications ;

Paper – C : Practical on Paper - A

Total Periods (6 Periods/week): 60 Max Marks: 20 Exam Hours: 4

Note for the Paper setter: Paper will be set at the time of examination. Due weightage may be given to the practical note-book and assignments.

INTRODUCTION TO COMPUTER SCIENCE
FOURTH SEMESTER

Paper B
Paper Title: Web Applications and JAVA

Max. Marks : 25 **Time : 3 Hrs.**

Theory	: Ext. 25 + Int. 5	= 30
Practical	: Ext. 20 --	= 20

Total Periods (6 Periods/week): 60

Objective : To familiarize students with basic concepts of Networking, HTML, JAVA Scripts and to enable them write programs in JAVA.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. Networking: Definition, Network hardware and Software, Network Topologies, Types and uses of Computer Networks, Brief Introduction to OSI reference model and TCP/IP reference Model. Internet, WWW, URL, Introduction to Search engines.

2. **HTML**: Introduction to HTML, Building blocks of HTML, lists, links, images, tables, frames, forms, Introduction to cascading style sheets (CSS) defining and applying CSS.

UNIT - II

3. **Java Script**: Features, tokens, data types, variables, operations, control constructs, strings arrays, functions, core language objects, client side objects, event handling. Applications related to client side form validation.

4. **Fundamentals of Java**: Java Vs. C++, Byte code, Java virtual machine, constants, variables, data types, operators, expressions, control structures, defining class, creating objects, accessing class members, constructions, method overloading.

UNIT - III

5. **Arrays, String handling Inheritance**: Basics, member access, using super to call super class constructors, creating a multi level hierarchy, method overriding, Dynamic method dispatch, using abstract classes, using Final.

6. **Packages and Interfaces**: Defining a package, understanding CLASSPATH, Access protection: Importing packages, Interfaces: Defining an Interface, Implementing. Interfaces, Applying, Interfaces, Variables in Interfaces. Exception Handling: Fundamentals, exception types, using Try and catch, Multiple Try and Catch clauses, Nested Try statements, Built – in exceptions.

UNIT - IV

7. **Multi-threaded Programming**: The Java Thread model, Thread priorities, synchronizations, messaging. The thread class and runnable Interface, The Main Thread: Creating a Thread, Implementing Runnable, Extending Thread, creating Multiple Threads, Thread Priorities; synchronizations: Methods, statements, Inter Thread communication, Deadlock, suspending, Resuming and stopping Threads
8. **Applet Programming**: Applet fundamentals: Local and remote applets, Applet Life Cycle, Creating an executable Applet, Applet tag, Adding Applet to a HTML file, Passing parameters to Applets

OUTLINES OF TESTS, SYLLABI AND COURSES OF READING IN VARIOUS SUBJECTS FOR B.A./B.Sc. (GENERAL) THIRD YEAR (SEMESTER SYSTEM) i.e. FIFTH SEMESTER NOVEMBER/DECEMBER 2020 AND SIXTH SEMESTER APRIL/MAY 2021, EXAMINATIONS.

ENGLISH (Compulsory)
(For B.A. Candidates Only)
SEMESTER V

Max. Marks	:	50
Written	:	45 Marks
Int. Ass.	:	05 Marks
Time	:	03 Hours

Note:

(i) The paper shall be divided into two sections i.e **section A & B.** The distribution of marks in each section shall be indicated separately against the questions.

(ii) Section A shall deal with the text and Section B with composition and grammar.

(iii) The questions should be set strictly in accordance with the pattern of question paper outlined in the syllabus.

Text Prescribed:

INSIGHTS: A Course in English Literature and Language (by K. Elango, Hyderabad: Orient Blackswan), **Panjab University Edition.**

Unit I to III (Unit II- Chapter 'Emotional Intelligence' deleted)

Section-A (Poetry & Prose)

Q.1. Reference to the context only from Poetry. **One** out of **two** given stanzas **5 marks**

Q.2. The examiner will set **eight** short questions from Poetry & Prose Sections of the prescribed text, out of which a student shall be expected to attempt only **five** selecting, at least, **two** from each section (to be answered in not more than 60-80 words). These questions may be drawn from each of the units given in the text **10 Marks**

Q.3. The examiner shall set ***four*** questions (on the pattern of questions for **Critical Analysis** suggested in the prescribed text) again from *Poetry & Prose* Sections of the text, out of which a student is expected to attempt only ***two*** selecting, at least, **one** from each section (to be answered in not more than 150-180 words), The questions should be chosen in such a manner that all the units given in the text are covered**.** **10 Marks**

Section-B (Composition & Grammar)

Q.4. Write an essay (in not more than 500 words), choosing one topic out of the given **four**. A wide range of topics should be given and in this respect ideas may be drawn from the prescribed text. **10Marks**

Q.5. (a) Antonyms –***ten*** out of ***fifteen*** **. 5 Marks**

(b) Correct the sentences- ***ten*** out of ***fifteen.*** **5 Marks**

……..

ENGLISH (Compulsory)
(For B.A. Candidates Only)
SEMESTER VI

Max. Marks	:	50
Written	:	45 Marks
Int. Ass.	:	05 Marks
Time	:	03 Hours

(i) The paper shall be divided into two sections i.e **section A & B.** The distribution of marks in each section shall be indicated separately against the questions.
(ii) Section A shall deal with the text and Section B with composition and grammar.
(iii) The questions should be set strictly in accordance with the pattern of question paper outlined in the syllabus.

Text Prescribed:

INSIGHTS: A Course in English Literature and Language (by K. Elango, Hyderabad: Orient Blackswan) , **Panjab University Edition.**

Unit IV-VI
Section-A (Poetry & Prose)

Q.1. Reference to the context only from Poetry. **One** out of **two** given stanzas. **5 marks**

Q.2. The examiner will set **eight** short questions from Poetry & Prose Sections of the prescribed text, out of which a student shall be expected to attempt only **five**, selecting, at least, **two** from each section (to be answered in not more than 60-80 words). These questions may be drawn from each of the units given in the text **10 Marks**

Q.3. The examiner shall set ***four*** questions (on the pattern of questions for **Critical Analysis** suggested in the prescribed text) again from *Poetry & Prose* Sections of the text, out of which a student is expected to attempt only ***two*** selecting at least, **one** from each section (to be answered in not more than 150-180 words), The questions should be chosen in such a manner that all the units given in the text are covered**.** **10 Marks**

Section-B (Composition & Grammar)

Q.4.A question on Précis writing shall be set, without any internal choice. For this purpose, the passage chosen should be simple, lucid and coherent and must not exceed 240-250 words. **10 Marks**

Q.5 (a) Idioms and Phrases to be used in sentences. ***ten*** out of ***fifteen*** **5 marks**

(b) One word substitution – ***ten*** out of ***fifteen*** **5 Marks**

HISTORY AND CULTURE OF PUNJAB
(FOR B.A ONLY)
SEMESTER V

PAPER: HISTORY AND CULTURE OF PUNJAB: COLONIAL PERIOD

Objectives: To introduce the students to the history of the history of the region and the impact of colonial rule.

Pedagogy: Lectures, library work and discussions.

INSTRUCTIONS FOR THE PAPER –SETTER AND CANDIDATES:

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 10 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type questions carrying 5 marks i.e. 1 marks for each. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit-IV in all. Each question will carry 10 marks.

2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. **One question from Unit-IV shall be set on the map.**

Explanation:

1. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
2. The distribution of marks for the map question would be as under:

Map	:	6 Marks
Explanatory Note	:	4 Marks

   In case a paper setter chooses to set a question of map on important historical places, the paper setter will be required to ask the students to mark 06 places on map of 01 marks each and write explanatory note on any 02 of 02 marks each.
3. The paper-setter would avoid repetition between different types of question within one question paper.

Paper:

Max. Marks	:	50
Theory	:	45
Internal Assessment	:	05
Time	:	3 Hours

ENGLISH (ELECTIVE)

SEMESTER V

Max.Marks 100
Written 90
Int. Assessment 10

Objective: The main aim of teaching English (Elective) to B.A.III students is to enable them to approach a wide variety of literary texts and genres with critically sensitive and analytical understanding.The idea is to introduce the students to the basic concepts of literature and also empower them to read, analyze and write about a poem, prose essay or drama in an independent manner. It is with this modest aim in mind that the new text books have been selected for B.A English Third Year (Elective) courses. The focus of the new text books is two-fold: to teach finer nuances of literature and language through an integrated approach; and to help and motivate for students to develop basic tools of analyzing a variety of literary texts/genres.

Note:

(i) There will be two semesters in all the three years of B.A English (Elective) courses. Rather than divide the papers vertically, there will be horizontal division in terms of texts, composition and grammar. As two books are prescribed for each course, these two books shall be distributed across two papers/semesters and shall not be included in the same paper/semester. So, **Modern Indian literature: Poems and Short Stories** shall figure in **Semester V** and **R.K.Narayan's The Guide** shall be included in **Semester VI.** Questions on composition and grammar shall, however, be included in Paper B/Semester VI. This is being done to help the students, who shall now find both the papers proportionately divided and so easily manageable.

(ii) Each theory Semester shall be of 90 marks, as 10 marks in each semester shall be reserved for internal Assessment. Each semester shall be further sub-divided into two sections i.e Section I & Section II. The mode of distribution of marks shall, however, vary from paper to paper. There shall be six questions in each semester. All the questions will be compulsory. Though internal choice may be offered in some of the questions, there will be no external choice.

(iii) Each paper shall include minimum 15 literary terms/concepts appropriate to the particular literary genre included in that paper.

(iv) The paper shall be divided into two sections i.e **section I & II .**

(v) Section I shall deal with the text and Section II with composition and grammar

(vi) The questions should be set strictly in accordance with the pattern of question paper outlined in the syllabus.

(vii) For the successful implementation of this syllabus, it is necessary that we reflect upon objectives of this course. First in our teaching practices and then in designing question paper/s and evaluating answer scripts of the students. The examination shall be held at the end of each semester as is recommended by the university from time to time.

Text Prescribed:

1. Modern Indian Literature: Poems and Short Stories, Edited by the Dept. of , University of Delhi, OUP, 2007 New Delhi.

Section I

(Literary terms/Concepts: *Literatures Indian Languages, Colonialism, Post-colonial, Multicultural Society: Orientalism, Hybridity, Ideology, Gender, Race, Class, Caste, Nation, Importance of Translation in India, Methods of Translation)*

Q.1. It shall be on literary terms/concepts. Eight terms shall be given in all and the students will be required to do *five.* 15 marks

Q.2 The examiner will set seven short questions (each to be answered in 60-80 words) based on Modern Indian Literature: Poems and Short stories out of which the students shall be required to attempt only *five.* 15 marks

Q.3. There will be three long questions, out of which two long questions are to be answered each in about 180-200 words. These questions shall be based on *Modern Indian Literature: Poems and Short Stories.* 15 marks

Section II

Q.4 Note-making (A passage of about 1000 words is to be given for this Purpose) 15 marks

Q.5. An unseen passage for Comprehension (about 1000 words again) With ten multiple choice questions is to be given. 15 marks

Q.6 Applied Grammar:

(a) 5 Pairs of words to be used in sentences. (altar/alter/compliment/complement etc.) (1x5=5 marks)

(b) First find one word for many and then use it in a sentence. 5 marks

(c) First change the form of nouns/verbs/adjectives and then make sentences. (1x5=5 marks)

……

   Recueil : *Premières poésies*
   Sonnet : Que j'aime le premier frisson d'hiver
   http://poesie.webnet.fr/lesgrandsclassiques/poemes

2. Victor HUGO
   Recueil : Les quatre vents de l'esprit
   Cent mille hommes, criblés d'obus et de mitraille
   http://poesie.webnet.fr/lesgrandsclassiques/poemes

3. Alphonse de LAMARTINE
   Recueil : *Méditations poétiques*
   L'Automne
   http://poesie.webnet.fr/lesgrandsclassiques/poemes

4. Théophile GAUTIER
   Premier sourire du printemps
   http://poesie.webnet.fr/lesgrandsclassiques/poemes/theophile_gautier
5. Jean-Baptiste CLEMENT
   Le temps des cerises
   http://poesie.webnet.fr/lesgrandsclassiques/poemes

Note: 1. The latest syllabus should be strictly followed.
2. Choice should be given in questions.

Text Books for Reference:

1. French Poetry for students by - A.W. Bains.
2. Paroles édition Folio by Jacques Prevert.
3. Le francais et la Vie-Tome III G. Mauger/M.Bruezier.
4. Collection Litteraire XIX & XX Siecle-Nouveaux classique Larousse.
5. Poèmes choisis-A de. Musset-edition-Nouveaux classique Larousse.
6. Les Textes français - XIX et XX Siècles. R. Chevalier P.Audiat, Hachette.

Courses of Reading :

Prose - Saison-3 (Units 5-9)Marie-Noëlle Cocton, Isabelle Cros, Carolino Mraz, Dorothée Dupleix (DELF), Delphine de Ripaud, Les Editions Didier, 2014.

N.B.: (1) The latest syllabus to be followed strictly and the question paper should be of B.A.III level.

(2) Choice in questions must be given.

(3) Eight periods of one hour weekly – Six hours for text and two hours for composition.

(4) The composition and the unseen passages should be based on the vocabulary and grammar covered till B.A. III.

(5) The paper will be set and answered in French (except Translation).

Note for Private Candidates: - The theory paper would be marked proportionately out of 70 as there is no internal assessment.

GERMAN (Elective)
Semester - V

Summary

Max. Marks :100 marks(Total)
Paper – A (Theory) : 90 marks
Internal Assessment: 10 marks

Paper A - Theory : **90 marks**

Time: 3 hours

Note: Use of dictionary is allowed

i. Explanation and interpretation of any **two** poems or **three** stanzas from the prescribed book "German Verse" (Kulkarni & Chapekar) : 30 marks

- i. Hyperions Schicksalslied (Hölderlin)
- ii. Der Karussel (Rilke)
- iii. Des Schiffers Traum (Arndt)
- iv. Der Zauberlehrling (Goethe)
- v. Ganymed (Goethe)
- vi. Einkehr (Uhland)

ii. Characterization / Literary questions (2) on the prescribed drama "Andorra" (Max Frisch) : 30 marks

iii. Translation of unseen text/s from German into English : 30 marks

5.2 **Internal Assessment** : **10 marks (Total)**

- Continuous Evaluation
- Attendance

Note:

1. The mode of evaluation for internal assessment is to be followed as per University guidelines.
2. For private candidates, Internal Assessment will be calculated proportionately to the marks obtained by the candidate in written examination and, wherever applicable, total of both written & oral examination (e.g. in Paper B)

Prescribed Textbook:

i. "German Verse" (Kulkarni & Chapekar)
ii. "Andorra" (Max Frisch)

……

GERMAN (Elective)

Semester - VI

Summary

Max. Marks: 100 marks (Total)
End-semester Exam Paper-B (Theory) : 60 marks
Oral (viva-voce) examination : 30 marks
Internal Assessment : 10 marks

Paper B - Theory		:	**60 marks (Total)**
	Time Note: Use of dictionary is allowed	:	3 hours
i.	Translation of unseen text/s from German into English	:	20 marks
ii.	Translation of unseen text/s from English into German	:	10 marks
iii.	Characterization / Literary questions (2 out of 3) on the prescribed novel "Der Verdacht" (Dürrenmatt)	:	30 marks
Oral (viva-voce) Examination		**:**	**30 marks (Total)**
i.	Conversation in German		
ii.	Reading of a simple unseen text and answering questions there-on.		
Internal Assessment		:	**10 marks (Total)**

- Continuous Evaluation
- Attendance

Note:

1. The mode of evaluation for internal assessment is to be followed as per University guidelines.
2. For private candidates, Internal Assessment will be calculated proportionately to the marks obtained by the candidate in written examination and, wherever applicable, total of both written & oral examination (e.g. in Paper B)

Prescribed Textbooks:

i. "Deutsche Texte zum Übersetzen", Max Hueber Verlag.
ii. "Der Verdacht" (Dürrenmatt)

……

Russian (Elective)
SEMESTER -V

Paper –Option (i) (General Translation & Grammar): Written
Maximum Time : 3 hrs.

Maximum Marks: 100
Theory : 90 Marks
Internal Assessment : 10 Marks
(For regular students)

1. Translation from simple Russian into English/Hindi/Punjabi. (about 120 words) 35 Marks
2. Translation from simple English/Hindi/Punjabi into Russian (about 100 words) 35 Marks
3. Applied grammar: 4 questions out of 6 (5 marks each) Cases(Nouns, Pronouns, Cases (Nouns, Pronouns, Adjectives, numerals (Singular and plural), Verb aspects, Direct and indirect narration, Verbal-adverbs, Participles, Gerund, Verbs of Motion (with and without prefixes). 20 Marks

Note: Use of dictionaries is allowed.

OR

Paper: Option(ii) (Scientific & technical Translation & Grammar): written
Maximum Time : 3 hrs.

Maximum Marks: 100
Theory : 90 Marks
Internal Assessment : 10 Marks
(For regular students)

1. Translation from simple Russian (Scientific & technical material) into English/Hindi/Punjabi. (about 120 words) 35 Marks
2. Translation from simple English/Hindi/Punjabi into Russian (about 100 words) 35 Marks
3. Applied grammar: 4 questions out of 6 (5 marks each) 20 Marks

   Cases (Nouns, Pronouns, Adjectives, numerals (Singular and plural), Verb aspects, Direct and indirect narration, Verbal-adverbs, Participles, Gerund, Verbs of Motion (with and without prefixes).

Note: Use of dictionaries is allowed.

Extra material to be provided by the department.

RUSSIAN (ELECTIVE)
SEMESTER -VI

Paper : Written (Literature)
Maximum Time : 3 hrs.

Maximum Marks : 100
Theory : 90 Marks
Internal Assessment : 10 Marks
(For regular students)

1. Biographies of Russian writers from prescribed text books **20 marks**
Biographies 2 out of 4 (10 marks each)

A.S.Pushkin
N.V.Gogol
A.P.Chekhov
M.Gorky
Leo Tolstoy
Chigiz Aitmatov
Konstantin Paustovsky

2. Literary works
(2 Question out of 4(10 marks each) on the following works: **20 marks**

Tolsti I Tonki:	A.P. Chekhov
'Belaya Raduga'	Konstantin Paustovsky (page 76) Dorogi
'Goluboi Zeleony	Yuri Kazakov: (page 20-29) do
Posle Bala	Leo Tolstoy

3.
a/ Reference to the context (Poetry): **10 marks**

a) Nyane	A.S.Pushkin
b) V Sibri	A.S.Pushkin
c) Parus	M.V.Lermontov

Poetry paragraph from the text studied (1 out of 2)

b/ Reference to the context (Prose): **10 Marks**

Tolsti I Tonki:	A.P. Chekhov
'Belaya Raduga'	Konstantin Paustovsky (page 76) Dorogi
'Goluboi Zeleony	Yuri Kazakov: (page 20-29) do
Posle Bala	Leo Tolstoy

Prose paragraph from the text studied (1 out of 2)

iii) Oral/Practical **30 marks**

Practical (Dissertation: Independent translation of about 2500 words from Russian literary, socio-political, popular science texts into English/Hindi/Punjabi) **15 marks**

OR

Verbal Narration in Russian on any two of the following topics:
1.Biography of any Indian/Russian personality 2. Native state 3. My favorite Russian Literary work.
4. Russia 5. India 6. Sport, 7. India-Russia commercial/Trade Relation.

General Conversation **15 marks**

PHYSICAL EDUCATION

B.A. /B.Sc. (GENERAL) FIFTH SEMESTER EXAMINATION (2020-2021)

Time : 3 Hrs.

Max. Marks : 65
Theory : 60 marks
Internal Assessment : 05 marks

INSTRUCTIONS FOR THE PAPER-SETTER AND STUDENTS:

(i) There shall be nine questions in all, spread over five units.

(ii) First question/unit is compulsory. It will contain six short answer type questions, spread over the whole syllabus to be answered in brief. It will carry 12 marks.

(iii) Rest of the paper shall contain four units for descriptive questions. Each unit shall have two questions and the students shall be given internal choice i.e. the students shall attempt one question from each unit.

(iv) All questions/units will carry equal marks.

(v) Private candidates and the students of the University School of Open Learning will not be allowed to take this subject.

UNIT-I **12** Marks

Entire syllabus given in the Unit-II to V will be covered to set six short answer type questions in first question/unit of the question paper which is compulsory.

UNIT-II **12** Marks

Play:

– Meaning and Definition of Play.
– Various theories of play and their significance in Physical Education and Sports.

Recreation:

– Meaning, definition, characteristics, aim, objectives and types of recreation and recreational activities.
– Significance of recreation in the modern society.
– Recreation providing agencies.

UNIT-III **12** Marks

Competitions:

– Meaning, importance and conduct of intramural and extramural competitions.
– Meaning and types of tournament and their merits and demerits.
– Draw of fixtures of various tournaments.

Camps:

– Meaning, aim and objectives of the camp.
– Advantages of camping/outdoor education.
– Types and agencies promoting camping.
– Organization of camps and factors affecting its organization.
– Educative values of a camp.

Athletic Meet:

– Organization of an athletic meet.
– Importance/significance of an athletic meet.

UNIT-IV **12** Marks

Posture:

– Meaning, types and importance of a good posture.
– Causes, preventive and remedial measures of a poor posture.

Postural Deformities:

– Postural deformities (Kyphosis, lordosis, scoliosis and flat foot), their causes, preventive and remedial measures.

Physical Activities and their effects on various physical parameters and vice versa:

– Physical activities/training and their effects on aging, body composition, and obesity.
– General problems of obesity.
– Health related risk factors of obesity.
– Obesity and physical activity.
– Causes, preventive and remedial measures of obesity.

UNIT-V **12** Marks

Massage:

– Brief history of massage.
– Meaning and definition of massage.
– Principles/guidelines for massage.
– Types of massage and their benefits.
– Effects of massage on skin, blood circulation, nervous system and muscles.

Basics of Cricket:

History of the game
Basic fundamentals
Equipment and specifications
Marking / layout of field
Rules and regulations (number of players, duration of game, number of officials required and general rules of play)
Major tournaments and Arjuna awardees of the game.

PRACTICAL

Max. Marks : 35 Marks
Practical : 30 Marks
Internal assessment : 5 Marks

ATHLETICS

(a) History of athletics

(b) List of track and field events

(c) Marking of standard track, width of lanes and starting points for various races.

1. THROWS:

Throws (Shot-put or Discuss Throw or Javelin Throw) and one event of the choice of the student.

(a) **Shot-put** (The holding the stance, the glide, the delivery and the reverse or the recovery).

OR

Discuss Throw (The handhold, the initial stance, the preliminary swings, turn the delivery and the reverse or the recovery).

OR

Javelin Throw (The grip, the carry, the run way approach, the last five strides, the delivery, the reverse or the recovery).

(b) Measurements of equipment and the throwing circles or the approach run, the arc and the throwing area/the sectors.

2. PHYSICAL FITNESS TESTS: More emphasis shall be given on variety of physical exercises for the development of Flexibility and strength components of physical fitness.

Test 1- Flexibility: Sit and reach test

Test 2- Strength: Medicine Ball Throw.

Division of Practical Marks: Marks for each activity shall be divided as under:

Athletics and Physical fitness 15 marks, Participation and achievement in sports/games 5 marks, viva voce/ practical file 10 marks and internal assessment 5 marks based on overall performance of a student during the current semester which will be assessed by the teacher concerned.

Note : 1. Polevault, Hammer Throw Hurdles, Relay Races and steeple chase men are not included in the practical syllabus/course due to the fact that these events are highly technical. Moreover in the absence of proper facilities required for the events mentioned above may prove to be injurious /fatal to the students.

2. 12 periods per week (6 periods each for theory and practical) shall be allotted to a class.

3. The theory and practical class shall consist of 60-80 students and 30-40 students respectively.

4. The theory and practical papers shall consist of 65 and 35 marks each.

5. As per the Panjab University Calendar, Chapter XIX (Page 324) Volume III, 1990, the maximum teaching work load for an Assistant Professor in Physical Education for B.A. Pass Course is 24 periods per week, which includes theory as well as practical.

6. The choice of games by the students shall be confined to games approved by the Association of Indian Universities.

7. A student is required to prepare a practical notebook on athletics with complete marking of standard track and starting points for various races and an event (long jump) mentioned in the syllabus.

Mandatory Instructions for the Colleges:

1. *Admission Criteria:*

(i) Any student opting to have Physical Education as an Elective Subject irrespective of the background of the students (sports or non-sports students) must appear in the physical fitness test. Ranking should be prepared and the top 60-80 students should be offered this subject.

(ii) This subject should be offered to the normal students (not to disabled one).

(iii) To measure Physical Fitness through Cardiovascular Fitness Test, Cooper's 9 Minutes or 12 Minutes Run-Walk Test should be conducted.

(iv) The date of Physical Fitness Test must be mentioned in the prospectus of the College.

2. *Periodical Physical Inspections:*

The University/Authorities with the collaboration of the Department of Physical Education, Panjab University, shall make Periodical Physical inspections of the various colleges to ensure that the teacher student ratio is maintained by all the affiliated colleges for this subject **as per the University Guidelines**, and for them to ensure that infrastructure (facilities), equipment, books/professional journals and groundmen, a game boy are provided as per the requirements of the subject and directions of the Panjab University, Chandigarh.

3. *Strength of Students :*

For imparting effective teaching, the strength of students in a theory class shall be between 60-80 while it shall be 30-40 students in practical class.

4. Infrastructure/facilities and Supporting personnel:

For the introduction/to continue with this subject, a college must fulfil the following mandatory requirements:

(i) A track atleast of 200 mtrs., it should, however, preferable be raised to 400 mtrs. track.

(ii) Bare minimum two Malies-cum-Groundmen for maintenance of the grounds and other infrastructure facilities etc.

(iii) A game boy to supply the sports equipments and water to the students/ teachers on the ground/playfield/arena.

(iv) A store-keeper for the proper maintenance/accountability of sports equipments in the stores.

5. *Number of Periods :*

The number of periods for theory and practical shall be 12 periods per week (6 periods each for theory and practical) for classes i.e. B.A. First to sixth semester.

Practical period shall be projected in the college time table itself.

6. *Teaching Work Load :*

(i) As per the Panjab University Calendar Chapter XX (Page 298) Volume-III, 1996, the Maximum teaching work load for an Assistant Professor in Physical Education for B.A. Pass course is 24 periods per week which includes theory as well as practical.

(ii) Teachers who are preparing 6 teams for the Panjab University Inter College Competition, their work load shall be counted by including six periods per week in the teaching load of concerned teachers in Physical Education.

7. *Division of Marks (Theory and Practical) :*

65% and 35% weightage shall be given to each theory and practical papers.

Note : STRICT ACTION SHALL BE TAKEN BY THE UNIVERSITY AGAINST THE COLLEGE(S) THAT VIOLATES THE ABOVE INSTRUCTIONS.

PHYSICAL EDUCATION

B.A. / B.Sc. (GENERAL) SIXTH SEMESTER EXAMINATION (2020-2021)

Time : 3 Hrs.

Max. Marks : 65
Theory : 60 marks
Internal Assessment : 05 marks

INSTRUCTIONS FOR THE PAPER-SETTER AND STUDENTS:

(a) There shall be nine questions in all, spread over Five Units.
(b) First question/Unit is compulsory. It will contain six short answer type questions, spread over the whole syllabus to be answered in brief. It will carry 12 marks.
(c) Rest of the paper shall contain four units for descriptive questions. Each unit shall have two questions and the students shall be given internal choice i.e. the students shall attempt one question from each unit.
(d) All questions/units will carry equal marks.
(e) Private candidates and the students of the University School of Open Learning will not be allowed to take this subject.

UNIT-I **12** Marks

Entire syllabus given in the Unit-II to V will be covered to set six short answer type questions in first question/unit of the question paper which is compulsory.

UNIT-II **12** Marks

Nervous System:

– Meaning of Nervous System.
– Main organs of Nervous System and their functions.
– Reflex action and Reciprocal Innervations.
– Functional classification of Nervous System.

Excretory System:

– Meaning of Excretory System.
– Main organs of Excretory System and their structure and functions.

Endocrine System:

– Meaning of **Endocrine System**.
– Meaning of Glands, their location and functions/Harmones produced by them.

UNIT-III **12** Marks

Sports Training,

– Meaning, definition, aim, objective, characteristics and principles of sports training.

General Physiological concept:

– Physiological concepts such as vital capacity, second wind, stitch in the side and its causes.
– Definition of oxygen debt/excess post exercise oxygen consumption (EPOC) and its implication.
– Meaning definition and types of fatigue.
– Muscular contractions such as isotonic, isometric, eccentric and isokinetic.
– Meaning of Blood pressure, Hypertension: Its causes, effects and treatment, exercise and Hypertension.

Effects of Physical Exercise / Training on body systems:

– Effects of Physical exercise/Training on muscular, respiratory and circulatory systems of the body.

UNIT-IV **12** Marks

Carrier aspects in Physical Education:

– Carrier options in Physical Education.
– Different avenues in Physical Education.
– Self assessment for carrier choices.
– Courses and institutions available for Physical Education profession.

UNIT-V **12** Marks

Coach:

– Coaching, coaching philosophy, definition of a coach.
– Qualification and characteristics of a coach.
– Responsibilities of a coach.

Basics of Table Tennis:

– History of the game
– Basic fundamentals
– Equipment and specifications
– Marking / layout of T.T Table
– Rules and regulations (number of players, duration of game, number of officials required and general rules of play)
– Major tournaments and Arjuna awardees of the game

EDUCATION

B.A. / B.Sc. (GENERAL) THIRD YEAR EXAMINATION, 2020-2021

SEMESTER –V

Paper- : INDIAN EDUCATION

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 hours

GENERAL INSTRUCTIONS FOR THE PAPER-SETTER :

The question paper will consist of five Units : I, II, III, IV and V. Units I, II, III and IV will have two questions from the respective unit of the syllabus and will carry 18 marks each. Unit V will consist of eight short answer type questions which will cover the entire syllabus uniformly and will carry 18 marks. The students are required to attempt 6 short answer type questions out of 8 in unit V which will be compulsory. The question paper should preferably carry internal division of marks for all the sub-questions of one main question. Preferably set the words limit for answer (300-350 words for units I, II, III, IV and 75 words for each short answer question in unit V).

GENERAL INSTRUCTIONS FOR THE CANDIDATE:

The students will be required to attempt one question each from Unit I, II, III and IV. Unit V will be compulsory. The students are required to attempt **6** short answer type questions out of **8** in Unit V. The words limit will be 300-350 words for unit I, II, III and IV and 75 words for each short answer question in unit V.

Objectives:

1. To enable the students to know about History of Indian Education.
2. To enable the students to understand the problems of pre-primary Education.
3. To make the students familiar with the concept of Universalization of Elementary Education and its problems.
4. To make the students familiar with the constitutional provisions of Education and role of different agencies in Education.

Course Contents :

UNIT-I : Education in the ancient and medieval period of Indian History.

UNIT-II : Current status and problems of pre-primary education. Public schools and their future.

UNIT-III : Importance of Elementary Education.
Universalization of Elementary Education. Problems of Elementary Education and Role of the State in Elementary Education.
Sarav Sikhiya Abhiyan – Concept, Objectives & Implementation.

UNIT-IV : Constitutional Provisions of Education.
Provisions for Education of Weaker Sections of Society.

HISTORY OF ART

SEMESTER - V

History of Indian Painting (from ca. 1800 to the present times) and Sculpture (from ca. 600 to 1300 A.D.)

Max.Marks: 100
Time: 3 Hr

NOTE 1: The paper carries 100 marks.

NOTE 2: The paper-setter is required to set **9 questions** in all. **The candidate is to attempt 5 questions as per the instructions given in the question paper**.

NOTE 3: The first question shall be of short answer type containing 14 questions spread over the whole syllabus. Each question is to be answered in about 25 to 30 words. It shall carry **28 marks** and shall be a **Compulsory question**.

NOTE 4: 8 questions are to be set from the entire syllabus consisting of 4 units. Two questions will be set from each unit and the candidates shall be given internal choice i.e. a candidate shall attempt one question from each unit. So in all, the candidate shall be attempting 4 questions in all out of 8 questions. Each question would be of **18 marks.**

Objectives:

The aim of the paper is to introduce to the students various schools, styles and phases of the developments in painting and sculpture in India. The emphasis will be to make them aware of the different terms, concepts, forms and subject matter of these works.

History of Indian Painting

Unit-I

- Company painting.
- Early oil painters - Raja Ravi Verma.
- Bengal School with special reference to Abanindranath Tagore

Unit-II

- New Trends: Nandlal Bose, Rabindranath Tagore, Gaganendranath Tagore, Jamini Roy, Amrita Shergil, D.P. Roy Chowdhury, Sobha Singh, M.F.Hussain, Satish Gujral.

History of Indian Sculpture

Unit-III

- Sculptures of Pala and Sena Period - Bengal, Bihar, Orissa

Unit-IV

- Pratihara Sculpture of Central and Western India.
- Chola Sculpture in Stone & Bronze

Pedagogy

The students are expected to familiarize themselves with the art forms as seen from the books, slides and related films.

Suggested Readings

- Archer, W.G : India and Modern Art, George Allen & Unwin Limited, London, 1959.
- Archer, M. & Archer W.G. : Indian Painting for the British, 1770-1880, Oxford University Press, London, 1955.

- Aggarwala, V.S. : Indian Art (English), Varanasi, 1965.
- Aggarwala, V.S. : Bhartiya Kala (Hindi), Prithvi Prakashan, 1977.
- Read, Herbert : Meaning of Art, Faber & Faber, London, 1972.

ANCIENT INDIAN HISTORY, CULTURE AND ARCHAEOLOGY
SEMESTER V

Paper-V (VOCATIONAL) : EXCAVATIONS, MONUMENTS AND SCULPTURES IN STONE AND BRONZE

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Objectives :

The primary objective of this paper is to prepare the students to become professional archaeologists through the study of various excavated and explored archaeological sites, monuments and antiquities such as stone and bronze sculptures. The study of this paper is designed for preparing students to persue advanced study in the subject.

Pedagogy of the Course Work :

It is expected to familiarize students with brief outline of the topics with the help of visual aids like slides and transparencies. Field work trips to museums and sites may be undertaken.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. The paper setter is required to set 9 questions in all. All questions shall carry equal marks.
2. The first question shall be short answer type containing 15 short questions spread over the entire syllabus. The candidate is required to answer any 9 short answer type questions. Each question shall be of 2 marks to be answered in 25-30 words each. **OR** A question on map. The map work shall consist of 12 marks for the map and 06 marks for the explanatory notes.
3. The map question shall have the following topics :
   (a) Location of important archaeological sites mentioned in Unit I.
   (b) Location of important monuments mentioned in Unit II.
   (c) Location/Provenance of important sculptures mentioned in Units III and IV.
4. The rest of the paper shall contain 4 Units. The entire syllabus has been divided into 4 Units. Each unit shall have two questions and the candidate shall be given internal choice, i.e. the candidate shall attempt one question from each unit. Each question shall carry 18 marks.
5. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (5) in the question paper.

UNIT-I:

Excavations : (Note: Instructions will be confined only to the location of the site and important results obtained). Kalibangan, Lothal Mitathal, Sugh, Sanghol, Inamgaon.

UNIT-II:

Monuments : Asokan Pillars, Stupa of Sanchi, Rock-cut-architecture of Ajanta and Ellora, Temples: Kandariya, Mahadev, Lingaraja and Konark..

UNIT-III:

Sculptures : Stone-Harappan, Sculpture of Rampurva Ashokan Bull, Didarganj Yakshi, Katra Buddha, Sarnath Seated Buddha, Gomatesvara at Sravanavelagola, Maheshamurti, (Elephanta), Krishna holding Govardhana (Halebid), Sun Image of Konark, Kasia reclining Buddha (Mahaparinirvana).

UNIT-IV:

Bronze : Sultanganj Buddha, Nalanda Image of Balarama and Buddha, Kurkihar Avalokitesvara, Indra and Padmapani from Nepal, Tanjore (Chola), Nataraja, Balakrishna Kaliyadamana and Somaskanda Murti.

Essential Readings :

1. Agrawala, V.S. : *Indian Art,* Prithvi Prakashan, Varanasi, 1965.
2. Allchin, B. and Allchin, F.R. : *The Rise of Civilization in India and Pakistan,* Cambridge University, Cambridge, 1982.
3. Bajpai, K.D. : *Five Phases of Indian Art,* Vidya Prakashan Jodhpur, 1991.
4. Brown, Percy : *Indian Architecture (Buddhist and Hindu Period),* Vol-1, rpt. D.B. Tara Gorevala sons, Bombay, 1971

Suggested Readings

1. Lal, B.B. : *The Early Civilization of South Asia,* Aryan Books, *New* Delhi, 1997.
2. Saraswati, S.K. : *A Survey of Indian Sculpture,* 2nd ed. Munshiram Manoharlal, New Delhi 1975.
3. Upinder Singh : *A History of Ancienty and Early Medieval India,* Pearson, New Delhi, 2009.

ANCIENT INDIAN HISTORY, CULTURE & ARCHAEOLOGY
SEMESTER VI

Paper-VI: EPIGRAPHY AND NUMISMATICS

Max. Marks	:	100
Theory	:	90 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

Objectives:

This course makes the students aware of major scripts of Ancient India, their origin and development upto 6th century A.D. It also provides knowledge about the origin, antiquity and main features of ancient Indian coins.

Pedagogy of the Course Work :

The students are to be taught with the help of slides, photographs and maps. In addition to it, special lectures, workshops, seminars, written assignments, class discussions, and term papers, should be included while teaching this course.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. The paper setter is required to set 9 questions in all. All questions shall carry equal marks.

2. The first question shall be short answer type containing 15 short questions spread over the entire syllabus. The candidate is required to answer any 9 short answer type questions. Each question shall be of 2 marks to be answered in 25-30 words each. **OR** A question on map. The question on map shall consist of the location of the sites of important inscriptions of Asoka.

3. The rest of the paper shall contain 4 Units. The entire syllabus has been divided into 4 Units. Each unit shall have two questions and the candidate shall be given internal choice i.e. the candidate will attempt one question from each unit. Each question shall carry 18 marks.

4. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (4) in the question paper.

UNIT-I:

(a) Epigraphy : Major scripts of Ancient India.

(b) Their origin and development up to 6th century A.D.

UNIT-II:

Rock and pillar edicts of Asoka.

UNIT-III:

(a) Origin and Antiquity of Punchmarked coins.

(b) Origin and date of Tribal coins : Yaudheyas, Kunindas, Audumbaras and Malavas.

UNIT-IV:

(a) Kushana Coins.
(b) Gupta Coins.

Essential Readings :

1 Allan, John : *Catalogue of Coins of Ancient India,* Vol.I, rpt., Delhi, 1974.

2. Altekar, A.S. : *Coinage of the Gupta Empire and its imitations,* Numismatic Society of India, BHU, Varanasi, 1957.
Varanasi, 1957.

3. Chattopadhya, B. : *The Age of Kushanas,* A Numismatic Study, Calcutta, 1970.

4. Gupta, P.L. : *Coins,* rpt., National Book Trust, New Delhi, 2006.

Suggested Readings :

1 Hultzsch, E. : *Corpus Inscriptionum Indicarum,* Vol.I, rpt. Archaeological Survey of India, Delhi, 1991.

2. Pandey, R.B. : *Indian Palaeography,* Munshiram Manoharlal, Banaras, 1952.

3. Dani A.H. : *Indian Palaeography,* Munshiram Manoharlal, New Delhi, 1997.

DEFENCE & STRATEGIC STUDIES
SEMESTER –V

INSTRUCTIONS FOR THE PAPER SETTER AND THE STUDENT

1. There will be one-theory paper of 70 marks. The internal assessment will be of 10 marks. The theory paper will have one compulsory short answer type question containing 15 questions of 2 marks each covering the entire syllabus. The candidates will be required to attempt any 10 short answer type questions. In addition to it there will be four sections of the question paper containing 2 questions each. The candidate will be required to attempt one question from each of the four sections. Theory paper will be of three hours duration.
2. Practical examination will be compulsory for regular, USOL and private students. It will be of 20 marks. There will be 3 hours of teaching per week for practical and the number of students in one group shall not ordinarily exceed fifteen.

Paper - <u>NATIONAL SECURITY, CONCEPTIONAL ASPECTS</u>

M. Marks: 70
Time: 3 hours

Objective : This paper deals with the conceptual aspects of national security and the role of economy & military organizations in furthering national pursuits.

SECTION -I

1. National Security, National Power & National Interest: Definition, Concept and Core Values
2. Elements of National Security: Geography, Mineral Resources, Economic Stability, Military preparedness, Socio-Political Factors, Science and Technology.

SECTION -II

3. Emerging Trends in Nature and Character of Threats to National Security
4. Non-Traditional Dimensions of Security: Energy, Food, Water, Health Environment, Drug Trafficking, Money Laundering, Cyber Security etc

SECTION -III

5. Regional Groupings and their Objectives, Achievements and Problems:
   (a) ASEAN
   (b) BIMSTEC
   (c) SAARC
   (d) SCO

SECTION -IV

6. Collective Security Arrangements: Security Relevance of UN in the modern context, Role of NATO in the Post-Cold War Era.
7. Non-Aligned Movement and National Security: History, Features, Problems, Achievements and Current Relevance

Books Recommended

1. Abhyankar, M.G., Defence Principles and Organisation, Usha Publications, Longmans, Michigan, 1966.

10. Shah, A.B., India's Defence and Foreign Policies, Manaktalas , 1966.
11. Singh, Jasbir, Indian Defence Year Book 2012-13, Natraj Publishers, Dehradun, 2001.

Paper: PRACTICAL

Max. Marks: 20
Time: 1 hrs

Note :

1. There will be 3 hours of teaching per week for practical. For practical classes, the number of students in one group shall not ordinarily exceed fifteen.
2. Practical exercise should be carried out on drawing sheets with explanatory notes or on computer.

SECTION –A Practical Test Marks:10

1. There will be three questions in all carrying 5 marks each and candidates will be required to attempt any two questions.
2. Examiners are required to set the question paper at least half an hour before the examination.

Course Contents for Practical

1. Relief features and their representation on Map.
2. Degree of Slopes, Gradients and Inter-visibility of Points.
3. Study of Field Craft with reference to the following:

   (a) Ground
   (b) Cover
   (c) Camouflage
   (d) Observation

SECTION-B

Marks: 10

1. Practical Record = 5 marks
2. Viva-Voce = 5 marks

(Students be asked to prepare on current topics of general interest)

DEFENCE & STRATEGIC STUDIES

SEMESTER –VI

INSTRUCTIONS FOR THE PAPER SETTER AND THE STUDENT

1. There will be one-theory paper of 70 marks. The internal assessment will be of 10 marks. The theory paper will have one compulsory short answer type question containing 15 questions of 2 marks each covering the entire syllabus. The candidates will be required to attempt any 10 short answer type questions. In addition to it there will be four sections of the question paper containing 2 questions each. The candidate will be required to attempt one question from each of the four sections. Theory paper will be of three hours duration.

2. Practical examination will be compulsory for regular, USOL and prive students. It will be of 20 marks. There will be 3 hours of teaching per week for practical and the number of students in one group shall not ordinarily exceed fifteen.

Paper: NATIONAL SECURITY OF INDIA

M. Marks: 70
Time : 3 hours

Objective - This paper covers the various factors related to National Security in India.

SECTION -I

1. India's Security Problems since 1947:
   (a) Geo-political effects of Partition: Boundaries and Frontiers.
   (b) Integration of States: J & K, Junagarh, Hyderabad and Goa.
   (c) An overview of India's Security problems related to Pakistan and China.

SECTION -II

2. Indian Ocean and India's Maritime Security.
3. Nuclear Policy of India: History, Evolution and Policy options.

SECTION -III

4. Internal Dimensions of India's National Security with particular reference to Insurgency, Terrorism and Low Intensity Conflict.
5. Disaster Management in India and the role of Civil Defence.

SECTION -IV

6. Economic Mobilization for National Defence.
7. Planning and Production for National Defence with particular reference to India's Defence Production and DRDO.
8. Higher Defence Organization in India

Books Recommended

1. Barnawal, S.P., Military Year Book, A Guide Publication, New Delhi, 2012.

    (ii) Planning for Defence.

Paper: PRACTICAL

Max. Marks: 20
Time: 1 hrs

Note :

1. There will be 3 hours of teaching per week for practical. For practical classes, the number of students in one group shall not ordinarily exceed fifteen.
2. Practical exercise should be carried out on drawing sheets with explanatory notes or on computer.

SECTION –A Practical Test Marks:10

1. There will be three questions in all carrying 5 marks each and candidates will be required to attempt any two questions.
2. Examiners are required to set the question paper at least half an hour before the examination.

Course Contents for Practical

1. Tactical Formations: Section and Platoon.
2. Application of Fire: Fire Control, Fire Control Orders and Sequence of Fire Control Orders.
3. Military Messages: Verbal and Written.

SECTION-B

Marks: 10

1. Practical Record = 5 marks
2. Viva-Voce = 5 marks

(Students be asked to prepare on current topics of general interest)

HISTORY

SEMESTER- V

PAPER: WORLD HISTORY 1500-1870 A.D.

INSTRUCTIONS FOR THE PAPER –SETTER AND CANDIDATES:

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 15 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit and 4 questions in all. Each question will carry 18 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. One question from Unit-IV shall be set on the map.

Explanation:

1. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
2. The distribution of marks for the map question would be as under:

Map	:	10 Marks
Explanatory Note	:	08 Marks

3. In case, a paper setter chooses to set a question on important historical places, the paper setter will be required to ask the students to mark 05 places on map of 02 mark each and write explanatory note on any 04 of 02 marks each.
4. The paper-setter would avoid repetition between different types of question within one question paper.

Max. Marks	:	100
Theory	:	90
Internal Assessment	:	10
Time	:	3 Hours

Objectives: To introduce the students to the history of the Modern World.

Pedagogy: Lectures, library work and discussions.

Unit-I

1. World Around 1500: Feudalism, features and its decline, Rise of Mercantilism and its impact.

2. Politico-Religious Changes: Renaissance; Reformation; Rise of absolute states in France and Prussia

3. Rise of Parliamentary Government: The Glorious Revolution and its effects.

Unit-II

HISTORY

SEMESTER-VI

PAPER: WORLD HISTORY (1871 to 1991 A.D.)

INSTRUCTIONS FOR THE PAPER –SETTER AND CANDIDATES:

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 15 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit and 4 questions in all. Each question will carry 18 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. One question from Unit-IV shall be set on the map.

Explanation:

1. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
2. The distribution of marks for the map question would be as under:

Map	:	10 Marks
Explanatory Note	:	08 Marks

3. In case, a paper setter chooses to set a question on important historical places, the paper setter will be required to ask the students to mark 05 places on map of 02 mark each and write explanatory note on any 04 of 02 marks each.
4. The paper-setter would avoid repetition between different types of question within one question paper.

Paper: World History 1871 to 1991

Max. Marks	:	100
Theory	:	90
Internal Assessment	:	10
Time	:	3 Hours

Objectives : To introduce the students to the history of the Modern World in the period of European Domination.

Pedagogy : Lectures, library work and discussions.

Unit-I

1. New Imperialism 1871-1914: Main features; Partition of Africa – Causes, colonization and impact.

1. *The syllabus has been divided into four units :*
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 15 short questions spread over the whole syllabus to be answered in about 10-20 words each. The candidates are required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain 4 units. Each unit shall have two essay type questions, and the candidate shall be given internal choice of attempting one question from each Unit–4 in all. Each question will carry 18 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

   The paper setter must put note (2) in the question paper.

Unit-I: Theoretical Framework

(i) Meaning, Nature and Scope of Comparative Government and Politics
(ii) Comparative Method.

Unit-II: U.K.

(i) The British Political System - Salient Features and Conventions.

(ii) Executive
   (a) Monarchy:- Difference b/w King and Crown, Powers of Crown, Nominal and Real position Justification of Monarchy
   (b) Features of Parliamentary/ Cabinet Government
   (c) Prime Minster:- Composition, Powers, Position and Role

   Legislature
   (a) House of Lords:- Composition, Powers, Criticism & Utility
   (b) House of Commons:- Composition, Powers, Mutual relations between House of Lords and House of Commons

(iii) Judiciary
   (a) Organisation of Courts in U.K.
   (b) Rule of Law.

Unit-III : U.S.A.

(i) The Constitutional framework of U.S.

(i) Salient features
(ii) Separation of Powers & Checks & Balances
(iii) Federal System- Meaning, Features, Tendency towards Centralisation and its future.

(ii) Executive

(i) Elections of U.S. President

(ii) Composition, Powers & Position of U.S. President.

Legislature/Congress

(i) House of Representative- Composition, Power, House of Representative is the weakest chamber
(ii) Senate – Composition, Powers, Most Powerful Second Chamber, Mutual relations b/w House of Representative & Senate

Judiciary

(i) Supreme Court - Organisation, Composition, Powers & its Role.

(ii) Power of Judicial review

Unit-IV

(i) Political Parties and Interest/Pressure Groups of U.K- Nature & Role.
(ii) Political Parties and Interest/ Pressure Groups of U.S.A. - Nature & Role.

PUBLIC ADMINISTRATION
SEMESTER -V

PAPER: LOCAL GOVERNMENT (WITH SPECIAL REFERENCE TO PUNJAB

Max. Marks	:	100
Theory	:	90 Marks
Internal assessment:		10 Marks
Time	:	3 Hours

Objective of the Paper:

The objective of the paper is to give the student an understanding of the concept, significance and evolution of local government in India. It would also acquaint them with the pattern and working of divisional and district administration. The key areas covered are the types, structure, functions, finances and personnel of rural and urban local governments. It would also include the concept of state control over local bodies, provincialisation and rural-urban relationship with reference to Punjab.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.
- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Unit-I

Meaning and Significance of Local Government
Evolution of Local Government since 1882
Role of Deputy Commissioner; Divisional Commissioner
Rural and Urban Development: Dimensions and Issues

Unit-II

The 73rd Constitutional Amendment – Provisions and its Impact
Gram Sabha – Composition Functions and Powers
Panchayati Raj Institutions in Punjab – Structure, Functions, Sources of Finances and Personnel

Unit-III

The 74th Constitutional Amendment – Provisions and its Impact
Urban Local Bodies – Structure, Functions and Sources of Finance
Mayor – Position, Functions and Powers
Municipal Commissioner – Position, Functions and Powers

Unit-IV

State Control over Local Bodies
State Finance Commission: Composition, Functions and Role
Provincialisation of Municipal Services
Rural- Urban Relationship – Challenges and Remedies

PUBLIC ADMINISTRATION

SEMESTER - VI

PAPER: DEVELOPMENT ADMINISTRATION (WITH SPECIAL REFERENCE TO PUNJAB)

Max. Marks : 100
Theory : 90 Marks
Internal assessment: 10 Marks
Time : 3 Hours

Objective of the Paper:

The objective of the paper is to give the student an in-depth understanding about the concept & significance of development administration, features of developed & developing countries, planning machinery at Centre & State level and the emergence of India as a welfare state. The paper would also give an understanding about the concept, forms, role and problems of public enterprises as well as the working of select Union Ministries and agencies in Welfare and Development Administration.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.

- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Unit-I

Development: Meaning, Features and Aspects
Development Administration: Meaning, Nature, Scope and Significance
Features of Developed and Developing Countries

Unit-II

India as a Welfare State.
Planning: Meaning, Objectives and Significance
Planning Machinery in India at National, State and Local

Unit-III

Public Enterprises: Concept and Forms
Role of Public Enterprises in Economic Development
Managerial Problems of Public Enterprises
Public Enterprise Reforms since 1991; Concept of Privatisation

Unit-IV

Administration of Rural Development at the local level
Education and Development; Role of State Administration in Primary and Secondary Education
Health and Development; Role of the Ministry of Health and Family Welfare
Role of Voluntary Sector in Development

PHILOSOPHY

SEMESTER – V

PAPER : INDIAN EPISTEMOLOGY AND METAPHYSICS

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours
Lectures	:	75

Aims and Objectives :
This paper discusses the main epistemological and metaphysical issues as discussed in the various Indian Philosophical Systems.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.

- There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain 4 units. Each unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each unit – 4 in all. Each question will carry 18 marks.

- For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

  The paper setter must put note (2) in the question paper.

Unit–I

- Salient features of Indian Epistemology and Metaphysics.
- Concept of Prama and Pramana according to Nyaya
  i) Pratyaksa
  ii) Anumana
  iii) Sabda
  iv) Upamana
  v) Arthapatti
  vi) Anuplabdhi

Unit–II

- Materialism (Swabhava vada) of Charvakas.
- Anekantavada of Jainism.
- Aryasatyas, Pratityasamutpada of Buddhism.

Unit–III

- Concept of Self and Consciousness with special reference to Mandukya Upanishads.
- Advaita Vedanta : Sankara on Brahman and Maya.

Unit - IV

- Samkhya. : Theory of Causation. (Satkaryavada)
- Vaisesika : Nature and kinds of Padartha (Categories)
- Sikhism : Nature of Ultimate Reality, Mand and the World.

PHILOSOPHY

SEMESTER – VI

PAPER : WESTERN EPISTEMOLOGY AND METAPHYSICS

Max. Marks	:	100
Theory	:	90 Marks
Internal Assessment	:	10 Marks
Time	:	3 Hours
Lectures	:	75

Aims and Objectives:

This paper aims at exposing the students to main epistemological and metaphysical theories and problems of western philosophy. It also deals with basic themes of existentialism, logical positivism and analytical philosophy.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

The syllabus has been divided into four units.

1. There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 15 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions carrying 18 marks i.e. 2 marks of each. Rest of the paper shall contain 4 units. Each unit shall have two essay type questions and the candidates shall be given internal choice of attempting one question from each unit – 4 in all. Each question will carry 18 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper setter must put note (2) in the question paper.

Unit-I

- Nature of Philosophy with special reference to Metaphysics and Epistemology (introductory).
- Materialism : Mechanical and Dialectical.
- Idealism : Objective (Plato), Subjective (Berkeley).

Unit-II

- Nature of Knowledge : Knowing subject, Act of knowing and object of Knowledge.
- Theories of Truth : Coherence, Correspondence and Pragmatic

Unit-III

- Theories of Knowledge :

  Rationalism.

  Empiricism.

  Transcendentalism of Kant.

Unit-IV

- Universal and Particulars : Concept of Being (Parmenides) and Becoming (Heraclites).
- Substance (Spinoza) Causality (Hume).
- Existentialism : Being in itself; Being for itself; Choice and Freedom.

PSYCHOLOGY
SEMESTER - V

Objectives :

(I) The course will enable the students to get an introductory knowledge about Clinical Psychology with emphasis on the dynamics of some of the behavioural disorders and therapies. Students will also have some knowledge about stress and coping; and will get acquainted with elementary inferential statistics.

(II) Pedagogy of the Course Work :

80 % Lectures (including expert lectures).
20% assignments, discussion and seminars and tests.

PAPER: CLINICAL PSYCHOLOGY

Theory	:	70 marks
Internal Assessment	:	10 marks
Time	:	3 Hours

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES :

The syllabus has been divided into four units.

(a) There shall be 9 questions in all. The first question shall be short answer type containing 12 short questions spread over the whole syllabus and each to be answered in about 25 to 30 words. The candidate is required to attempt any 7 short answer type questions i.e. 2 marks of each. It shall carry 14 marks and shall be Compulsory question. Rest of the paper shall contain 4 units. Each Unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall attempt one question from each Unit - 4 in all.Each question will carry 14 marks.

(b) The practical will be of 20 marks.

UNIT-I : Nature and Criteria of abnormality, *Viewpoints Regarding Abnormality:* Historical, Psychodynamic, Behavioural, Cognitive, Humanistic and Interpersonal;

UNIT-II : *Causes of Abnormal Behaviour:* Biological, Psychological and Sociocultural Causes.

UNIT-III : *Stress:* Concept of Stress; Types of Stressors; Etiology of Stress; Coping Strategies: Problem Focussed and Emotion Focussed, Effects of Stress.

UNIT-IV : *Significance of Statistics :* Mean, Standard Deviation, Correlation. Significance of Difference Between Means (Correlated and Uncorrelated).

Note : The use of non-programmable calculators and statistical tables is allowed in the examination.

PSYCHOLOGY PRACTICALS

Max. Marks : 20
Time : 3 Hours.

Four practicals have to be performed out of the following :

1. The use of Biofeedback.
2. Presumptive Stressful Life Event Scale.
3. Adjustment Inventory.
4. Mental Health Inventory.
5. Sentence Completion Test.
6. Word Association Test.

Suggested Readings :

1. Carson, R.C.; Butcher, J.N.; and Mineka, S. (2003).*Abnormal Psychology and Modern Life,* New York : Pearson Education.

GEOGRAPHY
SEMESTER-V

Paper-IX: WORLD REGIONAL GEOGRAPHY- I

Max. Marks	:	70
Theory	:	60
Internal Assessment	:	10
Time	:	3 Hours

Objectives:

To provide an understanding of the concept of world regions with respect to Land, People, Polity and Economy; the physical and human resource base and their interface with economic development; development problems and prospects.

Course Content:

Study of the following regions of the world in terms of constituent countries: strategic location, salient physical, demographic and economic features, cultural patterns, resource base, economic development, problems, prospects and issues related to Regional Groupings (European Union, North Atlantic Treaty Organization, North American Free Trade Agreement and Commonwealth of Independent States).

UNIT-I

(i) Anglo America (20 lectures)

UNIT-II

(ii) Latin America (20 lectures)

UNIT-III

(iii) Europe (20 lectures)

UNIT-IV

(iv) Russia & Commonwealth of Independent States (30 lectures)

(v) Oceania

Note:

1. Questions will be put on region(s) as a whole and not on individual country. The questions should focus on regional perspective.
2. A map based compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 10 parts in about 30 words each. Each part will carry 2 marks (Total 20 marks).
3. The whole syllabus will be divided into 4 units. Eight questions will be set out of the whole syllabus, 2 from each unit. The students will be required to attempt one question from each unit. Each question will carry 10 marks. (Total 40 marks) These will be in addition to the compulsory question.
4. Special credit will be given to suitable use of maps and diagrams. Use of unmarked stencils and colours will be allowed.
5. Six hours theory classes in a week are compulsory.
6. Internal assessment will be based on (i) class tests, (5marks) (ii) academic activities , seminar, Project , Assignment (3 Marks) and (iii) attendance (2marks).

7. For USOL, reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

The paper setter must put note 7 in the question paper.

Books Recommended

14. Salter, C. L., J.J. Hobbs et. al. : *Essentials of World Regional Geography,* Saunders College Publishing and Harcourt Brace College Publishers, Orlando, 1998.

Further Readings:

1. Don R. Hoy (Ed.) 1980. : *Essentials of Geography and Development,* Macmillan, New York,
2. Hussain, Majid : *World Regional Geography, Rawat Publications*, Jaipur, 2009.
3. Mankoo, Darshan Singh : *A Regional Geography of the Wold, Kalyani Publishers,* Ludhiana, 2009.
4. Tikkha, R. N., Bali, P.K. and Sekhon, M. S. : *World Regional Geography,* New Academic Publishers, 2007.
5. Singh, Malkit : *World Regional Geography,* Rasmeet Prakashan, Jalandhar, 2009.

Pedagogy:

Teacher should involve maximum use of detailed maps of the countries and continents.Students should be encouraged to use atlas in classrooms. Video shows about culture, physiography and economy of these countries may be arranged if possible.

Paper - X: MAP PROJECTIONS

Max. Marks: 30
Time: 3 hours

Distribution of Marks:

(i) Written paper of three hours covering entire syllabus shall be held for students of USOL. For others it shall be at respective colleges. 20 marks

(ii) Practical Record relating to Map Projections and Viva voce on Practical Record relating to Map Projections. 10 marks

Objective:

- To provide an analytical understanding of use of common map projections.

Course Content:

Unit- I

Map Projections:
General introduction , classification of projections, general principles of identification and choice of projections.
(6 lectures)

Unit- II

Construction, properties and limitations of following projections

Cylindrical : Simple, Equal area, Mercator's (4 lectures, 6 lab. sessions)

Unit- III

Construction, properties and limitations of following projections

Conical : One Standard Parallel, Two Standard Parallel , Bonne's, Polyconic and International
(4 lectures, 6 lab. sessions)

Unit- IV

Construction, properties and limitations of following projections

Zenithals : Gnomonic, Stereographic, Orthographic, Equidistant and Equal Area (Polar cases only)
Conventional : Sinusoidal and Molleweide's (normal cases only) (7 lectures, 7 lab. sessions)

Note:

1. A compulsory question containing 6 short answer type questions shall be set covering the whole syllabus. The students shall attempt any 4 parts. The answer of each part should not exceed 25 words. Each part will carry 1 mark (Total 4 Marks).

2. Practical exam at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the Principal of the respective colleges in consultation with the senior most teacher of geography in the college.

3. Evaluation of Practical Record and Field Report will be done at the time of viva-voce examination.A minimum of 20 sheets are to be prepared by the students. There will be no laboratory exercise at that time.

4. There will be no viva-voce examination for the candidates appearing through the USOL. They will be required to submit their Practical Note Book (Practical files) with the University School of open Learning (Department of Geography) at least 10 days before the commencement of their examination. Their Note Books (Practical files) will be evaluated by two examiners (including at least one from the USOL).

5. For the students of USOL there will be an internal assessment of 10 marks in lieu of the viva-voce examination in practical record and field report. The marks obtained by the candidate will be added to the marks awarded by the internal and external examiners evaluating the Practical Record.

6. A fresh practical note book shall be prepared by failed /improvement candidates.

7 For Practical classes, the number of students in one group shall not exceed fifteen.

8. There will be 3 hours of teaching per week for this paper.

9. For USOL, reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

The paper setter must put note 9 in the question paper.

Books Recommended

Essential Readings

1. Kellaway, George P. : *Map Projections*, Methuen and Co., London. Year 1956
2. Steers, J.A. : *Map Projections*, University of London Press, London,1957 Year .
3. Garnett, William : *Map Projections,* George Phillip and Sons, London.

Essential Readings

3. Singh, R.L & Singh, Raghunandan : *Mapwork and Practical Geography*, Central Book Depot, Allahabad, 1993, Reprint.

Pedagogy:

Basic fundamentals of map projections are introduced by demonstration of construction exercises in class.

Pedagogy:

Teacher should involve maximum use of detailed maps of the countries and continents. Students should be encouraged to use atlas in classrooms. Video shows about culture, physiography and economy of these countries may be arranged if possible.

Paper - XII: FIELD SURVEY BASED REPORT

Max. Marks: 30
Time : 3 hours

- To acquaint the students with the importance of field work as one of the methodologies in geography.
- To familiarise the students about pre-field work and post-field work i.e. data processing and analysis and writing of field work report.

Distribution of Marks

i) Viva-Voce : 10 Marks ii) Field Report: 20 Marks

Fieldwork (Theory):

(i) Role of fieldwork in Geography.

(ii) Scale of study and fieldwork methodology.

(iii) Methods of collecting primary data : Observation, Interview and Questionnaire and Measurement.

(iv) Methods of field study of: a farm, a village, and a town. (20 lectures)

Note: The teachers should familiarize the students in the class before collection of primary data for preparation of field work.

Fieldwork (Practical): A field report of minimum 20 pages will be prepared based on primary data on problems such as (a) local market survey, (b) service area of school/ or hospital; (c) traffic flow, and (d) socio-economic characteristics of student's village/ mohalla/ sector.

(25 lab. Sessions)

Note:

1. There will be no written paper for USOL and college students.
2. Practical exam at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the Principal of the respective colleges in consultation with the senior most teacher the Geography in the college.
3. Evaluation of Field Report will be done at the time of viva-voce examination. There will be no laboratory exercise at that time.
4. There will be no viva-voce examination for the candidates appearing through the USOL. They will be required to submit their Field Report with the University School of Learning (Department of Geography) at least 10 days before the commencement of their examination. Their Field Report will be evaluated by two examiners (including at least one from the USOL).
5. For the students of USOL there will be an internal assessment of 10 marks in lieu of the viva-voce examination in field report. The marks obtained by the candidate will be added to the marks awarded by the internal and external examiners evaluating the Field Report. .
6. All students are required to submit a practical record based on theoretical component listed as fieldwork (theory)
7. A fresh field report shall be prepared by failed /improvement candidates.
8. For Practical classes, the number of students in one group shall not exceed fifteen.
9. There will be 3 hours of teaching per week for this paper.
10. For USOL, reappear/improvement candidate(s) who have not been assessed earlier for Internal Assessment, the question paper(s) in their case shall be of Maximum Marks allotted to the paper(s) concerned.

The paper setter must put note 10 in the question paper.

WOMEN'S STUDIES

SEMESTER-VI

PAPER : WOMEN'S DEVELOPMENT AND EMPOWERMENT IN INDIA

Max. Marks : 100
Theory : 90 Marks
Int. Ass : 10 Marks
Time : 3 Hrs.

Objectives: This paper focuses on the issues related to the process of development and its impact on women, particularly in the context of a developing nation like India. The attempt is to equip the student to understand the major aspects of critique of development through a gender lens in its global and local contexts.

Course Contents

Unit I – Concept of Development

- Changing concept from Growth to Development;
- Human Centric Development;
- Why is gender a development issue?
- Indices of development: Human Development Index (HDI), Gender Development Index (GDI), Gender Empowerment Measure (GEM)

Unit II – Strategies for Women's Development

- Women in Development (WID), Women and Development (WAD) and Gender and Development (GAD),
- Empowerment and Sustainable Development;
- Microcredit

Unit III - Policy Initiatives

- Changing approaches from welfare to development to empowerment with special reference to Five Year Plans (First to Twelth Plan)
- National Policy for Empowerment of Women

Unit IV – Implementation Machinery

- Social Welfare Boards,
- National Commission for Women (NCW),
- Ministry of Women and Child Development (MOWCD),
- National Institute of Public Cooperation and Child Development (NIPCCD)

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES:

- In this paper, the candidate will be assessed for 90 marks on the basis of a written examination and for 10 marks internal assessment.
- There shall be 9 questions in all. The first question shall be compulsory containing 12 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidate is required to attempt any 09 short answer type questions carrying 2 marks each (18marks). Rest of the paper shall contain 4 units. Each Unit shall have two questions and the candidate shall attempt one question from each unit- 4 in all. Each question will carry 18 marks.

HUMAN RIGHTS & DUTIES
SEMESTER-V

PAPER: HUMAN RIGHTS RESPONSES TO SELECT PROBLEMS INTERNATIONAL AND NATIONAL PERSPECTIVE

Max. Marks: 100 Marks
Theory: 90 Marks
Internal Assessment: 10 Marks
Time: 3 Hours

Objective: The paper deals with a few select problems that have been addressed internationally through the UN Conventions to ensure protection of human rights. The objective is to regard to problems such as racial discrimination; custodial violence; and socially vulnerable groups including women, children, Specially-Abled and Internally Displaced Persons.

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES:

Note: (i) for written paper, the students will be required to attempt five questions in all. Question No. 1 will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students shall be required to attempt 9 short answer type questions out of 12 i.e. 9 x 2 = 18 marks. (ii) In addition to it, Question Nos. II to IX will consist of long answer of long answer (easy) type questions i.e. two questions from each unit with internal choice carrying 18 marks of each i.e. 4 x 18 = 72 marks.

UNIT-I

Racial Discrimination: International Convention and Related Mechanism

(a) Convention on the prevention and punishment of the Crime of Genocide, 1948.
(b) International Convention on Elimination of All Forms of Racial Discrimination 1965.
(c) Refugees and the Refugee Convention, 1951

UNIT –II

Custodial Violence and Safeguards:

(a) Custodial Violence a
  (i) Torture and Death in Police Custody
  (ii) Fake Encounters and Enforced Disappearances
  (iii) Human Indignity against Women and Children
(b) Convention against Torture and Other Cruel and Human of Degrading Treatment or Punishment, 1984.

UNIT-III

Social Vulnerability and Protection –I: Women and Children

(a) Understanding Discrimination and Violence against Women and Children
(b) Convention on the Elimination of All Forms of Discrimination against Women, 1979.
(c) Convention on the Rights of the Child, 1989.
(d) Human Trafficking and United Nations Convention against Transnational Organized Crime, 2000

UNIT- IV

Social Vulnerability and Protection- II: Aged, Specially-Abled and Internally Displaced Persons.

(a) Problems of Aged and specially – Abled Persons.
(b) Convention of the Rights of Persons with Disabilities, 2006.
(c) International Mechanism for the Rights of the Aged.
(d) Internally Displaced Persons and Related Mechanism.

Essential Readings:

RELIGIOUS & SIKH STUDIES

SEMESTER- V

Max. Marks: 100
Written : 90 marks
Internal : 10 marks

PAPER- V, RELIGIOUS REFORM MOVEMENTS IN MODERN INDIA

Objectives:

The course is designed for the students who want to pursue semester bases graduate degree programme with religious Studies as an elective subject. It is open to any student drawn from multiple disciplinary backgrounds after completion of 10+2 course. As one of the elective subject at the graduate level curriculum, it purports to develop a broad understanding of Indian Religions and awareness about the origin, features and purpose of different religions.

INSTRUCTIONS FOR PAPER-SETTER AND CANDIDATES:

Note: (i) For written paper, the students will be required to attempt five questions in all. Question No. 1 will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine answer type questions out of twelve. Question No. 1 would carry 18 marks (9X2). In addition to it, Question No. II to IX will consist of **eight** long answer (Essay Type) questions which will be further divided into four units with each Unit having **two questions** to ensure internal choice to the candidate. In all, each question in this section shall carry 18 marks and this section shall carry 72 marks (4 X 18).

Course Contents:

Unit I. Brahmo Samaj and Arya Samaj: Leaders, Principles and Contribution

Unit II. Namdharis and Singh Sabha Movement: Leaders, Principles and Contribution

Unit III. Anjumans and Ahmadiyahs: Leaders, Principles and Contribution

Unit IV Swami Vivekanand; Sir Syed Ahmad Khan and Bhai Kahn Singh Nabha

SCHEME OF EXAMINATION

FIFTH SEMESTER			Exam . Hrs	Ext.	Int.	Max. Marks
Paper – CS09	**Theory-A**	**Project Management**	**3**	**30**	**5**	**35**
Paper –CS10	**Theory-B**	**Relational Database Management System**	**3**	**30**	**5**	**35**
Paper – PCS05	**Practical-C**	**Practical Based on Paper – CS10**	**3**	**30**	**--**	**30**

Paper Code: CS09

Paper Title: Project Management

Objective: The student will come to know how a project needs to established, organized , coordinated ,controlled and evaluated.

Note: (i) The syllabus of this paper has been divided into four units.
(ii) Examiner will set total nine questions comprising two questions from each unit and one compulsory question of short answer type covering whole syllabi.
(iii) The students are required to attempt one question from each unit and the entire Compulsory question.
(iv) All questions carry equal marks, unless specified.

UNIT I

1. Concepts of Project Management :
Concept of a project, Characteristic features of a project, Categories of project, Project life cycle phases, Project Management Concepts, Tools and Techniques for Project Management, Introduction of Computerised project management systems, Roles and Responsibilities of a Project Manager.

2. Establishing the Project :
Feasibility Report : Raw material survey, Demand study, Technical study, Location study; Financing Arrangements, Preparation of Cost Estimates, Finalisation of Project Implementation Schedule, Evaluation of the Project Profitability, Fixing the zero date.

UNIT II

3. Organizing human resource:
Delegation, Project organization: Matrix, Tax force and Totally projectized organization;

4. Organizing the Project:
Working of Systems, Design of Systems, Project Work System Design, Work Breakdown Structure, Project Execution Plan, Project Procedure Manual, Project Control System, Planning, Scheduling and Monitoring.

UNIT III

5. Project Directions, Coordination and Control:
Project Direction, Communications in a Project, Project Coordination, Project Control, Scope/Progress Control, Performance Control, Schedule Control, and Cost Control.

6. Project Management Performance:
Performance Indicators, Performance Improvement, Project Management Environment.

UNIT IV

7. Report Writing - I:
Characteristics of Reports, Importance of Reports, Types of Reports, Structure and layout of Reports: front matter, main body, back matter;Preparatory Steps to Writing Reports: Evaluation of material, Note making, Organising material, Principle of organisation, Making outline

8. Report Writing- II:
Elements of Style; Use of Illustrations: types; Writing the Report: Rough draft, Process of writing, Order of writing, Final draft, Check list for reports;SpecimenReports: technical report;

Paper Code: CS10

Paper Title: Relational Database Management System

Objectives: This course will enable the student to get well versed with the SQL and PL/SQL concepts.

Note: (i) The syllabus of this paper has been divided into four units.
(ii) Examiner will set total nine questions comprising two questions from each unit and one compulsory question of short answer type covering whole syllabi.
(iii)The students are required to attempt one question from each unit and the entire Compulsory question.
(iv) All questions carry equal marks, unless specified.

UNIT I

1. Interactive SQL : SQL commands; Data Definition Language Commands; Data Manipulation Language Commands; Data types, Insertion of data into the tables; Viewing of data from the tables; Conditional viewing of data; Deletion operations; Updating the contents of the table; Modifying the structure of the table; Renaming table; Destroying tables.

2. Data Constraints: Types of Data Constraints; Column Level Constraints; Table Level Constraints; Null value concepts; The UNIQUE Constraint; The PRIMARY Constraint; The FOREIGN key Constraint; The CHECK Constraint; Viewing the User Constraint.

UNIT – II

3. SQL Operators and Functions: Arithmetic operators, Logical operators, Range searching, Pattern matching; Using DUAL, SYSDATE;SQL Functions: Group, Scalar, Aggregate, Numeric, String and Date Functions.

4. Grouping data from tables in SQL : GroupBy , Having clause, Subqueries, Collating Information: Equi Joins, Cartesian Joins, Outer Joins, Self Joins; SET Operators: Union, Intersect, Minus; Nested Queries.

UNIT III

5. Indexes: Creation, Types, Dropping an index; Introduction to Views, Manipulating the Base table(s) through views, Rules of DML Statements on Join Views, Dropping a View, Inline Views, Materialized Views.

6. Sequences: Creation, Reference and Alteration; Database Security and Privileges: Grant Command, Revoke Command, Application Privileges Management, COMMIT and ROLLBACK.

UNIT IV

7. PL/SQL-I: Introduction to PL/SQL, The Advantage of PL/SQL, PL/SQL block structure, PL/SQL Architecture, Fundamentals of PL/SQL, PL/SQL Data types, Variables and constants, Scope and visibility of a variable, Assignments and expressions, Operator precedence, Conditional and iterative control, SQL within PL/SQL, writing PL/SQL code.

8. PL/SQL-II: Cursor management in PL/SQL, Cursor manipulation, Implicit and Explicit cursor attributes, Exceptional Handling, Subprograms in PL/SQL, Procedure, Functions, and Triggers.

Paper Code: CS11

Paper Title: E-Commerce

Objective: To develop an understanding of concepts of E-Commerce

Note: (i) The syllabus of this paper has been divided into four units.
(ii) Examiner will set total nine questions comprising two questions from each unit and one compulsory question of short answer type covering whole syllabi.
(iii)The students are required to attempt one question from each unit and the entire Compulsory question.
(iv) All questions carry equal marks, unless specified.

UNIT I

1. E-Commerce: Introduction, History, Motivation for E-Commerce, Types of Ecommerce, Advantages, Limitations, E-Commerce applications : Business-to-consumer, Business-to-Business, Consumer-to-Business, Consumer-to-Consumer, Business-within-Business.

2. Internet and www: Introduction, History, Benefits of www, Internet Service Providers, Web and Electronic commerce,Web architecture and its components, Interactive web applications, Web and database integration, Web software development tools, Search engines.

UNIT II

3. Website designing and hosting: Life cycle of website building, Website content andtraffic management, Working of ISPs, Choosing an ISP, Choosing and registering a domain name.

4. Implementation and Maintenance of E-Commerce: Implementation strategies, Maintenance strategies, Legal and Ethical issues in E-commerce.

UNIT III

5. Payment Systems : From Barter to money, Requirements of Internet-based payments,Electronic payment media : Credit cards, Debit cards, Smart cards, e-wallets, Issues and implications of payment systems, Latest trends in payment systems.

6. Marketing on the Internet: Internet marketing techniques and cycles, Attracting and Tracking customers, Pros and cons of online marketing.

UNIT IV

7. Firewalls and Network Security: Types of firewall, Gateways, Proxy Servers and its advantages and disadvantages; Transaction Security: Types of transaction, Requirements for transaction, Encryption: asymmetric and symmetric encryption; Digital signatures, Digital certificates, Implementation and management issues.

Paper Title: Web Programming

Objectives: This course will enable the student to build and publish web sites using HTML, CSS, JavaScript and PHP.

Note: (i) The syllabus of this paper has been divided into four units.
(ii) Examiner will set total nine questions comprising two questions from each unit and one compulsory question of short answer type covering whole syllabi.
(iii)The students are required to attempt one question from each unit and the entire Compulsory question.
(iv) All questions carry equal marks, unless specified.

UNIT - I

1. Basic Terminology : Web Server; Web Browser, Understanding Communication between a Browser and Web Server, Webpage, Website, Static Website, Dynamic Website, Internet, Intranet, Extranet, WWW, URL.

2. HTML : HTML Program Structure, Paragraph Breaks, Line Breaks; Emphasizing Text: Heading Styles, Drawing Lines; Text Styles :Bold, Italics, Underline; Other Text Effects: Centering of text and images etc; Lists: Unordered List, Ordered Lists, Definition lists; Adding Graphics to HTML Documents using the Border, Width, Height and Align; Tables: Caption Tag, Width, Border, Cell padding, Cell spacing, BGCOLOR, COLSPAN and ROWSPAN Attributes.

UNIT - II

3. Linking Documents : Anchor tag, External Document References, Internal Document References and Image Maps; Frames: Introduction to Frames: The <FRAMESET> tag, The <FRAME> tag, Targeting Named Frames

4. DHTML: Introduction to Cascading Style Sheets (CSS), Style tag, Link tag, Types of CSS: In-Line, Internal, External; Forms: Attributes of Form element: Input element, Text Element, Password, Button, Submit Button, Reset Button, Checkbox, Radio, TextArea, Select and Option.

UNIT - III

5. JavaScript: Introduction and Features of JavaScript, Writing JavaScript into HTML,Tokens, Data Types, Variables, Operators, Control Constructs, Strings Arrays, Functions, Document Object Model, CoreLanguage Objects, Client Side Objects, Event Handling, Applications related to client side formvalidation, Built-In Objects in JavaScript: String Object, Math Object, Date Object;

UNIT - IV

6. Introduction to PHP : PHP Installation and Configuration; Naming files, Comments,Variables, Operators, Arrays, Flow Control Structures, More language basics; User-defined functions; Input validation, Working with Mathematical, String, Date and Time functions

Paper – PCS06 : Practical Based on Paper CS12 – Web Programming.

ENVIRONMENT CONSERVATION (ELECTIVE)

SEMESTER-V

Paper: Biodiversity and Conservation

Theory hours	Practical Hours	Theory marks	Internal Assessment Marks	Practical marks	Practical Internal Assessment Marks	Total Marks
6	4	65	10	20	5	100

The number of hours for theory and Practical per week shall be 6 hours and 4 hours, respectively.

Note: The practical will include survey and its project reports carrying 5 marks (Internal Assessment) and 20 marks will be allotted to Laboratory practicals.

Instructions for paper setters:

There will be 9 questions in all, two each from section I to IV. All questions will carry equal marks (13 marks each). Question NO. I will be short answer type & will cover the whole syllabus. Candidtes will attempt five questions in all, selecting one each from section I to IV and the first compulsory questions.

Paper : Biodiversity and Conservation

Section-I

Biodiversity: Definition, levels, importance, threats to biodiversity, hot spots of biodiversity in India. Environment Protection Act, 1986, Water (Prevention and Control of Pollution Act) 1974, Forest (Conservation) Act, 1980.

Section-II

Conservation: Causes of extinction of biodiversity**,** Strategies of conservation (in-situ and ex-situ). Protected Areas (National Parks, Sanctuaries and Biosphere reserves). Wild Life Protection Act, 1972.
Joint Forest Managemnt (JFM)

Section-III

Environmental Ethics: Role of religion in Environment Protection. Role of Indian tradition in environment conservation, Sustainable agriculture.
Different possible measures to make aware localties about environmental hazards and its remedies. Public Interest Litigation(PIL).

Section-IV

Cultivation Practices: Role of tree & plants in conservation; use of medicinal plants; cultivation methods *(Aloe vera, Calotropis (AK), Mentha, Ocimum*, Neem, *Ricinus, Jatropa, Accacia, Khair* (Katha).

Practical

Collection of local flora and fauna.
Study of vegetation of local area/college campus.
Collection of ten pests.
Identification of weeds.
Study of vegetation density by quadrat method
Plantation of medicinal plants**.**
Adaptation features of plants and animals.
Assignments/project as assigned by the teacher.

ENVIRONMENT CONSERVATION (ELECTIVE)

SEMESTER -VI

Paper: Public Awareness and Environment Issues

Theory hours	Practical Hours	Theory marks	Internal Assessment Marks	Practical marks	Practical Internal Assessment Marks	Total Marks
6	4	65	10	20	05	100

The number of hours for theory and Practical per week shall be 6 hours and 4 hours, respectively.

Note: The practical will include survey and its project reports carrying 5 marks (Internal Assessment) and 20 marks will be allotted to Laboratory practicals.

Instructions for paper setters:

There will be 9 questions in all, two each from section I to IV. All questions will carry equal marks (13 marks each). Question No. I will be short answer type & will cover the whole syllabus. Candidtes will attempt five questions in all, selecting one each from section I to IV and the first compulsory questions.

Paper : Public Awareness and Environment Issues

Section-I

Current Environmnet Issues: Climate Change, Global Warming, Population Explosion, Rain water harvesting, relamation of mining areas, impact of green revolution on environment with special referencve to Punab, Tehri Dam, Narmada Project, Bhopa Gas Tragedy, River Cleaning Project of Sant B.S. Seechewal (Punjab).

Section-II

Environmental Protection: Role of Non - Governmental Organizations (NGOs) in environmental protection (Chipko movement, For a Living Ganga by WWF, Transformation DTC fleet to CNG driven transport, Earth Hour, Green Peace (Nitrate Pollution in Punjab), KVM, Jaito). Role of individual in environment protection. Role of environmental education.

Section-III

Environmental Agencies: Role of International & National Agencies: UNEP, UNDP, WWF, MOEF, CPCB, in environment conservation and management.
A brief account on Ramsar convention, CITES (Convention on International Trade in Endangered Species), UNFCC, Montreal Protocol, Kyoto Protocol, Copenhagen Summit.

Section-IV

RS and GIS: Definition, Application in Environment**.**
Biostat: Mean mode, median, standard deviation, co-relation, Regression.

Practical

Public/Mass awareness programmes in different villages and their reports.
Survey report on different diseases based theory.
Visit to a dam to study its construction and working.
To visit any NGO working for environment.
To study various indoor pollutants in houses like LPG, AC, Paints, Polish, Cosmetics, Detergents, Shampoo, Hair dyes.
To study the different tools of stat in data interpretation.
Assignments/project as assigned by the teacher.

MICROBIOLOGY

SEMESTER -V

THEORY		6 hrs	75(33+33+9*)
MIC 501:	**Pathogenic Microbiology-I**	3 hrs.	37.5 (33+4.5*)
MIC 502:	**Food and Industrial Microbiology-I**	3 hrs.	37.5 (33+4.5*)

PRACTICAL

One Practical examination pertaining to the entire syllabus 3 hrs 25 (22+3*)
included in Theory Papers MIC 501 and MIC 502

Semester VI

THEORY		6 hrs	75(33+33+9*)
MIC 601:	**Pathogenic Microbiology-II**	3 hrs.	37.5 (33+4.5*)
MIC 602:	**Food and Industrial Microbiology-II**	3 hrs.	37.5 (33+4.5*)

PRACTICAL

One Practical examination pertaining to the entire syllabus 3 hrs 25 (22+3*)
included in Theory Papers MIC 601 and MIC 602

Note : * Denotes marks for the Internal Assessment.

MICROBIOLOGY

MIC 501-PATHOGENIC MICROBIOLOGY-I

SEMESTER- V

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

(THREE PERIODS PER WEEK)

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Introduction to important diseases caused by *Streptococcus, Pneumococcus, Neisseria, Corynebacterium, Bacillus, Clostridium, Proteus*. The operative mechanisms, laboratory diagnosis, prevention and control of these diseases.

Section B

Morphology, pathogenesis, life cycle, laboratory diagnosis, prevention and control of viral diseases viz. Rabies, Polio, Small pox and Measles.

Section C

Introduction to Human mycotic infections viz Superficial, Cryptococcosis and Dermatophytosis.

Section D

Life cycle, pathogenic mechanisms and control of parasitic infections viz. amoebiasis, Kala-azar and Toxoplasmosis.

MICROBIOLOGY

MIC502-FOOD AND INDUSTRIAL MICROBIOLOGY-I

SEMESTER -V

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.
(THREE PERIODS PER WEEK)

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Food as substrate for microorganisms, Nutritive value of food stuffs, Effect of Hydrogen ion concentration (pH), moisture requirement on food, Important food borne diseases viz. Staphylococcal intoxication, Botulism, Salmonellosis and Shigillosis.

Section B

Contamination, preservation and spoilage in various foods viz. cereal and cereal products (cereal grains, flour, bread, pasta, macroni), Sugar and sugar products (Maple, Syrup, Honey, Candy).

Section C

Production strains, Isolation and screening techniques, preservation and genetic modification of Industrial microorganisms.

Section D

Yeast (Baker's) and its uses, Fermentation of Beer, Wine and Alcohol.

MICROBIOLOGY

PRACTICAL

SEMESTER- V

MAX. MARKS: 25 MARKS
PRACTICAL: 22 MARKS
INTERNAL ASSESSMENT: 3 MARKS
TIME: 3 HRS.

1. Identification of both Gram positive and Gram negative bacteria on the basis of:
   i) Morphology
   ii) Biochemical characteristics
   iii) Serological reactions
2. Demonstration of pathogens (Viruses, fungi, parasites) in permanent mounted slides
3. Demonstation of cysts/ ovas of Protozoa/ Helminths.
4. Demonstration of Laboratory grown fungi on Sabauraud's agar
5. Germ tube test for *Candida albicans*

…….

MICROBIOLOGY

MIC601-PATHOGENIC MICROBIOLOGY-II

SEMESTER- VI

MAX. MARKS: 37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.

(THREE PERIODS PER WEEK)

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Introduction to important diseases caused by *Shigella, Salmonella, Vibrio, Yersinia, Hemophilus*and *Mycobacterium.* The operative mechanisms, laboratory diagnosis, prevention and control of these diseases.

Section B

Morphology, pathogenesis, life cycle, laboratory diagnosis, prevention and control of viral diseases viz. Herpes, Influenza and AIDS

Section C

Introduction to Human mycotic infections viz Blastomycosis, Opportunistic mycosis; Candidiasis and Aspergillosis.

Section D

Life cycle, pathogenic mechanisms and control of parasitic infections viz.Ascariasis, Filariasis and Hook worm infections

MICROBIOLOGY
MIC602-FOOD AND INDUSTRIAL MICROBIOLOGY-II

SEMESTER- VI

MAX. MARKS:37.5 MARKS
THEORY: 33 MARKS
INTERNAL ASSESSMENT: 4.5 MARKS
TIME: 3 HRS.
(THREE PERIODS PER WEEK)

Note: The question paper will consist of four sections (A-D). There will be nine questions and five questions have to be attempted. Question 1 will span the complete syllabus and will be compulsory. Rest eight questions will be from different sections of the syllabus. There will be two questions from each of four sections and one is to be attempted. Each question will be subdivided into 2-4 sub-parts.

Section A

Qualitative and Quantitative analysis of food components (proteins, lipids, carbohydrates), Microbiological examination of food products including dairy products, food poisoning caused by bacteria and fungi.

Section B

Contamination, preservation and spoilage in various foods viz. Vegetables and fruits, Meat (Fresh meat, fresh beef, hamburger, fish), Milk and milk products (Cheese, butter)

Section C

Fermentation media, Characteristics of Ideal production media, Common substrates used in Ideal fermentations, Batch and continuous fermentations

Section D

Production of organic acids viz. acetic acid, lactic acid, propionic acid, butyric acid and mixed acids. Mass transfer in aerobic fermentations

Recommended Books :

1. Ananthanarayan, R. Panikar, C.K.J(2002), *Textbook of Microbiology*, Orient Longman Ltd., 160, Anna Salai, Chennai.
2. Brooks, G.F, Butel J.S, Morse, S.A (2002), *Jawetx. Malnick and Adelberg's Medical Microbiology* Mc Graw Hill.

10. Casida, (1995), *Industrial Microbiology*, N.Y., Wiley.

MICROBIOLOGY
PRACTICAL
B.Sc. (GENERAL) THIRD YEAR EXAMINATION
Semester- VI

MAX. MARKS: 25 MARKS
PRACTICAL: 22 MARKS
INTERNAL ASSESSMENT: 3 MARKS
TIME: 3 HRS.

1. Demonstration of Fungi through normal saline/KOH preparation
2. Quantitative examination of microbial types in raw processed preserved food stuffs
3. Direct microscopic examination of bacteria in raw, pasteurised milk
4. Methylene reductase test for milk
5. Various biochemical tests and their importance in Food Microbiology

----

MATHEMATICS

SEMESTER V

Paper I : ANALYSIS - I

Max. Marks : 30
Time : 3 hrs.

Note: 1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

Unit-I

Countable and uncountable sets.
Riemann integral, Integrability of continuous and monotonic functions, Properties of integrable functions, The fundamental theorem of integral calculus, Mean value theorems of integral calculus.
Beta and Gamma functions.

Unit-II

Improper integrals and their convergence, Comparison tests, Absolute and conditional convergence, Abel's and Dirichlet's tests, Frullani's integral.
Integral as a function of a parameter. Continuity, derivability and integrability of an integral of a function of a parameter.

7. S.C.Malik and Savita Arora : Mathematical Analysis, 2nd edition, New Age International Publishers.
8. G.B.Thomas and R. L. Finney : Calculus and Analytic Geometry (Ninth edition), Pearson Publication.

Paper II: MODERN ALGEBRA

Max. Marks : 30
Time : 3 hrs.

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

Unit-I

Groups, Subgroups, Lagrange's Theorem, Normal subgroups and Quotient Groups, Homomorphisms, Isomorphism Theorems, Conjugate elements, Class equation, Permutation Groups, Alternating groups, Simplicity of A_n, $n \geq 5$ (without proof).

Unit-II

Rings, Integral domains, Subrings and Ideals, Characteristic of a ring, Quotient Rings, Prime and Maximal Ideals, Homomorphisms, Isomorphism Theorems, Polynomial rings.

Paper III : PROBABILITY THEORY

Max. Marks : 30
Time : 3 hrs.

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

.

SECTION A

Review of notion of Probability, conditional Probability and independence, Bayes' Theorem.

Random Variables : Concept, probability density function, cumulative distribution function, discrete and continuous random variables, expectations, mean, variance, moment generating function, skewness and kurtosis.

Discrete Random Variables : Bernoulli random variable, binomial random variable, negative binomial random variable, geometric random variable, Poisson random variable.

SECTION B

Continuous Random Variables : Uniform random variable, exponential random variable, Beta random variable, Gamma random variable, Chi-square random variable, normal random variable.

Bivariate Random Variables : Joint distribution, joint and conditional distributions, Conditional Expectations, Independent random variables, the correlation coefficient, Bivariate normal distribution.

MATHEMATICS
SEMESTER VI

Paper I : ANALYSIS - II

Max. Marks : 30
Time : 3 hrs.

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

Unit-I

Double and triple integrals : Double Integral over A Rectangle, Repeated Integrals in $\mathbf{R}^2$, Double Integrals over Bounded Non-rectangular Regions, Area of Bounded Regions in Plane, Double Integrals as Volumes, Change of Variables in Double Integrals, Change to Polar Coordinates, Area in Polar Coordinates, Triple Integral in Rectangular Coordinates, Triple Integrals over General Regions in $\mathbf{R}^3$, Repeated Integrals in $\mathbf{R}^3$, Volume of a Region in $\mathbf{R}^3$, Change of Variables in a Triple Integral to Cylindrical and Spherical Coordinates
Vector Integration : Line, Surface and Volume integration. Gauss divergence theorem, Stokes' theorem, Green's theorem.

Unit-II

Sequences and series of functions : Pointwise and uniform convergence, Cauchy criterion for uniform convergence, Weierstrass M-test, Abel's and Dirichlet's tests for uniform convergence, uniform convergence and continuity, uniform convergence and Riemann integration, uniform convergence and differentiation, Weierstrass approximation theorem(Statement only), Abel's and Taylor's theorems for power series.

Fourier series : Fourier expansion of piecewise monotonic functions, Fourier Series for Odd and Even Function, Half Range Series, Fourier Series in the Intervals $[0, 2\pi]$, $[-1, 1]$ and $[a, b]$.

Paper II : LINEAR ALGEBRA

Max. Marks : 30
Time : 3 hrs.

Note:
1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

Unit-I

Vectror Space : Definition and Examples of Vector Spaces, Subspaces, Algebra of subspaces, Linear span, Linear dependence and independence of vectors, Basis and dimension of a vector space, Basis and dimension of subspace, Direct sums and complements

Linear transformations, Rank and Nullity of a linear transformation, Vector space of linear transformations

Unit-II

Linear transformations and matrices, Change of basis.

Characteristic roots and characteristic vectors, Algebraic and Geometric multiplicity of a characteristic value, Cayley-Hamilton theorem, Diagonalizable operators and matrices. Minimal polynomial of a linear operator (matrix).

Paper III : NUMERICAL ANALYSIS

Max. Marks : 30
Time : 3 hrs.

Note: 1. The syllabus has been split into two Units: Unit-I and Unit-II. Four questions will be set from each Unit.
2. A student will be asked to attempt five questions selecting at least two questions from each Unit. Each question will carry 6 marks.
3. The teaching time shall be five periods (45 minutes each) per paper per week including tutorial.
4. If internal assessment is to be conducted in the form of written examinations, then there will be only one written examination in a Semester.

.

SECTION A

Solution of Equations: Bisection, Secant, Regula Falsi, Newton's Method, Roots of Polynomials.
Interpolation: Lagrange and Hermite Interpolation, Divided Differences, Difference Schemes, Interpolation

Formulas using Difference.

Numerical Differentiation.
Numerical Quadrature: Newton-Cote's Formulas, Gauss Quadrature Formulas, Chebychev's Formulas.

SECTION B

Linear Equations: Direct Methods for Solving Systems of Linear Equations (Gauss Elimination, LU Decomposition, Cholesky Decomposition), Iterative Methods (Jacobi, Gauss-Seidel, Relaxation Methods).
The Algebraic Eigenvalue problem: Jacobi's Method, Givens' Method, Householder's Method, Power Method, QR Method, Lanczos' Method.
Ordinary Differential Equations: Euler Method, Single-step Methods, Runge-Kutta's Method, Multi-step Methods.

STATISTICS

SEMESTER-V

Note: 1. A candidate shall offer this subject in B.A./B.Sc. only if he/she takes up Mathematics as a subject in B.A./B.Sc.

2 A candidate shall offer these subjects in B.A./B.Sc. Third year only if he/she had taken up the corresponding subject in B.A. /B.Sc First and Second years.

3 There are two papers with codes 301 and 302 in the subject of Statistics in B.A./B.Sc., Semester-V. These are to be taught simultaneously throughout the Semester.

4 For theory, 8 lectures (of 45 minutes each) per week and for practical 4 lectures (of 45 minutes each) per week, amounting to 12 lectures per week for theory and practical, shall be allotted for the teaching.

Paper 301: DEMOGRAPHY AND ECO NOMIC STATISTICS

Maximum Marks	**: 75**
Theory	**: 65**
Internal Assessment	**: 10**
Time allowed	**: 3 hours**

Objective: The objective of this course is to acquaint students with the basic concepts of Microeconomictheory and the analysis of Statistical concepts used in the context of economic set up. They will also be exposed to the basic concepts in Demography.

Notes:

1. There will be in all nine (9) questions, all of equal marks. The first question is **compulsory** and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit**.**
2. Simple non-programmable calculator is allowed.
3. Statistical tables and log tables will be provided on request.

UNIT –I

Sources of demographic data-census, vital statistical registers, adhoc surveys and hospital records. Measurement of mortality - crude death rate, specific death rates, standardized death rate, infant mortality rate and cause of death rate, complete life Table and its description. Measurement of fertility - crude birth rate, general fertility rate, total fertility rate, gross reproduction rate and net reproduction rate.

Economic time series, its different components, illustrations, additive and multiplicative models, determination of trend, growth curves (exponential and modified exponential), analysis of seasonal fluctuations, construction of seasonal indices.

UNIT –II

Index numbers**,** definition, Methods to construct price, quantity and value index numbers. Problems involved in the construction of index numbers, use of averages, simple aggregative and weighted average methods. Laspeyre's, Paasche's, Edgeworth - Marshall and Fisher's index numbers. Time and factor reversal tests of index numbers. Chain Base index numbers, Cost of living index number, interpretation and applications of index numbers.

Static laws of demand and supply, price elasticity of demand, Pareto distribution, log normal distribution and their properties.

PAPER 302 : PRACTICAL (SEMESTER-V)

Marks : 25
Time : 3 Hours

(Viva voce: 5 marks; record of the year: 5 marks; Final Exam: 15 marks)

Note: The Practical Question Paper will contain five questions from the following topics. A student will be required to attempt three questions, each of 5 marks, in three hours duration.

1. Computing measures of mortality & fertility, construction of complete life table and examples involving users of life tables.
2. Construction of Index Numbers by Laspeyre's, Paasche's, Edgeworth-Marshall's and Fisher's methods.
3. Determination of trend, construction of seasonal indices in a time series.

STATISTICS
B.A. /B.Sc. (GENERAL) THIRD YEAR EXAMINATION
SEMESTER-VI

Note: 1. A candidate shall offer this subject in B.A./B.Sc. only if he/she takes up Mathematics as a subject in B.A./B.Sc.

2 A candidate shall offer these subjects in B.A./B.Sc. Third year only if he/she had taken up the corresponding subject in B.A./B.Sc. First and Second years.

3 There are two papers with codes 303 and 304 in the subject of Statistics in B.A./B.Sc., Semester-VI. These are to be taught simultaneously throughout the Semester.

4 For theory, 8 lectures (of 45 minutes each) per week and for practical 4 lectures (of 45 minutes each) per week, amounting to 12 lectures per week for theory and practical, shall be allotted for the teaching.

Paper 303: STATISTICAL QUALITY CONTROL AND COMPUTATIONAL TECHNIQUES

Maximum Marks : 75
Theory : 65
Internal Assessment : 10
Time allowed : 3 hours

Objective: This course teaches the application of Statistics to maintain quality in Enginnering or industrial set up. Linear programming with applications in the management and Administration of military, government, commercial, and industrial systems, is used to maximize the utility of limited resources. The objective is to acquaint the students ith different techniques for optimization.

Notes:

1 There will be in all nine (9) questions, all of equal marks. The first question is **compulsory** and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit**.**

2 Simple non-programmable calculator is allowed.

3 Statistical tables and log tables will be provided on request.

UNIT –I

Importance of Statistical methods in industrial research and practice, meaning of quality, quality assurance and process control. General theory of control charts, causes of variations in quality, control limits, sub-grouping summery of out of control criteria. Charts for variables - $\overline{X}$ and R charts. Charts for attributes - np, p, c and u - charts.

Principle of acceptance sampling- problem of lot acceptance, stipulation of good and bad lots, concepts of producer's and consumer's risks, AQL, LTPD, AOQL, ATI, ASN and OC functions. Single and double sampling plans and their ATI, ASN and OC functions.

UNIT –II

Difference tables and methods of interpolation, Newton's and Lagrange's methods of interpolation, divided differences, numerical differentiation and integration. Trapezoidal rule, Simpson's one third formula, iterative solution of linear equations by Gauss – Seidel Method.

Linear Programming: elementary theory of convex sets, definition of general linear programming problems (LPP), formulation of LPP, examples of LPP. Graphical and simplex methods of solving an LPP, artificial variables, duality of LPP ,Transportation problem (non-degenerate and balanced cases), initial basic feasible solution through North-West Corner Rule, Matrix Minima & VAN method.

4. Rajaraman, V (1981) : Computer Oriented Numerical Methods, Prentice Hall.

PAPER 304 : PRACTICAL (SEMESTER-V)

Marks : 25
Time : 3 Hours

(Viva voce: 5 marks; record of the year: 5 marks; Final Exam: 15 marks)

Note: The Practical Question Paper will contain five questions from the following topics. A student will be required to attempt three questions, each of 5 marks, in three hours duration.

1 Drawing of $\overline{X}$, R, np, p,c and u – charts, Drawing of OC, AOQ and ATI curves for single and double sampling plans for attributes.

2 Construction of difference tables, use of Newton, Lagrange and divided difference interpolation formulae, numerical evaluation of integrals using Trapezoidal and Simpson one-third formulae, solution of system of linear equations by Gauss – Seidel iterative method.

3 Formulation of LPP's and their duals. Solving LPP's by graphical and Simplex methods, solution of transportation problem.

APPLIED STATISTICS

SEMESTER-V

Note:
1. This course shall not be opted for along with courses in B.A./B.Sc. Mathematics and/or B.A./ B.Sc. Statistics.
2 The candidate opting for this course will not be eligible for admission to M.A./M. Sc. Statistics.
3. There is one paper with code 301AS in the subject of Applied Statistics in B.A./B.Sc. Semester-V, having a total of 100 marks.
4 9 Lectures of 45 minutes each per week shall be allotted for the teaching

Paper- 301 AS: ESTIMATION AND TESTING OF HYPOTHESIS

Maximum Marks	**: 100**
Theory	**: 90**
Internal Assessment	**: 10**
Time allowed	**: 3 hours**

Objective: The objective of the course is to provide

(i) a systematic account of testing and closely related theory of point estimation and confidence sets, together with their applications.
(ii) exposure to various statistical designs leading to the analysis of variance, elimination of heterogeneity of the data and construction of designs.
(iii) an insight into Multivariate Techniques.

Notes:

1 There will be in all nine (9) questions, all of equal marks. The first question is compulsory and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit.

2 Simple non-programmable calculator is allowed.
3 Statistical tables and log tables will be provided on request.

UNIT –I

Estimators and estimates, unbiased, consistent, efficient estimators. Methods of moments, maximum likelihood estimators for the parameters of Binomial, Poisson and normal distributions, confidence intervals.

Tests of a statistical hypothesis, two types of errors, power of a test, Tests for the parameters of Binomial, Poisson and normal distributions, Chi-squared tests of goodness of fit. Wilcoxon and sign test.

UNIT –II

Analysis of variance, one and two way classifications. Estimates of main effects, tests of significance for equality of effects.

Principles of design of experiments- Randomization, replication and local control. Completely randomized and randomized block designs.

Multivariate Techniques (upto 4 variables only). Estimators of mean vector and variance-covariance matrix of multivariate (upto 4) normal distribution, multiple regression, multiple correlation and partial correlation.

Books Recommended

1. Goon, A.M., Gupta, M.K. and Das Gupta, B (2005) : Fundamentals of Statistics, Vol. I Chapters: 14 to18 (only the relevant portion from these chapters as suggested in the syllabus)

2. Goon, A.M., Gupta, M.K. and Das Gupta, B (2005) : Fundamentals of Statistics, Vol. II, Chapters: 1, 2 (only the relevant portion from these chapters as suggested in the syllabus)

Additional references:

1. Daniel, W.W. and Cross C.L. (2013) : Biostatistics. A foundation for analysis in the health Sciences, (10^{th} edition) Wiley India: New Delhi.
2. Gupta S.C. & Kapoor V.K. (2001) : Fundamentals of Applied Statistics, Sultan Chand & Sons Educational Publishers New Delhi.

APPLIED STATISTICS

SIXTH SEMESTER

Note: 1. This course shall not be opted for along with courses in B.A./B.Sc. Mathematics and/ or B.A./ B.Sc. Statistics.

2. The candidate opting for this course will not be eligible for admission to M.A./M. Sc. Statistics.

3. There is one paper with code 302AS in the subject of Applied Statistics in B.A./B.Sc. Semester VI, having a total of 100 marks.

4. 9 Lectures of 45 minutes each per week shall be allotted for the teaching

Paper- 302AS: ECONOMICS AND INDUSTRIAL STATISTICS

Maximum Marks	**: 100**
Theory	**: 90**
Internal Assessment	**: 10**
Time allowed	**: 3 hours**

Objective: The objective of the course is to provide an idea about different sampling methods, use of index numbers and time series. It also provides exposure to the knowledge about controlling quality in industry. Different measures used in demography are described.

Notes:

1. There will be in all nine (9) questions, all of equal marks. The first question is **compulsory** and will be of short answer type covering the entire syllabus. Out of the remaining eight (8) questions, four (4) questions will be set from each Unit. The candidate will be required to attempt five questions in all including the compulsory first question and two questions from each Unit**.**
2. Simple non-programmable calculator is allowed.
3. Statistical tables and log tables will be provided on request.
4. 4 to 5 lectures (40 minutes each) per paper per week amounting in all to 9 lectures for two papers shall be allocated for the teaching.

UNIT-I

Sampling: Simple random and stratified sampling, optimum allocation in stratified sampling. Ratio and regression estimates.

Index Numbers: Index Numbers-as weighted averages, Price Index numbers, Quantity index numbers, Fisher's tests for index numbers.

Time Series: The four components of a time series, moving average, the Slutsky Yule effect, determination of trend by curve fitting and moving average methods.

UNIT –II

Quality Control: Construction, use and interpretation of control charts for mean, range, fraction defective and number of defects. Single sampling inspection plans. Concepts of producer's and consumer's risks, O.C. and A.O.Q. Curves.

Vital Statistics: Rates and ratios, crude death rate, age specific death rate, infant mortality rates, standardized death rates, direct and indirect methods. Measurement of fertility, crude birth rate, general, specific and total fertility rates. Standardized birth rates. Calendar Year rates.

Books Recommended

1. Goon, A.M., Gupta, M.K. and Das Gupta, B. (2005) : Fundamentals of Statistics, Vol. II, Ch. 3, 4, 6, 7, 9. (only the relevant portion from these chapters as suggested in the syllabus)

2. Daniel, W.W. and Cross C.L. (2013) : Biostatistics, A foundation for analysis in the health Sciences, Tenth edition Wiley India: New Delhi.

****

PHYSICS

B.Sc. (GENERAL) THIRD YEAR (5th and 6th Semester) EXAMINATION, 2020-2021

General Instructions for teachers, students and paper setters :

1. There will be three papers of theory and one laboratory (practical course). Each of the theory papers is allocated 25 marks including 3(three) marks for the Internal assessment.
   The Practical examination is of 50 marks including 5 (Five) marks for the Internal assessment and will be held along with the sixth semester examination.
2. The number of lectures per week will be three for each theory paper and six for practicals.
3. The examination time for each theory paper will be three hours and it will be four hours for practicals.
4. Each theory paper will consist of **seven** questions comprising of three sections. First two sections will comprise of **three** questions from each of Units I and II of syllabus, and the third section will comprise of **one compulsory** question of **ten** short answer type parts covering whole syllabus. The question paper will be set for 44 marks - **All the questions in first and second sections will carry 9 (nine) marks each and the compulsory question will carry 8 marks.** Student will attempt two questions from each of the first two sections and any eight parts of the compulsory question. **After evaluation of the answer books out of 44 marks, the marks will be given out of 22 marks.**
5. The numerical problems /exercises in the question paper should be 25-30%.
6. The use of Non-programmable calculators will be allowed (paper setters should explicitly mention this on the question paper) in the examination centre but these will not be provided by the University/College. Mobile phones and pagers are not allowed in the examination hall.

PHYSICS

SEMESTER – V

Papers, marks and teaching hours allocation:

Paper A :	Condensed Matter Physics - I	Total Teaching hours 30
Paper B :	Electronics and Solid State Devices - I	Total Teaching hours 30
Paper C :	Nuclear & Particle Physics - I	Total Teaching hours 30
	Physics Practicals	Total Teaching hours 45

Paper A : CONDENSED MATTER PHYSICS - I (30 Hrs.)

UNIT-I

Crystal structure: Symmetry operations for a two dimensional crystal. Two dimensional Bravais lattices, Three dimensional Bravais lattices, Basic primitive cells, Crystal planes and Miller indices, Diamond and NaCl structure. Crystal diffraction : Bragg's Law, Determination of crystal structure, Laue equations, Reciprocal lattices of SC, BCC and FCC, Bragg's law in reciprocal lattice, Brillouin zones and its derivation in two dimensions, structure factor and atomic form factor.

UNIT-II

Band Theory of solids, periodic potential and Bloch theorem, Kronig-Penney model, band gaps, band structures in conductors, direct and indirect semiconductors and insulators.
Free electron theory of metals, effective mass, drift current, mobility and conductivity (carrier concentration and mobility of carriers) and their variation with temperature in semi-conductors, Fermi level positions in intrinsic and extrinsic semiconductors, Wiedemann-Franz law, Hall effect in metals and semiconductors.

Recommended Books :

Essential Readings :

1. *Introduction to Solid State Physics, C.* Kittel, Wiley Eastern
2. *Elements of Modern Physics,S.*H. Patil, Tata McGraw Hill, 1985.
3. *Solid State Physics, 6th Edition, S.O.* Pillai, *New Age International Publishers.*
4. *Physics for Degree Students*, C.L. Arora and P.S. Hemne, S. Chand & Co., 2014.

Further Readings :

1. *Elements of Solid State Physics,* 2nd Edition, J.P. Srivastava, Prentice Hall.
2. *Elementary Solid State Physics,* M. Ali Omar, Pearson.
3. *Crystallography for Solid State Physics,* A.R. Verma, O.N. Srivastava, Wiley Eastern.

Paper-B : ELECTRONICS AND SOLID STATE DEVICES - I (30 Hrs.)

UNIT-I

Concepts of current and voltage sources, Thevenin's theorem, Norton's theorem, Source conversion.
CRO, Block diagram, construction and principle of working, Use of CRO for frequency, time period, special features of dual trace, phase measurements.

Energy band diagrams in semiconductors, Direct and indirect semiconductors, Formula to calculate Position of Fermi level in p and n semiconductors, Barrier formation, energy band diagram of p-n junction, Formula for Depletion width, Qualitative ides of current flow mechanism in forward and reverse biased diode, v-i characteristics, static and dynamic resistance, Depletion and diffusion capacitance, zener diode, LED, photodiode and solar cell.

(Book 1, Book 3)

UNIT-II

Diode circuits, Clipping circuits, Rectification: half wave, full wave and bridge rectifiers, filter circuits (C, LC and π filters), rectification efficiency and ripple factor in LC filter, voltage regulation circuit using zener diode, voltage multiplier circuits.
Bipolar Junction transistors : Structure and working, different currents in transistor, switching action. Characteristics of CB, CE and CC configurations, Active, cutoff and saturation regions.
Load line analysis of transistors, Q-point, Transistor biasing and stabilization of operating point, fixed bias, collector to base bias, bias circuit with emitter resistor, voltage divider biasing circuit.
Working ans analysis of CE amplifier using h-parameters, current, voltage and power gain, input and output impedance. Class A, B and C amplifiers.

(Book 1, Book 2)

Recommended Books :

Essential Readings :

1. Electronic Devices and Circuit Theory, 7th Ed., R. Boylestad, L. Nashelsky, Prentice Hall Inc.
2. *Electronic Principles, A.P.* Malvino, and D.J. Bates, *7th ed.* McGraw Hill
3. *Solid State Electronic Devices,* 6th Ed., Ben G. Streetman and S. Banerjee, Eastern Economy Edition.

Further Readings :

1. *Basic Electronics,* 5th Edition, B.L. Thareja, S. Chand.
2. *Basic Electronics and Linear Circuits, N.N.* Bhargave, D.C. Kulshreshtha, and S.C. Gupta,Tata Mc Graw Hill.
3. *Foundations of Electronics, D.* Chatopadhyay, P.C. Rakshit, B. Saha, and N.N. Purkit, New Age International

Paper-C : NUCLEAR AND PARTICLE PHYSICS - I (60 Hrs.)

UNIT-I

General properties of Nuclei : Constituents of nucleus and their intrinsic properties, Quantitative facts about nuclear size, mass, density, binding energy and its variation with mass number, Wave mechanical properties of nucleus, angular momentum, parity; magnetic moment and electric moments of the nucleus. properties of nuclear forces and saturation, meson theory of nuclear forces
Nuclear Models : Liquid drop model, semi-empirical mass formula, most stable isobar.
Evidence for nuclear shell structure, Nuclear shell model, concept of mean field.

UNIT-II

Radioactive decay, Units of radioactivity (Ci and Bq), Successive disintegration, Natural radioactivity, Radioactive series, Carbon dating.
Alpha decay, energetic, alpha spectrum, Gamow's theory of alpha decay, Geiger-Nuttal rule.
Beta decay, Qualitative discussion of beta spectrum, Evidence of existence of Neutrino, Conservation of nuclear energy in Beta minus, Beta plus and Electron capture decays.
Gamma-ray emission, selection rules, Internal conversion.

Nuclear Reactions: Types, Concept of compound and direct (pickup and stripping) reactions, Reaction differential and integral cross section, units, conservation laws and kinematics, Q-value equation, Coulomb (Rutherford) scattering cross section and distance of nearest approach.
Energy classification of neutrons, Nuclear fission in reactors, Reactor facilities available in India, Nuclear fusion in stars.

Recommended Books :

Essential Readings:

1. *Concept of Modern Physics,* 6th Ed., A. Beiser, S. Mahajan and S.R. Choudhury, Tata McGraw Hill.
2. *Nuclear Physics, I.* Kaplan,Addition-Wesley, Publishing Company Inc.
3. *Physics for Degree Students*, C.L. Arora and P.S. Hemne, S. Chand & Co., 2014.

Further Readings :

1. *An Introduction to Nuclear Physics, M.R.* Bhiday, and V.A. Joshi, Orient Longman.
2. *Concepts of Nuclear Physics, B.L.* Cohen, Tata McGraw Hill
3. *Fundamentals of Nuclear Physics, J.* Verma, CBS.

PHYSICS PRACTICALS

The students are required to perform all the Nine experiments from each of the Units I and Unit II . The Practical examination will be held along with the sixth semester examination.

The aim of the project work is to develop the scientific and technical temper in the students and as such it may consist of development of a laboratory experiment, fabrication of a device or electronic circuit etc. The student will prepare a project report of about 10 pages. Assessment of the project work will be done on the basis of the effort put in the execution of the project, report prepared and viva-voce.

General Guidelines for Physics Practical Examinations :

Total : 50 marks

1. The distribution of marks is as follows :

(i)	One full experiment out of section–A requiring the student to take some data, analyse it and draw conclusions. (Candidates are expected to state their results with limits of error).	20
(ii)	One exercise based on experiment or Computer Programming from the Unit assigned to the student for the semester	7
(iii)	Viva-Voce and Record (Practical file)	10
(iv)	Project	8
(v)	Internal Assessment	5

Note for Examiners :

2. The marks scored under each head must be clearly written on the answer sheet.

3. There will be one session of 3 hours duration. The paper will have two sections. Section–A will consist of 4 experiments from each of Units I and Unit II, out of which an examinee will mark 3 experiments from either of units and one of these is to be allotted by the external examiner.

4. Section–B will consist of exercises/computer based activities which will be set by the external examiner on the spot. The length of the exercises should be such that any of these could be completed in one hour.

5. The examiner should take care that the experiment allotted to an examinee from section-A and exercise allotted from section–B are not directly related to each other.

6. Number of candidates in a group for practical examination should not exceed 12.

7. In a single group, no experiment be allotted to more than three examinees in the group.

List of Experiments :

Note : Each student should perform ***at least Nine experiments*** in the laboratory.

UNIT-I

I CONDENSED MATTER PHYSICS:

(i) Measurement of reverse saturation current in p-n junction diode at various temperatures and to find the approximate value of energy gap.
(ii) To draw forward and reverse bias characteristics of a p-n junction diode and draw a load line.
(iii) Study of a diode as a clipping element.
(iv) To measure the magnetic susceptibility of $FeCl_2$ solution by Quincke's method.

II ELECTRONICS AND SOLID STATE DEVICES :

(v) To study the response of RC-circuit to various input voltages (square, sine and triangular).
(vi) To measure the efficiency and ripple factors for (a) Half-wave, (b) Full wave, and (c) Bridge rectifier circuits.
(vii) To study the reduction in the ripples in the rectified output with RC, LC and π-filters.
(viii) To draw the characteristics of a Zener diode and LED using constant current source.
(ix) To study the stabilization of output voltage of a power supply with Zener diode.
(x) To set up an oscillator and study its output on CRO for different V values.
(xi) To study the characteristics of a thermistor and find its parameters.

Exercises :

1. Any one exercise based on the above given experiments.

Computer Based Activities : Elementary C language programs.

1. Print a 2D array in spiral form.
2. To find determinant of a given matrix.
3. To find inverse of a given matrix.
4. To interpolate the data values from the given set.

UNIT-II

I CONDENSED MATTER PHYSICS:

(i) To trace the B-H curves for different materials using CRO and find the magnetic parameters from these.
(ii) To find the conductivity of a given semi-conductor crystal using four probe method.
(iii) To determine the Hall coefficient for a given semiconductor.

II ELECTRONICS AND SOLID STATE DEVICES :

(iv) To measure and plot Common Emitter Characteristics of a transistor (pnp or npn).
(v) To plot Common Base Characteristics and determine h-parameters of a given transistor.
(vi) To draw output and mutual characteristics of an FET and determine its parameters.
(vii) To study the gain of an amplifier at different frequencies and to find band-width and gain-band- width product.

III NUCLEAR PHYSICS :

(viii) To draw the Plateau of a GM counter and find its dead time.

(ix) To study the statistical fluctuations using GM counter.

(x) To study the absorption of beta-particles and determine the end point energy using GM counter. Also determine the absorption co-efficient (for aluminium) from it.

(xi) Verification of Rutherford Scattering experiment-mechanical analogue.

Exercises :

1. Any one exercise based on the above given experiments.

Computer Based Activities : Elementary C language programs.

1. To solve simultaneous equations by elimination method.
2. Fitting a straight line or a simple curve of a given data.
3. Convert a given integer into binary and octal/hexadecimal system and vice versa.

Text and Reference Books :

1. *"A Laboratory Manual of Physics for Undergraduate Classes" by D.P.* Khandelwal.
2. *"B.Sc. Practical Physics" by C.L. Arora, S. Chand & Co. (2014)*
3. *"Numerical Analysis" by C. Dixon*
4. *Programming with C,* Byron Gottfried & Jitender Chhabra, *Schaum series*

.....

PHYSICS

SEMESTER – VI

Papers, marks and teaching hours allocation:

Paper A :	Condensed Matter Physics - II	Total Teaching hours 30
Paper B :	Electronics and Solid State Devices - II	Total Teaching hours 30
Paper C :	Nuclear & Particle Physics - II	Total Teaching hours 30
	Physics Practicals	Total Teaching hours 45

Paper A : CONDENSED MATTER PHYSICS - II (30 Hrs.)

UNIT-I

Lattice Dynamics : Lattice vibrations and phonons, Scattering of photons by phonons, Dynamics of a linear chain of similar atoms and chain of two types of atoms, optical and acoustic modes, Density of modes, Einstein and Debye theories of specific heats of solids.

Magnetic classification of materials (Dia, para, ferro, ferri, antiferro), Langevin theory of dia and paramagnetism, Quantum theory, Weiss's theory of Ferromagnetism, temperature dependence, hysteresis of ferromagnetic materials.

UNIT-II

Dielectric constant & polarizability, electric susceptibility, Clausius Mosotti equation, frequency dependence, ferroelectrics and Piezoelectrics.

Liquid crystals, various types and properties. Applications.

Superconductivity: Meisner effect, London's equation and penetration depth, critical magnetic field and temperature, DC and AC Josephson effect, BCS theory (formation of cooper pairs), ground state and energy gap.

Basic ideas of materials at nanoscale: Difference from bulk material properties, Nanoparticles, introduction to fabrication and characterization techniques, Carbon Nanostructures - nanotubes, grapheme. Applications of nanotechnology in various fields.

Recommended Books :

Essential Readings :

1. *Introduction to Solid State Physics, C.* Kittel, Wiley Eastern
2. *Elements of Modern Physics,S.*H. Patil, Tata McGraw Hill, 1985.
3. *Solid State Physics, 6th Edition,* S.O. Pillai, New Age International Publishers.
4. *Fundamental of Physics, Vol. II,* R.M.P. Jaiswal, S.K. Gupta and A. Rani, R. Chand and Co.

Further Readings :

1. *Elements of Solid State Physics,* 2nd Edition, J.P. Srivastava, Prentice Hall.
2. *Elementary Solid State Physics,* M. Ali Omar, Pearson.
3. *Crystallography for Solid State Physics,* A.R. Verma, O.N. Srivastava, Wiley Eastern.

Paper-B : ELECTRONICS AND SOLID STATE DEVICES - II (30 Hrs.)

UNIT-I

Structure and working of JEFT, characteristics, drain and transconductance curve, FET amplifier and its voltage gain, Structure and working of MOSFET.

Feed back in amplifiers, voltage gain of negative feedback amplifier, advantages of negative voltage feedback, negative current feedback circuit, emitter follower.

Theory of sinusoidal oscillations, loop gain and phase, Lead-lag RC circuit, Wein bridge oscillator. Barkhausen criterion of sustained oscillations, positive feedback amplifier, LC oscillators, Colpitts and Hartley oscillators.

(Book1, Book2)

UNIT-II

Operational amplifier (black box approach) : Characteristics of ideal and practical opamp 741, open-loop and closed-loop gain, characteristics and applications - inverting and non-inverting amplifiers, adder, subtractor, differentiator and integrator, Comparator, Timer IC555, pin diagram and its applications as astable and monostable multivibrator.

(Book1, Book2)

Analog and digital circuits, binary numbers, decimal to binary conversions, AND, OR, NOT gates, NAND NOR gates as universal gates, XOR and XNOR gates.

De Morgan's theorem, Simplification of logic circuit using Boolean algebra, Minterms and Maxterms, Conversion of a truth table into an equivalent logic circuit by Sum of products method. (Book 3)

Analog and digital communication systems, Amplitude and Frequency modulation, Power in AM wave, generation and detection, Brief account of Satellite communication, Sky-wave communication, and mobile communication.

Recommended Books :

Essential Readings :

1. *Electronic Devices and Circuit Theory*, 7th Ed., R. Boylestad, L. Nashelsky, Prentice Hall Inc.
2. *Electronic Principles, A.P.* Malvino, and D.J. Bates, 7th *ed.* McGraw Hill
3. Digital Principles and Applications, 7th Ed., A.P. Malvino, D.P. Leach and Saha, 2011, Tata McGraw Hill

Further Readings :

1. *Basic Electronics,* 5th Edition, B.L. Thareja, S. Chand.
2. *Basic Electronics and Linear Circuits, N.N.* Bhargave, D.C. Kulshreshtha, and S.C. Gupta,Tata McGraw Hill.
3. *Foundations of Electronics, D.* Chatopadhyay, P.C. Rakshit, B. Saha and N.N. Purkit, New Age International

Paper-C : NUCLEAR AND PARTICLE PHYSICS - II (30 Hrs.)

UNIT-I

Interaction of nuclear radiation with matter: Energy loss due to ionization (Bethe Bloch formula), Range and energy straggling, Energy loss of electrons and positrons, radiation loss by fast electrons, Bremsstrahlung, electron-positron annihilation, production of Cerenkov radiation,
Gamma-ray interaction with matter, photoelectric effect, Compton scattering, pair production (qualitative description).
Detectors for nuclear radiation: Gas-filled detectors, Ionization chamber, proportional counter, G.M. counter, Scintillation detector and Photomultiplier tube, Brief account of Semiconductor detectors.

UNIT-II

Particle Physics : Particle interactions : basic features and their exchange particles, Classification of elementary particles, properties, decay modes of leptons and mesons, Antiparticles, charge conjugation
Symmetries and Conservation principles, Lepton number, baryon number, Isospin, Hypercharge, Strangeness and charm, Gell-mann Nishijima formula
Concept of the quark model, color quantum number and gluons.
Origin and composition of Cosmic rays, Secondary cosmic rays, Effect of magnetic field of earth, Van Allen belts.
Particle accelerators: Cockcroft-Walton accelerator, Van-de Graaff generator, Tandem accelerator Linear accelerator, Cyclotron. Brief account of Syncrhrotron, Accelerator facilities available in India.

Recommended Books :

Essential Readings:

1. *Concept of Modern Physics,* 6th Ed., A. Beiser, S. Mahajan and S.R. Choudhury, Tata McGraw Hill.
2. *Nuclear Physics, I.* Kaplan,Addition-Wesley, Publishing Company Inc.
3. *Physics for Degree Students*, C.L. Arora and P.S. Hemne, S. Chand & Co., 2014.
4. *An Introduction to Nuclear Physics, M.R.* Bhiday, and V.A. Joshi, Orient Longman.

Further Readings :

1. *Concepts of Nuclear Physics, B.L.* Cohen, Tata McGraw Hill
2. *Fundamentals of Nuclear Physics, J.* Verma, CBS.

PHYSICS PRACTICALS

The Practical examination will be held along with the sixth semester examinations.General Guidelines for Physics Practical Examinations and syllabus is given in syllabus for Semester V.

CHEMISTRY

SEMESTER-5th

Scheme of Teaching and Examination

Paper	*Course*	*Teaching Hrs.*		*Max. Marks*
XVII	Inorganic Chemistry-A	30	3 periods per week	22+3 internal assessment
XVIII	Organic Chemistry-A	30	3 periods per week	22+3 internal assessment

Paper-XVII: INORGANIC CHEMISTRY-A

Time : 3 Hrs
Max. Marks: 22+3
30 Hrs. (2 Hrs/Week)
3 Periods/Week

Objective of the course

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(8 Hrs.)**

Metal – Ligand Bonding in Transition Metal Complexes:

Limitations of valence bond theory, an elementary idea of crystal – field theory, crystal field splitting in octahedral, tetrahedral and square planar complexes, factors affecting the crystal – field parameters, Spectro chemical Series.

UNIT-II **(7 Hrs.)**

Thermodynamic and Kinetic Aspects of Metal Complexes :

A brief outline of thermodynamic and Kinetic stability of metal complexes and factors affecting the stability, substitution reactions of square planar complexes.

UNIT-III **(8 Hrs.)**

Organometallic Chemistry:

Definition, nomenclature and classification of organometallic compounds. Preparation, properties, bonding and applications of alkyls and aryls of Li, Al , Hg, Sn and Ti, a brief account of metal – ethylenic complexes and homogeneous hydrogenation, mononuclear carbonyls and the nature of bonding in metal carbonyls

UNIT-IV **(7 Hrs.)**

Bioinorganic Chemistry:
Essential and trace elements in biological processes, metalloporphyrins with special reference to haemoglobin and myoglobin. Biological role of alkali and alkaline earth metal ions. Nitrogen fixation.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-XVIII: ORGANIC CHEMISTRY-A

Time : 3 Hrs
Max. Marks : 22+3
30 Hrs. (2 Hrs/Week)
3 Periods/Week

Objective of the course

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I

Electromagnetic Spectrum: Absorption Spectra –I: **(7 Hrs.)**
Ultraviolet (UV) absorption spectroscopy – Absorption laws (Beer – Lambert Law), molar absorptivity, presentation and analysis of UV spectra, types of electronic transitions, effect of conjugation. Concept of chromophore and auxochrome. Bathochromic, hypsochromic, hyperchromic and hypochromic shifts. UV spectra of conjugated enes and enones.

Woodward Fieser Rules and their applications in calculating maximum values of conjugated alkenes (cyclic as well as acyclic) and conjugated carbonyl compounds.

UNIT-II **(7 Hrs.)**

Electromagnetic Spectrum: Absorption Spectra-II:

Infrared (IR) absorption spectroscopy – Molecular vibrations, Hooke's law, selection rules, intensity and position of IR bands, measurement of IR spectrum, fingerprint region, characteristic absorptions of various functional groups and interpretation of IR spectra of simple organic compounds.

Problems pertaining to the structure elucidation of simple organic compounds using UV, IR and PMR spectroscopic techniques.

UNIT-III **(8 Hrs.)**

Spectroscopy:

Nuclear magnetic resonance (NMR) spectroscopy.
Proton magnetic resonance (^{1}H NMR) spectroscopy, nuclear shielding and deshielding, chemical shift and molecular structure, spin-spin splitting and coupling constants, area of signals, interpretation of PMR spectra of simple organic molecules such as ethyl bromide, ethanol, acetaldehyde, 1,1,2-tribromoethane, ethyl acetate, toluene and acetophenone.

UNIT-IV **(8 Hrs.)**

Carbohydrates:

Classification and nomenclature. Monosaccharides, mechanism of osazone formation, interconversion of glucose and fructose, chain lengthening and chain shortening of aldoses. Configuration of monosaccharides. Erythro and threo diastereomers. Conversion of glucose into mannose. Formation of glycosides, ethers and esters. Determination of ring size of monosaccharides. Cyclic structure of D (+) – glucose. Mechanism of mutarotation.

Structure of ribose and deoxyribose.

An introduction to disaccharides (maltose, sucrose and lactose) and polysaccharides (starch and cellulose) without involving structure determination.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-XIX: PHYSICAL CHEMISTRY-A

Time : 3 Hrs
Max. Marks : 22+3
30 Hrs. (2 Hrs/Week)
3 Periods/Week

Objective of the course

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(8 Hrs.)**

Elementary Quantum Mechanics-I:

Black-body radiation, Planck's radiation law, photoelectric effect, heat capacity of solids, Bohr's model of hydrogen atom (no derivation) and its defects, Compton effect.

De Broglie hypothesis, the Heisenberg's uncertainty principle, Sinusoidal wave equation, Hamiltonian operator, Schrodinger wave equation and its importance, physical interpretation of the wave function, postulates of quantum mechanics, particle in a one dimensional box.

Schrodinger wave equation for H-atom, separation into three equations (without derivation), quantum numbers and their importance, hydrogen like wave functions, radial wave functions, angular wave functions.

UNIT-II (7 Hrs.)

Elementary Quantum Mechanics-II:

Molecular orbital theory, basic ideas – criteria for forming M.O. from A.O., construction of M.O.'s by LCAO – H_2^+ ion. Calculation of energy levels from wave functions, physical picture of bonding and antibonding wave functions, concept of σ, $\sigma*$, π, π^* orbitals and their characteristics. Hybrid orbitals – sp, sp^2, sp^3; calculation of coefficients of A.O.'s used in these hybrid orbitals.

Introduction to valence bond model of H_2, comparison of M.O. and V.B. models.

UNIT-III (8 Hrs.)

Photochemistry-I:

Interaction of radiation with matter, difference between thermal and photochemical processes. Laws of Photochemistry: Grothus – Drapper law, Stark – Einstein law, Jablonski diagram depicting various processes occurring in the excited state.

UNIT-IV (7 Hrs.)

Photochemistry-II:

Qualitative description of fluorescence, phosphorescence, non-radiative processes (internal conversion, intersystem crossing), quantum yield, photosensitized reactions – energy transfer processes (simple examples).Photochemistry of carbonyl compounds and alkenes.

Instructions for paper setters and candidates:

i. Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.

ii. The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.

iii. Compulsory question carries six marks and remaining all questions carry four marks each.

Paper – XX: LABORATORY PRACTICALS **Max. Marks: 22+3**

INORGANIC CHEMISTRY

Synthesis and Analysis: **6 Periods/ week**

(a) Preparation of sodium trioxalatoferrate (III), $Na_3[Fe(C_2O_4)_3]$ and determination of its composition by permaganometry.
(b) Preparation of copper tetraammine complex $[Cu(NH_3)_4]SO_4$.
(c) Preparation of cis-and trans-bisoxalatodiaqua chromate (III) ion.

Instrumentation
Solvent Extraction
Separation and estimation of Mg(II) and Fe(II).

PHYSICAL CHEMISTRY

Electrochemistry

(a) To determine the strength of the given acid conductometrically using standard alkali solution.
(b) To determine the solubility and solubility product of a sparingly soluble electrolyte conductomertircally.
(c) To study the saponification of ethyl acetate conductometrically.
(d) To determine the ionization constant of a weak acid conductometrically.
(e) To study the distribution of iodine between water and CCl_4.
(f) To study the distribution of benzoic acid between benzene and water.

Molecular Weight Determination

(a) Determination of molecular weight of a non – volatile solute by Rast method.
(b) Determination of the apparent degree of dissociation of an electrolyte (e.g. NaCl) in aqueous solution of the substance.

General Instruction to the Examiners:

Note: Practical examination will be of four hours duration & shall consist of the following questions:

Q.No. 1*. Preparation of an inorganic complex : 7 marks

Q.No. 2. Physical Chemistry : 7 marks

Students shall be allowed the choice to opt for one experiment out of the three offered. The candidate will write theory, short procedure and calculations of that experiments in the next 10 minutes. Note – Book / Books is/are not allowed during writing.

Q.No. 3. Viva-Voce : 5 marks

Minimum of four questions (2 marks each) be asked on the background of practical course.

Q.No. 4. Note Book : 3 marks

*If a question on preparation is asked, then the students shall be required to give Equation, requirements & short procedure in the first 10 minutes. Note Books are not allowed during writing.

CHEMISTRY
SEMESTER-6th
Scheme of Teaching and Examination

Paper	*Course*	*Teaching Hrs.*		*Max. Marks*
XXI	Inorganic Chemistry-B	30	3 periods per week	22+3 internal assessment
XXII	Organic Chemistry-B	30	3 periods per week	22+3 internal assessment
XXIII	Physical Chemistry-B	30	3 periods per week	22+3 internal assessment
XXIV	Laboratory Practicals		6 periods per week	22+3 internal assessment
		Total	*15 periods/week*	*100*

Paper-XXI: INORGANIC CHEMISTRY-B

Time : 3 Hrs
Max. Marks : 22+3
30 Hrs. (2 Hrs/Week)
3 Periods/Week

Objective of the course
To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(7 Hrs.)**

Silicones and Phosphazenes:

Silicones and phosphazenes as examples of inorganic polymers, nature of bonding in triphosphazenes.

UNIT-II **(8 Hrs.)**

Hard and Soft Acids and Bases (HSAB):

Classification of acids and bases as hard and soft Pearson's HSAB concept, acid-base strength and hardness and softness. Symbiosis, theoretical basis of hardness and softness, electronegativity and hardness and softness.

UNIT-III **(8 Hrs.)**

Electronic Spectra of Transition Metal Complexes:
Types of electronic transitions, L – S coupling, selection rules for *d-d* transitions, spectroscopic ground states, Orgel – energy level diagram for d^1 and d^9states, discussion of the electronic spectrum of $[Ti(H_2O)_6]^{3+}$ complex ion.

UNIT-IV **(7 Hrs.)**

Magnetic Properties of Transition Metal Complexes:

Types of magnetic behaviour, methods of determining magnetic susceptibility, spin-only formula. Correlation of μ_s and μ_{eff} values, orbital contribution to magnetic moments, application of magnetic moment data for 3*d*-metal complexes.

Instructions for paper setters and candidates:

i ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***

ii ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***

iii ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-XXII: ORGANIC CHEMISTRY-B

Time : 3 Hrs
Max. Marks: 22+3
30 Hrs. (2 Hrs/Week)
3 Periods/Week

Objective of the course

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(8 Hrs.)**

Amino Acids, Peptides, Proteins and Nucleic Acids:

Classification, structure and stereochemistry of amino acids. Acid- base behavior, isoelectric point and electrophoresis. Preparation and reactions of α - amino acids.

Structure and nomenclature of peptides and proteins. Classification of proteins. Peptide structure determination, end group analysis, selective hydrolysis of peptides. Classical peptide synthesis, solid – phase peptide synthesis. Structures of peptides and proteins. Levels of protein structure. Protein denaturation/renaturation.

Nucleic Acids : Introduction. Constituents of nucleic acids. Ribonucleosides and ribonucleotides. The double helical Structure of DNA.

UNIT-II **(7 Hrs.)**

Synthetic Polymers:

Addition or chain-growth polymerization. Free radical vinyl polymerization, ionic vinyl polymerization, Ziegler – Natta polymerization and vinyl polymers.

Condensation or step growth polymerization. Polyesters, polyamides, phenol formaldehyde resins, urea formaldehyde resins, epoxy resins and polyurethanes.

Natural and synthetic rubbers.

UNIT-III **(7 Hrs.)**

Organic Synthesis via Enolates:

Acidity of ά-hydrogens, alkylation of diethyl malonate and ethyl acetoacetate. Synthesis of ethyl acetoacetate: the Claisen condensation. Keto-enol tautomerism of ethyl acetoacetate. Alkylation and acylation of enamines.

UNIT-IV **(8 Hrs.)**

Organometallic Compounds:

Organomagnesium Compounds: The Grignard reagents – Formation, structure and chemical reactions.

Organozinc Compounds: Formation and Chemical reactions.

Organolithium Compounds: Formation and Chemical reactions.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***

ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***

iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper-XXIII: PHYSICAL CHEMISTRY-B

Time : 3 Hrs
Max. Marks : 22+3
30 Hrs. (2 Hrs/Week)
3 Periods/Week

Objective of the course

To teach the fundamental concepts of Chemistry and their applications. The syllabus pertaining to B.Sc. (GENERAL) (Semester system) in the subject of Chemistry has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Chemistry working in the Panjab University, Chandigarh and affiliated colleges. The syllabus contents are duly arranged unit wise and contents are included in such a manner so that due importance is given to requisite intellectual and laboratory skills.

UNIT-I **(7 Hrs.)**

Solid State-I:

Definition of space lattice, unit cell and Miller Indices

Laws of Crystallography – (i) Law of Constancy of Interfacial Angles, (ii) Law of Rationality of Indices, (iii) Law of Symmetry. Symmetry elements in crystals.

UNIT-II **(8 Hrs.)**

Solid State-II:

X-ray diffraction by crystals. Derivation of Bragg equation. Determination of crystal structure of NaCl, KCl and CsCl (Laue's method and powder method). Applications of Powder diffraction for structure determination, Thermal and photochemical reaction in solid state

UNIT-III **(8 Hrs.)**

Spectroscopy :
Introduction : Electromagnetic radiation, regions of the spectrum, basic features of different spectrometers, statement of the Born-Oppenheimer approximation, degrees of freedom.

Rotational Spectrum:
Diatomic molecules. Energy levels of a rigid rotor (semi – classical principles), selection rules, spectral intensity, determination of bond length, qualitative description of non-rigid rotor, isotope effect.

UNIT-IV **(7 Hrs.)**

Vibrational Spectrum:
Infrared Spectrum : Energy levels of simple harmonic oscillator, selection rules, pure vibrational spectrum intensity, determination of force constant and qualitative relation of force constant and bond energies, effect of anharmonic motion and isotope on the spectrum, idea of vibrational frequencies of different functional groups. Raman Spectrum : Concept of polarizability, pure rotational and pure vibrational, Raman spectra of diatomic molecules, selection rules.

Electronic Spectrum:
Concept of potential energy curves for bonding and antibonding molecular orbitals, qualitative description of selection rules and Franck- Condon principle.

Qualitative description of σ, π – and n M.O., their energy levels and the respective transitions.

Instructions for paper setters and candidates:

i. ***Examiner will set total of NINE questions comprising TWO questions from each unit and ONE compulsory question of short answer type covering whole syllabi.***
ii. ***The students are required to attempt FIVE questions in all, ONE question from each unit and the Compulsory question.***
iii. ***Compulsory question carries six marks and remaining all questions carry four marks each.***

Paper – XXIV: LABORATORY PRACTICALS **Max. Marks: 22+3**

ORGANIC CHEMISTRY
Laboratory Techniques
Column Chromatography
Separation of fluorescein and methylene blue.
Separation of leaf pigments from spinach leaves.

Synthesis of Organic Compounds

(a) Aliphatic electrophilic substitution.
Preparation of iodoform from ethanol and acetone.
(b) Aromatic electrophilic substitution.
Nitration

Preparation of m-dinitrobenzene
Preparation of p-nitroacetanilide
Preparation of p-iodoaniline from aniline.
Preparation of methyl orange from N,N-dimethyl aniline and sulphanilic acid.

Halogenation

Preparation of p-bromoacetanilide

Preparation of 2,4,6 – tribromophenol

(c) Oxidation

Preparation of benzoic acid from toluene.

(d) Reduction

Preparation of aniline from nitrobenzene

Preparation of m-nitroaniline from m - dinitrobenzene

Stereochemical study of Organic Compounds via Models

R and S configuration of optical isomers.

E, Z configuration of geometrical isomers

Conformational analysis of cyclohexanes and substituted cyclohexanes.

General Instruction to the Examiners:

Note: Practical examination will be of four hours duration & shall consist of the following questions:

Q.No. 1*. Preparation of an organic compound : 7 marks

Q.No. 2. Experiment based onLaboratory Technique : 7 marks

Students shall be allowed the choice to opt for one experiment out of the three offered. The candidate will write theory, short procedure and calculations of that experiments in the next 10 minutes. Note – Book / Books is/are not allowed during writing.

Q.No. 3. Viva-Voce : 5 marks

Minimum of four questions (2 marks each) be asked on the background of practical course.

Q.No. 4. Note Book : 3 marks

*If a question on preparation is asked, then the students shall be required to give Equation, requirements & short procedure in the first 10 minutes. Note Books are not allowed during writing.

BOTANY

B.Sc. (General) Botany Fifth and Sixth Semester Syllabus (Examinations, 2020-2021)

Fifth Semester		Time	Theory	Int Assess.	Max Marks
Theory Paper-A:	Plant Physiology-I	3 hrs.	36	04	40
Theory Paper-B:	Plant Ecology	3 hrs	36	04	40
One practical pertaining to entire syllabus included in both theory papers		3 hrs.	18	02	20
Sixth Semester					
Theory Paper-A:	Plant Physiology-II	3 hrs.	36	04	40
Theory Paper-B:	Economic Botany	3 hrs	36	04	40
One practical pertaining to entire syllabus included in both theory papers		3 hrs.	18	02	20
		Total			**200**

Note:

1. The number of teaching hours for theory and practical per semester shall be 60 hrs. and 100 hrs. respectively.

2. There will be two theory papers (A&B) in each semester. Each paper will consist of **9** questions. Question No.1 will be compulsory and will consist of 8 parts (one mark each) comprising 4 MCQ and the rest 4 parts will be of fill-in the blanks covering the entire syllabus in both the theory papers A&B. The remaining 8 questions in papers A&B shall include two questions from each unit. Candidates shall be required to attempt one question from each unit. Question No. 1 will carry 8 marks and the rest of 8 questions will be of 7 marks each.

BOTANY

SEMESTER -V

THEORY PAPER- A: PLANT PHYSIOLOGY-I

Objectives: The basic aim of this paper is to familiarize the students with various concepts of functions and metabolism of plants. The course material of this paper would enable the students to correlate structural diversity of various plant forms with functional differentiation and its biological aspects including biological nitrogen fixation and mineral nutrition. In practicals, students will be familiarize with the various experiments pertaining to theory syllabus.

Teaching Methodology: Teaching methodology includes series of lectures making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc.

UNIT-I

Plant Water Relations: Importance of water to plant life; physical properties of water; imbibition, diffusion, osmosis, plasmolysis and deplasmolysis, concept of osmotic potential, water potential and pressure potential; absorption of water, active and passive mechanism of water absorption; transport of water, mechanism and theories to explain ascent of sap; transpiration types, mechanism of opening and closing of stomata, mechanism of transpiration, factors affecting transpiration, antitranspirants.

UNIT-II

Mineral nutrition: Hydroponics and its importance; essential macro-and micro elements, essentiality criteria, deficiency symptoms and their role; mineral uptake; mechanism of mineral uptake (active, passive absorption and modern concepts).

UNIT-III

Nitrogen Metabolism: Biological nitrogen fixation; importance of nitrate reductase and its regulation; ammonia assimilation.

Lipid Metabolism: Structure and function of lipids; β – oxidation; saturated and unsaturated fatty acids.

UNIT-IV

Proteins: Classification, role and structure (primary, secondary and tertiary) of proteins.

Basics of enzymology: Discovery and nomenclature; classification, structure, properties, factors affecting enzyme activity, mechanism of enzyme action.

Suggested Readings:

1. Bhatia, K.N. Plant Physiology- A Modern Treatise, Trueman Book Co. Jalandhar, 2015.
2. Hopkins, W.G. Introduction to Plant Physiology. John Wiley & Sons, Inc. New York, U.S.A., 1995.
3. Salisbury, F.B. and Ross, C.W. Plant Physiology (4th Edition) Wadsworth Publishing Co. California, USA, 1992.
4. Srivastava, H.S. Plant Physiology, Bio-chemistry & Bio-technology, Rastogi Publications, Meerut, 2008.
5. Taiz, L. and Zeiger, E. Plant Physiology (5th edition), Sinauer Associates, Inc., Publishers, Massachusetts, USA, 2010
6. Verma, B. Plant Physiology (1st Edition), Athena Academic, St. John Street, London, UK, 2007.

PAPER-B: PLANT ECOLOGY

Objective: The basic objective of this paper is to make students aware about the role of environment in causing structural and functional variation in plants. Since the present day problems of varied nature like pollution, Global Warming etc. are directly or indirectly related to ecology, it is more than desired to provide the students with knowledge of basic concepts of ecology.

Teaching Methodology: Teaching methodology includes series of lectures making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I

Definition, scope, relationship with other sciences.

Plant Environment: Climatic, edaphic, topographic and biotic factors affecting growth and distribution of plants.

UNIT-II

Ecosystem : Concept, structure; abiotic and biotic components; trophic levels, food chain, food web, ecological pyramids, energy flow, biogeochemical cycles of carbon, nitrogen and water.

UNIT-III

Community Ecology: Community characteristics, frequency, density cover, life forms, biological spectrum; ecological succession – Hydrosere and Xerosere.

UNIT-IV

Applied Ecology :

a) Air, water and soil pollution and their control.

b) Conservation and management of natural resources. (renewable and non-renewable)

Suggested Readings

1. Kormondy, E.J. Concepts of Ecology. Prentice-Hall of India Pvt. Ltd., New Delhi, 1996.
2. Odum, E. and Barrett, G.W. Fundamentals of Ecology, Cengage Learning Publisher, 2004.
3. Odum, E.P. Basic Ecology, Saunders, Philadelphia, 1983.
4. Saini A. Ecology and Economic Botany, Trueman Book Co., Jalandhar, 2015.
5. Sharma, P.D. Ecology and Environment, Rastogi Publications, Meerut, 2012.

Suggested laboratory exercises:

Plant Physiology:

1. To determine osmotic pressure of cell sap by plasmolytic method.

2. To demonstrate imbibition pressure using:

   i) Imbibition pressure apparatus.
   ii) Plaster of Paris cone.

3. To demonstrate osmosis through animal membrane/potato osmoscope.

4. To demonstrate plasmolysis and deplasmolysis.

5. To demonstrate mechanical and electrical adsorption.

6. To demonstrate the measurement of transpiration using simple potometer.

7. To demonstrate transpiration pull.

8. To study the effect of light intensity, and wind velocity on the rate of transpiration using Ganong's potometer.

9. To compare the rate of transpiration from the two sides of a leaf using :

   i) Vaseline method
   ii) Cobalt chloride method

10. To demonstrate the mechanism of opening and closing of stomata.

11. To demonstrate the path of ascent of sap.

Plant Ecology:

1. Study of ecological adaptations in external characters of :

   Hydrilla, Potamogeton, Ceratophyllum, Vallisneria, Lemna, Eichhornia Nelumbium, Calotropis, Nerium, Acacia, Zizyphus, Casuarina, Capparis, Asparagus, Ruscus, Opuntia, Euphorbia royleana.

2. To prepare permanent stained slide to show ecological adaptations in the internal structure of the following:

   a) T.S. stem of *Hydrilla*

   b) T.S. leaf and petiole of *Eichhornia*

   c) T.S. leaf and petiole of *Nelumbium*

   d) T.S. leaf of *Nerium*

   e) T.S. stem of *Casuarina* and *Capparis*

3. To determine soil pH using pH paper/solution/pH meter.

4. To determine water holding capacity of soil.

Guidelines for Botany Practical Examination

Max. Marks: 20
Practical: 18
Int. Assess. 02
Time: 3 hours

1. Write material required, procedure and precautions for physiology experiment A (to be announced by the examiner). Perform the experiment, record observations, calculations if any, and results and show the experiment to the examiner. 6
2. Identify and cut T.S. of stem, leaf or petiole (to be announced by the examiner) of specimen B. Make its permanent stained slide and show it to the examiner. Draw its labelled diagram and write its morphological and anatomical characters of ecological importance. 6
3. Practical note-book 3
4. *Viva-voce* 3

.....

BOTANY

SEMESTER -VI

PAPER-A: PLANT PHYSIOLOGY-II

Objectives: The main objective of this paper is to familiarize the students with growth and metabolic processes of the plants. It also deals with the plant development, differentiation and their regulatory mechanism along with basic concepts in tissue culture.

Teaching Methodology: Teaching methodology includes series of lectures making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students will be familiarize with the various experiments pertaining to theory syllabus.

UNIT-I

Photosynthesis: Significance, historical aspect; photosynthetic pigments; action spectra and enhancement effects; concept of two photosystems, cyclic and non- cyclic photophosphorylation; Calvin cycle; C4 pathway; CAM plants; photorespiration; factors affecting photosynthesis; transport of organic substances: Mechanism of phloem transport, source-sink relationship, factors affecting translocation.

UNIT-II

Respiration: ATP – The biological energy currency; aerobic and anaerobic respiration; Krebs cycle; electron transport mechanism (Chemi-osmotic theory); redox potential; oxidative phosphorylation; pentose phosphate pathway; respiratory quotient.

UNIT-III

Growth and development: Definitions; phases of growth and development; kinetics of growth, factors affecting growth; plant movements; the concept of photoperiodism, physiology of flowering; florigen concept; roles of plant hormones– auxins, gibberellins, cytokinins, abscisic acid and ethylene, history of their discovery.

UNIT-IV

Biotechnology: Functional definition; basic aspects of plant tissue culture, its applications and somatic hybridization.

Suggested Readings:

1. Bhatia, K.N. Plant Physiology- A Modern Treatise, Trueman Book Co. Jalandhar, 2015.
2. Bhojwani, S.S. Plant Tissue Culture: applications and Limitations. Elsevier Science Publishers, New York, USA, 1990.
3. Hopkins, W.G. Introduction to Plant Physiology. John Wiley & Sons, Inc. New York, U.S.A., 1995.
4. Salisbury, F.B. and Ross, C.W. Plant Physiology (4th Edition) Wadsworth Publishing Co. California, USA, 1992.
5. Srivastava, H.N. Plant Physiology, Biochemistry & Bio-technology. Pradeep Publication, Jalandhar, 2008.
6. Srivastava, H.S. Plant Physiology, Bio-chemistry & Bio-technology, Rastogi Publications, Meerut, 2008.
7. Srivastava, H.S. and Shankar, N. Plant Physiology and Bio-chemistry, Rastogi Publications, Meerut, 2012.
8. Verma, B. Plant Physiology (1st Edition), Athena Academic, St. John Street, London, UK, 2007.
9. Taiz, L. and Zeiger, E. Plant Physiology (5th edition), Sinauer Associates, Inc., Publishers, Massachusetts, USA, 2010

PAPER-B: ECONOMIC BOTANY

Objective: The basic objective of this paper is aimed to give an insight into plant wealth such as medicinal plants; crop plants; beverages; spices; condiments; sugar; fiber; pulp & oil yielding plants of commercial & economic importance. Both the aspects of this paper give a sound basis of ecology and economic botany so that students can venture into fields like Environmental Biology, Conservation Biology, Forestry, Agriculture, Horticulture and Crop production etc.

Teaching Methodology: Teaching methodology includes series of lectures making use of charts, transparencies, LCD, Models, slides, practical demonstrations, extension lectures from experts, field visits, discussions, quiz competitions etc. In practicals, students would be provided with fresh/preserved materials for their morphological and anatomical studies making use of microscopes and binoculars and hands-on tools/equipment etc.

UNIT-I

Crop production: Area of cultivation, soil requirement, cultivation practices and high yielding varieties of :

i) Cereals (Wheat, Rice and Maize)
ii) Fibres (Cotton)
iii) Vegetables (Potato)

UNIT-II

Crop production: Area of cultivation, soil requirement, cultivation practices and high yielding varieties of :

i) Fruits (Mango, Grapes, Lemon)
ii) Sugar-yielding plants (Sugarcane)
iii) Oil-yielding plants (Groundnut, Mustard)

UNIT-III

Elementary knowledge of the following plants (Botanical names, families, parts used and economic importance) :

i) Wheat, Maize, Rice, Moong, Gram (Food).
ii) Teak, Shisham, Deodar, Sal (Timbers).
iii) Cotton, Jute, Coir, Flax (Fibres).
iv) Fennel, Coriander, Turmeric, Ginger, Mint, Clove (Spices and Condiments).

UNIT-IV

Elementary knowledge of the following plants (Botanical names, families, parts used and economic importance) :

i) Bamboo, Eucalyptus (Pulp plants).
ii) Liquorice, Belladona, Aconite, Ashwagandha, Arjun, Poppy, Amla (Medicinal plants).
iii) Tea and Coffee (Beverages).

Forestry: Forest conservation, wood seasoning and its preservation.

Suggested Readings

1. Kochhar, S.L. Economic Botany in Tropics, (4th edition). Macmillan India Ltd., New Delhi, 2012.
2. Saini, A. Ecology and Economic Botany, Trueman Book Co., Jalandhar, 2015.
3. Sharma, O.P. Hill's Economic Botany (Late Dr. A.F. Hill, Adapted by O.P. Sharma). Tata McGraw Hill Co. Ltd., New Delhi, 1996.
4. Simpson B. and Ogorzaly, M. Economic Botany: Plants in our World (3rd edition). McGraw Hill Publisher, 2000.
5. Taiz, L. and Zeiger, E. Plant Physiology (5th edition), Sinauer Associates, Inc., Publishers, Massachusetts, USA, 2010
6. Singh, V., Pande, P.C. and Jain, D.K. Economic Botany, Rastogi Publications, Meerut, 2012.

Suggested laboratory exercises:

Plant Physiology:

1. To demonstrate that chlorophyll is necessary for photosynthesis.
2. To demonstrate that light is necessary for photosynthesis.
3. To demonstrate that CO_2 is essential for photosynthesis.
4. To demonstrate evolution of oxygen during photosynthesis in an aquatic plant.
5. To study the effect of light intensity and CO_2 concentration on the rate of photosynthesis using an aquatic plant.
6. To demonstrate aerobic respiration using flask method.
7. To demonstrate anaerobic respiration in germinating seeds or yeast.
8. To demonstrate the activity of amylase.
9. To demonstrate the activity of catalase in plant tissue (germinating seeds).
10. To demonstrate phototropism.
11. To demonstrate geotropism using clinostat.
12. To test for the presence of starch, proteins, amino acids, and reducing sugars in plant material.

Economic Botany:

Identification and morphology of economically important part/s of crop plants mentioned below:
Cereals (wheat, rice); Fibres (cotton); Vegetables (potato); Fruits (mango, grapes, lemon); sugar-yielding plants (sugarcane) and oil-yielding plants (groundnut, mustard).

Guidelines for Botany Practical Examination

1. Write material required, procedure and precautions for physiology experiment A (to be announced by the examiner). Perform the experiment, record observations, calculations if any, and results and show the experiment to the examiner.
2. Identify and write illustrated morphological notes on specimens B & C giving their economic importance.
3. Practical note-book
4. *Viva-voce*

ZOOLOGY
SEMESTER -V

Paper I: Developmental Biology	40 (36 +4) marks
Paper II: Applied Zoology-I	40 (36 + 4) marks
Practical (Covering the entire syllabus) of 4 hours duration	20 (18 +2) marks
	----------
Total :	100 marks

Note : The number of hours for Theory and Practical per week shall be 6 hours and 4 hours, respectively.

OBJECTIVES OF THE COURSE

The syllabus pertaining to **B.Sc. (General) Semester V,** in the subject of Zoology has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Zoology working in the Panjab University, Chandigarh and affiliated colleges.

The syllabus contents are duly arranged section wise as well as unit wise. The contents are included in such manner so that due importance may be given to skill oriented components.

The course contents are also given due stress for excursion/field trips to Zoological Parks, Sea-shores, Hill Stations, Museum, Fossil Park and Apiary/godowns for better academic outlook. The Department of Zoology, P.U., Chandigarh usually organizes workshop/seminars from time to time for updating the teachers.

PAPER I: DEVELOPMENTAL BIOLOGY (ZOO-501)

Max. Marks	: 40
Theory Exam.	: 36 marks
Internal Assessment	: 4 marks
Time	: 3 hours

UNIT-I

Gametogenesis with particular reference to differentiation of spermatozoa. Vitellogenesis, role of follicle/subtesticular cells in gametogenesis.
Egg maturation : egg membranes : polarity of egg.

UNIT-II

Fertilization, parthenogenesis.

Cleavage : Types of cleavage patterns depending upon amount and distribution of yolk and position of spindle. Blastula and types of blastula.

Fate maps of chick and frog embryos.

UNIT-III

Induction: cell to cell interactions: juxtacrine, paracrine, gap junctions; basic concepts of organizers and inducers and their role. Determination and differentiation.

Development up to three germ layers in *Herdmania, Amphioxus*, frog, chick and rabbit.

UNIT-IV

Foetal membranes, their formation and role.

Mammalian placenta – its formation, types and functions.

Metamorphosis in *Herdmania* and *Rana* (frog)

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Books Recommended

1. Ballinsky, B.I. — An Introduction to Embryology, 5th edition, Saunders Co., 1981.
2. Gilbert, S.F. — Developmental Biology, 10th ed.,Sinauer Ass., Inc. Publ., 2014.
3. Urspaung, H. — Major Problems in Developmental Biology, Academic Press, New York, 1966.
4. Gardner, E.J., Simmons, M.J. and Snustad, — Principles of Genetics, 8thed., John Wiley and Sons, Inc. New York, 2004.
5. Wolport, Lewis — Principles of development, Oxford University press, Oxford, 2007

Practical based on Theory Paper

1. Study of the development of frog from permanent slides.
2. Window preparation and identification of stages of development in chick egg.
3. Study of the development of chick embryo from permanent slides up to 96 hours.
4. Study of the following permanent slides:
    a. Stages of gametogenesis, structure of egg and sperm of a mammal.
    b. Larva of *Herdmania*.
5. Study of metamorphosis of *Herdmania* and Frog through charts/video.

Paper II: APPLIED ZOOLOGY-I

Max. Marks	: 40
Theory	: 36 marks
Internal Assessment	: 4 marks
Time	: 3 hours

Note: Students are required to opt any one of the following:

1. Medical Zoology and Medical Laboratory Technology-I
2. Economic Entomology and Pest Management-I
3. Inland Fisheries & Aquaculture-I

OPTION I: MEDICAL ZOOLOGY & MEDICAL LABORATORY TECHNOLOGY-I
(ZOO-502A)

UNIT-I

Introduction to parasitology (pertaining to various terminologies in use).
Brief introduction to pathogenic microbes. (Dengue, Chikangunya, Japanese encephalitis, tuberculosis).
Epidemic diseases, such as typhoid, cholera, small pox; their occurrence and eradication programmes.

UNIT-II

Brief accounts of life history, mode of infection and pathogenicity of the following pathogens with reference to man; prophylaxis and treatment:

Pathogenic protozoans : *Entamoeba, Trypanosoma, Leishmania, Giardia, Trichomonas* and *Plasmodium.*

UNIT-III

Pathogenic helminthes: *Fasciolopsis, Schistosoma, Echinococcus, Ancylostoma, Trichinella, Wuchereria, Dracunculus* and *Oxyuris*.

UNIT-IV

Life cycle, disease caused and control measures of arthropod vectors : *Anopheles stephensi, A culicifaces,Aedes aegypti, A. albopictus*, *Culex fatigans, C.tritaeniorhynchus*, *Mansonia* sp., *Xenopsylla cheopis,Pediculus*.

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Books Recommended

1. Chatterjee, K.D. : Parasitology, Protozoology and Helminthology, 13th ed., CSB Publishers and Distributors Pvt. Ltd., 2009.
2. Garcia, L.S. Diagnostic Medical Parasitology, 4th ed., ASM Press Washington, 2001.
3. Parija, S.C. Text book of Medical Parasitology, Protozoology and Helminthology, 1st edition, 2001.

Practicals based on Theory Paper ZOO-502A (ZOO-352A)

1. Introduction to Medical Entomology to various orders.
2. Study of permanent slides and specimens of parasitic protozoans, helminthes and arthropods mentioned in theory syllabus.

OPTION-II:ECONOMIC ENTOMOLOGY AND PEST MANAGEMENT-I (ZOO-502B)

UNIT-I

Introduction to Entomology with various orders.
Comparative studies of mouth parts in Grasshopper, Honeybee, Butterfly, Red-Cotton bug, House fly and Mosquito.
Major modifications in the antennae and legs of insects.
Development of Insects: Different type of metamorphosis along with a study of different kinds of larvae and pupae.
Systematic position, habits and nature of damage of the following pests of crops and vegetables :

I. Sugarcane :

1. Sugarcane leaf hopper (*Pyriliaperpusila*) alongwith life cycle and control measures.
2. Sugarcane top borer (*Scirpophaganivella*)
3. Sugarcane stem borer (*Chilotreainfuscatellus*)

II. Cotton :

1. Pink bollworm (*Pectinophoragossypiella*) alongwith life cycle and control measures.
2. Red cotton bug (*Dysdercuscinglulatus*)
3. Cotton grey weevil (*Myllocerusmaculosus*)
4. Surface grasshopper (*Chrotogonustrachypterus*)
5. Cotton jassid (*Empoascadevastans*)

UNIT-II

III. Paddy :

1. Rice Gundhy Bug (*Leptocorisavaricornis*) alongwith life cycle and control measures.
2. Rice grasshopper (*Hieroglyphyusbanian*)
3. Rice Hispa (*Dicladispaarmigera*)

IV. Wheat :

1. Wheat stem borer (*Sesamiainferens*) alongwith life cycle and control measures.
2. Termites (*Microtermesobesi*)
3. Aphids (*Macrosiphummiscanthi*) Jassids (*Amrasca sp.*)

V. Vegetables :

1. Red pumpkin beetle (*Aulacophorafoveicollis*)
2. Pumpkin fruit fly (*Dacuscucurbitae*) alongwith life cycle and control measures.
3. Hadda beetle (*Epilachnavigintioctopunctata*)

UNIT-III

VI. Pests of Stored Grains : Systematic position, habits and nature of damage of the following pests of stored grains :

1. Pulse Beetle (*Callosobruchus maculates*) alongwith life cycle and control.
2. Rice weevil (*Sitophilus oryzae*)
3. Khapra beetle (*Trogodermagranarium*)
4. Rust red flour beetle (*Tribolumcastaneum*)
5. Lesser grain borer (*Rhizoperthadominica*)
6. Rice moth (*Corcyra cephalonica*)

UNIT-IV

Systematic position, disease caused and control of the following insects of Medical and Veterinary importance :

1. Mosquitoes (Aedes,Anopheles, Culex)
2. Sand fly (*Phlebotomus minutus*)
3. House fly (*Musca domestica*) along with life cycle of house fly.
4. Horse fly (*Tabanus striatus*)
5. Blow fly (*Calliphora erythrocephala*)
6. Warble fly (*Hypoderma lineatum*)
7. Poultry louse(*Menopon gallinae*)
8. Sucking louse/(*Haematopinus surysternus*)
9. Fleas (*Xenopsylla cheopis*)

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Books Recommended

1. Attwal, A.S., : Agricultural Pests of India and South East Asia, Kalyani Publishers, New Delhi, 1991.
2. Nair, M.R.G.K. : Insects and Mites of Crops in India, ICAR, New Delhi, 1975.
3. Kumar, A. and Nigam, P.M. : Economic and Applied Entomology, Emkay Publications, 1991.
4. Matheson, R. : Medical Entomology, Comstock Publishing Company, Inc., 1950.
5. Metcalf, R.L. & Metcalf, R.A. : Destructive and Useful Insects, McGraw Hill Book Company, Inc., New York, Toronto, London, 1951.

Practicals based on Theory Paper ZOO-502B (ZOO-352B)

1. External morphology and identification marks of the crops and vegetables pests : P*yrillaperpusilla* (Sugarcane leaf hopper), *Pectinophora gossypiella* (Pink bollworm), *Leptocorisa varicornis* (Gunbdhy bug) *Hieroglyphus banian* (Paddy grass hopper), *Dacus cucurbitae* (Pumpkin fruit fly).
2. External morphology and identification marks of the following stored grain pests : *Sitophilus oryzae* (Rice weevil), *Tribolium castaneum* (Rustred flour beetle), *Rhizopertha dominica* (Lesser grain borer/susri),*Trogoderma granarium* (Khapra beetle), *Callosobruchu smaculatus* (Pulse beetle/Dhora).
3. External morphology and identification marks of the following insects of Medical/Veterinary importance-Mosquitoes (*Culex, Anopheles and Aedes*), house fly (*Musca domestica*), blow fly (*Calliphora erythrocephala*), warble fly (*Hypoderma lineatum*) and horse fly (*Tabanus striatus*).
4. A study of different types of larvae and pupae of insects through slides, charts etc.
5. Project- Study of life cycle of any insect.

OPTION III: INLAND FISHERIES & AQUACULTURE-I (ZOO-502C)

UNIT-I

- Components of Aquaculture: Capture, Culture, Intensive, Extensive, Semi-Intensive, Pen Culture, Cage Culture.
- Morphology of a typical fish (Carp, Catfish, Eel, Perch)
- Culturable fishes: Characters of culturable fishes, Indian major carps, saltwater fishes, exotic species and air breathing fishes.

UNIT-II

- Structure of mouth of different fishes in relation to feeding habits
- Bionomics of *Labeorohita, CatlaCatla, Cirrhinusmrigala, Wallago attu.*
- Food value of Fish (Vitamins, Amino acids, Minerals etc.)

UNIT-III

- Exotic fishes: History, their introduction, morphology, their role in fish culture and impact on native fish fauna.
- Induced Breeding: History, technique, chemicals involved in induced breeding and impact on fish culture.

UNIT-IV

- Pond culture: Construction of pond, types of pond, hydrobiological factors of water and soil of a fish pond, fertilization of pond, maintenance of pond.
- Aquatic weeds and their control both biological and chemical.

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Practicals based on Theory Paper ZOO-502C (ZOO-352C)

1. Morphology of a Carp, Cat fish and Perch.
2. Morphometric and meristic characters of a typical fish.
3. Identification of the following fishes using keys to the species :
   Notopterus n*otopterus*. ; *Labeo rohita, L. colbasu, L. bata, Cirrhinus mrigala, Catla catla, Puntius sarana, Tor putitora, Schizothorax richardsonii, Aorichthys seenghala, Wallago attu, Bagarius bagarius, Heterpneustus fossilis, Channamaruluis, C. striatus, Xenentondon cancila, Cyprinus carpio, Hypophthalmichthys molitrix,Ctenopharyngodon idellaus, Colisa fasciatus, Mastacembelus armatus.*

   For the identification of the fishes, the students can use already prepared keys or can prepare their own keys.

4. Determination of maturity stages (both male and female) of any commercial fish (preserved specimens) through slides/charts etc.
5. Preparation of permanant slides of phytoplanktons and zooplanktons which constitute the food of commercial fishes. Their identification and study of important characters.
6. Identification of common aquatic weeds of a fish pond.
7. Study of various exotic fishes (*Hypophthalmichthys molitrix, Ctenopharyngodon idellaus, Cyprinus carpio, Gambusia affinis, Salmo trutta fario, salmo gairdneri, gairdneri*) with respect to the purpose with which they were introduced.
8. Study of endemic culturable fish species *(Catla catla, Labeo rohita, Cirrhinus mrigala)*
9. Study of types of fins and scales.

Guidelines for the conduct of Practical Examinations:

Max. Marks : 20 marks
Practical Exam : 18 marks
Internal Assessment : 2 marks
Time : 4 hours

1. Identify the developmental stage of chick embryo by window preparation. 2.5
2. Identify the slides A , B& C. Give two reasons for each identification 4.5
3. Viva-Voce 2
4. Practical Note Book and Project Report 2

Option-I

5. To identify the specimens D, E&F. Write the disease caused by each and two reasons for their identification. 4.5
6. Identify the given instrument. Write about its uses and functions. 2.5

Option- II

5 To identify the specimens D, E & F belonging to crop and stored grain pests. Give one outstanding character of each. 4.5

6 Identify specimen/ slide G. Give its one outstanding morphological character and medical/ veterinary importance. 2.5

Option- III

5. Giving two identification features identify specimen D&E. 2

6. Identify specimen 'F'. Give the purpose for which this fish has been introduced. 1

7. Identify the slides G & H. Give one identification features of each. 2

8. Identify the weed 'I' and write its common identification features. 2

ZOOLOGY

SEMESTER -VI

Paper I: GENETICS	40 (36 +4) marks
Paper II: APPLIED ZOOLOGY-II	40 (36 + 4) marks
Practical (Covering the entire syllabus) of 4 hours duration	20 (18 +2) marks
	----------
Total :	100 marks

Note: The number of hours for Theory and Practical per week shall be 6 hours and 4 hours, respectively.

OBJECTIVES OF THE COURSE

The syllabus pertaining to **B.Sc. (General) Semester VI,** in the subject of Zoology has been upgraded as per provision of the UGC module and demand of the academic environment. The course contents have been revised from time to time as per suggestions of the teachers of the Zoology working in the Panjab University, Chandigarh and affiliated colleges.

The syllabus contents are duly arranged section wise as well as unit wise. The contents are included in such manner so that due importance may be given to skill oriented components.

The course contents are also given due stress for excursion/field trips to Zoological Parks, Sea-shores, Hill Stations, Museum, Fossil Park and Apiary/godowns for better academic outlook. The Department of Zoology, P.U., Chandigarh usually organizes workshop/seminars from time to time for updating the teachers.

PAPER I: GENETICS (ZOO-601)

UNIT-I

Mendelism and Mendeliar Ratios.
Modification of Mendelian ratios .
Non-allelic gene interaction, Modified F_2 ratios.

(9:7, 9:3:4, 9:3:3:1, 12:3:1, 13:3,15:1,9:6:1)

Gene modifications due to incomplete dominance, lethal factors (2:1), Pleiotropic genes.

Multiple Alleles : Blood group inheritance,eye colour in *Drosophila*, pseudo-allelism.

Multiple factors : Qualitative and quantitative characters, inheritance of quantitative traits (skin colour in man).

UNIT-II

Linkage, crossing over and recombination : Linkage, sex-linked characters, crossing over, frequency of crossing over, cytological basis of crossing over, synaptonemal complex. Recombination in Fungi, (tetrad analysis).
Gene and Genetic Code : Structure of nucleic acids (DNA & RNA). Replication of DNA and transcription.Expression of gene (protein synthesis in Prokaryotes and Eukaryotes). Properties of genetic code, codon assignment, wobble hypothesis.
Extranuclear inheritance : Kappa particles in *Paramecium*.

UNIT-III

Mutations : Spontaneous and induced mutations, physical and chemical mutagens.
Detection of mutations in *Drosophila*. Inborn errors of metabolism in man (Phenylketonuria, Alcaptonuria, Albinism).Somatic mutations and carcinogenesis.
Regulation of gene expression in prokaryotes (Operon model) and in eukaryotes.

UNIT-IV

Population genetics : Equilibrium of gene frequencies and Hardy Weinberg Law.
Genetic recombination in bacteria (conjugation, transduction and transformation) plasmids.
Applied Genetics : Recombinant DNA,genetic cloning and its applications in medicine and agriculture, DNA finger printing.

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Books Recommended

2. Powar, C.B. : Cell Biology, Himalaya Publishing House, Bombay, 1999.
3. Swanson, C.P., Merz, T. and Young, W.J Division, : Cytogenetics – The Chromosome in Inheritance and Evolution, Prentice Hall, 1981.
4. Gupta, P.K. : Cytology, Genetics and Molecular Biology, Rastogi Publishers, Meerut, 1993.
5. Chaudhry, S. and Sharma, A. : PV's Cytology& Ecology, S. Vikas& Co., Jallandhar, 2003.
6. Gardner, E. J., Simmons, M.J. and Snustad, D.P. : Priciples of Genetics, 8th ed., John Wiley and Sons, Inc., New York, 2004.

Practicals based on Theory Paper ZOO-601(ZOO-353)

1. Demonstration of Law of segregation, Independent assortment and epistasis (use of coloured beads or capsules etc.). Numericals for segregation and Independent assortment.
2. Segregation demonstration in preserved material (Maize).
3. Cytoplasmic inheritance in *Mirabilis jalapa*.
4. Inheritance of other human characteristics, ability to taste, PTC, thiourea.
5. Comparison of variance in respect of pod length and number of seeds/pods.
6. Calculation of gene frequencies and random mating (coloured beads or capsules).
7. Study of polytene chromosomes of *Chironomus*/*Drosophila* through photographs.
8. Dermatographics: Palm print taking and finger tip patterns.

Paper II: APPLIED ZOOLOGY-II

Max. Marks	:	40
Theory	:	36 marks
Internal Assessment	:	4 marks
Time	:	3 hours

Note: Students are required to opt any one of the following:

1. Medical Zoology and Medical Laboratory Technology-II
2. Economic Entomology and Pest Management-II
3. Inland Fisheries & Aquaculture-II

OPTION I: MEDICAL ZOOLOGY AND MEDICAL LABORATORY TECHNOLOGY-II (ZOO-602A)

UNIT-I

Brief introduction to Cells, organs, specific and non specific defence mechanisms.
Humoral and cell mediated immune-response, Antigens-physical & chemical properties.

UNIT-II

Antibodies - structure and function of immunoglobulin M, G, A, E and D.
Antigen and antibody interactions :Serodiagnostic assays.
Vaccines and their types.

UNIT- III

Laboratory safety rules, hazards and precautions during sample collection and laboratory investigations.

Laboratory techniques: Colorimetry, Microscopy (student's and electron microscope), Autoclaving., Centrifugation, Spectrophotometry.

Haematology : Collection of blood (Venous and Capillary), Anticoagulants (merits and demerits), Romanowsky's stains,

UNIT- IV

Bacteriology : Sterilisation, (dry heat, moist heat, autoclave, filtration), Disinfection, Staining techniques (gram's stain, AFB stain, etc), Culture media (Defined & Synthetic media & routine laboratory media), Bacterial culture (aerobic and anaerobic), Antibiotic sensitivity.

Biochemistry : Protein estimation, Estimation of blood urea, blood sugar and urine analysis.

Histopathology : Common fixatives and staining techniques, Histochemistry : Principle and method : Staining of carbohydrates, proteins and fats with bromo phenol blue, Periodic acid Schiff, Sudan Black blue and Feulgen reaction.

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Books Recommended

1.	Baker, F.J. and Silverton, R.E.	:	Introduction to Medical Laboratory Technology, 6th edition, Butterworth and Co. Ltd., 1985.
2.	Cheesborough, M.	:	Medical Laboratory Technology for Tropical countries, 2nd edition, Butterworth and Co. Ltd., 1987.
3.	Talib, V.H.	:	Essential Laboratory Manual, Mehta Publishers, New Delhi, 1999.
4.	Goldsby, R.A., Kindt, T.J. Osborne, B.A. and Kuby, J	:	Immunology, 6th edition, Freeman, W.H. & Co., New York, U.S.A., 2007.
5.	Kuby	:	6th Edition

Practicals based on Theory Paper ZOO-602A (ZOO-354A)

1. Demonstration of safety rules in laboratory like proper handling of patients specimens and disposal of syringes, needles etc.
2. Demonstration of the use of autoclave, centrifuge and spectrophotometer.
3. Cleaning and sterilization of glassware using hot air oven, autoclave etc.
4. Demonstration of various equipments for the estimation of hemoglobin, WBC, RBC, ESR.
5. Estimation of sugar and protein in a sample.
6. Procedure of Fixation, embedding, cutting of tissue sections and their staining (Routine Haematoxylin and Eosin and special staining with BPB,PAS, SBB and Feulgen reaction) (Theory only).
7. Study of permanent slides-Thymus, spleen & lymph mode.
8. Demonstration of parts of microscope, its functioning and care.

OPTION-II: ECONOMIC ENTOMOLOGY AND PEST MANAGEMENT-II (ZOO-602B)

UNIT-I

1. Sericulture

(i) Species of silkworm
(ii) Requirements of Sericulture Industry
(iii) Grainage Management
(iv) Pre and Post-cocoon processing (Stifling & Reeling)
(v) Diseases of silkworm.

UNIT-II

2. Apiculture

(i) Species of Honeybees
(ii) Flora for Apiculture
(iii) Methods & Appliances of Bee Keeping
(iv) Products - (a) Honey (b) Bee wax (c) Propolis (d) Pollen (e) Royal Jelly (f) Bee Venom
(v) Diseases of Honey bee

3. Lac Culture

(i) Species and varities of Lac insect
(ii) Host Plants
(iii) Cultivation of Lac
(iv) Processing of Lac
(v) Lac Industry
(vi) Enemies of Lac insect.

UNIT-III

I. **Chemical Control** : Types and Classification of Insecticides (a) Insecticides of plant origin with special reference to vicotine; Pyrethrum; Rotenone and Azadirachtin (b) Chlorinated Hydrocarbons insecticides with special reference to DDT; Toxaphene; BNC; Chlordane; Aldrin; Endrin and Endosulfan (c) Organophosphorus Insecticides with special reference toMalathion;TEPP; Parathion and DDVP (d) Carbamate Insecticides with reference to Carbaryl and Carbofuran (e) Fumigants with reference to Hydrogen cyanide; Methyl bromide; Ethylene dichloride; Carbon tetrachloride and Aluminium phosphide. Hazards of chemical control. List of banned pesticides.

UNIT-IV

II. **Recent methods of Pest Control**:

- **Biological Control** : History; Techniques in biological control, Agents of biological Control (a) Vertebrates (b) Nemathelminthes (c) Arthropods (d) Protozoan; Microbial control with the help of Bacteria, Virus and Fungi.
- **Integrated Pest Control**: Introduction of IPM: Pre-requisites; Implementation Strategy; Framework of IPM programme and perspectives in IPM.

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Books Recommended

1.	Attwal, A.S.,	:	Agricultural Pests of India and South East Asia, Kalyani Publishers, New Delhi, 1991
2.	Dent, D.	:	Integrated Pest Management, Chapman & Hall, London, New York, Tokyo, Madras, 1995.
3.	Howse, P., Stevens, I. & Jones, O	:	Insect Pheromones and their use in Pest Management, Chapman & Hall, London, New York, Tokyo, Madras, 1998.
4.	Mishra, R.C.	:	Honey Bees and their Management in India, ICAR Publication, New Delhi, 1995.
5.	Kumar, A. and Nigam, P.M.,	:	Economic and Applied Entomology, Emkay Publications, 1991.
6.	Metcalf, R.L. & Metcalf, R.A.	:	Destructive and Useful Insects, McGraw Hill Book Company, Inc., New York, Toronto, London, 1951.

Practicals based on Theory Paper ZOO-602B (ZOO-354B)

1. Study of Mouth parts of honey bee, butterfly and red cotton bug from permanent mounts.
2. Study of different types of antennae, legs and wings through preserved specimens and permanent slides.
3. A study of life stages of silk worm, honey bees and lac insect.
4. Structure and working of common sprayers: Hand Compression sprayer, Knap sack sprayer.
5. Visit to apiary and godowns for study of infestation and project report.

OPTION III - INLAND FISHERIES & AQUACULTURE-II (ZOO-602C)

UNIT-I

- Fishing gears: Classification of the fishing gears according to the habitats in which they are being used, Electrical fishing.
- Culture systems: Monoculture and polyculture

UNIT-II

- Integrated fish farming: Duck-cum-fish farming, Dairy-cum-fish farming and Poultry-cum-fish farming.
- Pearl culture in India: Species used, implantation procedures, water quality requirements and economics
- Fish seed resources and their transport

UNIT-III

- Prawn culture: Culture of fresh water prawn, culture technology
- Cold water fisheries: Mahseer fisheries and trout fisheries
- Fish Diseases and their control: Viral, bacterial, fungal, protozoan, helminth, crustacean, diseases due to nhygienic conditions, diseases during transportation.

UNIT-IV

- Fish by-products
- Fish marketing
- Fish preservation: Principles of fish preservation, preservation by curing (Drying, Salting and Smoking), Chilling and freezing of fish, Canning of fish and fish products, Spoilage of fish, Rigor mortis

Note: Nine questions are to be set. Question No.1 is compulsory consisting of short answer type questions covering the whole syllabus. It will have 8 parts of 1 mark each. Two questions are to be set from each Unit. One question is to be attempted from each Unit. In all, five questions are to be attempted including compulsory one. 50% of the questions are to be split up into 2-4 sub-parts.

Books recommended

7. Brian, R.M. &David W.W.(ed.)., : Fisheries Techniques: American Fisheries Society, Bethesda Maryland, USA, 1996.

<u>Practicals based on Theory Paper</u> ZOO 602C (ZOO-354C)

1. Determination of food and feeding habits of locally available fishes on the basis of stomach analysis adopting the following methods :
   a. Frequency occurrence method
   b. Feeding intensity
   c. Point method.
2. Estimation of following chemical parameters of the water of a fish pond:
   a. Temperature
   b. pH
   c. Dissolved oxygen
   d. Phosphates
   e. Total dissolved solids
   f. Nitrates
   g. Hardness
   h. Chlorides
3. Visits to various fish ponds and fish market.
4. Study of various fresh water prawn species cultured in India.

Guidelines for the conduct of Practical Examinations

Max. Marks	: 20
Practical Exam	: 18 marks
Internal Assessment	: 2 marks
Time	: 4 hours

1. Demonstrate the law of independent assortment/segregation/epistasis from the material provided. Identify the characters involved showing the dominance/recessiveness of characters.

   OR

   Calculate the gene frequency from a known sample of characteristics using Hardy-Weinberg Law. 3
2. Make a dermatographic print of your finger tips or palm pattern and classify the various visible patterns with the help of diagrams and demonstrate it to the examiner. 3
3. Identification of polytene chromosomes from the photograph provided. 1
4. Viva-Voce 2
5. Practical Note Book and Project Report 2

Option-I

6. Identify the slide and give two reasons for identification. 2
7. Identify the instrument/apparatus (Autoclave/centrifuge/spectrophotometer/microtome etc.). Write about its uses and working. 2
8. Quantitative estimation of sugar/protein in the given sample 3

Option- II

9. Identification of mouth parts/antennae/legs/wings from charts/slides/specimens 2
10. Mention the type of larva/pupa/stages of life history of silkworm, honeybees, lac insect. Write a note on its external morphology. 2
11. Name the apparatus provided. Draw its well labeled diagram and explain its structure and working. 3

Option- III

12. Identify the gear 'A' and draw its well labeled diagram. 2
13. Identify specimens B & C giving one identification feature of each. 2
14. Determine the Temperature/pH/Dissolved oxygen/Phosphates/Total dissolved Solids/Nitrates/Hardness/Chlorides in given water sample. 1
15. Write the habit and habitat of given specimen (Cold water fish)'D'. 2

BIO-CHEMISTRY
SEMESTER V

INSTRUCTIONS FOR PAPER SETTER AND STUDENTS:

1. Total no. of questions will be nine. All questions carry equal marks.
2. Q. no. 1 will be compulsory. It will consist of short questions covering the entire syllabus.
3. Besides question Number 1, there will be 4 sections of 2 questions each.
4. All other questions may contain 2-3 parts.
5. Questions should be uniformly spread over the entire syllabus.
6. Students will be required to attempt 5 questions in all including Q. No. 1 and at least one question from each of the 4 sections.

Paper A: Molecular Biology – I **Marks: 45+5**

Objective: To understand aspects of storage and expression of genetic information. Membrane structure and function.

SECTION-I

(Lectures: 10)

Experimental proof for DNA as genetic material. Watson-Crick model of DNA. A&Z-DNA, structure of chromatin topology of DNA & topoisomerases. Organization of genes in different genomes. Extra nuclear genomes.

SECTION-II

(Lectures: 10)

Types & biochemical basis of mutations, DNA replication: semiconservative, semicontinuous, bidirectional & from a unique origin. Enzymes & proteins of DNA replication. Mechanism of DNA repair, DNA recombination.

SECTION-III

(Lectures: 10)

Transcription in prokaryotes and eukaryotes: promoter sequences, initiation, elongation, Rho dependent and rho independent termination, regulation, processing, alternative splicing, mRNA editing & Inhibitors of transcription.

SECTION-IV

(Lectures: 10)

Translation in prokaryoties and eukaryoties: Genetic code, Wobble hypothesis, structure of tRNA, amino acid activation, initiation, elongation, termination and inhibitors of translation, post translational modification of proteins.

Books Suggested :

1. Biochemistry, 5th Ed., 2002., Berg, J. M. & L. Stryer, W.H. Freeman, San Francisco.
2. Molecular Biology by David Freifelder, 1987.
3. Genes XI, by Benjamin Lewin, 2014.
4. Molecular Cell Biology by James Darnell, Harvey Lodish and Davit Baltimore, 7th Edition, 2014.

Paper B: Applied Biochemistry – I **Marks: 45+5**

Objective: To understand general aspects of vitamins, hormones, nutrition, immunology, blood coagulation, muscle contraction and nerve impulse transmission.

SECTION-I

(Lectures: 10)

Vitamins: water soluble & fat soluble, their sources, structure & biochemical function. Role of Thiamine, Riboflavin, Niacin, Pyridoxine, Pantothenic Acid, biotin, folic acid and Ascorbic acid. Role of Vitamin A in the visual cycle, Role of Vitamin D, Vitamin E and Antioxidant theory, role of Vitamin K in Coagulation.

SECTION-II

(Lectures: 10)

Essential nutrients. Protein energy malnutrition, starvation and obesity. Respiratory quotient (R.Q.) of carbohydrates, proteins and lipids. Basic metabolic rate and factors influencing it. Specific dynamic action of foods.

SECTION-III

(Lectures: 10)

Biochemical principles of toxicology. Phase I reactions and cytochrome P 450 enzyme systems. Phase II reactions and various conjugation systems. Effects of nutritional status and metabolic induction on xenobiotic toxicity; importance of physico–chemical properties of toxic chemicals. Biochemical basis of organophosphate and carbamate pesticides toxicity.

SECTION-IV

(Lectures: 10)

Hormones: classes, modes of action, endocrine glands & their hormones. Hypothalmic and posterior pituitary hormones, Anterior pituitary hormones, PTH, Calcitonin, insulin, glucagon, steroid hormones, thyroid hormones.

Books Suggested :

1. Berg, J. M., Lubert Stryer *:* Bio-chemistry*,* W.F. Freeman and Co., New York, Edition 5th, 2002.
2. Harper's Illustrated Biochemistry by R.K. Murray, P.A. Mayes, D.K. Granner and V.W. Rodwell, 27th Ed. 2006, Prentice Hall International Ltd. (U.K.).
3. Biochemical Toxicology of Environmental Agents by A. De Bruin, Elsevier Pub.
4. Human Nutrition & Dietetics by R. Passmore & M.A. Eastwood.

PRACTICALS: **Marks : 25**

One Practical of three hours per week

1. Extraction of DNA
2. Estimation of DNA by diphenylamine method.
3. Effect of temperature on the Viscosity of DNA using Oswald's viscometer.
4. Assays of SGPT and SGOT in serum.
5. Extraction of RNA from yeast .
6. Estimation of RNA by Orcinol method.
7. Determination of total protein and A/G ratio in serum.
8. Separation of serum proteins using paper electrophoresis.
9. Demonstration of Western Blotting technique.

BIO-CHEMISTRY

SEMESTER -VI

INSTRUCTIONS FOR PAPER SETTER AND STUDENTS:

1. Total No. of questions will be nine. All questions carry equal marks.
2. Q. No. 1 will be compulsory. It will consist of short questions covering the entire syllabus
3. Besides question Number 1, there will be 4 sections of 2 questions each.
4. All other questions may contain 2-3 parts.
5. Questions should be uniformly spread over the entire syllabus.
6. Students will be required to attempt 5 questions in all including Q. No. 1 and at least one question from each of the 4 sections.

Paper A: Molecular Biology – II **Marks: 45+5**

Objective: To understand aspects of storage, expression and regulation of genetic information.

SECTION-I

(Lectures: 10)

Targetting of proteins to different cell organelles. Post & co-translational modification of proteins. DNA binding domains of protein. Regulation of prokaryotes gene expression. Concept of operon, regulation of lac operon, trp-operon, phage infection (lysogenic & lytic mode)

SECTION-II

(Lectures: 10)

Regulation of enkaryotic gene expression. transcription factors: Zn fingers and leucine zipper. Roles of RNA regulators. hormonal control of transcription.

SECTION-III

(Lectures: 10)

Gene cloning: different types of vectors, libraries & isolation of gene. Yeast gal gene and mat locus. Mechanism of development in Drosophila.

SECTION-IV

(Lectures: 10)

Analysing genome, genome size, genome sequencing, microarrays, DNA finger printing, SNPs and applications in diseases and forensic.

Books Suggested :

1. Freifelder's Essentilas of Molecular Biology Malacinski GM 4th edition Narosa New Delhi 2005
2. Molecular Biology of Gene Watson JD 7th edition 2007 CSH New York 2013.
3. Genes XI, Benzamin Lewin, 2014 Oxford press Oxford.
4. Molecular cell biology Lodish H et al 8th edition 2016 McMilian Publishers, London.
5. Genomes 3 Brown TA. Garland Science New York 2007.

Paper B: Applied Biochemistry – II **Marks: 45+5**

Objective: Providing the student a comprehensive knowledge of physiology with emphasis on immune system and techniques in use; blood, muscle and nerve. This course will explain and demonstrate important techniques being used for analysis of blood. It will also enable the students to understand how the fundamental systems work in tandem for keeping the body fit.

SECTION-I

(Lectures: 10)

Basics of immune system. Cells & organs involved in immune response. Molecules associated: antigen, hapten & immunoglobulins- their structure, properties & functions. Innate & adaptive responses. Complement system- types, mechanism & functions. Humoral & cell mediated immune responses.

Immunological techniques-their principle, method & applications: precipitation, agglutination, Immunofluorescence, radio-immunoassay (RIA), enzyme liked immunosorbent assay (ELISA) and immunoblotting.

SECTION-II

(Lectures: 10)

Blood: composition, groups, functions; coagulation. Anticoagulants. Hemoglobin- forms, roles and disorders: hemoglobinopathies, anaemia.Buffers in the body: acid base equilibrium. Systems responsible for maintenance of acid-base balance- erythrocytes, respiration, liver, kidneys. Disturbances in acid base balance and compensation.

SECTION-III

(Lectures: 10)

Muscle: basic components of muscle cell, arichitecture of muscular organization, types. Microscopic & electron microscopic structure-skeletal, smooth & cardiac. Role of muscle proteins & calcium.

Mechanism of skeletal and smooth muscle contraction and relaxation. Sliding filament theory. Excitation-contraction coupling.

SECTION-IV

(Lectures: 10)

Central nervous system, peripheral nervous system, action potential, neurotransmitters, synapses & nerve gases. Mechanism of nerve impulse transmission: structure, classification and functions of neurons and neuroglias. The resting membrane potential & action potential.

Properties of nerve fibers : excitability, conductivity, all or none law, accommodation, adaptation, summation, refractory period, indefatigability.

Synapses : types, structure, synaptic transmission of the impulse, synaptic potentials, neurotransmitters, cotransmitters, neuromodulators. The neuromuscular junction : structure, transmission, end-plate potential.

Books Suggested :

1. Berg, J. M., Lubert Stryer *:* Bio-chemistry*,* W.F. Freeman and Co., New York, Edition 5th, 2002.
2. Harper's Illustrated Biochemistry by R.K. Murray, P.A. Mayes, D.K. Granner and V.W. Rodwell, 27th Ed. 2006, Prentice Hall International Ltd. (U.K.).
3. Essential Immunology by Ivan M. Roitt, English Language Book Society (ELBS) 8th Ed.,1994.

PRACTICALS: **Marks : 25**

One Practical of three hours per week

1.Demonstration of western blotting

2. Use of different anticoagulants.

3. Estimation of haemoglobin in blood.

4.Demonstration of ELISA.

5. Determination of clotting time of blood.

6. Determination of proteins by dye binding assay.

7. Visualizing antigen-abtibody precipitation in gel.

8. Agglutination assay.

9. Separation of proteins by SDS-Polyacrylamine Gel Electrophoresis

10. Liver function tests.

11. Estimation of urea and creatinine.

ELECTRONICS

(Kept in Abeyance)

AGRICULTURE
B.A/B.Sc. 5th and 6th Semester System

SEMESTER-V

Paper-V: Agrodiversity and Physiology

Max. Marks	: 75 Marks
Theory	: 70 Marks
Internal Assessment	: 05 Marks
Time	: 3 Hours

Period per week: 1. THEORY – Six of 45 minutes duration each.
2. PRACTICAL – Two of three hours duration.

Instructions for the paper setter and the students:

1. The syllabus of this paper has been divided into Four Units.
2. Question paper shall comprise of 9 questions in all.
3. Question 1 shall comprise of 10 short answer type questions covering the whole syllabus and will be **compulsory.** Each question will carry 1 (one) mark.
4. Unit I, II, III and IV shall have two questions each from respective units, out of which one question from each unit is to be attempted. Each question will be of 15 (fifteen) marks.
5. Total five questions are to be attempted.

Unit – I

History of Agroforestry
Agroecological Zonification
Socioeconomic Aspects of Agroforestry
Agroforestry System for Small Holdings
Arid Land Agroforestry

Unit – II

Establishment of Orchard
Basic Cultural Practices
Elemental Role and Needs of Nutrients
Propagation – Principles and Techniques
Stock –Scion relationship and their incompatibility
Fruit Physiology

Unit – III

Respiration- Glycolysis, Citric Acid Cycle, Photorespiration
Photosynthesis – Light Reaction, Dark Reaction, C_4 – Cycle, CAM Plants
Growth Hormones and their role in Agriculture
Enzymes and Vitamins
Vernalization
Photoperiodism

Unit – IV

Intellectual Property Right
Informatics in Agriculture
Seed Production and Technology
Indigenous Technical Knowledge in Agriculture
Introduction to Crop Biotechnology
Agrobiodiversity

PRACTICAL

Max. Marks	: 25 Marks
Practical	: 20 Marks
Internal Assessment	: 05 Marks

Planning an Orchard
Study of Agroforestry of Local Area
Scion- Stock relationship study
Study the effect of temperature and light duration on various crop plants of an area
Role of computer in Agriculture
GM crops and techniques
Study of Agrobiodiversity of Punjab

BOOKS

Plant Physiology, 2010 – K.N. Bhatia – Trumen Publishers, Jalandhar
Plant Physiology, 2010 – H.N. Srivasava – Pardeep Publishers, Jalandhar
Fruits – Ranjit Singh and S.K. Sexena - National Book Trust, New Delhi, 2008
Fruit Physiology – Amar Singh – Kalyani Publishers, Ludhiana, 1997

AGRICULTURE

SEMESTER-VI

Paper-VI: Insect Pests and Diseases of Crop

Max. Marks	: 75 Marks
Theory	: 70 Marks
Internal Assessment	: 5 Marks
Time	: 3 Hours

Period per week: 1. THEORY – Six of 45 minutes duration each.
2. PRACTICAL – Two of three hours duration.

Instructions for the paper setter and the students:

1. The syllabus of this paper has been divided into Four Units.
2. Question paper shall comprise of 9 questions in all.
3. Question 1 shall comprise of 10 short answer type questions covering the whole syllabus and will be **compulsory.** Each question will carry 1 (one) mark.
4. Units I, II, III and IV shall have two questions each from respective units, out of which one question from each unit is to be attempted. Each question will be of 15 (fifteen) marks.
5. Total five questions are to be attempted.

Unit – I

Plant Protection
Crop diseases ? How to control them?
Biological control, chemical control
Systemic fungicides
Weedicides
Compatibility of various fungicides and weedicides
Rodenticides

Unit – II

Diseases of Crop Plants

1. Crop-Wheat

Type of Disease	Name of Disease	Causal Organism
Fungal	Loose smut of Wheat	*Ustilago tritici*
Bacterial	Tundu disease of Wheat	*Corynebacterium tritici*
Viral	Chloris striate mosaic	Chloris striate mosaic virus (CSMV)

2. Crop- Rice

Type of Disease	Name of Disease	Causal Organism
Fungal	Blast of Rice	*Piricularia oryzae*
Bacterial	Bacterial Blight of Rice	*Xanthomonas oryzae*
Viral	Rice Tungro disease	Rice tungro Bacilliform virus (RTBV)

3. Crop- Maize

Type of Disease	Name of Disease	Causal Organism
Fungal	Black kernal rot	*Lasiodiplodia theorbrome*
Bacterial	Stalk rot of Maize	*Erwinia cartovora*
Viral	Maize chlorotic dwarf	Maize chlorotic dwarf virus (MCDV)

4. Crop-Citrus

Type of Disease	**Name of Disease**	**Causal Organism**
Fungal	Citrus black spot	*Guignardia citricarpa*
Bacterial	Citrus canker	*Xanthomonas citri*
Viral	Citrus Yellow Mosaic	Badnavirus

5. Crop-Grapes

Type of Disease	**Name of Disease**	**Causal Organism**
Fungal	Powdery Mildew of grapevine	*Unicinula nectator*
Bacterial	Crown gall	*Agrobacterium tumifaciens*
Viral	Cork bark	Grapevine virus B

6. Crop-Cotton

Type of Disease	**Name of Disease**	**Causal Organism**
Fungal	Cotton Rust	*Puccinia schedonnardii*
Bacterial	Bacterial Blight of Cotton	*Xanthomonas citri*
Viral	Leaf curl	Bigeminivirus or Cotton Leaf curl virus (CLCuV)

7. Vegetables

Type of Disease	**Name of Disease**	**Causal Organism**
Fungal	Late Blight of Potato	*Phytopthora infestans*
Bacterial	Bacterial canker of Tomato	*Clavibacter michiganensis*
Viral	Yellow vein mosaic of Bhindi	Yellow vein mosaic virus

8. Oil Crops: Mustard

Type of Disease	**Name of Disease**	**Causal Organism**
Fungal	White rust of crucifers	*Albugo candida*
Bacterial	Black rot of crucifers	*Xanthomonas campestris*
Viral	Rai Mosaic virus	Yellow Mosaic Virus

9. Oil Crops: Groundnut

Type of Disease	**Name of Disease**	**Causal Organism**
Fungal	Tikka Disease of groundnut	*Cercospora s*p.
Bacterial	Bacterial wilt	*Pseudomonas solanacearum*
Viral	Groundnut crinkle	Groundnut crinkle virus

Unit – III

General account of Insects and pests
Classification of Insects
Parts of Insect body
Control measures of Insect pests and diseases of crop

Unit – IV

Insect and nematode diseases of Cereal (Wheat, Maize, Rice) crops; Oil (Sunflower, Groundnut, Mustard) crops; Fruit (Mango, Guava, Citrus) crops

Vegetable crops

Rabi Crops	**Kharif Crops**
Green Peas	Chilli
Chick Peas (Cicer arientinum)	Okra
Onion (Allium cepa)	Bitter Gourd
Tomato (Solanum lycopersicum)	Bottle Gourd
Potato (Solanum tuberosum)	Brinjal

PRACTICAL

Max. Marks : 25 Marks
Practical : 20 Marks
Internal Assessment : 05 Marks

Study of all the diseases mentioned in theory
Symptoms and their control measures

Books

Plant Pathology – R.S. Singh, 2007 – Oxford and IBH Publishing Co. Pvt. Ltd., New Delhi

Plant Pathology – R.S. Malhotra and Aggarwal, 2009 – Tata MacGraw Hill Publishing, New Delhi

Economic and Applied Entomolgy – Kumar and Nigam, 2008 - Emkay Publishing, New Delhi

Fungicides– Y.L. Naine and Thaplial, 2008 – Oxford and IBH Publishing Co. Pvt. Ltd., Calcutta, Bombay

Elements of Entomology – Rajendra Singh, 2007 – Rastogi Publications, Meerut

A Text book of Applied Entomology – Vol I and Vol II – Srivastva, 2007- Kalyani Publishers, Ludhiana

Indian Crop Pests - Kumar and Nigam, 2007 – Emkay Publishers, Allahabad

Integrated Pest Management – G.s. Dhaliwal and R. Arora, 2006 – Kalyani Publishers, Ludhiana

HOME SCIENCE

B.A./B.Sc. (GENERAL) THIRD YEAR EXAMINATION, 2020-21
SEMESTER- V

Scheme of Examination

Theory						**Practical**				
Sr. No.	*Name of Paper*	*No. of Papers*	*Time in hrs.*	*Marks allotted*	*Int. Ass.*	*No. of Papers*	*Time in hrs.*	*Marks Allotted*	*Int. Ass.*	*Total Marks*
1.	Food, Nutrition and Child Development	1	3	45	05	1	3	45	05	100

Total : **100**

Note : 1. Each Practical group will have 12-15 students.

FOOD, NUTRITION AND CHILD DEVELOPMENT (Theory)

Max. Marks : 50
Theory : 45
Int. Ass. : 05
Hours : 06 Hours per week

INSTRUCTIONS FOR THE PAPER SETTER:

The question paper will consist of five Sections: A, B, C, D and E. Sections A, B, C and D will have **two** questions from the respective sections of the syllabus and will carry 9 marks each. Section E will consist of objective type questions covering the entire syllabus uniformly and will carry 9 marks.

INSTRUCTIONS FOR THE CANDIDATES:

Candidates are required to attempt one question each from the Sections A, B, C and D of the question paper and the entire section E.

SECTION-A

I. Importance and Functions of Food :

(a)Physiological; (b) Psychological; (c) Social

II. Food Constituents : Carbohydrates, Proteins and Fats—Functions, sources, requirements and deficiency.

III. Methods of Cooking : Boiling, Steaming, Frying, Baking, Roasting and Microwave cooking.

SECTION B

IV. Functions, recommended allowances, deficiency, excess and food sources of the following nutrients:

(a) Vitamins–A, B_1, B_2, B_3 , Vit. C, Vit. D.
(b) Minerals– Calcium, Phosphorous, Iron, Sodium, Iodine.

V. Balanced Diet

(a) Concept
(b) Classification of food based on the five/seven food groups.

SECTION-C

VI. Pregnancy

1. Signs and symptoms of pregnancy.
2. Discomforts and Complications.
3. Care during pregnancy
4. Preparation for delivery
5. Post natal care- Importance of breast feeding, bottle feeding, weaning and different types of weaning foods

VII. Methods of family planning

SECTION D

VIII Definition and importance of Child Development.

(a) Differences between growth and development; (b) Principles of development.

IX Developmental tasks at various stages of development

PRACTICAL

Max. Marks	**:**	**50**
Practical	**:**	**45**
Int. Ass.	**:**	**05**
Hours	**:**	**03 Hours per week**

I. Preparation of following dishes using various methods of cooking
   a. Soups- stimulating and nourishing (any two)
   b. Snacks- savory and sweet (two each)
   c. Salads- decorative and nutritious (two each)
   d. Bakery items (any two)
   e. Preparation with cereal pulse combination (any two)
   f. Desserts (any two)

II. Hot and cold beverages (at least two each).

III. Preparation of low cost nutritious recipes (at least two)

IV. Recipes- enhancing nutritive value (at least two)

V. Project

- Survey of Food Labels in order to study their nutritional facts

OR

- Survey of eating habits of five students

Reports to be submitted

List of Equipments for a practical group of 12-15 students :

1.	Gas Burners	15
2.	Cooking Range	01
3.	Ovens	05
4.	Mixers and Grinders	05
5.	Weighing Scales (for food)	05
6.	Gas Lighters	15
7.	Dustbin-Small	15-Big-1
8.	Vegetable Racks	02
9.	Plate Racks	15
10.	Storage Jars and Containers	25
11.	Refrigerator	01
12.	Icing Sets	05

Cooking Utensils

1.	Pressure Cooker	15
2.	Patila with Lid	30
3.	Kadahai	15
4.	Parat	15
5.	Tawa	15
6.	Chakla-Belna	15
7.	Grinding Stone	15
8.	Saucepans	15
9.	Karchhi	15
10.	Palta	15

11.	Poni	15
12.	Soup Strainers	15
13.	Sieves	15
14.	Enamel Bowls	15
15.	Baking Trays and Tins	15
16.	Cookie Trays	15
17.	Serving Trays	15
18.	Cutting Knives	15
19.	Peelers	15
20.	Jelly Moulds	15

Crockery and Cutlery

1.	Full Plates	30
2.	Half Plates	30
3.	Quarter Plates	30
4.	Cups & Saucers	30
5.	Soup Bowls	30
6.	Glasses	36
7.	Katoris (Vegetables Bowls)	30
8.	Dongas	30
9.	Forks	30
10.	Table Knives	30
11.	Table Spoons	48
12.	Tea Spoons	48
13.	Serving Spoons	24
14.	Tea Sets	05
15.	Dinner Sets	05
16.	Borosil Bowls	15
17.	Casseroles	15

HOME SCIENCE

B.A./B.Sc. (GENERAL) THIRD YEAR EXAMINATION, 2020-21
SEMESTER- VI

Scheme of Examination

Theory						Practical				
Sr. No.	*Name of Paper*	*No. of Papers*	*Time in hrs.*	*Marks allotted*	*Int. Ass.*	*No. of Papers*	*Time In hrs.*	*Marks Allotted*	*Int. Ass.*	*Total Marks*
1.	Food, Nutrition and Child Development	1	3	45	05	1	3	45	05	100
									Total:	**100**

Note : 1. Each Practical group will have 12-15 students.

FOOD, NUTRITION AND CHILD DEVELOPMENT (Theory)

Max. Marks : 50
Theory : 45
Int. Ass. : 05
Hours : 06 Hours per week

INSTRUCTIONS FOR THE PAPER SETTER :

The question paper will consist of five Sections: A, B, C, D and E. Sections A, B, C and D will have **two** questions from the respective sections of the syllabus and will carry 9 marks each. Section E will consist of objective type questions covering the entire syllabus uniformly and will carry 9 marks.

INSTRUCTIONS FOR THE CANDIDATES :

Candidates are required to attempt one question each from the Sections A, B, C and D of the question paper and the entire section E.

SECTION-A

I Food Preservation :
- (a) Definition, Importance & Principles.
- (b) Causes of food spoilage.
- (c) Household methods of food preservation—sun drying, use of salt, oil, spices, sugar & chemical preservatives.

II Meal Planning:
- (a) Definition
- (b) Importance
- (c) Principles of meal planning (physiological, psychological and economical)

SECTION-B

III. Therapeutic Diets & Modification of Normal Diet:
- (a) Principles of therapeutic diets.
- (b) Concept of soft, bland, liquid diets with examples.

IV. Therapeutic diets in the following conditions with principles involved :
- (a) Fever
- (b) Diarrhoea
- (c) High blood pressure/ Hypertension
- (d) Diabetes Mellitus.

SECTION-C

VI. Emotional Development of the child from infancy up to 6 years
- (a) Characteristics of children's emotions.
- (b) Common childhood emotions—Fear, angers, jealousy, curiosity love and affection.

VII. Language Development.
- (a) Stages of language development.
- (b) Factors affecting language development

SECTION-D

VIII. Play
- (a) Significance of play.
- (b) Types of play.
- (c) Play materials/equipment required for various age groups.

IX. Common behavioural problems and their remedies—Bed wetting, thumb sucking, nail biting, temper tantrums.

PRACTICAL

Max. Marks	**:50**
Practical	**:45**
Int. Ass.	**:05**
Hours	**:03 Hours per week**

I Planning & Preparation of diets for the following:
- (a) Pre-Schooler;
- (b) School going/packed lunch;
- (c) Adolescent;
- (d) Pregnant and lactating woman.

II Cooking and serving of the following : Soft, liquid, fluid diets (two each)

III Preservation- preparation of pickle, jam, chutney and squash (one each)

IV Project

- Safety measures of play equipment
  OR
- Visit to a nursery school
  OR
- Preparation of any one play item

Reports to be submitted

- **List of Equipments for a practical group of 15 students : SAME AS OF SEMESTER V**

INTRODUCTION TO COMPUTER SCIENCE
(Additional Optional Subject)

Note : The students with no background of Computer knowledge will opt for Module 1 while those familiar with the use of Computer system at the operating system level and application level, may opt either Module II or Module III.

Course Duration for each semester: 60 hours for Theory and 60 hours for Practical

Sr. No.	Paper	Name of Paper	Lectures per week	Max. Marks			Exam. Hours
		Fifth Semester		Ext.	Int.		
1	**Paper IIIA :**	Database Management System	6	25	5	30	3
2	**Paper PIIIA**	Practical on Paper – IIIA	6	-	-	20	3
		Sixth Semester					
3	**Paper IIIB :**	Relational Data Base Management System	6	25	5	30	3
4	**Paper PIIIB:**	Practical on Paper – B	6	-	-	20	3

FIFTH SEMESTER

Paper IIIA

Paper Title: DATABASE MANAGEMENT SYSTEM

Max. Marks : 25 **Time : 3 Hrs.**

Theory : Ext. 25 + Int. 5 = 30
Practical : Ext. 20 -- = 20

Total Periods (6 Periods/week): 60

Objectives of the Module: The objective of the module is to create skills in development of information system using DBMS. The students should be able to independently develop computer based projects.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. Data Base Concept

Data Base Vs file oriented approach, Basic DBMS terminology, Data independence, General Architecture of a Data Base Management Software, Components of DBMS, Advantage and Disadvantages of DBMS, Functions of a Database Administrator

(15 hours)

UNIT – II

2. Data Base Design

Introduction to Data Models, Entity Relationship Model, Entities, Attributes, Relationships, Relationship constraints, E-R Models, Generalization and Aggregation, Conceptual Design of a relational data base model. Comparison of Network, Hierarchical and Relational Model, Schemas, Sub-schemas, keys, Designing data base for Commercial application like inventory control, financial management and personal management, Storage organization for Relations.

(15 hours)

UNIT - III

3. Normalization: 1NF, 2NF, 3NF and BCNF.

4. Application of DBMS: MS Access

Features of MS Access, Creating a database in MS Access, Tables in MS Access: creating tables, inserting data into tables, inserting keys, modifying design. Properties of fields: field size, field format, input mask, caption, default value, validation rule, validation text. Establishing relationships between tables in MS Access: creation, modification and deletion of relationships.

(15 hours)

UNIT - IV

5. Queries in MS Access: creating queries, defining calculated fields, saving, running and modifying queries, multitable queries, including summary functions, expressions, search criteria. Crosstab queries, Action queries. Updata, append and delete queries. Forms in MS Access: creating and editing forms. Reports in MS Access: creating and printing reports, grouping and sorting the data in a report. Saving database with a password in MS Access, Importing external data and exporting the database in MS Access.

(15 hours)

7.	Rowski, Bob	Oracle Client server Computing, BPB publications

Paper PIIIA: Practical Based on Paper III-A

INTRODUCTION TO COMPUTER SCIENCE
SIXTH SEMESTER

Paper IIIB : **Relational Data Base Management System**

Max. Marks : 50

Theory : Ext. 25 + Int. 5 = 30

Practical : Ext. 20 -- = 20

Course Duration : 30 hours (for both Theory and Practical)
Pre-requisite: Computer Fundamentals and Problem Solving

Objectives of the Module: The objective of the module is to create skills in development of information system using DBMS. The students should be able to independently develop computer based projects.

Note :

i. The Question Paper will consist of Four Sections & a Compulsory question .
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. The Relational Model:

Relational Model: Database relations, properties of a relation, Attributes, Domains, Tuples, Relations and their schemes, Relational representation, Degree and cardinality, Extensions and intensions, Integrity constraints, Relational constraints, Relational operations: insertion, deletion and updation, Relational operators: union, intersection, difference, product, project, select, join, division.

(15 hours)

UNIT - II

2. Introduction to SQL

Oracle Data types, Starting SQL *Plus, Querying database tables, Conditional retrieval of rows, Working with Null Values, Matching a pattern from a table, Ordering the Result of a Query, Aggregate Functions, Grouping the Result of a Query, ROLLUP Operation: Getting Sub Totals, CUBE Operation: Getting Cross Tabs, Command Summary of SQL *Plus Editor. Querying Multiple Tables: Collating Information: Equi Joins, Cartesian Joins, Outer Joins, Self Joins; SET Operators: Union, Intersect, Minus; Nested Queries. Functions: Functions, Column Functions: Arithmetic Functions, Character Functions, Date Functions, General Functions; Group Functions. Data Manipulation and Control: Data Definition Language (DDL), Creating Tables, Creating a Table with data from Another table, Inserting Values into a Table, Updating Column(s) of a Table, Deleting Row(s) From a Table, Dropping a Column.

(15 hours)

UNIT - III

3. SQL contd..

Introduction to VIEWs, Manipulating the Base table(s) through VIEWs, Rules of DML Statements on Join Views, Dropping a VIEW, Inline Views, Materialized Views. Database Security and Privileges, GRANT Command, REVOKE Command, Application Privileges Management, Enhancing Performance, Sequences, Maintaining Database Objects, COMMIT and ROLLBACK.

4. **PL/SQL:** Introduction to PL/SQL, The Advantage of PL/SQL, PL/SQL Block Structure, PL/SQL Architecture, Fundamentals of PL/SQL, PL/SQL Data Types, Variables and Constants, Scope and Visibility of a Variable, Assignments and Expressions, Operator Precedence, Referencing Non-PL/SQL Variables, Built-in-Functions.

(15 hours)

UNIT - IV

5. **PL/SQL contd..**

Conditional and Iterative Control, SQL Within PL/SQL, Writing PL/SQL Code, Composite Data types. Cursor Management in PL/SQL, Cursor Manipulation, Implicit Cursor Attributes, Exception Handling in Pl/SQL; Predefined Exceptions, User Defined Exceptions. Subprograms in PL/SQL, Advantages of Subprograms, Procedure, Functions, Actual versus Formal Parameters, Argument Modes, Stored Packages, Advantages of Packages, Dropping a Procedure, Dropping a Function, Dropping a Package, Using Stored Function in SQL Statements, Database Trigger, Types of Triggers, Dropping Triggers, Storage for Triggers.

(15 hours)

* This is a compulsory qualifying paper, which the students have to study in the B.A./B.Sc./B.Com./B.C.A.1st year. The students are required to qualify this paper either in the first year, second year and third year of the course. The examination will be conducted by the University.

:

FIRST SEMESTER

: **English (Compulsory) – A**
BCA-16-101

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Semester I

Book Prescribed: **Colours of Expression** by Harbhajan Singh published by Publication Bureau, Panjab University, Chandigarh

Section A

1) **Short Stories** (1& 2)
One essay type question on summary/Character/Incident (one out of two with internal choice)
10 marks

II) **Prose (1 to 3)**
Long essay type question on Summary/Theme(one out of two with internal choice)
10 marks

III) **Poetry** (1 to 6) **15 marks**
Summary (one out of two with internal choice) **5 marks**
Short Questions (two out of three) **5 marks**
Reference to the Context (one out of two with internal choice) **5 marks**

Section B

1) Word formation from Prose and Stories and their use in sentences (5 out of 8)
10 marks

2) Use of textual words and idioms in sentences (5 out of 8) **10 marks**

3) Translation from Hindi/Punjabi to English **5 marks**
(a small Paragraph)

OR

For Foreign Students (Paraphrase of Poetry Passage)

4) Official, Business and Letters to the Editors **5 marks**

Fundamentals of Mathematical Statistics
: **BCA-16-102**

L	T	P	Cr	External Marks: 65
6	1	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: To teach the students the basic techniques of Statistical Methods. After completing this course students will be able to solve various Financial, Scientific and Engineering fields' problems.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.
v. **The student can use only Basic (Non-programmable) type of Calculator.**
vi. **Log tables are allowed. Students may be provided the same for computation.**

UNIT - I

Basic Statistics: Types of Statistics, Different Statistical Techniques, Steps in Statistical Investigation, Uses and Limitations of statistics, Collection of Data: Sources of collecting primary and Secondary Data, Limitations of Secondary Data, Criteria of evaluating secondary data, Organization of data, Graphs of Grouped Frequency Distribution, Tabulation of Data, Parts of Table

Measures of Central Tendency: Kinds of measures of central tendency (statistical averages or averages):

Arithmetic Mean: Simple Arithmetic Mean, Methods of calculating Simple Arithmetic Mean, Arithmetic Mean in case of Individual Series, Discrete series and continuous series, Weighted Arithmetic Mean, Combined Arithmetic Mean.

Geometric Mean: Simple Geometric Mean, Methods of calculating Simple Geometric Mean, Geometric Mean in case of Individual Series, Discrete series and continuous series, Weighted Geometric Mean, Combined Geometric Mean.

Harmonic Mean: Simple Harmonic Mean, Methods of calculating Simple Harmonic Mean, Harmonic Mean in case of Individual, Discrete series and continuous series, Weighted Harmonic Mean, Combined Harmonic Mean.

UNIT - II

Median: Methods of Calculating Median in case of Individual, Discrete series and continuous series

Partition Value: Quartile, Quintiles, Hexiles, Septiles, Octiles, Deciles, Percentiles

Mode: Methods of Calculating Mode in case of Individual Series, Discrete series and continuous series

Range: Computation of Range, Inter Quartile Range, Computation of Inter Quartile Range, Percentile Range and Computation of Percentile Range.

Mean Deviation, Computation of Mean Deviation, Standard Deviation, Calculation of Standard Deviation, Variance, Calculation of Standard Deviation for individual Series, Discrete Series and Continuous Series, Coefficient of Standard Deviation and coefficient of variation, Combined Standard Deviation, Correcting incorrect Standard Deviation

UNIT - III

Correlation Analysis : Correlation Analysis: Definition, Types of Correlation: Positive, Negative, Simple, Multiple, Partial, Total, Linear and Non-Linear. Need of Correlation Analysis, Correlation and Causation, Techniques for Measuring Correlation: Scatter Diagram Method, Graphic Method, Karl Pearson's Coefficient of Correlation: Correcting incorrect coefficient of correlation, calculating Karl Pearson's coefficient of correlation in case of grouped series, Probable Error, Coefficient of Determination, Spearman's coefficient of Correlation (Rank correlation): Calculation of Correct Coefficient of rank correlation, Difference between Rank Coefficient and Karl Pearson's coefficient of coefficient, Coefficient of concurrent deviation.

UNIT - IV

Regression Analysis (Linear Regression): Definition, Difference between Correlation and Regression, Types of Regression Analysis: Simple, Multiple, Partial, Total, Linear and Non-Linear, Objectives of Regression Analysis, Methods of obtaining regression analysis: Regression Lines, Regression Equations. Methods of obtaining regression equations: Normal Equations and Regression Coefficient, Properties of Regression Coefficient, Standard Error of Estimate, Regression Coefficient in case of Grouped Data, Uses of Regression Analysis and Limitations of Regression Analysis.

Suggested Readings:

1. Gupta S.C, Kapoor V.K. : Fundamentals of mathematical Statistics, Sultan Chand & Sons.
2. Gupta, S.P., 2003 : Statistical Methods, S. Chand.
3. Affi, A.A, 1979 : Statistical Analysis: A Computer Oriented Approach, Academic Press, Inc.

Computer Fundamentals and Computing Software
: **BCA-16-103**

L	T	P	Cr	
6	-	-	3	

External Marks: 65
Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objectives: The objective of this course is to familiarize students with complete Fundamentals and the packages commonly used in computing software.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Computer Appreciation: Introduction to computers, characteristics of computer; History of computers; Classification of computers on size: (Micro, Mini, Mainframe and super computers), Working Principles, Generations; Applications of computers; commonly used terms–Hardware, Software, Firmware. Basic Computer Organization: Block diagram of computer system, Input unit, Processing Unit and Output Unit; Description of Computer input devices: Keyboard, Mouse, Trackball, Pen, Touch screens, Scanner, Digital Camera; Output devices: Monitors, Printers, Plotters.

Computer Memory: Representation of information: BIT, BYTE, Memory, Memory size; Units of measurement of storage; Main memory: Storage evaluation criteria, main memory organization, RAM, ROM, PROM, EPROM; Secondary storage devices: Sequential Access Memory, Direct Access Memory Magnetic Tapes, Magnetic disks, Optical disks: CD, DVD; Memory storage devices: Flash Drive, Memory card;

Types of software: System and Application software; Programming Languages: Generation of Languages; Translators - Interpreters, Compilers, Assemblers and their comparison.

UNIT - II

Understanding Operating System using DOS : Introduction to operating systems and its functions, DOS and versions of DOS, Booting sequence; Warm and Cold Boot; Concepts of files and directories, Redirecting command input and output using pipes, Wildcard characters, Types of DOS commands: Internal and External; Internal Commands: DIR, MD, CD, CLS, COPY, DATE, DEL, PATH, PROMPT, REN, RD, TIME, TYPE, VER, VOL; External Commands: XCOPY, ATTRIB, BACKUP, RESTORE, FIND, SYS, FORMAT, CHKDSK, DISKCOPY, LABEL, MOVE, TREE, DELTREE, DEFRAG, SCANDISK, UNDELETE. Batch Files: Introduction to simple batch files; Introduction to CONFIG.SYS and AUTOEXEC.BAT files.

Understanding Graphical User Interface using Windows: Fundamentals of Windows, Types of Windows, Anatomy of windows, Icons, Recycle bin, Operations on Folders, Registry of Windows: Basics, Editing; Control panel.

:

UNIT - III

Word Processing Package: Opening, saving and closing an existing document; renaming and deleting files; Using styles and templates: Introduction to templates and styles; applying, modifying and creating new (custom) styles; using a template to create a document, creating a template, editing a template, organizing templates, examples of style use, Changing document views, Moving quickly through a document, Working with text: select, cut, copy, paste, find and replace, inserting special characters, setting tab stops and indents, Checking spelling and Grammar, Autocorrect, Using built-in language tools, word completion, Autotext, Formatting text: Using Styles, formatting paragraphs, formatting characters, auto-formatting, creating lists; Formatting pages: Using layout methods, creating headers and footers, Numbering pages, Changing page margins, Adding comments to a document, Creating a table of contents, Creating indexes and bibliographies, Printing a document, Using mail merge, Tracking changes to a document, Using fields, Linking to another part of a document, Using master documents, Creating fill-in forms.

UNIT - IV

Spreadsheet Package: Introduction to Spreadsheets, sheets and cells; Opening and saving spreadsheet files; Working with sheets: inserting new sheet, deleting and renaming sheets, Viewing a spreadsheet: freezing rows and columns, splitting screen, Entering data: cell referencing, formatting cells, entering numbers, entering numbers as text, entering formulae, entering date and time, deactivating automatic changes, Speeding up data entry: using fill tool, fill series, defining fill series, Validating cell contents, Formatting data: formatting text, numbers, cells, Autoformatting cells and sheets, defining new autoformat, Using conditional formatting, Hiding and showing data, Sorting records, Printing a spreadsheet document: using print ranges, page formats, inserting page breaks, headers and footers; Working with Graphs and Charts : Creating Embedded Chart, formatting chart: Changing chart types, adding Titles, Legends and Gridlines, Printing Charts; Adding database functions: defining database ranges, sorting, filtering and grouping database ranges; Evaluating data: using DataPilot; Functions and Macros: using and editing existing macro, Creating Macros, Recording Macros, Running Macros.

Presentation Packages: Basics of creating a presentation, Parts of main window, workspace views, creating a presentation, Incorporation of Animation.

Note: Any word processing, spreadsheet and presentation package may be used. Focus should be on open source software's.

Suggested Readings:

1. Basandra, S.K. : Computers Today, Galgotia.
2. Sinha P.K. & Sinha Priti : Computer Fundamentals, BPB Publications
3. Mathur Rajiv, 1995: DOS 6.2 Quick Reference, Galgotia.
4. OOoAuthors Team : Getting Started with OpenOffice.org 3.3, Friends of OpenDocument
5. Singleton, Roderick G.: OpenOffice.org User Guide.

Problem Solving Through C
: **BCA-16-104**

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: The objective of this course is to make the student understand programming language concepts, mainly control structures, reading a set of data, stepwise refinement, function and arrays. After completion of this course, the student is expected to analyze the real life problem and write programs in 'C' language to solve problems. The main emphasis of the course is on problem solving aspect.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Programming Process: Steps in developing of a program, Data Flow Diagram, Decision Table, Algorithm development, Flowchart, Pseudo Code, Testing and Debugging.
Fundamentals of C Languages: History of C, Character Set, Identifiers and Keywords, Constants, Types of C Constants, Rules for Constructing Integer, Real and character Constants, Variables, Data Types, rules for constructing variables.
Operators and Expressions: C Instructions, Arithmetic operators, Relational operators, Logical operators, Assignment Operators, Type Conversion in Assignments, Hierarchy of Operations, Standard and Formatted Statements, Structure of a C program , Compilation and Execution.

UNIT - II

Decision Control Structure: Decision making with IF-statement, IF-Else and Nested IF-Else, The else if Clause.
Loop Control Structure: While and do-while, for loop and Nested for loop,
Case Control Structure: Decision using switch, Thegoto statement.
Functions: Library functions and user defined functions, Global and Local variables, Function Declaration, Calling and definition of function, Methods of parameter passing to functions, recursion, Storage Classes in C.

UNIT - III

Arrays: Introduction, Array declaration, Accessing values in an array, Initializing values in an array, Single and Two Dimensional Arrays, Initializing a 2-Dimensional Array, Memory Map of a 2-Dimensional Array, Passing array elements to a function: Call by value and call by reference, Arrays of characters, Insertion and deletion operations, Searching the elements in an array, Using matrices in arrays, Passing an Entire Array to a Function.

Pointers: Pointer declaration, Address operator "&", Indirection operator "*", Pointer and arrays, Pointers and 2-Dimensional Arrays, Pointer to an Array, Passing 2-D array to a Function, Array of Pointers.
Dynamic Memory Allocation: malloc(), calloc(), realloc(), free() functions.

UNIT - IV

String Manipulation in C: Declaring and Initializing string variables, Reading and writing strings, String Handling functions(strlen(), strcpy(), strcmp(), strcat()).
Structures and Unions: Declaration of structures, Structure Initialization, Accessing structure members, Arrays of structure, Nested structures, Structure with pointers, Union.
Files in C: Introduction, Opening and Closing files, Basic I/O operation on files.

Suggested Readings:

Essential :

1. Yashavant P. Kanetkar : Let us C, BPB Publications, New Delhi.

Further Reading:

2. Salaria, R.S. : Test Your Skills in C, Salaria Publications, New Delhi.
3. C. Balaguruswami : Programming with C Language, Tata McGraw Hill, New Delhi.
4. Byron S. Gottfried : Programming in C, McGraw Hills Publishers, New York.
5. M.T. Somashekara : Programming in C, Prentice Hall of India.

:

SECOND SEMESTER

English (Compulsory) – B
BCA-16-201

:

L	T	P	Cr	
6	-	-	3	**External Marks: 65**
				Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Semester II

Book Prescribed: **Colour of Expression** by Harbhajan Singh published by Publication Bureau, Panjab University, Chandigarh

Section A

1) **Short Stories** (3-5)
One essay type question on summary/Character/Incident (one out of two with internal choice) **10 marks**

2) **Prose (4-5)**
Long essay type question on Summary/Theme (one out of two with internal choice) **10 marks**

3) Poetry (7-11) **15marks**
Summary (one out of two with internal choice) **5 marks**
Short Questions (two out of three) **5 marks**
Reference to the Context(one out of two with internal choice) **5 marks**

Section B

1) Paragraph Writing(Descriptive and Narrative) **10 marks**

2). Use of textual words and idioms in sentences (5 out of 8) **10 marks**

3). Translation from Hindi/Punjabi to English **5 marks**
(isolated sentences)

OR

For Foreign Students (Paraphrase of Poetry Passage)

4) Transformation of all types (5 out of 5) **5 marks**

Computer Organization
BCA-16-202

L	T	P	Cr	
6	1	-	3	

External Marks: 65
Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objectives: This course will enable the student to understand the basic organization of computer system and system maintenance.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Computer Organisation: Evolution of Computers, Von Neumann Architecture, Combinatorial Blocks : Gates, Half Adder, Full Adder, Multiplexers, Decoders, Encoders; Sequential Building blocks : Flip Flops, Registers, Counters,
Information representation: codes, fixed and floating point representation
Arithmetic: Addition and subtraction for sign magnitude and 2's complement numbers, integer multiplication using Booth's algorithms

UNIT - II

Architecture of a Simple Processor: Architecture of 8086/8088 microprocessor, instruction set, Addressing Modes.
Instruction: Microinstructions: Register Transfer, Arithmetic, Logical and Shift, Types of Instructions, Instruction Cycle.
Interrupt: Types, Interrupt Cycle
I/O organization: Strobe based and Handshake based communication, DMA based data transfer;

UNIT - III

Memory Organisation: Memory Hierarchy, RAM (Static and Dynamic), ROM Associative memory, Cache memory organisation, Virtual memory organisation.
Assembly Language : Features of Assembly Language, Machine Language vs Assembly Language, Pseudo Instruction; use of Assembly for programs: Addition, Subtraction, Multiplication using Subroutines and Basic Input/ Output.

UNIT - IV

System Maintenance: Introduction to various physical components of a computer, Physical Inspection and Diagnostics on PC, Functional description of various Internal and External cards; Viruses: Types of Computer Viruses, Detection, prevention and protection from Viruses.

Suggested Readings:

:

Essential :

1. M. Morris Mano, 1993. : Computer System Architecture, Prentice Hall International, 3rd Ed.,

Further Reading :

2. P. Pal Choudhri, 1994. : Computer Organisation and Design, Prentice Hall of India.
3. Biswal, Sadasiva, 2001 : Basic Electronics, Pub-Atlantic, New Delhi.
4. B. Govindarajalu, 1994. : IBM-PC and Clones - Hardware Troubleshooting and Maintenance, Tata-McGraw-Hill.

Fundamentals of Web Programming

: **BCA-16-203**

L	T	P	Cr	
6	-	-	3	**External Marks: 65**
				Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objectives: This course will enable the student to build and publish web sites using HTML, DHTML, CSS, JavaScript and Dreamweaver.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Basic Terminology: Web Server; Web Client/Browser, Understanding how a Browser communicates with a Web Server, Website, Webpage, Static Website, Dynamic Website, Internet, Intranet, Extranet, WWW, URL

HTML: Structure of an HTML program, Paragraph Breaks, Line Breaks; Emphasizing Material in a Web Page (Heading Styles, Drawing Lines); Text Styles (Bold, Italics, Underline); Other Text Effects (Centering (Text, Images etc.)

Lists: Unordered List, Ordered Lists, Definition lists

Adding Graphics to HTML Documents using the Border, Width, Height, Align, ALT Attributes

Tables: Caption Tag, Width, Border, Cell padding, Cell spacing, BGCOLOR, COLSPAN and ROWSPAN Attributes.

UNIT - II

Linking Documents: Anchor tag, External Document References, Internal Document References and Image Maps

Frames: Introduction to Frames: The <FRAMESET> tag, The <FRAME> tag, Targeting Named Frames

DHTML: Introduction to cascading style sheets (CSS), Style tag, Link tag, Types of CSS: In-Line, Internal, External

Forms: Attributes of Form element, Input element, The Text Element, Password, Button, Submit Button, Reset Button, The Checkbox, Radio, TextArea, Select and Option , Bootstrap Library.

UNIT - III

Java Script: Introduction and Features of JavaScript, Writing JavaScript into HTML, tokens, data types, variables, operations, control constructs, strings arrays, functions, core language objects, client side objects, event handling. Applications related to client side form validation.

Other Built-In Objects in JavaScript: The String Object, The Math Object, The Date Object;

UNIT - IV

:

Introduction to Dreamweaver: Understanding Workspace Layout, Managing Websites, Creating a Website, Using Dreamweaver Templates, Adding New WebPages, Text and Page Format, Inserting Tables, Lists, Images, Adding Links.

Web Hosting: Understanding Domain Name & Web Space, Getting a Domain Name & Web Space (Purchase or Free), Uploading the Website to Remote Server, Introduction to Open Source Third party FTP Tools

Suggested Readings:

Essential :

1	Wanger & Wyke	:	Java Script Unleased, Pearson Education, New Delhi.
2	Bayross, Ivan :	:	HTML, DHTML, Java Script by BPB, Latest reprint
3	Schildt , Herbert	:	The Complete Reference Java 2, TMH, Latest reprint
4	Joseph Lowery	:	Adobe Dreamweaver CS5 Bible Paperback Edition

Further Reading :

5	Thomas Powell	:	HTML & CSS: The Complete Reference
6	John Pollock	:	JavaScript, A Beginner's Guide
7	Janine C. Warner	:	Dreamweaver CS5 For Dummies Paperback Edition
8	David Powers	:	The Essential Guide to Dreamweaver CS4

Object Oriented Programming using C++
: BCA-16-204

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objectives: By the end of the course, students will be able to write C++ programs using the more esoteric language features, utilize Object Oriented techniques to design C++ programs, use the standard C++ library, and explore advanced C++ techniques.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Principles of Object Oriented Programming (OOP): Introduction to OOP, Difference between OOP and Procedure Oriented Programming; Concepts: Object, Class, Encapsulation, Abstraction, Polymorphism and
Inheritance, Applications of OOP. Special operators: scope resolution operator, Member Dereferencing operators, Memory management operators, Manipulators and Type cast operator
Structure of a C++ Program and Classes and Objects : Class Declaration : Data Members, Member Functions, Private and Public members, Creating Objects, Accessing class data members, Accessing member functions; Class Function Definition: Member Function definition inside the class declaration and outside the class declaration.

UNIT - II

Friend function, inline function, Static members, Function Overloading, Arrays within a class. Arrays of Objects; Objects as function arguments: Pass by value, Pass by reference, Pointers to Objects.
Constructors: Declaration and Definition, Types of Constructors, (Default, Parameterized, Copy Constructors). Destructors: Definition and use.
Operator Overloading & Type Conversion: Conversion from basic type to user defined type, User defined to basic type and one user defined conversion to another user defined type.

UNIT - III

Inheritance: Extending Classes Concept of inheritance, Base class, Defining derived classes, Visibility modes : Public, Private, Protected ;Types of Inheritance: Single inheritance :

Privately derived, Publicly derived; Making a protected member inheritable, multilevel inheritance, multiple Inheritance and ambiguity of multiple inheritance, Hierarchal Inheritance, Hybrid, Nesting of classes.

Polymorphism: Definition, Application and demonstration of Data Abstraction, Encapsulation and Polymorphism. Early Binding, Polymorphism with pointers, Virtual Functions, Late binding, pure virtual functions.

UNIT - IV

Exception Handling: Definition, Exception Handling Mechanism : Throwing mechanism and Catching Mechanism, Rethrowing an Exception

File Processing : Opening and closing of file, Binary file operations, structures and file operations, classes and file operations, Random file processing.

Suggested Readings :

Essential :

1. E. Balaguruswamy, 2008 : Object Oriented Programming with C++, TMH.

Further Reading :

2. Bjarne Stroustrup, 2009 : The C++ Programming Language, Addison-Wesley Publishing Company.
3. Robert Lafore, 2003 : Object Oriented Programming in Turbo C++, Galgotia Pub.
4. Salaria, R. S. : Object Oriented Programming Using C++, Khanna Book Publishing Co. (P.) Ltd., New Delhi.

:

THIRD SEMESTER

Punjabi – A
BCA-16-301

:

ਪੰਜਾਬੀ ਲਾਜ਼ਮੀ

ਦਸੰਬਰ 2019 ਦੇ ਇਮਤਿਹਾਨ ਲਈ

ਕੁੱਲ ਅੰਕ : 50
ਥਿਊਰੀ : 45
ਇੰਟਰਨਲ ਅਸੈਸਮੈਂਟ: 05
ਸਮਾਂ: 3 ਘੰਟੇ

ਸਿਲੇਬਸ

1. ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਕਵੀਆਂ ਦੀਆਂ ਚੋਣਵੀਆਂ ਕਵਿਤਾਵਾਂ ਦਾ ਅਧਿਐਨ
2. ਚੋਣਵੀਆਂ ਪੰਜਾਬੀ ਕਹਾਣੀਆਂ ਦਾ ਅਧਿਐਨ
3. ਚੋਣਵੇਂ ਪੰਜਾਬੀ ਲੇਖਕਾਂ ਦਾ ਸੰਖੇਪ ਜੀਵਨ ਤੇ ਰਚਨਾ/ਯੋਗਦਾਨ

ਕੋਰਸ

1. ਸੁਰ-ਸੰਵੇਦਨਾ, ਸੰਪਾ: ਡਾ.ਸਤਿੰਦਰ ਸਿੰਘ ਵਿਚੋਂ ਚੋਣਵੀਆਂ 15 ਕਵਿਤਾਵਾਂ,
   ਪ੍ਰਕਾਸ਼ਕ: ਪੰਜਾਬ ਯੂਨੀਵਰਸਿਟੀ ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਚੰਡੀਗੜ੍ਹ
   (ਭਾਈ ਵੀਰ ਸਿੰਘ- ਗੁਲਾਬ ਦਾ ਫੁੱਲ ਤੋੜਨ ਵਾਲੇ ਨੂੰ, ਵਿਛੋੜਾ-ਵਸਲ, ਖੇੜਾ, ਪੂਰਨ ਸਿੰਘ- ਜਵਾਨ ਪੰਜਾਬ, ਸਮੁੰਦਰ ਕਿਨਾਰੇ ਮੈਂ ਉਡੀਕਾਂ, ਗਰਾਂ ਦਾ ਮਿਹਨਤੀ ਬਲਦ, ਧਨੀ ਰਾਮ ਚਾਤ੍ਰਿਕ- ਰਾਧਾ ਸੰਦੇਸ਼, ਏਕੇ ਦੀ ਬਰਕਤ, ਪੰਜਾਬੀ ਦਾ ਸੁਪਨਾ, ਮੋਹਨ ਸਿੰਘ- ਮਾਂ, ਦੇਸ਼ ਪਿਆਰ, ਹਵਾ ਦਾ ਜੀਵਨ ਅਤੇ ਅੰਮ੍ਰਿਤਾ ਪ੍ਰੀਤਮ- ਆਖਾਂ ਵਾਰਸ ਸ਼ਾਹ ਨੂੰ, ਸੱਤ ਵਰ੍ਹੇ ਅਤੇ ਅਸ਼ੋਕਾ ਚੇਤੀ ਕਵਿਤਾਵਾਂ)
2. ਪੰਜਾਬੀ ਕਥਾ-ਕਿਤਾਬ, ਸੰਪਾ: ਗੁਰਦਿਆਲ ਸਿੰਘ ਵਿਚੋਂ ਚੋਣਵੀਆਂ 6 ਕਹਾਣੀਆਂ
   ਪ੍ਰਕਾਸ਼ਕ: ਪੰਜਾਬ ਯੂਨੀਵਰਸਿਟੀ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਚੰਡੀਗੜ੍ਹ।
   (ਏਹੁ ਨਿਦੋਸਾ ਮਾਰੀਐ, ਸਵਰਗ ਦੀ ਝਲਕ, ਮਾਮਲਾ, ਉਜਾੜ, ਬਸ਼ੀਰਾ ਅਤੇ ਰੱਬ ਤੇ ਰੁੱਤਾਂ ਕਹਾਣੀਆਂ)

ਯੂਨਿਟ ਅਤੇ ਥੀਮ

1.	ਸੁਰ-ਸੰਵੇਦਨਾ ਪੁਸਤਕ ਵਿੱਚੋਂ ਪ੍ਰਸੰਗ ਸਹਿਤ ਵਿਆਖਿਆ (2 ਵਿਚੋਂ 1)	5 ਅੰਕ
2.	ਕਿਸੇ ਇੱਕ ਕਵਿਤਾ ਦਾ ਸਾਰ ਜਾਂ ਕੇਂਦਰੀ ਭਾਵ (3 ਵਿਚੋਂ 1)	5 ਅੰਕ
3.	ਇਕ ਕਹਾਣੀ ਦਾ ਸਾਰ (ਪੰਜਾਬੀ ਕਥਾ-ਕਿਤਾਬ ਵਿਚੋਂ)	5 ਅੰਕ
4.	ਕਿਸੇ ਇੱਕ ਕਵੀ ਜਾਂ ਕਹਾਣੀਕਾਰ ਦਾ ਜੀਵਨ, ਰਚਨਾ ਅਤੇ ਯੋਗਦਾਨ (ਭਾਈ ਵੀਰ ਸਿੰਘ, ਪ੍ਰੋ ਮੋਹਨ ਸਿੰਘ, ਅੰਮ੍ਰਿਤਾ ਪ੍ਰੀਤਮ, ਸੁਜਾਨ ਸਿੰਘ, ਸੰਤੋਖ ਸਿੰਘ ਧੀਰ ਅਤੇ ਕੁਲਵੰਤ ਸਿੰਘ ਵਿਰਕ) (2 ਵਿਚੋਂ 1, ਇੱਕ ਕਵੀ ਅਤੇ ਇੱਕ ਕਹਾਣੀਕਾਰ ਵਿੱਚੋਂ)	8 ਅੰਕ
5.	ਲੇਖ : ਸਮਾਜਕ, ਸਭਿਆਚਾਰਕ ਅਤੇ ਆਮ ਵਾਕਫ਼ੀ ਨਾਲ ਸੰਬੰਧਤ (500 ਸ਼ਬਦਾਂ ਤੱਕ)	7 ਅੰਕ
6.	ਸ਼ਬਦ ਸ਼ੁੱਧੀ (10 ਅਸ਼ੁੱਧ ਸ਼ਬਦ-ਜੋੜਾਂ ਵਿੱਚੋਂ 7)	7 ਅੰਕ
7.	ਵਾਕ ਸ਼ੁੱਧੀ (10 ਅਸ਼ੁੱਧ ਵਾਕਾਂ ਵਿੱਚੋਂ 8)	8 ਅੰਕ

ਵਿਸ਼ੇਸ਼ ਨੋਟ : ਸਮੁੱਚੇ ਪਾਠ ਕ੍ਰਮ ਲਈ ਹਫ਼ਤੇ ਵਿਚ 6 ਪੀਰੀਅਡ

OR

HISTORY AND CULTURE OF PUNJAB – A
BCA-16-302

HISTORY AND CULTURE OF PUNJAB – I

Instructions for the paper-setter and candidates: (for paper in Semester I & II)

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 10 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type questions. Each question will carry 1 mark. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit-IV in all. Each question will carry 10 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. One question from Unit-IV shall be set on the map.

Explanation:

1. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
2. The distribution of marks for the map question would be as under:
   Map : 06 Marks
   Explanatory Note : 04 Marks
   In case a paper setter chooses to set a question of map on important historical places, the paper setter will be required to ask the students to mark 6 places on map of 1 mark each and write explanatory note on any two of 2 marks each.
3. The paper-setter would avoid repetition between different types of question within one question paper.

PAPER : HISTORY AND CULTURE OF PUNJAB FROM THE EARLIEST TIMES TO 1849

Max. Marks	:	50
Theory	:	45
Internal Assessment	:	05
Time	:	3 Hours

Objectives: To introduce the students to the history of the Punjab region.
Pedagogy: Lectures, library work and discussions.

UNIT I

1. Harappan Civilization: extent and town planning and socio-economic life.
2. Life in Vedic Age: socio-economic and religious.
3. Growth of Jainism and Buddhism in Punjab on the region.

UNIT II

4. Society and Culture under Maurayas
5. Society and Culture under Gupta
6. Cultural Reorientation: main features of Bhakti; origin and development of Sufism

UNIT III

7. Evolution of Sikhism: teaching of Guru Nanak; Institutional Development -Manji, Masand, Sangat and pangat.
8. Transformation of Sikhism: martyrdom of Guru Arjan; martyrdom of Guru Tegh Bahadur; impact.
9. Institution of Khalsa: new baptism; significance

UNIT IV

10. Changes in Society in 18th century: social unrest; emergence of misls and institutions-rakhi, gurmata, dal khalsa.
11. Society and Culture of the people under Maharaja Ranjit Singh
12. MAP (of undivided physical geographical map of Punjab): Major Historical Places: Harappa, Mohenjodaro, Sanghol, Ropar, Lahore, Amritsar, Kiratpur, Anandpur Sahib, Tarn Taran, Machhiwara, Goindwal, Khadur Sahib.

Suggested Readings:

1. Joshi, L.M (ed.) : History and Culture of the Punjab, Part-I, Publication Bureau, Punjabi University, Patiala, 1989 (3rd edn.)
2. Joshi, L.M and Singh, Fauja (ed.) : History and Culture of the Punjab, Vol. I, Punjabi University, Patiala, 1977
3. Prakash, Buddha : Glimpses of Ancient Punjab, P.U., Patiala, 1983
4. Thapar, Romila : A History of India, Vol. I, Penguin Books, 1966
5. Basham, A.L : The Wonder That was India, Rupa Books, Calcutta (18th rep.),1992
6. Sharma, B.N : Life in Northern India, Munshi Ram Manohar Lal, Delhi,1966
7. Singh,Kirpal : History and Culture of the Punjab, Part II(Medieval Period), Publication Bureau, Punjabi University, Patiala 1990(3rd edn.).
8. Singh, Fauja(ed.) : History of the Punjab, Vol.III, Punjabi University, Patiala, 1972
9. Grewal, J.S. : The Sikhs of the Punjab, the New Cambridge History of India, Orient Longman, Hyderabad,1990.
10. Singh, Khuwant : A History of the Sikhs, vol I: 1469-1839, Oxford University Press Delhi, 1991.
11. Chopra, P.N.,Puri, B.N.:A Social, Cultural and Economic History of India, Vol. II, and Das, M.N. Macmillan, Delhi, 1974.
12. Hussain ,Yusuf : Glimpse of Medieval Indian Culture, Asia Publishing House, Bombay, 1973(rep.).

Note: The following categories of the students shall be entitled to take option of History & Culture of Punjab in lieu of Punjabi as compulsory subject:

A. That the students who have not studied Punjabi upto class 10th.
B. Ward of / and Defence Personnel and Central Govt. Employee/Employees who are transferrable on all India basis.
C. Foreigners

Information System Design and Implementation

: **BCA-16-303**

L	T	P	Cr	
6	-	-	3	**External Marks: 65**
				Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: To teach the students about the various aspects of Information Systems to be developed their analysis and design. The motive is to aware the learners about pre requisite of software development and associated paradigms. After completing this course students will be able to be analyse and design information systems.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Systems Concepts and Information Systems Environment: Definition and characteristics of a system. Elements of a system Environment: Boundaries and interface. Types of systems: Physical or Abstract Systems, Open and Closed System, Man - made information systems.

The System Development Life Cycle: Introduction to various phases-Recognition of Need, Feasibility Study, Analysis, Design, Implementation, Post– Implementation and Maintenance.

The Role of System Analyst: Skills of a System Analyst, various roles of the Analyst.

UNIT - II

System Planning and the Initial Investigation: Bases for planning in system analysis, Initial investigation, determining the users information requirements, Problem definition and Project Initiation, Background Analysis, Fact Finding, Fact Analysis, Determination of Feasibility.

Information Gathering: Introduction, Information Gathering tools: Review of Literature, Procedures and forms. On -site observation. Interviews and questionnaires.

Tools of Structured Analysis: Various tools of structured analysis: Data flow diagram (DFD), Data Dictionary, Decision tree and structured English, Decision table, Pros and cons of each tools.

UNIT - III

Feasibility Study: System Performance-statement of Constraints, Identification of Specific System Objectives, description of Outputs. Feasibility Study – Feasibility considerations, Steps in feasibility analysis. Feasibility Report.

System Design: The Process of Design-Logical and Physical Design, Design methodologies: Structured design, Functional Decomposition

System Testing and Quality Assurance: Testing, System testing, Quality assurance and its goals in its system life cycle, Levels of quality assurance, Trends in testing.

UNIT - IV

Implementation and Software Maintenance: Introduction, Conversion- Activity network for Conversion, File Conversion, User Training: Elements of user Training Post implementation review. Software Maintenance - Primary activities of a Maintenance Procedure, Reducing Maintenance Costs.

Hardware and Software Selection: Types of Software, Procedure for Hardware/Software selection: Major phases in selection, Evaluation and Validation, Vendor Selection, Post – Installation Review. Software selection- Criteria for Software Selection, the evaluation process.

Suggested Readings:

1. E.M. Awad: Systems Analysis and Design,Galgotia Publications(P)Ltd.

Further Reading :

2. Hardgrave Bill C. ,Siau Keng, Chiang Roger H.L., Systems Analysis and Design : Techniques, Methodologies, Approaches and Architectures 1st Edition, M.E. Sharpe Publications.

Computer Oriented Numerical Methods
: BCA-16-304 (Session 2020 – 2021)

L	T	P	Cr	External Marks: 65
6	1	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: To teach the students the essential techniques of Numerical Methods. After completing this course students will be able to solve various Scientific and Engineering fields' problems.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.
v. **The student can use only Basic (Non-programmable) type of Calculator.**
vi. **Log tables are allowed. Students may be provided the same for computation.**

UNIT - I

Introduction to differentiation, integration and matrix algebra.

(No. of Lectures – 05)

Data Representation and Computer Arithmetic: Introduction, Concept of Exact and Approximate Numbers, Concept of Significant digits, Representation of Numbers in Memory, Storage of Integer Numbers: Signed Representation, 1's Complement Representation, 2's Complement Representation, Floating Point Numbers and their storage, Floating Point Arithmetic, Normalization and their consequences, Errors, Measures of Accuracy: Absolute Error, Relative Error and Percentage Error, Error types: Data Errors, Truncation Errors, Round-Off Errors, Computational Errors, Rules, Relationship between Relative Error and Significant digits and Error Propagation: Error Propagation in Addition Operation, Subtraction Operation, Multiplication Operation and Division Operation.

(No. of Lectures – 10)

UNIT - II

Solution of Non-Linear Equations: Introduction, Types of Non-Linear Equations: Polynomial Equations, Transcendental Equations, Methods of Finding Solutions of Non-Linear equations: Direct Method, Iterative Method.

Iterative Methods: Bisection Method, False-Position Method, Secant Method, Newton - Raphson Methods, Zeros of a polynomial using Birge – Vieta Method. Convergence of Iterative Methods, Comparison between Iterative Methods.

(No. of Lectures – 08)

Simultaneous Linear Equations: Solution of Simultaneous Linear Equations using Direct and Iterative Methods: Direct Methods: Gauss – Elimination Method, Gauss-Jordan Method, Concept of Pivoting, Iterative Method: Gauss-Seidal Method.

(No. of Lectures – 07)

UNIT - III

Interpolation: Introduction, Lagrange Interpolation, Inverse Interpolation, Finite Differences: Forward Differences, Backward Differences, Divided Differences, Difference Tables: Forward Difference Table, Backward Difference Table, Divided Difference Table, Observations regarding Difference Tables, Newton's Method of Interpolation: Newton' s Forward Difference Interpolation Formula, Newton' s Backward Difference Interpolation Formula, Newton' s Divided Difference Interpolation Formula.

(No. of Lectures – 10)

Numerical Integration: Introduction, Newton-Cotes Integration Formulae: Trapezoidal Rule, Simpson's 1/3rd Rule, Simpson's 3/8th Rule.

(No. of Lectures – 05)

UNIT - IV

Approximation: Approximation of functions: Taylor Series Representation, Chebyshev Polynomials.

(No. of Lectures – 07)

Solution of Ordinary Differential Equations: Introduction**,** Euler's Method, Runga–Kutta Methods: 2nd order & 4th order, Predictor Corrector Methods: Modified Euler's Method.

(No. of Lectures – 08)

Suggested Readings:

Essential :

1. Salaria,R.S. : Computer Oriented Numerical Methods,5th Edition, Khanna Book Publishing Co. (P.) Ltd., New Delhi

Further Reading :

2. Rajaraman,V.,2004 : Computer Programming in C, Prentice Hall of India.
3. S.S. Shastry : Introductory Methods of Numerical Analysis
4. H.C. Saxena : Finite differences and Numerical Analysis

Data Structures
: **BCA-16-305**

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: To teach the students various data structures and the basic operations performed using them. At the end of course the student will have complete knowledge of data structures, thus will be able to use them for solving real world problems.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Basic Concepts: Introduction to Complexity, Data Structure and Data Structure operations. Applications of Data Structure, Basic data Structures.
Arrays: Introduction, Types of Array, Memory representation, Applications and operations.
Stacks: Introduction, memory representation, Applications and operations, Recursion.

UNIT - II

Linked List: Operations:-traversing, searching, inserting, deleting, operations on header linked list, circular linked list, doubly linked list, memory representation, Applications, polynomial manipulation.
Queue: Introduction, Types, Memory Representation and Applications.

UNIT - III

Trees – Definition and Basic concepts, Representation in Contiguous Storage, Binary Tree, Binary Tree Traversal, Searching, Insertion and deletion in Binary trees, Binary Search tree.
Graphs: Introduction, Memory Representation, Graph Traversal (DFS and BFS)

UNIT - IV

Searching: Binary and Linear Search;
Sorting: Bubble sort, Insertion sort, Selection sort, Merge Sort, Quick sort.
Comparison of various Searching and Sorting algorithms.

Suggested Readings :

Essential :

1. Lipschuitz L. Seymour, 2001 : Data Structure, Schaum Outline Series, TMH, New Delhi.

Further Reading :

2. Tannenbaum, Aaro M., 1990 : Data Structure Using C, Pearson.
3. Salaria, R. S. : Data Structures & Algorithm Using C, Khanna Book Publishing Co. (P.) Ltd., New Delhi.
4. Salaria, R. S., Test Your Skills in Data Structures, Khanna Book Publishing Co. (P.) Ltd., New Delhi.
5. Sofat Sanjeev, Data Structure with C and C++, Khanna Book Publishing Co.
6. Patel, R.B., Expert Data Structure in C, Khanna Book Publishing Co.

:

FOURTH SEMESTER

Punjabi (Compulsory) – B
BCA-16-401

:

ਪੰਜਾਬੀ ਲਾਜ਼ਮੀ

ਅਪ੍ਰੈਲ /ਮਈ 2020 ਦੇ ਇਮਤਿਹਾਨ ਲਈ

ਕੁੱਲ ਅੰਕ : 50
ਥਿਊਰੀ : 45
ਇੰਟਰਨਲ ਅਸੈਸਮੈਂਟ: 05
ਸਮਾਂ: 3 ਘੰਟੇ

ਸਿਲੇਬਸ

1. ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਕਵੀਆਂ ਦੀਆਂ ਚੋਣਵੀਆਂ ਕਵਿਤਾਵਾਂ ਦਾ ਅਧਿਐਨ
2. ਚੋਣਵੀਆਂ ਪੰਜਾਬੀ ਕਹਾਣੀਆਂ ਦਾ ਅਧਿਐਨ
3. ਚੋਣਵੇਂ ਪੰਜਾਬੀ ਲੇਖਕਾਂ ਦਾ ਸੰਖੇਪ ਜੀਵਨ ਤੇ ਰਚਨਾ/ਯੋਗਦਾਨ

ਕੋਰਸ

1. ਸੁਰ-ਸੰਵੇਦਨਾ, ਸੰਪਾ: ਡਾ.ਸਤਿੰਦਰ ਸਿੰਘ ਵਿਚੋਂ ਚੋਣਵੀਆਂ 15 ਕਵਿਤਾਵਾਂ, ਪ੍ਰਕਾਸ਼ਕ: ਪੰਜਾਬ ਯੂਨੀਵਰਸਿਟੀ ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਚੰਡੀਗੜ੍ਹ
(ਫ਼ੀਰੋਜ਼ਦੀਨ ਸ਼ਰਫ਼- ਪੰਜਾਬ, ਭਾਰਤ, ਮਾਂ ਦਾ ਦਿਲ, ਨੰਦ ਲਾਲ ਨੂਰਪੁਰੀ- ਭੋਲਾ ਪੰਛੀ, ਚੁੰਮ ਚੁੰਮ ਰਖੋ, ਸ਼ੌਕਣ ਮੇਲੇ ਦੀ, ਸ਼ਿਵ ਕੁਮਾਰ- ਲੱਛੀ ਕੁੜੀ, ਕੀ ਪੁੱਛਦਿਉ ਹਾਲ ਫ਼ਕੀਰਾਂ ਦਾ, ਬਿਰਹੜਾ, ਪਾਸ਼- ਇਨਕਾਰ, ਅਸੀਂ ਲੜਾਂਗੇ ਸਾਥੀ, ਗੀਤ, ਸੁਰਜੀਤ ਪਾਤਰ- ਖ਼ਤਾਂ ਦੀ ਉਡੀਕ, ਗ਼ਜ਼ਲ (ਕੋਈ ਡਾਲੀਆਂ 'ਚੋਂ) ਅਤੇ ਗ਼ਜ਼ਲ (ਮੇਰਾ ਸੂਰਜ ਡੁਬਿਆ ਹੈ) ਕਵਿਤਾਵਾਂ)

2. ਪੰਜਾਬੀ ਕਥਾ-ਕਿਤਾਬ, ਸੰਪਾ: ਗੁਰਦਿਆਲ ਸਿੰਘ ਵਿਚੋਂ ਚੋਣਵੀਆਂ 6 ਕਹਾਣੀਆਂ, ਪ੍ਰਕਾਸ਼ਕ: ਪੰਜਾਬ ਯੂਨੀਵਰਸਿਟੀ, ਪਬਲੀਕੇਸ਼ਨ ਬਿਓਰੋ, ਚੰਡੀਗੜ੍ਹ।
(ਗਧੀ ਵਾਲਾ, ਕੁਰਸੀ, ਬਾਕੀ ਸਭ ਸੁੱਖ-ਸਾਂਦ ਹੈ, ਰੋਹੀ ਬੀਆਬਾਨ, ਜਿੱਥੋਂ ਸੂਰਜ ਉੱਗਦਾ ਹੈ ਅਤੇ ਪਰਛਾਵੇਂ ਕਹਾਣੀਆਂ)

ਯੂਨਿਟ ਅਤੇ ਥੀਮ

1. ਸੁਰ-ਸੰਵੇਦਨਾ ਪੁਸਤਕ ਵਿੱਚੋਂ ਪ੍ਰਸੰਗ ਸਹਿਤ ਵਿਆਖਿਆ (2 ਵਿਚੋਂ 1) — 5 ਅੰਕ
2. ਕਿਸੇ ਇੱਕ ਕਵਿਤਾ ਦਾ ਸਾਰ ਜਾਂ ਕੇਂਦਰੀ ਭਾਵ (4 ਵਿਚੋਂ 1) — 5 ਅੰਕ
3. ਇਕ ਕਹਾਣੀ ਦਾ ਸਾਰ (ਪੰਜਾਬੀ ਕਥਾ-ਕਿਤਾਬ ਵਿਚੋਂ) — 5 ਅੰਕ
4. ਕਿਸੇ ਇੱਕ ਕਵੀ ਜਾਂ ਕਹਾਣੀਕਾਰ ਦਾ ਜੀਵਨ, ਰਚਨਾ ਅਤੇ ਯੋਗਦਾਨ — 8 ਅੰਕ
(ਸ਼ਿਵ ਕੁਮਾਰ, ਪਾਸ਼, ਸੁਰਜੀਤ ਪਾਤਰ, ਗੁਰਦਿਆਲ ਸਿੰਘ, ਰਘੁਬੀਰ ਢੰਡ ਅਤੇ ਵਰਿਆਮ ਸੰਧੂ)
(2 ਵਿਚੋਂ 1, ਇੱਕ ਕਵੀ ਅਤੇ ਇੱਕ ਕਹਾਣੀਕਾਰ ਵਿੱਚੋਂ)
5. ਕਾਲਜ ਨਾਲ ਸਬੰਧਤ ਪ੍ਰੈਸ-ਨੋਟ (2 ਵਿਚੋਂ 1) — 8 ਅੰਕ
6. ਕਾਰੋਬਾਰੀ ਇਸ਼ਤਿਹਾਰ (2 ਵਿਚੋਂ 1) — 7 ਅੰਕ
7. ਵਿਸ਼ਰਾਮ ਚਿੰਨ੍ਹ — 7 ਅੰਕ

ਵਿਸ਼ੇਸ਼ ਨੋਟ : ਸਮੁੱਚੇ ਪਾਠ ਕ੍ਰਮ ਲਈ ਹਫ਼ਤੇ ਵਿਚ 6 ਪੀਰੀਅਡ

OR

: **History and Culture of Punjab – B**
BCA-16-402

HISTORY AND CULTURE OF PUNJAB-II

Instructions for the paper-setter and candidates: (for paper in Semester I & II)

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 10 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type questions. Each question will carry 1 mark. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit-IV in all. Each question will carry 10 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. One question from Unit-IV shall be set on the map.

Explanation:

1. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
2. The distribution of marks for the map question would be as under:
   Map : 06 Marks
   Explanatory Note : 04 Marks

   In case a paper setter chooses to set a question of map on important historical places, the paper setter will be required to ask the students to mark 6 places on map of 1 mark each and write explanatory note on any two of 2 marks each.
3. The paper-setter would avoid repetition between different types of question within one question paper.

PAPER: HISTORY AND CULTURE OF PUNJAB IN THE COLONIAL AND POST INDEPENDENCE TIMES

Max. Marks	:	50
Theory	:	45
Internal Assessment	:	05
Time	:	3 Hours

Objectives: To introduce the students to the history of Punjab region in the Modern times.
Pedagogy: Lectures, library work and discussions.

UNIT I

1. Introduction of Colonial Rule in Punjab: Annexation of Punjab, Board of Administration
2. Western Education: Growth of Education and rise of middle classes
3. Agrarian Development: Commercialization of agriculture; canalization and colonization.

UNIT II

4. Early Socio Religious Reform: Christian Missionaries; Namdharis; Nirankaris.
5. Socio Religious Reform Movements: activities of Arya Samaj; Singh sabhas; Ahmadiyas.
6. Development of Press & literature: growth of press; development in literature

UNIT III

7. Emergence Of Political Consciousness: Agrarian uprising 1907; Ghadar Movement.
8. Gurudwara Reform Movement: Jallianwala Bagh; foundation of SGPC and Akali Dal; Morchas; Activities of Babbar Akalis.
9. Struggle for Freedom: activities of revolutionaries - Naujawan Bharat Sabha; Kirti Kissan Movement; participation in mass movements – non co-operation, civil disobedience, Quit India.

UNIT IV

10. Partition and its Aftermath: resettlement; rehabilitation
11. Social Concerns In Post Independence Punjab: language; immigration; socio-economic issues.
12. MAP(Physical geographical map of undivided Punjab): Major Historical places: Delhi, Kurukshetra, Jaito, Ferozepur, Ambala, Amritsar, Lahore, Ludhiana, Qadian, Jalandhar, Lyallpur, Montgomery.

Suggested Readings:

1. Singh, Kirpal :History and Culture of the Punjab, Part II(Medieval Period), Publication Bureau, Punjabi University, Patiala 1990(3rd edn.).
2. Singh, Fauja(ed.) :History of the Punjab, Vol.III, Punjabi University, Patiala 1972.
3. Grewal, J.S. :The Sikhs of the Punjab, the New Cambridge History of India, Orient Longman, Hyderabad,1990.
4. Singh, Khuwant :A History of the Sikhs, vol I: 1469-1839, oxford University Press,. Delhi, 1991.
5. Chopra, P.N.,Puri, B.N.And Das,M.N. :A Social, Cu.ltural and Economic History of India, Vol.II, Macmillan, delhi, 1974.

Software Project Management
: BCA-16-403

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: To teach the students important concepts, terms related to various phases during the development of a software project. At the end of the course the student will be able to apply software project management techniques to manage a software project.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Software Project Management and Process Groups: Introduction to project and project management, role of a project manager in project management, a system view of project management, Stakeholders of Project, Project phases and product life cycles, Evolution of software economics, Improving software economics: reducing product size, software processes, team effectiveness, automation through software environments, Principles of modern software management.

UNIT - II

Project Management Framework: Project Management Framework, Software Tools for Project Management, Issues in Project Staff Acquisition and Team formation and Development, Model based software architectures, Workflows of the process, Checkpoints of the process.

Project Integration: Integration Management: Project selection, project management plans, project execution, project monitoring and controlling, integrated change control;

UNIT - III

Scope Management: Scope Management: project scope statement, Work breakdown structures, Scope verification and scope control, Process instrumentation and seven core metrics.

Software management disciplines: Iterative process planning, Project organizations and responsibilities, Process automation.

:

UNIT - IV

Project Scheduling: Time Management; Importance of Project Schedules, Sequencing and Scheduling Activity, Project Network Diagrams, PERT/CPM, Gantt charts, Critical chain scheduling.

Cost Management: Project Cost Management - Importance and Principles of Project Cost Management, Resource Planning, Cost Estimating Techniques and. Expert Judgment, Estimating by Analogy, COCOMO Model, Cost Budgeting and Control

Suggested Readings :

Essential :

1. Kathy Schwalbe, Information Technology Project management, Thomson Publication.
2. Bob Hughes and Mike Cotterell, Software Project Management, Tata McGraw-Hill.

Further Reading :

3. Walker Royce, Software Project Management - A Unified, Addison-Wesley.
4. Pankaj Jalote, Software Project Management in Practice, Pearson Education.
5. S.A. Kelkar, Software Project Management, A Concise Study, Prentice-Hall India.

: Operating System Concepts and Linux

BCA-16-404

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: The objective of the module is to create skills of students in operating systems concepts and Linux commands.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Operating Systems (OS): Introduction, its needs and services, Types of OS: Multi-user, Multitasking, Multiprocessing and Real time Operating Systems, Parallel systems, Distributed systems

Process Management: Introduction to Process, PCB, Process States, CPU Scheduling: Scheduling Criteria and Algorithms: FCFS, SJF, Priority, Round Robin, Multilevel Queue Scheduling, Multilevel Feedback Queue Scheduling

UNIT - II

Deadlocks: Necessary and sufficient conditions for Deadlocks, Introduction to methods for handling deadlocks, deadlock detection and recovery

Memory Management: Logical vs Physical address space, Swapping, Introduction to Paging, Segmentation, Virtual Memory-Demand paging, Introduction to Page Replacement algorithms: FIFO, Optimal Page replacement and LRU

UNIT - III

Introduction to Linux: Linux's shell, Kernel, Features of Linux, History, Minimum system requirements, Boot and Root disks , Starting and stopping Linux system, passwords, logging in and out, terminal Handling commands: who, Understanding wildcards, Environment variables.

Understanding I/O Redirection and Piping: Introduction, cut, paste, sort, tee; Introduction to Regular Expressions and grep .

Using file system: Introduction to common types of files, Filenames, Introduction to different types of directories: Parent, Subdirectory, Home directory; rules to name a directory, Important directories in Linux File System, Absolute and relative filenames, creating files and directories, listing files (ls), pwd, moving and copying files (mv, cp), moving directories, Removing files and directories, using wildcards with files and directories, File and directory permissions using relative and absolute methods, Changing group ownership, umask settings

UNIT - IV

Process Management: Types of processes, ps, bg, fg, nice, kill.
Understanding System Administration activities: Superuser (su) command, Taking backups using tar, Managing disk space, Mounting and Un-mounting file system, Managing users, Managing printers with lpd, mknod, lpc, lpq, lprm.
Vi editor: starting vi, vi modes, inserting text, quitting vi, deleting text, copying and moving text, searching and replacing text.

Suggested Readings:

Essential :

1. Peterson, J.L.& Silberschatz, A., Operating System Concept, Addison Wesley, reading.
2. John Goerzen: Linux Programming Bible, IDG Books, New Delhi, 2000.

Further Reading :

3. Brinch, Hansen, Operating System Principles, Prentice Hall of India
4. Haberman, A.N., Introducing to Operating System Design Galgotia Publication, New Delh.
5. Sumitabha Das: Your Unix - The Ultimate Guide, TMH, 2000.

Database Management System
: **BCA-16-405**

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: This course aims at giving the students the insight of the underlying concepts of database management system and **implement them using Database software.**

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Basic Concepts: A Historical perspective, File Systems vs. DBMS, Characteristics of the Data Base Approach, Abstraction and Data Integration, Database users, Advantages and Disadvantages of DBMS, Implication of Database approach.
Data Base Systems Concepts and Architecture: Schemas and Instances, DBMS architecture and Data Independence, Data base languages & Interfaces, DBMS functions and component modules.
Entity Relationship Model: Entity Types, Entity Sets, Attributes & Keys, Relationships, Relationship Types, Roles and Structural Constraints, Design issues, weak entity types, E-R Diagrams. Design of an E-R Database Schema, Reduction of an E-R Schema to Tables.

UNIT - II

Relational Data Model : Relational model concepts, Integrity constraints over Relations, Relational Algebra - Basic Operations.
Conventional Data Models : An overview of Network and Hierarchical Data Models.
Relational Data Base Design : Functional Dependencies, Decomposition, Desirable properties of decomposition, Normal forms based on primary keys (1 NF, 2 NF, 3 NF and BC NF).
RDBMS: Terminology, The 12 Rules (Codd's Rule) for an RDBMS.

UNIT - III

Understanding SQL-1: Data Types, Creating Tables, Creating a Table with data from Another table, Inserting Values into a Table, Updating Column(s) of a Table, Deleting Row(s) from a Table, Dropping a Column, Querying database tables, Conditional retrieval of rows, Working with Null Values, Matching a pattern from a table, ordering the result of a

Query Aggregate Functions, Grouping the Result of a Query, creation and deletion of Views, Managing privileges with Grant and Revoke Command, COMMIT and ROLLBACK, Functions: Character Functions, Date Functions, Group Functions

UNIT - IV

Understanding SQL-II: Querying Multiple Tables using Equi-Joins, Cartesian Joins, Outer Joins, Self-Joins, SET Operators: Union, Intersect, Minus; Introduction to Nested Queries

PL/SQL: Introduction to PL/SQL, The Advantage of PL/SQL, PL/SQL Block Structure, PL/SQL Architecture, Fundamentals of PL/SQL, PL/SQL Data Types, Variables and Constants, Scope and Visibility of a Variable, Assignments and Expressions, Operator Precedence, Conditional and Iterative Control, Cursor Management in PL/SQL, Implicit/explicit Cursor Attributes, Exception Handling in PL/SQL; Predefined Exceptions, User Defined Exceptions, Database Trigger, types of triggers, dropping triggers, storage for triggers.

Suggested Readings:

Essential

1. Elmasri & Navathe: Fundamentals of Database systems, 3rd Edition, Addison Wesley, New Delhi.
2. Ivan Bayross : SQL, PL/SQL-The Program Language of ORACLE, BPB Publication, New Delhi.

Further Reading :

3. Korth & Silberschatz : Database System Concept, 4th Edition, McGraw Hill International Edition.
4. Raghu Ramakrishnan & Johannes Gehrke: Database Management Systems, 2nd edition, Mcgraw Hill International Edition.
5. C.J.Date : An Introduction to Data bases Systems 7th Edition, Addison Wesley, New Delhi.
6. Bipin C.Desai : An Introduction to Database System, Galgotia Publication, New Delhi
7. Abbey, Abramson & Corey : Oracle 8i-A Beginner's Guide Tata McGraw Hill Publishing Company Ltd.

FIFTH SEMESTER

Computer Networks
BCA-16-501

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: The objective of the course is to:

- Offer knowledge about computer network related hardware and software using a layered architecture.
- Provide good understanding of the concepts of network security, wireless and various emerging network technologies.

Note :

i. The Question Paper will consist of Four Sections.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Computer Network: Network Hardware and Software, Network Topologies, Uses of Computer Networks, OSI Reference Model, TCP/IP reference model, Comparison of OSI with TCP/IP model.

Physical Layer: Transmission media: Twisted pair, Coaxial cable, Fiber optics, Wireless Transmission (Radio, Microwave, and Infrared), Switching: Circuit Switching, Message Switching, Packet Switching & their comparisons. ISDN and its services, Multiplexing: Frequency Division, Time Division, Wave Length Division, MODEMS.

UNIT - II

Data Link Layer: Design Issue, Framing, Errors Detection and Correction Code: Check sum, CRC, Hamming code, Data Link Protocols for noisy and noiseless channels, Sliding Window Protocol: Stop and Wait ARQ, Go-back-N ARQ, Selective Repeat ARQ.

Medium Access Sub-Layer: Introduction to Static and Dynamic channel allocation, IEEE standards 802.3.

UNIT - III

Network Layer: Design Issues, network layer addressing, network layer datagram, IP addressed Classes. Sub netting-Sub network, Subnet mask, Routing Algorithm: Shortest Path Routing, Flooding, Broadcast and Multicast routing, Congestion control: Principles of Congestion Control, Congestion prevention policies, Leaky bucket and token bucket algorithms.

UNIT - IV

Application Layer: Domain Name system (DNS), DNS name space, DNS Servers, World Wide Web, HTTP, e-mail: Architecture and Services, Message Component, Multipurpose Internet Mail Extensions (MIME), Simple Mail Transfer Protocol (SMTP), Post Office Protocol (POP), Remote Login and File transfer protocol, Introduction to Network Security.

Discrete Mathematical Structure
BCA-16-502

L	T	P	Cr	External Marks: 65
6	1	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objectives : In this paper, Students will learn and be able to acquire the knowledge of Logic, Relations and Functions. Algebric Functions and Graph Theory will also be discussed in this paper.

Note :

i. The Question Paper will consist of Four Sections.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Set Theory : Relations and Functions : Set Notation and Description, subset, basic set operations, Venn Diagrams, laws of set theory, partitions of sets, min sets, duality principle, basic definitions of relations and functions, graphics of relations, properties of relations: injective, surjective and bijective functions, compositions.

UNIT - II

Recurrence : Recurrence Relations and Recursive Algorithms – Linear-Recurrence Relations with Constant Coefficients; Homogeneous Solutions : Particular Solution, Total Solution, Solution by the Method of Generating functions.

UNIT - III

Graph Theory : Graph and planar graphs – Basic Terminology, Multi-graphs, Weighted Graphs, Paths and Circuits, Shortest Paths, Eulerian Paths and Circuits. Travelling Salesman Problem, Planar Graphs.

UNIT - IV

Automata Theory : Finite State Machines–Equivalent Machines, Finite State Machines as language Recognizers; Analysis of Algorithms - Time Complexity, Complexity of Problems.

Java Programming
BCA-16-503

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: This course aims at giving student knowledge about all the programming concepts of JAVA programming language.

Note :

i. The Question Paper will consist of Four Sections.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT I

Java and the Internet: The Java programming language and its characteristics; Java development kit, Java run- time environment; Java compiler

Fundamentals of Java: Java Vs. C++, Byte Code, Java Virtual Machine, constants, variables, data types, operators, expressions, control structures, defining class, creating objects, accessing class members, constructors, Garbage Collection, method overloading,
Inheritance: Different types of Inheritance, member access, using super keyword to call super class constructors, creating a multilevel hierarchy, method overriding, dynamic method dispatch, using abstract classes, using Final keyword.

UNIT II

I/O Basics: streams, the predefined streams; Reading console Input, Writing console Output.
Arrays and Strings: One-dimensional and two-dimensional Arrays, String Handling using String and StringBuffer class, String Functions.
Packages: Types of packages, defining a package, Importing packages, Access protection
Interfaces: Defining an Interface, Implementing Interfaces, Variables in Interfaces, Achieving multiple inheritance using interfaces, Interface and Abstract classes.

UNIT III

Exception Handling: Java Exception handling model, Types of exception, using Try and catch, Multiple Try and Catch clauses, Nested Try statements, finally block, user defined exceptions.
Multi-threaded Programming: The Java Thread model, the Thread class and Runnable interface, Creating a Thread using Runnable Interface and extending Thread, Creating Multiple Threads, Thread Priorities, Synchronizations: Methods, Statements, Inter Thread Communication, Deadlock, Suspending, Resuming and Stopping Threads.
Applet Programming: Introduction, Types of applet, Life Cycle, Incorporating an applet into web page using Applet Tag, running applets, using Graphics class and its methods to draw lines, rectangles, circles, ellipses, arcs and polygons.

UNIT IV

Using AWT controls: Introduction to AWT, Creating GUI Applications using AWT, AWT controls: Label, TextBox, TextArea, Check Boxes, Radio Buttons, Choice lists, Understanding Layout Managers: FlowLayout, BorderLayout, GridLayout; Introduction to Event handling using Delegation Event Model.

Introduction to Java Database Connectivity (JDBC): JDBC Architecture, JDBC Drivers, Java.SQL package, Connecting to the Database and performing basic database operation like Insert, Delete, Update and Select.

Web Application Development using PHP
BCA-16-504

L	T	P	Cr	
6	-	-	3	

External Marks: 65
Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: This course enables students to do web programming using PHP and MySQL.It would enable them to develop websites and other web based applications.

Note :

i. The Question Paper will consist of Four Sections.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Introduction to web applications: Client Side Scripting Vs Server Side Scripting, Understanding Web Servers: Local Servers and Remote Servers, Installing WAMP and configuring PHP environment, Static website Vs Dynamic website development, Embedding PHP code in Web Pages

PHP Basics: Tokens, Variables, Variable Scope, Constants, Data Types, number handling in PHP, operands, operators, expressions, operator precedence, comments, echo and Print statement

Control structures: Branching statements: if-else, ternary operator, switch; looping statements: while, do-while, for; file inclusion Statements

UNIT - II

Functions: Function definition, Creating and invoking user-defined functions, Formal parameters versus actual parameters, Function and variable scope, Recursion, Library functions

String Handling: interpolation with curly braces, characters and string indexes, string operators, heredoc, string functions, Formatting Strings, Comparing and searching Strings and substrings

Arrays: PHP Arrays, Creating Arrays, Accessing Array elements, Multidimensional Arrays, Inspecting Arrays, Deleting from Arrays, Iterating with each() and foreach(), Iterative functions: current(), next(), prev(), reset(), end()

UNIT - III

Forms: Working with HTML Form controls and PHP, Super global variables, super global array, importing user input, Accessing user input

Integrating PHP and Database: Connecting to database, Making SQL queries, Executing queries, Fetching data sets, Integrating Forms and Databases**:** Basic form submission to a database, editing data with an HTML form

UNIT - IV

Maintaining User State: Introduction to Cookies, Setting time in a cookie with PHP, Deleting a cookie, creating session cookie, Introduction to sessions, Starting a session, Registering Session variables, working with session variables, Destroying session, passing session Ids , encoding and decoding session variables, increase session expire time, working of session without cookie.

Working with File System: Understanding PHP file permissions, Opening and closing a file, File reading and writing functions, File system and directory functions

:

SIXTH SEMESTER

E-Commerce
BCA-16-601

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: The objective of this course is to understand the process of electronic commerce and familiarizes students with the technology involved in it.

Note :

i. The Question Paper will consist of Four Sections.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

An Overview of E-Commerce:
Definitions: E-commerce, E-business, difference between E-commerce and E-business, Problems with Traditional business systems, Aims of E-commerce, Types of E-commerce: B2B, B2C, C2C, B2G, G2H, G2C, Operational & Strategic benefits of E-commerce, Issues & Challenges in E-commerce.
Electronic Data Interchange (EDI): Definition; Traditional versus EDI enabled system for document exchange; Components of EDI: EDI Standards, EDI Software, Communication Networks; EDI Message Structure; EDI Notification Structure; EDI in India; EDI enabled procurement process; Benefits of EDI: Direct Benefits, Strategic Benefits; EDI Implementation issues; Legal Aspects

UNIT - II

Web based E-Commerce: Definition; Need for web based business, Steps in setting up business on Internet: Selection & registration of domain name, Website development : Planning a website, Steps for creating a website, Elements of a webpage, web authoring tools, Hosting a website: Website hosting considerations.
Online Promotion tools & techniques: Getting links to your site, banner advertisements & measuring advertisement effectiveness; Web Traffic Analysis: Hits, View pages, Visits and Other web-reporting tools, various measures, What is Search Engine optimization

UNIT - III

Electronic Payment Systems: E-cash: Purchasing & using of e-cash; Electronic Purses their loading with cash and use; E-cheque payment system; Online Third Party Verified Payment System through Credit & Debit Cards; ATM based cash disbursement system; Electronic Bill Payment System; Inter bank clearing system.

UNIT - IV

Mobile Commerce: Definition, Benefits of Mobile Commerce, Issues in Mobile Commerce, Mobile Commerce Framework
Applications of E-Commerce & Case Studies: Applications of e-commerce, Case studies in Retailing, Banking and e-governance; Cyber Crimes: Types, Cyber Forensics, Cyber crimes and IT Act - 2000.

Application Development using VB.Net
BCA-16-602

L	T	P	Cr	External Marks: 65
6	-	-	3	Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: The course is designed to enable the students to develop applications using event driven programming with VB.net (as front end) and accessing database at back end.

Note :

i. The Question Paper will consist of Four Sections.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Overview of the Visual Studio .NET IDE: Introduction to .NET Framework and the Common Language Runtime, Introduction to Visual tudio.NET IDE: Menu Bar and Tool Bar, Solution Explorer, Toolbox, Using different controls of Toolbox and their commonly used properties and methods: TextBox, Label, Check Box, Radio Button, Button, Frame, List Box, Combo Box, Picture, Image, Shape, Drive, File, directory related controls, Introduction to Menus

UNIT - II

Basics of VB.Net: Constants, Variables, data types, assignment operator, Operators: Arithmetic, Relational and logical operators, Assignment operators, Control structures: If, if/then/else selection structures, Select case Multiple-selection structure, While, do while, do until, For/Next repetition structure

Procedures: Introduction, sub Procedures, function procedures, event procedures, commonly used Form events, msgBox function, InputBox function.

Arrays and Strings: declaring and allocating Arrays, Using Strings and String functions: len, right, left, ucase, lcase, ltrim, trim;

Control Arrays: Introduction, creating and using Control Arrays

UNIT - III

Writing ASP .NET applications and Deploying ASP .NET Applications: Introduction to ASP.NET, Difference between ASP and ASP.NET, Understanding Web Forms, Using Validation Controls :
RequiredFieldValidator,RangeValidator,CompareValidator,RegularExpressionValidator,CustomValidator,ValidationSummary; , Managing State in ASP.NET Web Applications using Session object, Cookie and Query String ,Creating ASP.NET application, Deploying ASP.NET Applications with Windows Installer, Introduction to Web Services.

UNIT - IV

Accessing Data with ADO.NET: Understanding ADO.net, ADO.NET Object model: Connected model and Disconnected model, architecture, components, Understanding Provider classes, using Data Reader to read data from database, Data Adapter and Data sets, Using DataAdapter for Data Navigation and Data Manipulation, connecting to and querying a data source, using Data Grid view control with ADO.NET data sources.

Computer Graphics and Multimedia Applications
BCA-16-603

L	T	P	Cr	
6	-	-	3	**External Marks: 65**
				Internal Marks: 10

Time Duration: 3 Hrs. Number of Lectures : 60

Objective: The objective of the course is to introduce basic computer graphics concepts and algorithms. The student will also learn about essential concepts used in developing multimedia applications.

Note :

i. The Question Paper will consist of Four Sections.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Section and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Section and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Computer Graphics: A Survey of Computer Graphics : Computer Aided Design, Presentation Graphics, Computer art, Entertainment, Education and Training, Visualization, Image Pressing, Graphical User Interfaces.
Overview of Graphics Systems: Video Display Devices, Cathode Ray Tube, CRT monitors, Flat panel displays: Plasma Panel display, Thin-film electroluminescent displays, LED, Liquid Crystal Displays (LCD), Raster Scan Systems, Random Scan Systems. Graphics Monitors and Workstations, Input Devices, Hard-copy devices, Graphics Software.

UNIT - II

Studying the Features and Developing Computer Graphics Using Standard Graphics package Auto CAD: Features and applications of AutoCAD, Interface, System Requirements, The X, Y coordinate system, Dimensioning, Drawing commands, Cleaning Up the drawing, Positioning Commands, Editing Commands, Construction Commands, Display Commands.
Developing Computer Graphics Using 'C': Input-output primitives, setting character and text attributes, changing line styles, Using fill styles to fill images. Use these primitives to develop programs like drawing concentric circles, Ellipses, Sine curves, Histograms, Pie charts and human face.

UNIT - III

Multimedia Applications: What is multimedia, Components of Multimedia, Need of Multimedia, Features of a Multimedia System, Benefits and problems of using Multimedia?
System Components: Multimedia system and a conventional system, Basic System components, Subsystems and functions of a Multimedia computer, Multimedia Add-on Cards. Applications: Multimedia in the Real World, Training and Education, Image

Processing, Multimedia in home and office

Multimedia Platforms: Personal computer as a Multimedia System, Limitations of the early Personal Computer as a Multimedia System, The evolution of MPC, Hardware Platforms, Software Platforms.
Development Tools: Types of development tools, Commercial tools, Stages of Multimedia Application Development.

UNIT - IV

Image: Sources of image, Types of images, Basic editing operations, Introduction to Image Compression: Lossy and Lossless compression, Image file formats.
Audio: Hardware for Audio, Digital Audio, Audio editing operations, MIDI, Audio file formats
Video: Hardware Components of a Video System, introduction to Video compression, MPEG, Video file formats.
Storage for multimedia: magnetic media, Optical media, Compact disk specifications.
Studying features and use of Multimedia authoring tools like Photoshop and Macromedia Director.
Photoshop- Features, Interface, Toolbox, Color models, Layers, Filters
Macromedia Director- Features, Stage, Cast, Score, Control Panel, Sprite, Channels, Text Inspector, Tools for creating cast members

Paper: English
Code No: BIOT-Sem-I-I-T

Semester I

Note: (i) There will be one paper of 40 marks, 5 marks are reserved for the internal assessment and 5 for the Practical work. Total is 50.

(ii) The paper shall consist of Two Units, Unit I will be text specific and Unit II shall deal with different aspects of Communication and Language Skills.

(iii) For Unit I, the prescribed text is **Varieties of Expression** Ed. A.H.Tak. Foundation Books. Only four Prose chapters and two dramas have been recommended for study. The relevant sections, however, are as follows:

Unit I

Prose: Chapters 1-4
Drama: Dramas 1-2

Unit II

Note (iv) No text book is recommended for Unit II, but a few books that may be used for this Unit are listed towards the end. Unit II shall consist of the following:

Business Communication: It shall focus on different aspects of communication in general and business communication in particular, communication within organizations, types of communication, and significance of positive attitude in improving communication.

Writing Skills: This section shall focus on letters of all kinds, tender notices, auction notices, public notices; and memos.

Practical Work:

Teacher should assign some project or practical work to the students. This should be in the nature of guided activity, which the students shall have to complete under the direct supervision of the teacher. The students may be given projects on a variety of subjects relating to their discipline i.e. business, commerce, accounts etc. Preferably, they should be given minor projects (to be completed within less than two weeks, and length not exceeding 20 pages) in consultation with teachers of commerce. However, the evaluation of the projects should be done only by the Language Teachers, who must keep all the basic criteria of good writing in mind while doing so.

Note: *In case of private candidates and students of School of Open Learning, the marks obtained by them out of 40 will be proportionately increased out of 50).*

Testing Scheme:

The examination paper shall be divided into two sections, corresponding to two units already proposed in the syllabus. The distribution of questions and marks in Unit I shall be as follows:

Section I (It is text-based and corresponds to Unit I in the syllabus)

Q.1 It shall consist of six short questions. Three from Prose and three from drama (not exceeding 50-60 words) out of which, a student will be expected to attempt any **two** from **Prose** and **two** from **Drama**. This question shall be based upon the prescribed text **Varieties of Expression** and cover a wide range of issues, topics and problems. **10 marks**

Q.2 It shall consist of four long questions-**Two** from **Prose** and **two** from **Drama**(not exceeding 100-150 words) out of which a student will be expected to attempt **two-**one from Prose and one from Drama.

5 marks

Note; The question 1 &2 should be so designed as to cover all the chapters prescribed (Prose & Drama)

Q.3. It shall exclusively be a test of vocabulary, but designed strictly on the lines of various exercises given at the end of each chapter in the prescribed text. The candidate shall be given **five** words in one column and asked to match them with words/meanings in the next column. **5 marks**

UNIT II

Q.4 This question shall test a student's ability to write letter of various kinds (not more than 200 words). Again, there will be internal choice here.

5 marks

Q.5.Memos/Tender Notices/Auction Notices/Public Notices. **10 marks**

Q.6 One short question to test the students' understanding of various aspects of Business Communication.

BIOT - Sem-I--II-T

SEMESTER I

HISTORY AND CULTURE OF PUNJAB FROM THE EARLIEST TIMES TO 1849

INSTRUCTIONS FOR THE PAPER –SETTER AND CANDIDATES: (FOR PAPER in semester 1 AND 2)

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 10 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type questions carrying 5 marks i.e. 1 mark each. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit-IV in all. Each question will carry 10 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. One question from Unit-IV shall be set on the map.

Explanation:

1. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
2. The distribution of marks for the map question would be as under:

Map	:	6 Marks
Explanatory Note	:	4 Marks

   In case a paper setter chooses to set a question of map on important historical places, the paper setter will be required to ask the students to mark 6 places on map of 1 mark each and write explanatory note on any two of 2 marks each.
3. The paper-setter would avoid repetition between different types of question within one question paper.

PAPER: HISTORY AND CULTURE OF PUNJAB FROM THE EARLIEST TIMES TO 1849

Max. Marks	:	50
Theory	:	45
Internal Assessment	:	05
Time	:	3 Hours

Objectives: To introduce the students to the history of Punjab region.

Pedagogy: Lectures, library work and discussions.

UNIT I

1. Harappan Civilization: extent and town planning; socio-economic life.
2. Vedic Age: socio-economic life; development of caste; position of women.
3. Religion: vedic religion; impact of Buddhism and Jainism on the region.

UNIT II

4. Society and Culture c. 1000 A.D.: Socio-economic life; religious life; education
5. Cultural Reorientation: main features of Bhakti; origin and development of Sufism
6. Society and Culture c. 1500A.D: socio-economic life under the Lodhis; religious beliefs and practices-Vainavism, Shaivism, Shaktism, Islam.

UNIT III

7. Sikhism: new ideology of Guru Nanak; evolution of Sikh community-guruship,manji,masand; new institutions-gurdwara, sangat-pangat.
8. Transformation of Sikhism: martyrdom of Guru Arjan; martyrdom of Guru Tegh Bahadur; impact.
9. Institution of Khalsa: new baptism; significance

UNIT IV

10. Changes in Society: social unrest; emergence of new rulers-rakhi, gurmata, dal khalsa.
11. Society and Culture under Maharaja Ranjit Singh: social mobility; painting and architecture; literature.
12. MAP: Major Historical Places: Harappa, Mohenjodaro, Sanghol, Ropar, Lahore, Amritsar, Kiratpur, Anandpur Sahib, Tarn Taran, Machhiwara, Goindwal, Khadur Sahib.

Suggested Readings:

1. Joshi, L.M (ed.) : History and Culture of the Punjab, Part-I, Publication Bureau, Punjabi University, Patiala, 1989 (3rd edn.)
2. Joshi, L.M and Singh, Fauja (ed.) : History and Culture of the Punjab, Vol. I, Punjabi University, Patiala, 1977
3. Prakash, Buddha : Glimpses of Ancient Punjab, P.U., Patiala, 1983
4. Thapar, Romila : A History of India, Vol. I, Penguin Books, 1966
5. Basham, A.L : The Wonder That was India, Rupa Books, Calcutta (18th rep.),1992
6. Sharma, B.N : Life in Northern India, MunshiRam Manohar Lal, Delhi, 1966
7. Singh,Kirpal :History and Culture os the Punjab, Part II(Medieval Period), Publication Bureau, Punjabi University, Patiala 1990(3rd edn.).
8. Singh, Fauja(ed.) :History of the Punjab, Vol.III, Punjabi University, Patiala 1972.
9. Grewal, J.S. :The Sikhs of the Punjab, the New Cambridge History of India, Orient Longman, Hyderabad,1990.
10. Singh, Khuwant :A History of the Sikhs, vol I: 1469-1839, oxford University Press,. Delhi, 1991.
11. Chopra, P.N.,Puri, B.N.:A Social, Cu.ltural and Economic History of India, Vol.II, And Das,M.N. Macmillan, delhi, 1974.
12. Hussain ,Yusuf : Glimpse of Medieval Indian Culture, Asia Publishing House, Bombay, 1973(rep.).

Note: The following categories of the students shall be entitled to take option of History & Culture of Punjab in lieu of Punjabi as compulsory subject:

A. That the students who have not studied Punjabi upto class 10th.
B. Ward of / and Defence Personnel and Central Govt. Employee/Employees who are transferrable on all India basis.
C. Foreigners

Paper: Mathematics
Course No: BIOT-103A-T

Theory : 67 marks
Int. Assessment : 08 marks
Total : 75 marks

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Objectives: -

- To study the different concepts of limits, differentiation, integration and calculus so as to apply these concepts in biotechnology.
- To learn solutions to quadratic, cubic equations, differential equation, linear equation and thus study the applications in biotechnology.

UNIT – I

Numbers
Different kinds of numbers, integer, rational and irrational, surds and their properties, Fractional indices.
Complex numbers, conjugate, modulus and argument of a complex number.

UNIT – II

Set, relation and function
Set, product sets, relations, functions (polynomials, trignometric, nexponential), graphical representation of functions.
Limit
Sequences, limits of sequences, series, limits of functions

UNIT – III

Calculus
Differentiation: Calculating gradients of chords first and higher order derivatives. Applications increasing and decreasing functions, maximum and minimum points, Derivatives as rates of change.

Integration
Finding a function from its derivative, definite integral, indefinite integral, calculating areas for bounded regions.

Differential Equations
Forming differential equations solving first order differential equation and second order differential equation with constant co-efficients, growth equation, applications.

UNIT – IV

Linear Programming
Elementary statistics

Representation of Data: Discrete data, continuous data, histogram, polygons, frequency curves
The Mean, variability of data-The standard deviation Median, quintiles, percentile Skewness.

Reference Books:
1. Arya J.C, Lardner R.W (1990). Mathematics for the biological sciences

(Prentice Hall. International, New Delhi).
2. Mathematics: Text book for class XI & XII (2006) (National Council of Education Research and Training, New Delhi).

Mathematics (Practicals)
Course No: BIOT-103A-P

Practical : 22Marks
Int. Assessment : 03 Marks
Total :25 Marks

1. Computation of mean, variance and standard deviation using given (preferably biological) data (2 to 3 practicals).
2. Sets (Venn-Diagram, Union, Intersection, Difference of sets, Symmetric Difference of sets, Complement of sets) (2 practicals).
3. Relations (graphical representation of relation from set A to set B or set A to set A) (1 practical).
4. Functions (Graph of standard functions, modulus, greatest, integer, exponential, logex, signum, sin, cos, tan, cot, sec, cosec,) (2 to 3 practicals).
5. Increasing and Decreasing (Polynomial functions) – wavy curve method (2 practicals).

Paper: Life Sciences
Course No: BIOT-103B-T

Theory: 67 marks
Internal Assessment: 8marks

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Objectives: -

- To increase scientific vocabulary and understanding of a variety of life science concepts.
- To learn about the anatomy and physiology of animals and animal systems.
- To study ecology and ecosystems.

Unit-I

An introduction to life on earth.
Plant Anatomy and Physiology:-
Structure of land plants: Vascular system of dicot and monocot plants
Nutrition and Transport phenomena in plants.
An Introduction to Plant reproduction.
Plant responses to the environment (Short day and Long day Plants).

Unit-II

Ecology:- Community interactions.
Ecosystems:- Definition and components.
Food chain and food web.
Habitat.
Ecological succession.
Types of succession.

Unit-III

Animal Anatomy and Physiology:-
Homeostasis and organization of animal body.
Circulation: Human Circulatory system, Mechanism of Circulation, Cardiac cycle

Respiration: Organs of respiration, mechanism of breathing, Exchange of gases
Nutrition and digestion: Mechanism of digestion of proteins and carbohydrates.
The immune response in Animals: B Cells and T Cells

Unit-IV

Animal Anatomy and Physiology:-

The endocrine system: Define glands, Pitutary, Pancreas, Thyroid and Parathyroid
Action and support by the muscles and skeleton system.
Reproduction: An introduction to reproduction in animals.

Reference Books:

1. Life Sciences (2001) by Rastogi and Dubey, S. Chand & Co., New Delhi.
2. Basics of Biotechnology–I: Introduction to Life Sciences (2005) by Sobti& Sharma, Vishal Publishing Co. Jalandhar.
3. Ecology- Principles and applications (2004) by Chapman and Reiss, Cambridge University Press, Cambridge, U.K.
4. Microbial Ecology- fundamentals and applications, (2000) by R. Atlas and R. Bartha, Benjamin / Cummings Science Publishing, California.
5. Animal Physiology (2008) by R. C. Sobti, Narosa publishing house Pvt. ltd, New Delhi.

Life Sciences (Practical)

Course No: BIOT-103B-P

Practical : 22Marks
Int. Assessment : 03 Marks
Total : 25 Marks

1. To study cell structure from onion leaf peels.
2. To study ultra structure of cell organelles through photographs.
3. To study digestive, Respiratory, Circulatory, Endocrine and Reproductive system of Human body through charts/ model.
4. Study of the slides/specimens and identification with reasons – Bacteria, oscillatoria, Spirogyra, Rhizopus, Mushroom, yeast, liverwort, moss, fern, lichen, one monocotyledon and dicotyledon.
5. Study of the slides/specimens and identification with reasons –Amoeba, Hydra, Tapeworm, Roundworm, Earthworm, Cockroach, Pila, Starfish, Shark Labeo, Frog, Lizard, Pigeon and Rabbit

Paper : Chemistry
Course No: BIOT-104-T

Theory : 67 marks
Int. Assest. : 08 marks
Total : 75marks

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Objective:

Without chemical reactions, biological systems cannot work. So understanding the concepts of basic chemistry inorganic, organic and various laws and their applications in Biotechnology is important.

UNIT – I

a) **Chemical bonding:** Elementary treatment of valence bond theory and molecular orbital theory. Ionic bonding, multiple bonds, multi-centerbonds, metallic bonding. hydrogen bonding and its significance.

b) **Periodic properties:** Position of elements in the periodic table, effective nuclear charge and its calculation, atomic and ionic radii, ionization energy, electron affinity, electronegativity. Trends in periodic table and application in predicting and explaining the chemical behavior.

c) **Molecular Spectroscopy:** Difference between atomic and molecular spectroscopy, absorption and emission spectroscopy, regions of electromagnetic spectrum. Infrared and Raman spectra, basic principle and information from Infrared and Raman spectra. Principle of NMR, chemical shift values and its applications. Importance of mass spectroscopy in chemistry and biology.

UNIT – II

a) **Solutions:** Ideal and non- ideal solutions, method of expression concentrations of solution, activity and activity coefficients, dilute solution, Osmotic pressure, its law and measurements, Elevation of boiling point and depression of freezing points.

b) **Chemical kinetics:** Scope, rate of reaction, influencing factors such as concentration, temperature, pressure, solvent *etc*. theories of chemical kinetics. Arrhenius equation, concept of activation energy.

UNIT – III

a) **Photochemistry:**

Absorption of light, Lambert-Beer Law, Photochemical principles, Stark-Einstein Law of Photochemical equivalence, Quantum yield of a photochemical reaction (with example). Fluorescence and Phosphorescence.

b) Coordination compounds:

Introduction, Wener's coordination theory, naming of coordination compounds, isomerism and stereochemistry in coordination compounds.

UNIT – IV

a) Fundamentals: inductive effect electromeric effect, resonance, hyperconjugation, types of reagents, electrophiles and nucleophiles, types of organic reaction intermediates, carbocations, free radicals, carbenes (with example). Nomenclature and classification of Alkyl halide, method of formation, chemical reaction, mechanisms and stereochemistry of nucleophillic substitution reaction of Alkyl halides, SN2, and SN1 reaction with energy diagram.

b) Carboxylic Acids and derivatives: Structure of carboxylic acids and derivatives. Acidity of carboxylic acids, effects of substitution on acidic strengths, chemical properties of carboxylic acids. HVZ reaction with mechanism. Relative stability and reactivity and reactivity of acid chloride, esters, anhydrides, amides, mechanism of esterification.

5. Walter J Moore (1986). Basic physical chemistry (Prentice Hall of India).

Paper: Chemistry (Practicals)
Course No: BIOT-104-P

Practical : 22 marks
Int. Assessment : 03 Marks
Total : 25marks

1. Four ions including interfering ions.
2. Iodimetry and Iodometry

3. Redox titrations using cericsulphate, potassium dichromate and potassium permanganate
4. Complexometric titration using EDTA of Ca++, Mg++ and Zn++
5. Analysis of a given organic compound (solid): Elemental Analysis,

Reference Books:

3. P. Kelter, M. Mosher, A. Scott (2008). Chemistry: The practical science (Publisher Houghton Mifflin).
4. G. Svehla (1996). Vogel's quantitative inorganic analysis (Prentice Hall).

Paper: Physics **Theory: 67 Marks**
Code No: BIOT-105-T **Int Assess: 08 Marks**

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Objectives: -
Physics is one of the important basic sciences and Biotechnology is based upon these. Introduction to basic course of Physics will enhance the grasping of subject.

UNIT – I

Science, Physics and Life Sciences- An introduction to apparent differences and the underlying overlap (atomic nature of matter). Units of measurement and ranges (from the smallest to the largest known) for different physical quantities viz. mass, length, time, current, temperature, luminosity, etc. with suitable examples from bio/physical sciences.

UNIT – II

Coulomb's law for point charges; electric field due to point charge and electric dipole (on axial line and equator line), electric flux; Gauss's theorem and its applications (line of charge and sheet of charge).

Electric potential due to point charge, group of charges and dipole (on axial line and equatorial line), potential difference as line integral of electric field, capacitance; series and parallel arrangements, energy stored in the electric field of capacitor, current, current density, equation of continuity, Ohm's law in vector form.

UNIT - III

Interference of waves, phase and path differences, theory of interference fringes, Young's experiment, coherent sources, Llyod's mirror, Fresnel Biprism, intensities of maxima and minima.

Diffraction of light, rectilinear propagation, Fresnel and Fraunhofer diffraction, Fraunhofer diffraction at single slit, Rayleigh criterion for resolving power, Resolving power of telescope and microscope, Compound Microscope (Principle, construction, ray diagram, formula for magnifying power), fluorescent microscope(concept only,. Polarization introduction.

UNIT – IV

Quantum
theory of light, X-rays diffraction, Compton effect, Bragg's law, de Broglie wave equation, phase velocity and group velocity, electron microscope, Uncertainty Principle (statement only), applications of Uncertainty Principle (particle in a box, existence of electron in Nucleus and atom).

Radioactivity and its laws ; half-life and mean life, uses of radioactivity.

4. Jenkins &White : Fundamental of optics (Tata Mcgraw Hill 1991)
5. D.P. Khandelwal : Text book of optics and atomic physics (Himalaya Pub. 2005)
6. Arthur Beiser : Modern Physics (Tata Mcgraw Hill 1981)

Paper: Physics (Practical)
Course No: BIOT-105-P **Practical: 22 Marks**
Int Asset: 03 Marks

1. Introduction and practice the concepts of proper measurement, data recording, and data presentation; stress to be laid on use of proper units, least count, error & its propagation, graph plotting & least square fitting. (Simple measuring devices available in the lab may be used to create basic data).
2. Resolving power of Telescope/Microscope.
3. Rotation of the plane of polarization of a solution using a Polarimeter.
4. Use of C.R.O. as a display & measuring device.
5. Capacitance by flashing and quenching of a neon lamp.

Reference Books:
1. Laboratory Manual of Physics for Undergraduate classes by D. P.Khandelwal.
2. B.Sc. Physics Practicals by C. L. Arora.

Paper: Introduction to Biotechnology **Theory: 67 Marks**
Course No: BIOT-106-T **Int Ass: 08 Marks**

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Objectives: -
This course will introduce the basic concepts of biotechnology to the students. They will learn about the history of biotechnology; the foundations of modern biotechnology; the role of biotechnology in fermentation industry, environment and modern medicine and the ethical implications of biotechnology.

Unit-I

Advent, scope and basics of biotechnology
Bacteria as workhorses of biotechnology; *E. coli* as the model bacterium
Saccharomyces cerevisiae and *Neurospora* in Biotechnology
Introduction to multicellular organisms as research models: *Drosophila melanogaster*, *Caenorhabditis elegans*, *Daniorerio*, *Musmusculus.*
Arabidopsis thaliana as model for plant genetics
Role of viruses and bacteriophages in biotechnology

Unit-II

Structure and function of the cell: the basic unit of life
Prokaryotic and Eukaryotic cells
Biomolecules in a cell (DNA, RNA and proteins)

Introduction to concept of genomics, transcriptomics, proteomics and metabolomics;
Introduction to basic techniques like sterilization, centrifugation, electrophoresis, chromatography, sonication.
Fundamentals of recombinant DNA technology: Restriction Enzymes, Type II Restriction endonucleases, Vectors based on E.coli plasmids and their properties: pBR322, pBR327, pUC8.

Unit-III

Applications of biotechnology: today and tomorrow
Basics of Biotechnology in fermentation processes.
Green technology to control pollution.
Role of biotechnology in diagnostics, introduction to gene therapy.

Unit-IV

Biotechnology and society: genetically modified organisms (GMOs) - transgenic plants and animals and their applications in biotechnology.
Public concerns and risks associated with genetic engineering: Bioterrorism and biowarfare.
Ethical, social and legal implications of biotechnology.

Reference Books:

1. Comprehensive Biotechnology, Murray Moo-Young, 2nd edition (2011), Pergamon Press.
2. Introduction to Biotechnology, William J. Thieman& Michael A. Palladino, 3rd edition (2012), Benjamin Cummings.
3. Biotechnology Expanding Horizons, BD Singh, 4th edition (2012), Kalyani Publishers.
4. The Ethics of Biotechnology (Biotechnology in the 21st Century), Jonathan Morris, Chelsea House Pub (L), 1st edition (2005).
5. Biotechnology, Applying the Genetic Revolution, David P. Clark & Nanette J. Pazdernik, 1st edition (2008), Academic Cell.
6. Molecular Biotechnology, Sandy B. Primrose, 2nd edition (1991), Blackwell Scientific Publications, ISBN.
7. Biotechnology: Demystifying the concepts, David Bourgaize, Thomas R. Jewell & Rodolfo G. Buiser, 1stedition(1999), Benjamin Cummings.
8. Ethical Issues in Biotechnology, Richard Sherlock & John D. Morrey, 1st edition (2002), Rowman& Littlefield Publishers.

Introduction to Biotechnology (Practical)
Course No: BIOT-106-P

Practical : 22 Marks
Int. Assess: 03 Marks

1. Introduction and use of basic equipment's in a biotechnology laboratory (Auto-pipettes, pH meter, centrifuges, light microscope, electrophoretic apparatus, vortex mixer, magnetic stirrer, rocker, laminar hoods, autoclave, sonicator)
2. Handling and disposal of hazardous reagents (acids, carcinogenic chemicals like acrylamide, ethidium bromide) and concept of chemical hoods
3. Good laboratory practices followed in biotechnology laboratory (DNAse/ RNAse free space, separate area for protein work, possible means of contamination and its control etc)
4. Cell disruption and cell lysis of animal/plant/bacterial cell
5. Sterilization techniques
6. Introduction to bioinformatic tools used in biotechnology.

B.Sc. (Hons.) 1st year (2nd Semester) (January 2021)

S.No.	Course/Paper	Code

Total Marks = 500

ENVIRONMENT, ROAD SAFETY EDUCATION, VIOLENCE AGAINST WOMEN & CHILDREN and Drug Abuse (SEMESTER – II)

*** Total duration of the whole paper(Consisting of four parts) shall be of 2 hours, carrying 100 marks in whole, divided into the rations of 40:20:20:20**

Note: The syllabus has 15 topics to be covered in 20 hour lectures in total, with 2 lectures in each topic from 2 to 11 and one each for the topics 1 and 12 to 15.

1. Environment Concept:

Introduction, concept of biosphere – lithosphere, hydrosphere, atmosphere; Natural resources – their need and types; Principles and scope of Ecology; concepts of ecosystem, population, community, biotic interactions, biomes, ecological succession.

2. Atmosphere:

Parts of atmosphere, components of air; pollution, pollutants, their sources, permissible limits, risks and possible control measures.

3. Hydrosphere:

Types of aquatic systems; Major sources (including ground water) and uses of water, problems of the hydrosphere, fresh water shortage; pollution and pollutants of water, permissible limits, risks and possible control measures.

4. Lithosphere:

Earth crust, soil – a life support system, its texture, types, components, pollution and pollutants, reasons of soil erosion and possible control measures.

5. Forests:

Concept of forests and plantations, types of vegetation and forests, factors governing vegetation, role of trees and forests in environment, various forestry programmes of the Govt. of India, Urban Forests, Chipko Andolan.

6. Conservation of Environment:

The concepts of conservation and sustainable development, why to conserve, aims and objectives of conservation, policies of conservation; conservation of life support systems – soil, water , air, wildlife, forests.

7. Management of Solid Waste:

Merits and demerits of different ways of solid waste management– open dumping, landfill, incineration, resource reduction, recycling and reuse, vermicomposting and vermiculture, organic farming.

8. Indoor Environment:

Pollutants and contaminants of the in-house environment; problems of the environment linked to urban and rural lifestyles; possible adulterants of the food; uses and harms of plastics and polythene; hazardous chemicals, solvents and cosmetics.

9. Global Environmental Issues:

Global concern, creation of UNEP; Conventions on climate change, Convention on biodiversity; Stratospheric ozone depletion, dangers associated and possible solutions.

10. Indian Laws on Environment:

Indian laws pertaining to Environmental protection: Environment (Protection) Act, 1986; General information about laws relating to control of air, water and noise pollution. What to do to seek redressal.

11. Biodiversity:

What is biodiversity, levels and types of biodiversity, importance of biodiversity, causes of its loss, how to check its loss; Hotspot zones of the world and India, Biodiversity Act, 2002.

12. Noise and Microbial Pollution:

Pollution due to noise and microbes and their effects.

13. Human Population and Environment:

Population growth and family welfare programme, Human Health. HIV-AIDS. Human Rights.

14. Social Issues:

Environmental Ethics: Issues and possible solutions, problems related to lifestyle, sustainable development; Consumerisms and waste generation.

15. Local Environmental Issues:

Environmental problems in rural and urban areas. Problem of Congress Grass & other weeds, problems arising from the use of pesticides and weedicides, smoking etc.

Practical

Depending on the available facility in the college, a visit to vermicomposting units or any other such non-polluting eco-friendly site or planting/caring of vegetation/trees could be taken.

Examination Pattern:

A qualifying paper of 40 marks comprising of forty multiple choice questions (with one correct and three incorrect alternatives and no deduction for wrong answer or un-attempted question), and of 1 hour duration.

The students have to obtain 33% marks to qualify the paper. The marks are not added / included in the final mark sheet.

UNIT II (ROAD SAFETY)

1. Concept and Significance of Road Safety.

2. Role of Traffic Police in Road Safety.
3. Traffic Engineering – Concept & Significance.
4. Traffic Rules & Traffic Signs.
5. How to obtain Driving License.
6. Traffic Offences, Penalties and Procedures.
7. Common Driving mistakes.
8. Significance of First-aid in Road Safety.
9. Role of Civil Society in Road Safety.
10. Traffic Police-Public Relationship.

Note : Examination Pattern :

Road Safety paper is 20 marks.

Unit II shall comprise of 20 questions with minimum of 1 question from each topics 1 to 10. The entire syllabus of Unit II is to be covered in 10 hours.

All the questions are to be attempted.

Qualifying Marks 33 per cent

The paper setter is requested to set the questions strictly according to the syllabus**.**

Suggested Readings

1. The Motor Vehicle Act, 1988 (2010), Universal Law Publishing Co. Pvt. Ltd., New Delhi.
2. Road Safety Signage and Signs (2011), Ministry of Road Transport and Highways, Government of India.

SYLLABUS ON "VIOLENCE AGAINST WOMEN & CHILDREN" AT UNDER-GRADUATE LEVEL

Unit – III

VIOLENCE AGAINST WOMEN & CHILDREN

1. Concept and Types of Violence: Meaning and Definition of violence; Types of Violence against women – domestic violence, sexual violence (including rape), sexual harassment, emotional/psychological violence; Types of Violence against children – physical violence, sexual violence, verbal and emotional abuse, neglect & abandonment.

2. Protective Provisions of IPC on Domestic Violence & Sexual Violence against Women: Dowry Death – Section 304B;

Rape – Sections 375, 376(1), 376A, 376B, 376C, 376D and 376E; Cruelty – Section 498A;

Insult to Modesty – The Indian Penal Code does not define the word eve-teasing; there are three sections which deal with crime of eve-teasing. These are Sections, 294, 354 and 509of Indian Penal Code. Section 509 of the Indian penal code defines (Word, gesture or act intended to insult the modesty of a woman), Section 294 – (Obscene acts and songs) and Section 354 (Assault or criminal force to woman with intent to outrage her modesty);

Hurt & Grievous Hurt Provisions – Sections 319 to 326;
Acid Attacks – Sections 326A and 326B;

Female Infanticide – Section 312, Section 313 of Indian Penal Code (Causing miscarriage without women's consent) and section 314;

Sexual Harassment – For providing protection to working women against sexual harassment, a new section 354 A is added; 354 B (Assault or use of criminal force to women with intent to disrobe); 354 C Voyeurism; 354 D (Stalking). All these provisions are added in IPC to protect women against acts of violence through Criminal Law (Amendment) Act, 2013; Human Trafficking and Forced Prostitution-Sections 370 and 370A

Protective Laws for Women:

3.1 Provisions of Protection of Women Against Domestic Violence Act 2005 – Definition, Powers of the Magistrate and Protection Officers, Protection order, Residence order, Monetary relief, Custody order and Compensatory order.

3.2 The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 – Definition, Internal Complaint Committee, Local Complaint Committee, Procedure adopted by Committee for punishing accused.

4. Protective Provisions of IPC regarding Sexual Violence against Children: Section 293(sale etc. of obscene objects to young persons); 294 (obscene acts & songs); 305 (abetment of suicide of child); 315 to 317 (act causing death after birth of a child etc.); 361 (kidnapping from lawful guardianship); 362 (abduction); 363 (punishment for kidnapping); 363A (kidnapping or maiming a minor for purposing of begging); 364A (kidnapping for ransom etc.); 366 (kidnapping etc. to compel woman for marriage etc.); 366A (procuration of minor girl for illicit forced intercourse); 366B

(importation of girl from foreign country); 367 (kidnapping/abduction in order to subject person to grievous hurt, slavery etc.); 369 (kidnapping adductive child under 10 year with intent to steal from its person); 372 & 373 (selling & buying minor for purposes of prostitution etc.).

4.1 The Protection of Children from Sexual Offences Act, 2012: An overview of the POCSO, relevant legal provisions and guidelines for the protection of children against sexual offences along with punishments; role of doctors, psychologists & mental experts as per rules of POCSO.

Note: Instructions for Examination:

Unit III of the paper dealing with Violence against Women and Children is of 20 Marks. It shall have 20 multiple-choice questions (with one correct and three incorrect choice options and no deduction of marks for wrong or un-attempted questions). Minimum two questions from each topic must be covered.

All the questions are to be attempted Qualifying Marks 33 percent

Duration of Examination 30 Minutes

The Paper Setter is requested to set the questions strictly according to the syllabus.

Pedagogy:

The entire syllabus of Unit III is to be covered in ten hours in total, with each lecture of one-hour duration.

The purpose behind imparting teaching-learning instructions is to create basic understanding of the contents of the Unit III among the students.

RELEVANT READING MATERIAL

Ahuja, Ram (1998), Violence against Women, New Delhi: Rawat Publication

NRHM, Child Abuse, A Guidebook for the Media on Sexual Violence against Children The Indian Penal Code (Universal Law Publishing Co. Pvt. New Delhi).

The Protection of Children from Sexual Offences Act, 2012 The Protection of Women from Domestic Violence Act 2005
The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013

UNO, United Nations Secretary-General's Study on Violence against Children, adapted for Children and Young People

Unit –IV
Drug Abuse

UNIT IV (Drug abuse: problem, prevention and management)

1. **Problem of drug abuse**
   Meaning and concept; types of drugs often misused;antibiotics, steroids and their misuse with suitable examples;habit forming drugs and their effects; drug addiction; drug tolerance and withdrawal symptoms;various signs and symptoms of drug abuse;vulnerable groups (age, gender and socio-economic status)

2. **Prevention and management of drug abuse**
   Medical treatment through deaddiction center, support of family, media and school education; Government policies, programs and laws to prevent drug abuse.

Instructions to the examiners

1. Unit IV of the paper dealing with Drug abuse would be of 20 marks comprising of twenty multiple choice questions carrying one mark each having four options a, b, c, d with one correct and three incorrect alternatives.
2. The question paper shall be set strictly according to the syllabus uniformly
3. All the questions are to be attempted

Note: The teaching hours for the Unit IV will be 10 hours

Suggested readings

1. Kapoor T (1985) Drug epidemic among Indian Youth. New Delhi: Mittal Pub
2. Modi, Ishwar and Modi, Shalini (1997) Drugs: addiction and prevention, Jaipur: Rawat publications
3. World drug Report 2019, Booklet 1, Executive summary, United Nations Office of drug and crime
4. Bansal R and Kumar A (2020) Drug abuse, addiction and recovery

Paper: English
Code No: BIOT-Sem-II-I-T

Semester II

Note: (i) There will be one paper of 40 marks, 5 marks are reserved for the Internal assessment and 5 for the Practical work. Total is 50.

(ii) The paper shall consist of Two Units, Unit I will be text specific and Unit II shall deal with different aspects of Communications and Language Skills.

(iii) For Unit I, the prescribed text is **Varieties of Expression** Ed. A.H.Tak. Foundation Books. Only four Prose chapters and two dramas have been recommended for study. The relevant sections, however, are as follows:

Unit I

Prose: Chapters 5-8
Drama: Dramas 3-4

Unit II

Note (iv) No text book is recommended for Unit II, but a few books that may be used for this Unit are listed towards the end. Unit II shall consist of the following:
Writing Skills: This section shall focus on précis-writing, curriculum vitae; short, formal reports (not exceeding 200 words) and advertisements relating to product promotion etc.,

Modern Forms of Communication: Here special emphasis shall be given to teaching the format of E-mails, Fax Messages, Audio-Visual Aids and Power-Point Presentations. Apart from this, the students shall also be given basic lessons in Effective Listening, Non-Verbal Communication, How to Prepare for an Interview & Group Discussion etc

Practical Work:

Teacher should assign some project or practical work to the students. This should be in the nature of guided activity, which the students shall have to complete under the direct supervision of the teacher. The students may be given projects on a variety of subjects relating to their discipline i.e. business, commerce, accounts etc. Preferably, they should be given minor projects (to be completed within less than two weeks, and length not exceeding 20 pages) in consultation with teachers of commerce. However, the evaluation of the projects should be done only by the Language Teachers, who must keep all the basic criteria of good writing in mind while doing so.

Note: *In case of private candidates and students of School of Open Leaning, the marks obtained by them out of 40 will be proportionately increased out of 50.*

Testing Scheme: The examination paper shall be divided into two sections, corresponding to two units already proposed in the syllabus. The distribution of questions and marks in Section I shall be as follows:

Unit I (It is text-based and corresponds to Unit I in the syllabus)

Q.1 It shall consist of six short questions. Three from Prose and three from drama (not exceeding 50-60 words) out of which , a student will be expected to attempt any four. **Two** from **Prose** and **two** from **Drama**. This question shall be based upon the prescribed text **Varieties of Expression** and cover a wide range of issues, topics and problems. **10 marks**

Q.2 It shall consist of four long questions-**Two** from **Prose** and **two** from **Drama**(not exceeding 100-150 words) out of which a student will be expected to attempt **two-**one from Prose and one from Drama.

5 **marks**

Note; The question 1 &2 should be so designed as to cover all the chapters prescribe (Prose & Drama)

Q.3. It shall exclusively be a test of vocabulary, but designed strictly on the lines of various exercises given at the end of each chapter in the prescribed text. The candidate shall be given **five** words in one column and asked to match them with words/meanings in the next column. **5 marks**

UNIT II

Q.4 Short Survey Report (150-200 words) with internal choice**.** **5 marks**

Q.5. Precis of 200 words. **10 marks**

Q.6 Definition/Format of modern forms of communication to be tested.

SEMESTER II

HISTORY AND CULTURE OF PUNJAB IN THE COLONIAL AND POST INDEPENDENCE TIMES

INSTRUCTIONS FOR THE PAPER –SETTER AND CANDIDATES: (FOR PAPER in semester 1 AND 2)

1. The syllabus has been divided into four Units.
   There shall be 9 questions in all. The first question is compulsory and shall be short answer type containing 10 short questions spread over the whole syllabus to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type questions carrying 5 marks i.e. 1 mark each. Rest of the paper shall contain 4 units. Each Unit shall have two essay type questions and the candidate shall be given internal choice of attempting one question from each Unit-IV in all. Each question will carry 10 marks.
2. For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
   The paper-setter must put note (2) in the question paper.
3. One question from Unit-IV shall be set on the map.

Explanation:

4. Each essay type question would cover about one-third or one-half of a topic detailed in the syllabus.
5. The distribution of marks for the map question would be as under:

Map	:	6 Marks
Explanatory Note	:	4 Marks

   In case a paper setter chooses to set a question of map on important historical places, the paper setter will be required to ask the students to mark 6 places on map of 1 mark each and write explanatory note on any two of 2 marks each.
6. The paper-setter would avoid repetition between different types of question within one question paper.

PAPER: HISTORY AND CULTURE OF PUNJAB IN THE COLONIAL AND POST INDEPENDENCE TIMES

Max. Marks	:	50
Theory	:	45
Internal Assessment	:	05
Time	:	3 Hours

Objectives: To introduce the students to the history of Punjab region in modern times.

Pedagogy: Lectures, library work and discussions.

UNIT I

1. Introduction of Colonial Rule: administrative changes; means of communication; western education.
2. Agrarian Development: Commercialization of agriculture; canalization and colonization.

3. Social Classes: agrarian groups; new middle classes

UNIT II

4. Early Socio Religious Reform: Christian Missionaries; Namdharis; Nirankaris.
5. Socio Religious Reform Movements: activities of Arya Samaj; Singh sabhas; Ahmadiyas.
6. Development of Press & literature: growth of press; development in literature

UNIT III

7. Emergence Of Political Consciousness: Agrarian uprising 1907; Ghadar.
8. Gurudwara Reform Movement: Jallianwala Bagh; foundation of SGPC and Akali Dal; Morchas.
9. Struggle for Freedom: activities of revolutionaries - Babbar Akalis, Naujawan Bharat Sabha; participation in mass movements – non co-operation, civil disobedience, Quit India.

UNIT IV

10. Partition and its Aftermath: resettlement; rehabilitation
11. Social Concerns In Post Independence Punjab: language; immigration; socio-economic issues.
12. MAP: Major Historical places: Delhi, Kurukshetra, Jaito, Ferozepur, Ambala, Amritsar, Lahore, Ludhiana, Qadian, Jalandhar, Lyallpur, Montgomery.

Suggested Readings:

1. Singh,Kirpal :History and Culture os the Punjab, Part II(Medieval Period), Publication Bureau, Punjabi University, Patiala 1990(3rd edn.).
2. Singh, Fauja(ed.) :History of the Punjab, Vol.III, Punjabi University, Patiala 1972.
3. Grewal, J.S. :The Sikhs of the Punjab, the New Cambridge History of India, Orient Longman, Hyderabad,1990.
4. Singh, Khushwant :A History of the Sikhs, vol I: 1469-1839, oxford University Press,. Delhi, 1991.
5. Chopra, P.N.,Puri, B.N. And Das,M.N. :A Social, Cu.ltural and Economic History of India, Vol.II, Macmillan, delhi, 1974.

Paper: Statistics & Computer Fundamentals **Theory: 67 Marks**
Course No: BIOT-203-T **Int Assess: 08 Marks**

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Objectives: -

- To learn applications of statistics in the field of biology.
- To study concepts of probability, averages, distributions, tests of deviations, correlation and linear regression.
- To learn to design experiments and analysis of results by tests of significance or analysis of variance.

UNIT – I

An introduction, types of data, collection, classification and tabulation of the primary data, secondary data, discrete data and continuous data, diagramatic and graphical representation of
grouped data, frequency distribution {univariate and bivariate},cumulative frequency distribution and their graphical representation, histogram frequency polygon.

Concept of central tendency or location and their measures, partition values: quantiles, deciles and percentiles, dispersion and their measures, relative dispersion.

UNIT – II

Binomial distribution, Poisson distribution as a limiting form of binomial distribution and properties of these distributions, moments, moment generation function, cumulate generating function,geometric distribution and exponential distribution and properties of these distributions.
Normal distribution
Correlation and regression analysis
Hypothesis testing
Markov models
Cluster analysis

- Nearest neighbour search
- Search using stem numbers
- Search using text signature

Concepts of Probability.

UNIT – III

Computers: General introduction to computers, organization of computers, digital and analogue computers, computers algorithms.
Introduction to computers and its uses: Milestones in hardware andsoftware-batch oriented/online/real time applications.
Compute as systems: Basic concepts, stored programs, functional units and their interrelation- communication with computer.

UNIT – IV

Data storage devices:
Primary storage: Storage address and capacity, type of memory.
Secondary storage devices: Magnetic tape-data representation and R/W Magnetic disks, fixed and removable, data representation and R/W; Floppyand hard disks, optical disks CD-Rom, mass storage devices.
Input/output devices: Key-tape/diskette devices, light pin Mouse, joystick, source data automation.
Printed outputs: Serial, line, page, printers, plotters, voice response units.

4. P.K. Sinha (2004). Computer fundamentals (BPB).
5. Suresh K. Basandra (2008). Computers today (Galgotia Publications Pvt.Ltd., New Delhi).

Paper: Statistics and Computer Fundamentals (Practical) **Pract: 22 Marks**
Course No: BIOT-203-P **Int Assess: 03 Marks**

1. Presentation of data by frequency tables, diagrams and graphs.
2. Calculation of measures of central tendencies, skewness and Kurtosis.
3. Calculation of dispersion.
4. Fitting of binomial distribution and Poisson distribution.
5. Probability
6. Basics of computer: Basic commands-File creation, copying, moving and deleting in DOS & windows, Using e-mail, browsers, search engines.

Reference Books:

1. W.J. Evens, G.R. Grant (2005). Statistical methods in bioinformatics:An introduction (Springer).

Paper: Basic Biochemistry **Theory: 67 Marks**
Course No: BIOT-204-T **Int Assess: 08 Marks**

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Course Objectives
To make student conversant with the biochemical aspect of cell, chemical structure & function of various biomolecules.

UNIT – I

Water: Physico chemical properties of water, dissociation and association constants. pH and buffers, pI, pka, Henderson Hasselbatch equation and its implications.

Carbohydrates: Structure of important mono, di-, oligo- and polysaccharides, glycoproteins, peptidoglycan, glycolipids and lipopolysaccharides. Storage polysaccharides and cell walls. Enantiomers and anomers. Acid mucopolysaccharides. Reaction of monosaccharides.

UNIT II

Lipids: Classification of lipids and fatty acids, general functions and structure of major lipid subclasses, acylglycerols, phosphoglycerols, phosphoglycerides, sphingolipids, glycosphingolipids and terpenes, sterols, steroids: Prostaglandins.

UNIT – III

Vitamins and hormones: Types of vitamins and their chemistry, vitamins as co-factors, steroids and peptide hormones.
Nucleic Acids: Structures of RNA & DNA

UNIT IV

Proteins: Structure of amino acids, nonprotein and rare amino acids and their chemical reactions.
Structural organization of proteins (primary, secondary, tertiary and quaternary domain structure), protein classification and function. Forces stabilizing primary, secondary and tertiary structure.

Paper: Basic Biochemistry (Practical)
Course No: BIOT-204-P

Practical: 22 Marks
Int. Assess: 03 Marks

1. Preparation of physiological buffers.
2. Verification of Beer-Lamberts law for p-nitrophenol.
3. Determination of Ka value of p-nitrophenol.
4. Estimation of carbohydrates in given solution by Anthrone method.
5. The determination of acid value and saponifaction value of a fat.
6. Methods of protein estimation.
7. Methods for Lipid estimation.

Paper: Cell Biology **Theory: 67 Marks**
Course No: BIOT-205-T **Int Assess: 08 Marks**

Instructions for paper setters and candidates
• Set nine questions in all. All questions carry equal marks.
• Five questions to be attempted.
• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).
• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Course Objectives

- To understand the detailed overview of eukaryotic cell and its inner components
- To understand the processes of cell transport and cell locomotion
- Introduction to stem cells and their applications

Practical skills will be imparted to the students through critically designed practical related to the subjects.

Unit I

Cell as a basic unit of living systems: the cell theory, pre-cellular evolution, artificial creation of "cells", broad classification and ultrastructure of cell types (PPLOs, Bacteria, eukaryotic microbes, plant and animal cells), tissue, organ and organism at different level of organization of other genetically similar cells; biochemical comparison of cells (proteins, lipids, carbohydrates, nucleic acids and metabolic pool).

Ultrastructure of cell membrane and cell organelle: structure and function of cell organelles, ultrastrucure of cell membrane, cytosol, golgi bodies, vacuoles, endoplasmic reticulum (rough and smooth), ribosomes, cytoskeletal structures (actin microtubules etc), mitochondria, chloroplast, lysosomes, peroxisomes, nucleus (nuclear membrane, nucleoplasm, nucleolus).

Unit II

Cellular transport: Passive & active transport, permeases, sodium, potassium, Calcium, ATPase pumps, lysosomal and vacuolar membrane, ATP dependent proton pumps, co-transport symport, antiport, transport into prokaryotic cells, endocytosis and exocytosis, entry of viruses and toxins into cells.

Unit III

Cell locomotion: Amoeboid, Flagellar and Ciliar.

Chromosomes: discovery, morphology, chemical composition, structural organization of chromatids, centromere, telomere, chromatin, nucleosome organization, euchromatin and heterochromatin, special chromosomes (polytene, lampbrush chromosomes), banding patterns in human chromosomes.

Unit IV

Basics of stem cells: Introduction to concepts in stem cell biology, Cell differentiation in multicellular organisms: (renewal, potency: Totipotent, pleuripotent, multipotent); types of stem cells: early embryonic stem cells, blastocyst embryonic stem cells, fetal stem cells, umbilical cord stem cells, adult stem cells; applications; ethical issues related to stem cells.

Reference Books:

1. The World of the Cell (2008) Becker, Klein Smith & Hardin Pearson education Inc
2. Cell and Molecular Biology (2010) E.D.P De Robertis and E.M.F. De Robertis, Jr.
3. Molecular Cell Biology (2007) Lodish et al. Freeman & Co
4. Molecular Biology of the Cell (2007) Bruce Alberts, Alexander Johnson, Julian Lewis, Martin Raff, Keith Roberts, Peter Walter.
5. The Cell: A Molecular Approach (2013) Geoffrey M. Cooper and Robert E. Hausman
6. Cells and Cell Function: Advanced Level (2007) Sally Morgan
7. Stem Cells: An Insider's Guide (2013) Paul Knoepfler

Paper: Cell Biology (Practical) **Practical : 22 Marks**
Course No: BIOT-205-P **Int. Assess: 03 Marks**

1. To study the parts and function of a light microscope
2. To prepare a wet mount of onion peel for microscopy
3. Counting of cells using haemocytometer
4. Subcellular fractionation of spinach cells
5. To study cell locomotion of amoeba
6. To study flagellar motility in bacteria by hanging drop technique
7. To study cell transport in cell membrane by following experiments
    1) Diffusion through artificial membrane: transport of albumin and glucose solution through dialysis bag.
    2) To study the effect of membrane disrupting agents in beet root
8. Quantitative analysis of cell membrane lipids by TLC

Paper: General Microbiology **Theory: 67 Marks**
Course No: BIOT-206-T **Int Asess: 08 Marks**

Instructions for paper setters and candidates.

- Pattern Change should be UNIT wise.

Course Objectives

Microbes play significant role in understanding medical science and industries so study of microbes from basic to advance level, with understanding of biochemistry, cell structure and application makes this paper significant.

UNIT – I

History of Microbiology: A. Leewenhook, L. Pasteur, R. Koch, J. Lister, J.Tyndall, Koch postulates, discovery of antibiotics.

Principle of microscopy: Bright field, dark field, phase contrast, fluroscent, electron microscopy.

UNIT – II

Microbial classification: Bacteria, fungi

Morphology of bacteria, viruses and fungi with major emphasis on bacterial structure specially cell wall. Gram positive and Gram negative bacteria. Microbial spores, sporulation/ germination process.

UNIT – III

Microbial growth, nutritional biodiversity, phases of growth, generation time, growth rate, monoauxic, diauxic and synchronous growth. Chemostat

Physical and chemical agents to kill microbes, sterilization and pasteurization processes.

UNIT –IV

Normal micro flora in human. Types of microbial pathogens and diseases caused by them. Microbial interactions like symbiosis and antibiosis. Host defense mechanism against pathogens.

Reference Books:

4. H.G. Schlegel, C.Zaborosch, M. Kogut (1993).General microbiology (Cambridge University Press).
5. S.C. Prescott, C.G. Dunn (1959). Industrial microbiology (McGraw- Hill).
6. Purohit, S.S. (2003). Microbiology: Fundamentals and applications (Agrobios, India).
7. Postgate, J.R. (2000). Microbes and man (Cambridge University Press).

Paper: General Microbiology (Practical) **Practical: 22 Marks**
Course No: BIOT-206-P **Int Assess: 03 Marks**

1. Cleaning of glass wares, preparation of media, cotton plugging and sterilization.
2. Isolation of microorganisms from air, water and soil samples.
3. Dilution and pour plating techniques.
4. Gram staining, spore staining
5. Growth curve of microorganisms.
6. Antibiotics sensitivity of microbes using antibiotic discs.
7. Testing of water quality.

Reference Books:

1. Cappuccino J.G., Sherman N. (2007). Microbiology: A laboratory manual, (Pearson Benjamin Cummings).

B.Sc. (Hons.) 2nd year (3rd Semester)

Paper: Biochemistry

Course No.: BIOT-Sem-III-I-T

Theory : 67 marks

Internal assest : 08 marks

Total : 75 marks

Instructions for paper setters and candidates:-:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: To familiarize the students with the biochemical activities taking place at cellular level, highlighting the enzymatic reactions, metabolic pathways and biochemical aspect.

Unit- I

Metabolism: Metabolic pathways, biochemical reaction mechanism, energy rich metabolites. Coupled reactions, substrate level phosphorylation. Importance of ATP: Structural basis of high phosphoryl transfer potential of ATP. Sources of cellular energy, activated carriers. Regulation and evolution of metabolic pathways.

Unit- II

Carbohydrate metabolism: Biosynthesis and degradation of glucose; feeder pathways of glycolysis; Kreb cycle, amphibolic nature of the Kreb cycle; regulation of Kreb cycle, regulation of gluconegenesis. Glycogen metabolism.

Mitochondrial electron transport chain, oxidative phosphorylation; regulation of ATP synthesis.

Unit- III

Lipid Metabolism: Biosynthesis and degradation of fatty acids; β-oxidation of saturated, unsaturated and polyunsaturated fatty acids. Formation of ketone bodies, their function and

physiological significance. Fatty acid synthesis: multifunctional enzyme complex in eukaryotes, function of citrate. Regulation of fatty acid metabolism.

Cholesterol metabolism: Biosynthesis of cholesterol and its regulation.

Unit- IV

Amino acid metabolism: Biosynthesis of nutritionally non-essential amino acids; catabolism of carbon skeleton of amino acids. Conversion of amino acids to specialized products; amino acids as precursors of porphyrins, bile pigments and biogenic amines.

Nucleic acid metabolism: Biosynthesis of purine and pyrimidine nucleotides; salvage reactions. Catabolism of purines and pyrimidines, urea cycle.

Biochemistry (Practical)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. **Estimation of DNA by the diphenylamine reaction.**
2. **Determination of reducing sugars using 3, 5-dinitrosalicylic acid and Benedict's test.**
3. **Determination of iodine number of fat.**
4. **Determination of extinction coefficient of nucleic acids.**
5. **Biuret assay for protein estimation..**
6. **Quantitative estimation of amino acids using ninhydrin reaction.**
7. **Estimation of RNA by means of orcinol reaction.**

Paper: Genetics

Course No.: BIOT-Sem-III-II-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: The focus of this course is on the science of heredity with emphasis on the basics of Mendelian and molecular genetics. It will familiarize students with chromosome organization, linkage, chromosome mapping, chromosome aberrations, mutations and microbial genetics.

Unit – I

Mendelian laws of inheritance, Sex determination in drosophila, plants and animals, sex linkage, Non-disjunction as a proof of chromosomal theory of inheritance. Numerical chromosome aberrations: polyploidy, aneuploidy, Chromosomal aberrations: Delition, duplications, inversions, translocations, position effects.

Unit – II

Gene interactions, sex linked inheritance. Crossing over: molecular mechanism and cytological proof, Recombination, linkage, gene mapping, Three point testcross, interference, coincidence, recombination frequencies, Tetrad analysis, somatic cell hybridization for gene linkage studies, Hereditary defects.

Unit – III

Population genetics: Hardy-Weinberg equilibrium, gene and genotypic frequencies, Chi-square test, probability, pedigree analysis.

Mutation: Spontaneous versus induced mutations, types of mutations, mutagenic agents: Physical, chemical and radiation, molecular basis of mutations, mechanisms of DNA repair, mutations frequency, correlation between mutagenicity and carcinogenicity,

Unit – IV

Basic microbial genetics: Conjugation, transduction, transformation, isolation of auxotrophs, replica plating techniques, analysis of mutations in biochemical pathway, one gene – one enzyme hypothesis. Extra chromosomal inheritance: mitochondrial and chloroplast genetic systems.

Genetics (Practical)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. **Examination of permanent slides of various stages of mitosis and meiosis and different types of chromosomes.**
2. **Demonstration of law of segregation and independent assortment (use of dried peas, colored peas, capsules etc.).**
3. **Numerical for segregation and independent assortment.**

4. **Use of Chi-square for prediction of phenotype/genotype frequencies of parents from progeny and vice-versa, epistasis.**

5. **Detection of blood groups (ABO & Rh factors).**

6. **Calculation of variance in respect of pod length and number of seeds/pod.**

7. **Calculation of gene frequencies and random mating (colored beads, capsules).**

8. **Dermatographics: Palm print taking and finger tip patterns.**

Paper: Immunology-I

Course No.: BIOT-Sem-III-III-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objectives: To understand general aspects of immune system like different components of the immune system, Generation and functions of these components, Knowledge of basic immunological techniques.

Unit-I

1. **Introduction**
   i) Overviews of immune system – Historical perspectives

   ii) Innate and acquired immunity
   iii) Clonal nature of immune response.

2. **Cells of the immune system : Hematopoiesis and differentiation, lymphocyte trafficking, B-lymphocytes, T-lymphocytes, macrophages, dendritic cells, Natural killer cells and lymphocyte activated killer cells, eosinophils, neutrophils & mast cells.**

Unit-II

3. **Organs of the immune system : Primary and secondary lymphoid organs, systemic function of immune system.**

4. **Lymphocyte Trafficking: Cell surface proteins, Cell Adhesion molecules (Integrin, Selectin, Cadherin family and Ig Superfamily).**

5. **Antigen – Immunogenicity Vs. antigenicity, factors effecting immunogeniticity, nature of immunogen, epitopes, heptans and antigenicity, pattern recognition receptors.**

Unit-III

6. **Immunoglobulins: Structure of antibody, antibody effector function, antibody classes and biological activities, antigenic determinants on Immunoglobulins, Immunoglobulins superfamilies.**
7. **Major histocompatibility complex: General organization and inheritance, MHC molecules and genes, genetic map, cellular distribution, regulation of MHC expression and disease susceptibility, antigen presentation.**

Unit-IV

8. **Hybridoma Technology: Production of Monoclonal Antibodies, applications of polyclonal and monoclonal antibodies.**

9. **Antigen–Antibody interactions : Strength of interaction, cross reactivity, antibody affinity, avidity. Antigen-antibody interactions as tools for research and diagnosis: precipitation and agglutination reactions, immunodiffusion, immunoelectrophoresis, immunoassays, Enzyme linked immunosorbent assay (ELISA), Radioimmunoassay (RIA), western blot, Immunofluorescence.**

Reference Books:

1. **Kuby Immunology (2006) by Thomas J. Kindt, Richard A. Goldsby, Barbara A. Osborne, Janis Kuby (W.H. Freeman).**

2. **Immunology- A short course (2009) by Richard Coico, Geoffrey Sunshine (Wiley Blackwell).**

3. **Fundamentals of immunology (1999) by William Paul (Lippincott Williams & Wilkins).**
4. **Immunology (2001) by Ivan Maurice Roitt, Jonathan Brostoff, David K. Male (Mosby).**

5. **Kindt TJ, Goldsby RA, Osborne BA, Kuby J. Immunology. (6th Ed.) WH Freeman & Co. New York; 2006.**

6. **Delves PJ, Martin SJ, Burton DR, Roitt IM. Roitt's essential immunology. Wiley Blackwell; 2011.**

Paper: Immunology-I (Practicals)

Course No.: BIOT-Sem-III-III-P

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. **Lymphoid organs and their microscopic organization.**
2. **Differential leucocytes count.**
3. **Separation of serum from blood.**
4. **Separation of plasma from blood.**
5. **Ouchterlony Double Diffusion**
6. **Radial immuno diffusion test using specific antibody and antigen.**
7. **Agglutination (Blood group testing).**

Paper: Plant Tissue Culture

Course No.: BIOT-Sem-III-IV-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: To introduce the students with fundamentals and applications of plant tissue culture. This course will expose students to the methods of culturing, maintaining and regenerating plants species.

Unit – I

Cellular totipotency and differentiation in plants.

Plant Culture Media and their composition.

Sterilization techniques for glassware and tissue culture media.

Micropropagation: Establishment of aseptic culture, various stages, advantages and disadvantages.

Unit –II

Organogenesis; somatic embryogenesis; somaclonal variation, its genetic basis and application in crop improvement. Cell/callus line selection for resistance to herbicide, stress and diseases. Role of tissue culture in rapid clonal propagation, production of pathogen - free plants and "synthetic seeds" haploid and Triploid plant production & their application.

Unit – III

Protoplast and somatic hybridization: Isolation, culture and plant regeneration, protoplast fusion, identification and characterization of somatic hybrids, applications of protoplast hybridization technology.

Unit – IV

Secondary metabolites: Secondary Plant products from cultured cells and their industrial applications. Cryopreservation of germplasm: Short term and long term conservation of plant genetic resources, In situ and Ex situ conservation of plants

Reference Books:

6. HS Chawla (2003). Plant biotechnology: A practical approach (Science Publishers, USA). Plant Tissue Culture and Biotechnology

Plant Tissue Culture (Practical)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. Laboratory design set up for a plant tissue culture laboratory.
2. How to clean glass/plastic ware.
3. Preparation of complex nutrient medium (Murashige and Skoog's medium).
4. To select, prune, sterilize and prepare an explant for culture.
5. To culture different explants for raising callus cultures.
6. Significance of growth hormones in culture medium.
7. To demonstrate various steps of micropropagation.

Paper: Animal Cell Culture

Course No.: BIOT-Sem-III-V-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: The major emphasis of this course is to introduce the students to the field of Animal cell-culturing and its importance to mankind. The students will also learn the techniques involved in animal cell culture.

Unit – I

History of development of cell cultures, natural surroundings for animal cells, simulating natural conditions for animal cells, metabolic capabilities of animal cells.

Biology of cultured cells : The culture environment, cell adhesion, proliferation, differentiation, signaling, evolution of cell lines. Equipments and materials for animal cell culture technology.

Unit II

Introduction to the balanced salt solutions and simple growth medium. Brief discussion on the chemical, physical and metabolic functions of different constituents of culture medium. Role of carbon dioxide. Role of serum and supplements.

Serum & protein free defined media and their application.

Animal cell culture Techniques: Dispersion and disruption of tissues; primary cultures, anchorage and non-anchorage dependent cells; secondary culture, transformed animal cells.

Unit – III

Established/continuous cell lines, commonly used animal cell lines, their origin and characteristic. Maintenance and growth kinetics of cells in culture, differentiation of cells,

Measurement of growth and viability of cells in culture. Cytotoxicity assays & their applications,

Unit – IV

Characterization of Cell lines and their authentication, Cell fusion and production of monoclonal antibodies.

Transformation and immortalization, cryopreservation.

Bio-Safety & Bioethics.

Animal Cell Culture (Practical)

Practical : 22 marks

Int. assessment : 03marks

Total : 25 marks

Time : 3 hours

3. **Fumigation of animal cell culture laboratories.**
4. **Maintenance of aseptic conditions and sterilization method.**
5. **Preparation of Minimal Essential Growth medium for cell culture.**
6. **Isolation of lymphocytes for culturing.**

B.Sc. (Hons.) 2nd year (4th Semester)

S.No.	Course/Paper	Code			
		Theory		Practical

Total Marks = 500

B.Sc. (Hons.) 2nd year (4th Semester)

Paper: Immunology-II

Course No.: BIOT-Sem-IV-I-T

Theory : 65 marks

Int. assessment : 10 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: This course will introduce students to the principles of advanced Immunology, both at the molecular and cellular levels.

Unit-I

3. **B Cell Activation, Differentiation: B-Cell Activation and Proliferation, In Vivo Sites for Induction of Humoral Responses, T-dependent and T-independent antigens.**

4. **Organization and expression of Immunoglobulins gene: Genetic model, multigene organization, generation of antibody diversity.**

Unit-II

5. **Receptors and Signaling: T-Cell Receptors: Structure and Roles, T-Cell Receptor Complex.**

6. **T-Cell Maturation, Activation, and Differentiation: Thymic Selection of the T-Cell Repertoire, T_H-Cell Activation, T-Cell Differentiation, Cell Death and T-Cell populations, Peripheral-T-Cells.**

7. **Complement system: Function, Components- Classic, Alternative, Mannose binding proteins, activation, Regulation of the Complement System, Biological Consequences of Complement Activation.**

Unit-III

6. **Hypersensitivity: Type I, Type II, Type III and Type IV Hypersensitivity reactions and their implications.**

7. **Autoimmunity: Organ specific autoimmune diseases : Hashimoto's Thyroditis, Insulin-dependent Diabetes Mellitus, Grave's disease, Mysthenia Gravis.**

   Systemic Autoimmune Disease: Systemic lupus Erythmatosus (SLE).

Unit-IV

8. **Transplantation immunology- Immunologic Basis of Graft Rejection, Clinical Manifestations of Graft Rejection, General Immunosuppressive Therapy, Specific Immunosuppressive Therapy, Immune Tolerance to Allografts, Clinical Transplantation**
9. **Vaccines and Vaccination – principles of vaccination, passive & active immunization, immunization programs, adjuvants, bacterial vaccines, viral vaccines, polysaccharide vaccines, DNA vaccines, recombinant vaccines, vaccines to other infectious agents, tumor vaccines.**

Reference Books:

1. **Kindt TJ, Goldsby RA, Osborne BA, Kuby J. Immunology. (6th Ed.) W.H. Freeman & Co. New York; 2006.**

5. **Clinical Immunology and serology: A laboratory perspective (1997) by Stevens Dacis Company, Phialadelphia).**

Immunology-II (Practical)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. **Performing enzyme linked immunosorbent assay (ELISA).**
2. **Rocket immuno-electrophoresis for antigen antibody interaction.**
3. **Isolation of mononuclear cells from peripheral blood and viability test by dye exclusion methods.**
4. **Total leucocyte count (TLC).**
5. **Isolation of IgG from serum.**

Paper: Biophysical and Biochemical Techniques

Course No.: BIOT-Sem-IV-II-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: To enable the students learn important tools and techniques based on biophysical and biochemical principles so that they can understand application of these techniques in biotechnology

Unit – I

Principle, working and applications of Spectrophotometry (UV& visible) and spectroflourimetry, Atomic absorption spectrophotometry: Equipment used and applications

Infrared and Raman spectroscopy. ORD and circular dichroism, Nuclear Magnetic Resonance and Electron Spin Resonance spectroscopy, Magnetic Resonance Imaging. Electrophoresis: Principle, types & applications.

Unit – II

Microscopy: Properties; Light and Bright field Microscopy, Dark field Microscopy; Phase contrast, Fluorescent and Confocal microscopy,

Electron microscopy: Scanning and Transmission Electron Microscopy.

Centrifugation: Principle, types & applications.

Unit – III

Crystallography: Physical basis of crystallization; formation of crystals; Mounting of crystals

X-ray diffraction: Braggs law; Diffraction of x-rays by crystals
Overview of chromatography; Gas chromatography and HPLC

Unit – IV

Radioisotope techniques: Radiotracers; GM counter, proportional and scintillation counters, autoradiography.

Mass spectrometry: Physical basis; Instrument used; ionization modes; Applications

Collaboration of MS with other techniques: GCMS and LCMS.

7. **Bansal, D.D., K Hardori, R & Gupta, M.M. (1985). Practical biochemistry (Standard Publication, Chandigarh).**

Biophysical And Biochemical Techniques (Practicals)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25marks

Time : 3 hours

1. **Identification of the provided sample using some of the spectroscopic techniques.**
2. **Quantitative analysis by UV/Visible spectrophotometry.**
3. **Use and care of light microscope.**
4. **Demonstration of radioisotopic techniques**
5. **Gel filtration chromatography**

Paper: Plant Biotechnology

Course No.: BIOT-Sem-IV-III-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: The objective of this course is to familiarize the students with different aspects of plant molecular biotechnology and techniques for plant genetic manipulations.

Unit – I

Genetic material of plant cells with an introduction to chloroplast and mitochondrial DNA.

Plant Promoter, Plant Selection markers and reporter genes.

Transformation of plant cells; different type of vectors including viral vectors and their benefits.

Unit –II

Modes of gene delivery in plants: Particle bombardment, electroporation, microinjection; Advantages and disadvantages

Agrobacterium mediated gene transfer, natural pathogen mode of infection,

vir gene functions, Ti / Ri plasmids, Screening and selection of transformants, PCR and hybridization methods; Transgene selection and silencing; Generation and maintenance of transgenic plants.

Unit – III

Transgenic plants: Genetic modification of plants for herbicide resistance, Pest resistance, virus resistance

Bacterial and fungal resistance. : Delayed fruit ripening, improved protein composition.

Bt cotton, golden rice and some others as examples.

Unit – IV

Plant cell as factories for production of industrial enzymes, biodegradable plastics, antibodies, edible vaccines; manipulation of metabolic pathways for production of fatty acids, industrial oils, terpenoids, flavanoids.

Plant Biotechnology (Practicals)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. **Aseptic culture techniques for establishment and maintenance of cultures**
2. **Preparation of stock solutions of MS basal medium and plant growth regulator stocks.**
3. **Micropropagation of Tobacco plant by leaf disc culture.**
4. **Isolation of plant genomic DNA by modified CTAB method.**
5. **DNA check run by Agarose Electrophoresis.**
6. **Agrobacterium tumefaciens-mediated plant transformation.**

Paper: Animal Biotechnology

Course No.: BIOT-Sem-IV-IV-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: The major emphasis of this course is to introduce the students to the advances in the field of Animal and their importance to mankind.

Unit-I

Organotypic and histotypic cultures: Organotypic culture: Gas and nutrient exchange, structure integrity, growth, differentiation, advantages and applications. Methods, advantages and applications of histotypic culture.

Three dimensional culture and tissue engineering: Concept of tissue engineering, components of tissue engineering, cells imaging in 3D construct.

Unit-II

In vitro fertilization (IVF) in Humans and Embryo Transfer in Livestock.

Cell culture based vaccines: Cells as virus host/cell culture based vaccines, cells as protein factory/cell expression system and cells as antigen presenter/personalized vaccine.

Scaling up of the animal cell culture: different methods of scale up at laboratory and industrial level.

Unit-III

Transgenic animals and their applications: Concept of transgenics, Methods of gene transfer, selection of clone containing DNA insert and application of transgenic animals (Food, environment, recombinant proteins, drugs etc.). Safety and ethical issues of transgenic animals.

Unit-IV

Production of various products of human use using animal cell culture:

Antibiotics production

Human Growth factors

Insulin and other Hormones

<u>Essential Readings:</u>

Animal Biotechnology (Practicals)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. **Growing the cell monolayers, in vitro.**
2. **Trypsinization of the monolayers and cell counting using hemocytometer.**
3. **To check the viability of the cells using Trypan Blue dye exclusion assay.**
4. **Checking the cytotoxicity of the compounds using MTT Assay.**

Paper: Agro & Industrial Biotechnology

Course No.: BIOT-Sem-IV-V-T

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates:-

•Set nine questions in all. All questions carry equal marks.

•Five questions to be attempted.

•Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

•Set two questions from each Unit, and each question should be further divided in two to three parts.

Any one question to be attempted from each unit.

Objective: This course will introduce students to the concepts of agriculture as industry. This course will help students to understand the application of fundamental concepts like transgenic approaches to improve crop plants, microbial culture maintenance, and metabolite purification at industrial level.

Unit I

Basic concept of agriculture as industry: Industrially important microbes, its screening, selection and identification.

Maintenance and preservation of industrially important microbial cultures.

Differences between microbial industrial process and chemical industrial process.

Unit II

Improvement programme of industrial microbes, mutational programme of penicillin producing microorganisms, selection pressure in maintaining the hyper producer, lowering of production due to reversal of mutations, media formulation and process optimization of industrial and agro industrial microbes.

Unit III

Microbes in agro industries and industrial biotechnology: Introduction of primary and secondary metabolites, production of vitamin B12, alcohol, wine, beer, cheese, bread, citric acid, gluconic acid, antibiotics (penicillin), enzymes (amylases, cellulases, lipases and proteases) and their industrial applications.

Unit IV

Emerging energy technologies in agro industries: production of vermiculture, composting, herbicides and biopesticides, production of biofertilizers: Blue green algae, azolla, fungi, mycorrhiza (VAM), bacteria – Azospirrilum, microbial biotransformations, single cell proteins (bacterial, fungal and algal).

Reference Books:

Agro & Industrial Biotechnology (Practicals)

Practical : 22 marks

Int. assessment : 03 marks

Total : 25 marks

Time : 3 hours

1. **Counting of Microbial cells by serial dilution techniques (Spread plate and pour plate).**
2. **Measurement of bacterial size.**
3. **Screening of industrial enzymes (cellulase, protease, amylase etc.) from different soil samples.**
4. **Production of enzymes by submerged and solid state fermentation.**

B.Sc. (Hons.) 3rd year (5th Semester) (July, 2018)

S.No.	Course/Paper	Code

B.Sc. Hons Biotechnology 3rd year (5th Semester)

BIOT-Sem-V-I-T MOLECULAR BIOLOGY

Theory : 67 marks

Int. asset : 08 marks

Total : 75 marks

Time : 3 hours

Objectives: To make the students understand the fundamental concepts which includes DNA structure, replication, transcription, translation, mutation, gene regulation.

UNIT-I

1. DNA: Chemical composition of DNA DNA structure-single stranded DNA, detailed account of double stranded DNA, BDNA, Z.DNA and other structural forms and their importance.

2. Genome organization in prokaryotes: Molecular nature of the genetic material, Composition and structure of prokaryotic DNA and RNA.

3. Genome organization in eukaryotes: Composition and structure of eukaryotic DNA and RNA. Characteristic features of highly repetitive DNA, Tandemly repetitive DNA and Mini and microsatellite DNA and Insertional elements and their role and importance

UNIT-II

4. DNA replication: Prokaryotic DNA replication; replication origin and site and structure and DNA Ter regions and structure. DNA polymerases, composition and features, replication factors and the mechanism of replication, leading strand and lagging strand synthesis, procesessivity and fidelity. Replication of single stranded DNA, M13 viral DNA.

5. Eukaryotic DNA replication; origins, replication initiation complexes and their assembly, licensing factors, DNA polymerases and their composition, telomerase and mode of action, replication factors, disassembly of chromatin components and reassembly during replication.

UNIT-III

6. Gene Expression: Overview of central dogma

7. RNAs: types, rRNAs; Structural features of rRNAs- prokaryotic and eukaryotic. tRNAs: structural features, their anticodon feature. mRNAs- prokaryotic and eukaryotic mRNAs, structural features,

8. Transcription: regulatory elements and mechanism of transcription regulation in prokaryotes and eukaryotes

UNIT IV

9. Translation: Overview and mechanism of translation process in prokaryotes, characteristics of the genetic code, structure and charging of tRNA,

10. Gene Regulation: Regulation of gene expression in response to environmental conditions. Operon concept- the Lactose and the Tryptophan operon.

Total : 75 marks
Time : 3 hours

Instructions for paper setters and candidates

• Set nine questions in all. All questions carry equal marks.

• Five questions to be attempted.

• Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

• Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Objective:

The course focuses on an introduction to environment, major threats to environment by various polluting agents and the remedies for the same, incorporating design and monitoring of waste treatment processes. As well as learning environmental technology fundamentals, with special focus on biological treatment processes, environmental management. The course is use of biotechnology to design cleaner manufacturing processes and to solve pollution problems. It is ideal for under graduates just embarking on their career, or scientists and engineers who have been working for a few years and wish to develop their career in this direction.

UNIT-I

Basics of Environment and Environmental pollution, air, water, soil and noise.

Air – Types, Sources & Effects,

Soil - Physicochemical and bacteriological analysis of soil, soil pollutants (fertilizers,

insecticides fungicides, pesticides).

Noise pollution, its control and impact on human health.

Renewable and Non Renewable resources. and their Environmental Impacts.

Modern Fuels (gasohol, hydrogen and solar energy) and their Environmental Impacts.

UNIT-II

Water pollution and its management: Measurement of water, pollution, sources of water pollution. Microbiology of waste water treatment, aerobic processes, activated sludge, oxidation ponds, trickling filters, and rotating biological contactors.

Anaerobic processes: Anaerobic digesters, upward flow anaerobic sludge blanket reactors.

General strategies for wastewaters treatment.

UNIT-III

Bioremediation of contaminated soil and its applications

Degradation of pesticides and other toxic chemicals by microorganism. Integrated Pest management Biodegradation of environmental pollutants: pesticides, hydrocarbons, dye, etc.

Biofertilizers for clean environment– Nitrogen fixing microorganism, enrichment of the soil with assimilable nitrogen

UNIT IV

Introduction to solid waste and municipal solid waste management: Sources, types, composition.

Bioabsorption of metals:- Role of Microorganisms in biosorption and bioleaching. ,

Enrichment of ores by microorganisms

Bioindicators for detection of pollution

Practical:- ENVIRONMENTAL BIOTECHNOLOGY
BIOT-Sem-V-II-T

Practical : 20 marks

Int. assessment : 05 marks

Total : 25 marks

Time : 3 hours

1. **Detection of coli forms for determination of the purity of potable water.**
2. **Determination of chlorine in water**
3. **Determination of total alkalinity of water**
4. **Determination of dissolved oxygen concentration of water sample.**
5. **Determination of biological oxygen demand (BOD) of a sewage sample.**
6. **Determination of chemical oxygen demand (COD) of sewage sample.**
7. **Isolation of phosphate solubilizing microorganisms from soil.**

Reference Books:

1. **Microbiology: A laboratory manual (2007) by Cappuccino J.G and Sherman N. (Publisher Pearson Benjamin Cummings).**

BIOINFORMATICS

Theory : 67 marks

Int. assessment : 08 marks

BIOT-Sem-V-III-T

Total : 75 marks

Time : 3 hours

UNIT – I

Introduction to Bioinformatics, Biological Databases and Sequence analysis Introduction, overview and needs of bioinformatics technology.

Primary Databases: Primary Sequence database i.e. GenBank & EMBL.

Secondary Databases: SwissProt/TrEMBL, Pfam.

Molecular Structure Databases: Protein Data Bank (PDB), SCOP, CATH. Understanding the structure of each database and using it on the web.

UNIT – II

Sequence Alignment

Introduction to sequence alignment and its applications.

Pair wise sequence alignment: Concept of global and local alignment, Dot Plot, algorithm for pair wise sequence alignment (Needleman Wunsch, Smith-watterman methods), Introduction to BLAST, types of BLAST, algorithm of BLAST and interpretation of its result.

Substitution matrices: Introduction to substitution matrices: PAM and BLOSUM matrices, concept of log odd ratio.

Multiple sequence alignment: Methods of multiple sequence alignment. Introduction to consensus sequences, motifs and profiles.

UNIT – III

Phylogenetic Analysis: Introduction to phylogenetic analysis and its application, phylogenetic tree topologies, methods of phylogenetic tree construction and tools.

Genome Annotation: Concept of genome annotation, methods of gene identification. Tools of gene

identification: GenScan and Glimmer.

UNIT IV

Protein Structure Prediction: Concepts and strategies of protein structure prediction, methods of secondary structure prediction, and methods of protein tertiary structure prediction. Structure visualization tool – RasMol.

BIOT-Sem-V-IV-P: BIOINFORMATICS (Practicals)

Practical : 20 marks

Int. assessment : 05 marks

Total : 25 marks

Time : 3 hours

1. **Searching literatures over PubMed.**
2. **Performing DOTPLOT on web.**
3. **Retrieving amino acid and nucleotide sequence from sequence databases using Entrez.**
4. **Performing BLASTp/n and interpreting its results.**
5. **Performing PSI-BLAST.**
6. **Performing multiple sequence alignment using Clustalw.**
7. **Finding ORF in nucleotide sequence using NCBI ORF FINDER**
8. **Using GenScan to identify exons in nucleotide sequence.**
9. **Download protein structure form PDB and visualize it using RasMol.**

BIOT-Sem-V-IV-T Paper: ENZYMOLOGY

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

UNIT – I

Structure and functions of enzymes: Historical background and general properties of enzymes, concept of active centre, binding sites, stereo specificity and ES complex formation, activation energy, Evidences for enzyme-substrate complex; Lock and key, Induced fit and Transition state hypotheses, Coenzymes and Cofactors- Prosthetic group, coenzymes involved in different metabolic pathways.

UNIT – II

Factors Affecting the Enzyme Activity: Concentration, pH and temperature. Kinetics of a single substrate enzyme catalysed reaction, derivation of Michealis-Menten Equation, significance of Km value, Vmax, Turnover number, Kcat. Enzyme activity, international units, specific activity, Enzymes as thrombolytic agents, Anti-inflammatory agents, streptokinase, Isoenzymes

UNIT-III

Enzyme Regulation: Feedback inhibition, Allosteric Regulation, Covalent Modification and Proteolytic Activation. Organization of enzymes in the cell, localization, enzymes in membranes. Acid-base catalysis, covalent catalysis, Metal ion catalysis, multienzyme complexes and ribozymes, catalytic antibodies, Allosteric enzymes.

UNIT – IV

Applications of Enzymes: Immobilized enzymes, industrial applications of immobilized enzymes, Thermophilic enzymes, amylases, lipases, Proteolytic enzymes in meat and leather industry, enzymes used in fermentation processes, cellulose degrading enzymes, Metal degrading enzymes.

Reference Books:

5. **Fundamentals of enzymology: The cell and molecular biology of catalytic proteins (2003) by Nicholas C. Price, Lewis Stevens, Lewis Stevens published (Oxford University Press, USA).**
6. **Principles and reactions of protein extraction, purification, and characterization (2004) edited by Hafiz Ahmed PhD (CRC, Taylor Francis Group).**

BIOT-Sem-V-IV-P: Enzymology (Practicals)

Practical : 20 marks

Int. assessment : 05 marks

Total : 25 marks

Time : 3 hours

1. **Estimation of enzyme activity.**
2. **To study the Effect of pH on activity of enzyme.**
3. **To study the Effect of temperature on activity of enzyme.**
4. **To study the effect of substrate concentration on enzyme activity.**
5. **To estimate Km and Vmax of an enzyme and plot Line-Weaver Burk plot.**

Reference Books:

1. **An introduction to practical biochemistry (2004) by Plummer D.T. (Tata McGraw Hill Publishers Co. Ltd., New Delhi).**

B.Sc. (Hons.)3rd year (6th Semester)

BIOT-Sem-VI-I-T Paper: GENETIC ENGINEERING

: 67 marks

Int. assessment: 08 marks

Total : 75marks

Time : 3 hours

Objectives:

Genetic engineering refers to the process of manipulating the characteristics and functions of the original genes of an organism. The objective of this process is to introduce new physiological and physical features or characteristics. The students will learn how the genes can be cut and paste from one organism to another and what are its implications.

UNIT-I

1. Introduction to genetic engineering. Why gene cloning and DNA analysis is important. . How to clone a gene - What is clone, Overview of the procedure

2. Tools in Recombinant DNA Technology:

Restriction and modifying enzymes, Type I , Type II and Type III enzymes and their characteristic features; restriction sequences, isoschizomers, rare cutting enzymes, enzyme cutting similar sequence in different manner.

DNA Modifying enzymes: Characteristics and applications of Nucleases – DNase and RNase, DNA-Pol I, Klenow fragment, T4DNA polymerase, T7 DNA polymerase, T4 Polynucleotide kinase, Phosphatase, Reverse transcriptase, Taq polymerase and Ligase. Terminal deoxy ribonucleotidyl transferase.

3. Polymerase Chain Reaction: Types and applications

UNIT II

Basic biology of plasmids and Phage vectors Basic features of plasmids, plasmid classification, Bacteriophage λ, lytic & lysogeny, Promoter control circuits. linear and circular forms of lambda vector, DNA cloning with single stranded DNA vectors.

DNA cloning vectors Cloning vectors for E. coli- Nomenclature, pBR 322, pBR 327, pUC 8, pGEM3Z. insertion and replacement vectors; Vectors based on M13. Methods of identification of recombinants: Insertional inactivation, blue/white selection. Cloning vectors for yeast- YEp, Ylp, YRp.

Advanced Vectors: cosmid, phagemid, Bacterial Artificial Chromosomes (BACs), shuttle vectors, yeast artificial chromosomes.

UNIT-III

Preparation of genomic and cDNA library: Partial digests, Choice of vectors, Construction and Evaluation of a genomic library. cDNA library: mRNA enrichment, cDNA synthesis, Random, arrayed and Ordered library.

Finding The Right Clone: Gene identification, Nucleic acid hybridization, screening Procedure, Probe selection, immuno screening, functional complementation. Southern blotting, northern blotting.

Preparation of nucleic acid probes: DNA and RNA labeling techniques, nick translation , random priming, end labelling, radioactive and non- radioactive labels.

UNIT-IV

Site directed mutagenesis (cassette , primer extension, RT, real time, multiplex, inverse), DNA sequencing (Maxam-Gilbert, Sanger, pyro).

Production of Protein from Cloned Genes: Special vectors for expression of foreign genes in E. coli, General problems with the production of recombinant protein in E. coli. Production of recombinant protein by eukaryotic cells.

Suggested readings:

3. **Methods in Gene Technology by Dale, J.N., 1994, JAI Press Ltd. London, England.**
4. **Recombinant Principles of gene manipulation and genomics, primrose & Twyman 2006, Blackwell, U.K.**
5. **Gene cloning and DNA analysis: An introduction by T.A. Brown (5th Ed.) 2006, Blackwell Science Ltd.**
6. **Molecular cloning: A laboratory manual Vol. I-III Sambrook J. and Russel, David N. 2001 Cold Spring Harbar,**

BIOT-Sem-VI-I-P : GENETIC ENGINEERING (PRACTICAL)

Practical : 20 marks

Int. assessment : 05 marks

Total : 25 marks

Time : 3 hours

1. **Demonstration of PCR.**
2. **Demonstration of Southern blotting.**
3. **Preparation of competent cells.**

4. **Transformation of competent cells and blue/white selection.**

5. **Spectrophotometer analysis of DNA.**

BIOT-Sem-VI-II-T: BIOPROCESS ENGINEERING AND TECHNOLOGY

Theory : 67 marks

Int. assessment: 08 marks

Total : 75marks

Time : 3 hours

Instructions for paper setters and candidates

- **Set nine questions in all. Five questions to be attempted.**
- **Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).**
- **Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.**

Unit – I

Fundamental principles of biochemical engineering.

Sterilization of air and media sterilization, design of batch sterilization process.

Del factor, sterilization cycle, continuous sterilization process

Unit – II

Microbial growth kinetics Simple kinetics of microbial growth (Batch and Continuous, Feed Back System), yield coefficient, doubling time, specific growth rate, internal and external feedback systems, metabolic and Biomass productivities, effect of temperature and pH on the product formation

Unit – III

Design of fermenter:

Components of Fermenter, Aseptic operation of the fermenters, control and measurement equipment of fermenters, pH and DO probes, impeller and spargers,

Unit – IV

Downstream processing

Removal of microbial cells and other solid materials, foam separations, filtration, industrial filters, centrifugations and industrial centrifuges, cell Disruption, aqueous two phase extraction system, super critical extraction, whole broth process.

Waste water treatment for fermentation process

BIOT-Sem-VI-III-T : FOOD BIOTECHNOLOGY

Theory: 67 marks

Int. assessment: 08 marks

Total: 75 marks

Time: 3 hours

Instructions for paper setters and candidates

- **Set nine questions in all. All questions carry equal marks.**
- **Five questions to be attempted.**
- **Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).**
- **Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.**

UNIT – I

Food and Microorganisms: History and scope of Food biotechnology, food as substrates for microbes, factors affecting growth of microorganisms, Detection of microorganisms in food: Sampling plan & procedure for microbial analysis; Qualitative methods to isolate pathogenic microorganisms, test for bacterial toxins in foods; Quantitative methods for microbial enumeration: Direct enumeration, indirect estimations and standard and recommended methods; Applications of enzymes in food technology. .

UNIT – II

Principles of food preservation: Physical, chemical, and biological methods of preservations.

Contamination, preservation and spoilage of different kind of foods: Milk and milk products (milk, butter, yoghurt and cheese), beverages (beer, wine, tea and coffee), meat and fish products (sausages, vegetables and fruits.

UNIT – III

Food adulterants and food additives: Major food adulterants, types and their methods of assay, food additives their function and uses, flavoring agents, coloring agents and vitamins as food additives.

Fermented foods and their production: Bakers yeast, Bread, cheese, yoghurt, tofu, miso, tempeh, sauerkraut,meat and alcoholic beverages (beer and wine)

Production of algal, fungal and other microbial proteins(SCP and mushroom etc)

Probiotics, prebiotics,fortified and biofortified foods, functional foods, nutraceuticals, organic foods.

Genetically modified food (Golden rice, Favr savr tomato, protato, pomato etc)

UNIT –IV

Food and water borne diseases: Shigellosis, Salmonellosis, Cholera.

Food borne intoxications: Staphylococcal, Bacillus and Clostridium botulinum Exotoxins and Endotoxins, their mechanism of action

Rapid and advanced estimation methods (Immunoassays, nucleic acid probe)for detection of pathogens.

BIOT-Sem-VI-III-P: FOOD BIOTECHNOLOGY (Practicals)

Practical : 20 marks

Int. assessment : 05 marks

Total : 25 marks

Time : 3 hours

1. Isolation and identification of microorganisms in spoiled food (fungi and bacteria).

2. Inhibitory effect of low temperature on microbial growth.

3. Production and estimation of ethanol.

4. Estimation of lactose in milk.

5. Methylene blue reductase test (MBRT) for determination of quality of milk.

6. Plating the milk samples for microbial contamination.

7. Demonstration for the identification of mushrooms by spore prints.

8. Checking the effect of pasteurization of milk by alkaline phosphatase.

Reference Books:

1. Cappuccino J.G., Sherman N. (2007). Microbiology: A laboratory manual (Pearson Benjamin Cummings).

BIOT-Sem-VI-IV-T: GENOMICS AND PROTEOMICS

Theory : 67 marks

Int. assessment : 08 marks

Total : 75 marks

Time : 3 hours

Instructions for paper setters and candidates

Set nine questions in all. All questions carry equal marks. Five questions to be attempted.

Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

UNIT I

Introduction to Genomics, DNA sequencing methods – manual & automated: Maxam & Gilbert and Sangers method. Pyrosequencing, Genome Sequencing: Shotgun & Hierarchical (clone contig) methods, Computer tools for sequencing projects: Genome sequence assembly software.

UNIT II

Managing and Distributing Genome Data: Web based servers and softwares for genome analysis: ENSEMBL, VISTA, UCSC Genome Browser, NCBI genome. Selected Model Organisms' Genomes and Databases.

UNIT III

Introduction to protein structure, Chemical properties of proteins. Physical interactions that determine the property of proteins. Short-range interactions, electrostatic forces, van der waal interactions, hydrogen bonds, Hydrophobic interactions. Determination of sizes (Sedimentation analysis, gel filteration, SDS-PAGE); Native PAGE, Determination of covalent structures – Edman degradation.

UNIT IV

Introduction to Proteomics, Analysis of proteomes. 2D-PAGE. Sample preparation, solubilization, reduction, resolution. Reproducibility of 2D-PAGE. Mass spectrometry based methods for protein identification. De novo sequencing using mass spectrometric data.

PRACTICALS

1. **Use of SNP databases at NCBI and other sites**
2. **Use of OMIM database**
3. **Detection of Open Reading Frames using ORF Finder**
4. **Proteomics 2D PAGE database**
5. **Softwares for Protein localization.**
6. **Hydropathy plots**
7. **Native PAGE**
8. **SDS-PAGE**

SUGGESTED READING

BIOT-Sem-VI-V-T

INTELLECTUAL PROPERTY RIGHTS AND ETHICAL ISSUES IN BIOTECHNOLOGY AND ENTREPRENEURSHIP

Theory : 90 marks

Int. assessment : 10 marks

Total : 100marks

Time : 3 hours

Instructions for paper setters and candidates

Set nine questions in all. All questions carry equal marks.

Set two questions from each Unit, and each question should be further divided in two to three parts. Any one question to be attempted from each unit.

Five questions to be attempted.

Question number one will be compulsory having 7-10 short answer types covering the whole syllabus (Not objective type and no short notes).

Objective: To introduce the students to intellectual rights and how to use the current intellectual property system to protect and commercialize their biotechnological invention. This course also covers the ethical issues, controversies and social-ethical impact of biotechnology on society.

UNIT – I

IPR: Introduction to Intellectual Property Rights. Tangible and intangible property. Patents: Introduction to patent law and brief history (early GATT and TRIPS), conditions for patentability; procedure for obtaining patents, patent filing through PCT, rights of a patentee; patent infringements and litigation. Indian patent laws and amendments. Patents from an international perspective.

UNIT- II

Design, copyright and Trademark:

Copyright: Registration procedure and copyright authorities; assignment and transfer of copyright, copyright infringement and exceptions to infringement; software copyright.

Designs: Introduction to the law on industrial designs; registration and piracy; international perspective; commercial exploitation and infringement.

Trademark: Importance, Registration, Trademark infringement and piracy.

UNIT – III

Patenting in biotechnology: Biotechnology patents and its economic, ethical and depository considerations. Patentable subject matter and legal aspects of transfer of biotechnology in India. Other multilateral treaties & International conventions – Paris convention, CBD, UPOV, PGRFA. Writing a patent specification.

Information sources in patent literature search.

UNIT – IV

Entrepreneurship:

Entrepreneur and its types, Women Entrepreneurship. Selection of a product, Product line design and development processes, economics on material and energy requirement, stock the product and release the same for making

The basic regulations of excise: Demand for a given product, feasibility of its production under given constraints of raw material, energy input, financial situations export potential.

FIRST SEMESTER

PAPER I: PHYCOLOGY

Objective of the paper is to impart knowledge about Algae on various aspects like Classification, Life cycles, Thallus organization and Reproduction in various groups; Evolution, Habitats and Economic importance of algae.

Teaching methodology includes delivery of lectures by the teacher using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions in the class rooms. In practical, the students make observations and work on the plant materials using Microscopes, Micrometers, Computer and Image Projecting system and permanent glass slides of plant materials.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. Criteria for algal classification (pigments, reserve food, flagella, chloroplasts, pyrenoids, eye spots, endoplasmic reticular membrane etc.); Comparative account of important systems of classification (Fritsch, Round, Chapman and Lee).
2. Salient features: Cell structure, thallus organization, reproduction and broad classification of i) Cyanophyta ii) Xanthophyta iii) Bacillariophyta iv) Dinophyta.

UNIT-II

3. Salient features : Cell structure, thallus organization , reproduction and broad classification of v) Chlorophyta vi) Phaeophyta vii) Cryptophyta and viii) Rhodophyta.

UNIT-III

4. Diversity in algal habitats (terrestrial, freshwater and marine).
5. Thallus organization in algae including evolutionary trends.
6. Reproduction (vegetative, asexual and sexual), origin and evolution of sex, life cycles.
7. Current concepts and relationships of protochlorophycean algae.

UNIT-IV

8. Rhythms and bioluminescence in dinoflagellates.
9. Economic importance of algae (algal biofertilizers , algal blooms, algae as food and feed , uses in industries etc.)
10. Algae in Biotechnology.

PRACTICALS

Max. Marks :20

1. Algal collections from different habitats and their identification.
2. Morphology and reproductive stages of following genera:

Cyanophyta *: Chroococcus, Microcystis, Oscillatoria, Lyngbya, Nostoc, Anabaena, Gloetrichia, Cylindrospermum, Scytonema*.

Chlorophyta: *Volvox, Hydrodictyon, Chlorella, Pediastrum, Scenedesmus*, *Oedogonium, Bulbochaete, Cosmarium, Closterium, Zygnema, Sphaeroplea, Cladophora, Pithophora, Spirogyra, Caulerpa, Codium, Valonia, Halimeda, Acetabularia, Chara, Nitella, Coleochaete, Dreparnaldia.*

Xanthophyta *: Vaucheria, Botrydium.*

Bacillariophyta *: Pinnularia, Synedra, Navicula, Cyclotella.*

Phaeophyta : *Ectocarpus, Fucus, Laminaria, Dictyota, Desmortestia, Sporochnus, Sargassum.*

Rhodophyta : *Erythrotrichia, Porphyra, Nemalion, Batrachospermum, Corallina, Gelidium, Polysiphonia*

ESSENTIAL READINGS

.

1. Chapman, V.J. and D.J. Chapman. *The Algae.* ELBS and Macmillan , NY. 1977.
2. Lee, R. E., *Phycology,* Cambridge University Press, Cambridge, 2008
3. VanDen Hock, C., Mann, D.G. and Jahns, H. M. *Algae : An Introduction to Phycology,* Cambridge University Press, Cambridge, 1995.

SUGGESTED READINGS

1. Ahluwalia, A.S., (Ed.) *Phycology: Principles, Processes and Applications*, Daya Publishing House, New Delhi, 2003

3. Lee, R.E. *Phycology*. 4th Ed. Cambridge University Press, London. 2008.

PAPER II : BRYOLOGY

Objective of the paper is to impart knowledge about Bryophytes on various aspects like Classification, structural organization and developmental studies of gametophyte and sporophyte in various groups; Ecology, Water relations, Chemistry, Cytology, Fossil bryophytes, Origin and evolution, Experimental studies and Economic Importance.

Teaching methodology includes delivery of lectures by the teacher using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions in the class room. In practical the students make observations and work on the plant materials using Microscopes, Micrometers, Computer and Image Projecting system and permanent glass slides of plant materials.

Theory : 75(60A+ 15HT)
Practical : 25 (20A+5HT)

THEORY

Max. Marks: 60

NOTE: Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. General characteristics of Bryophytes: systems of classification with salient features of Anthcerotophyta, Marchantiophyta and Bryophyta.
2. Structure and development of sex organs in Bryophytes.
3. Economic Importance of Bryophytes.
4. Ecology of Bryophytes: Habitats, Growth forms, Bryophytes as Pollution Indicators.
5. Water Relations: Drought Tolerance ; Dessication and Rehydration ; Ectohydric ,Endohydric and Mixohydric mosses.

UNIT-II

6. Comparative structural organization of gametophyte and sporophyte; Asexual reproductive structures; distribution of sex organs; protective structures associated with archegonia and developing sporogonia; spore and elaters / peristome teeth ; spore dispersal mechanisms and spore germination in
    a) **Hornworts** (Anthocerotales)
    b) **Liverworts** (Calobryales, Jungermanniales, Metzgeriales, Marchantiales, Monocleales and Sphaerocarpales.)

UNIT-III

    c) **Mosses** (Sphagnopsida, Andreaeopsida – *Andreaea* and *Takakia* , Archidiopsida, and Peristomiopsida -- Tetraphidae, Buxbaumidae, Polytrichidae and Bryidae).

7. Experimental studies: Effect of various factors on protonemal differentiation and bud formation; Apogamy and Apospory.

UNIT-IV

8. Chemistry of Bryophytes: A brief account of distribution of various organic compounds in different groups of Bryophytes ; Chemistry in relation to taxonomy.
9. Cytological studies in Bryophytes: Chromosome numbers in major groups of Bryophytes, Polyploidy in brief, m-chromosomes and sex-chromosomes, Cytology in relation to taxonomy.
10. Fossil Bryophytes (A brief account).
11. Origin of Bryophytes.

PRACTICALS **Max. Marks : 20**

1. Structural details of *Marchantia, Asterella, Plagiochasma, Targionia, Pellia, Frullania, Porella, Notothylas, Anthoceros, Sphagnum, Pogonatum, Barbula, Bryum and Entodon* and *Thuidium.*
2. Study of diagnostic features of following genera: *Dumortiera, Athalamia, Conocephalum, Cryptomitrium, Reboulia, Riccia, Riccardia, Metzgeria, Blasia, Sewardiella, Plagiochila, Fissidens , Atrichum* , *Mnium* and *Thuidium.*
3. Field trips to familiarize with natural habitats, growth forms and diversity of bryophytes.
4. To study permanent slides / photographs of m-Chromosomes and Sex- chromosomes.

ESSENTIAL READINGS

PAPER III : MYCOLOGY AND MICROBIOLOGY

Objective of the paper is to impart knowledge about Classification, Mycelium, Reproduction in various groups of Fungi.; Nomenclature, Classification, Structure, reproduction, importance of Bacteria, Viruses, MLOs, Spiroplasmas, Viroids, Mycoviruses; Translocation and distribution in host plants, infection, replication and transmission of plant viruses.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions in the class rooms. In practical the students make observations and work on the plant materials using Microscopes, Micrometers, Computer and Image Projecting system and permanent glass slides of plant materials.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. Recent trends in the classification of Fungi.
2. General account of Myxomycota, Oomycota and Chytidriomycota

UNIT-II

3. General account of Zygomycota, Ascomycota , Basidiomycota and anamorphic fungi.

UNIT-III

4. Tissue systems in Fungi.
5. Types of Centrum development in Ascomycota.
6. Heterokaryosis and Parasexuality.
7. Mycorrhizal application in agriculture and plant growth.

UNIT-IV

8. Nomenclature, classification, morphology, translocation and distribution in host plants, infection, replication and transmission of plant viruses.
9. Nomenclature, classification, structure, reproduction, nutrition and economic importance of Eubacteria ; General account of Archaebacteria.
10. Brief account of MLOs, Spiroplasma, Viroids and Mycoviruses.

PRACTICALS

Max. Marks: 20

1. Study of morphological and reproductive structures of following genera :
   MYXOMYCOTA: *Stemonitis, Physarum.*
   OOMYCOTA: *Saprolegnia, Albugo, Peronospora, Phytophthora*, *Bremia.*
   CHYTIDRIOMYCOTA: *Synchitrium, Allomyces, Blastocladia.*
   ZYGOMYCOTA: *Mucor, Rhizopus, Pilobolus.*
   ASCOMYCOTA: *Protomyces, Aspergillus, Penicillium, Claviceps, Phyllactinia, Xylaria, Morchella, Peziza*
   BASIDIOMYCOTA: *Puccinia, Melampsora, Agaricus, Ustilago, Polyporus, Ganoderma, Cyathus, Hydnum , Geasterum.*
   ANAMORPHIC FUNGI: *Fusarium, Cercospora, Colletotrichum, Alternaria, Helminthosporium.*
2. Preparation of media to isolate fungi, bacteria and other microbes.
3. Isolation of *Rhizobium* from legume root nodules.
4. Sensitivity tests of bacteria using different antibiotics.

SUGGESTED READINGS

1. Alexopolous, C.J., C.W. Mims and M. Blackwell. *Introductory Mycology.* 4th Ed. John Wiley & Sons, New York. 880 pp. 2007.

PAPER IV : A) COMPUTER APPLICATIONS AND BIOSTATISTICS

B) LABORATORY TECHNIQUES

Objective: Now-a-days life sciences have become interdisciplinary. The aim of this paper is to converse and train the students with different modern biological and physico-chemical techniques employed in the study of biological materials.

This paper also aims to impart basic knowledge of Computer (Computer Hardware, software and programming languages etc.) and Biostatistics and use the information in analyzing the biological data.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector, LCD projector etc. The students also make group discussions in the class rooms. In practical the students learn the working of different instruments and computer.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY

Max. Marks : 60

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified

SECTION A : COMPUTER APPLICATIONS AND BIOSTATISTICS

UNIT-I

1. General awareness of Computer Hardware i.e., CPU and other peripheral devices.
2. Introduction to MS Office software, covering word processing, spread sheet & presentation software.
3. Introduction to internet and its applications.
4. Introduction to programming in C & its functions.
5. FORTRAN; Preparation of programme.

UNIT-II

1. Principles and practice of statistical methods in biological research samples and populations.
2. Basic statistics, average statistics of dispersion. Measures of central tendency and measures of dispersion.
3. Coefficient of variation, standard error, confidence interval.
4. Probability distribution, binomial, Poisson and normal.
5. Tests of statistical significance (Chi square – test, Z-test, F-test, Student t-Test).
6. Analysis of variance – one way ANOVA. Coefficient of correlation; Simple & multiple regression.

ESSENTIAL READINGS

1. Daniel, W.W. *Biostatistics: A foundation for Analysis in the Health Sciences*. Wiley and Sons, Singapore, 2006, pp. 755.
2. Kothari, C.R. *Research Methodology – Methods and Techniques*. 2nd revised ed. New Age International Publishers, India, 2009, pp.401.
3. Sinha, P.K. *Computer Fundamentals.* 4th Ed. B.P.B. Publication. 404 pp. 2003.

SUGGESTED READINGS

1. Hunt, R. and J. Shelly. *Computer and Common Sense.* 4th Ed. Prentice Hall, India. 224 pp. 2002
2. Dobbs, S. and Miller, J. *Statistics 1*. Cambridge University Press, UK, 2006, pp. 184
3 Dobbs, S. and Miller, J. *Statistics 2*. Cambridge University Press, UK, 2006, pp. 178.

SECTION B : LABORATORY TECHNIQUES

UNIT-III

1. Principles and applications of Light, Phase Contrast, Fluorescence, Scanning and Transmission Electron Microscopy.
2. Principles and applications of Tracer Techniques in Biology: Radioactive Isotopes and Half Life of isotopes; Autoradiography.
3. pH metery – Principles and applications.
4. Principles, procedure and application of Paper Chromatography, Thin Layer Chromatography , Gel filtration, Ion Exchange and Affinity Chromatography, High Pressure Liquid Chromatography.

UNIT-IV

5. Electrophoresis and Isoelectric focusing: Principle , working and applications of Electrophoresis.
6. Colorimetery and Spectrophotometery: Lambert Beer Law, Basic components, applications.
7. Centrifugation: Technique and principles; Preparative and Analytical Centrifugation.

PRACTICALS Max. Marks :20

1. Data collection, presentation, plots, Chi-square test, Goodness of fit, determination of correlation coefficient.
2. Genomic DNA isolation.
3. DNA and Protein analysis by Gel electrophoresis.
4. To demonstrate Beer's law using different dyes.
5. Preparation of Phosphate Buffers of different pH values.
6. Practicals pertaining to Chromatographic techniques: Column Chromatography (Exclusion and Affinity Chromatography), Paper Chromatography and Thin Layer Chromatography.
7. Practicals pertaining to centrifugation.

ESSENTIAL READINGS

1. Mahajan, B.K. *Methods in Biostatistics for Medical Students and Research Workers*. Jaypee Brothers Medical Publishers, India, 2006, pp. 341

PAPER V : ANATOMY OF ANGIOSPERMS

Objective: This paper deals with the structure, origin, differentiation and phylogeny of meristems cell, tissues and organs of the plant body.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students make observations and work on the plant materials using Microscopes, Micrometers, Camera Lucida, Computer and Image Projecting system and permanent glass slides of plant materials

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY

Max. Marks : 60

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **Shoot Development :** Various theories regarding the organization and activity of shoot apical meristem (SAM) ; Transition to flowering , Floral meristem and Floral development in *Arabidopsis* and *Antirrhinum* .
2. **Root development:** Organization of Root Apical Meristem (RAM); Vascular tissue differentiation; lateral roots .

UNIT-II

3. **Leaf growth and differentiation**: Phyllotaxy, Leaf development, differentiation of epidermis (with special reference to stomata and trichomes) and mesophyll, Kranz Anatomy and Leaf abscission.

UNIT-III

4. Structure, differentiation and phylogeny of Xylem; Reaction wood.
5. Structure, differentiation and phylogeny of Phloem

UNIT-IV

6. Transfer Cells.
7. Structure and activity of vascular and cork cambium.
8. Seed coat anatomy with reference to legumes and cereals.

PRACTICALS

Max. Marks : 20

1. Study of anomalous type of secondary growth through transverse sections.
2. Maceration of wood.
3. Study of living shoot apices .
4. Study of cyto-histological zonation in the shoot apical meristem and. examination of shoot apices in both T.S. and L.S. to show the origin and arrangement of leaf primordia.
5. Study of V.S. of various types of leaves.
6. Study of leaf epidermis.
7. Study of T.S. of Seed Coat.

ESSENTIAL READINGS

3. Fahn, A. *Plant Anatomy*. 3rd Ed. Pergamon Press, Oxford. 544 pp. 1989.

SUGGESTED READINGS

1. Esau, K. *Anatomy of Seed Plants*. John Wiley, New York. 550 pp. 1977.
2. Ray, F.E. and S.E.Eichhorn. *Esau's Plant Anatomy : Meristems, Cells and Tissues of the Plant Body: their Structure, Function and Development.* 3rd Ed. Wiley-Lis . 624 pp. 2006.
3. Steeves, T.A. and I. M. Sussex. *Patterns in Plant Development.* 2nd Ed. Cambridge Univ. Press, Cambridge. 408 pp. 1989.

SECOND SEMESTER

PAPER VI : PTERIDOPHYTES

Objective of the paper is to impart knowledge about Pteridophytes on various aspects like Classification, Structural organization and Developmental studies of sporophyte and gametophyte of extant and extinct Pteridophytes, Economic importance , Cytological and Experimental studies.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions in the class rooms. In the practical the students make observations and work on the plant materials (including fossils) using Microscopes, Micrometers, Computer and Image Projecting system and permanent glass slides of plant materials.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY

Max. Marks : 60

NOTE: Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. General characteristics, The emerging concepts and Classification of pteridophytes.
2. Geological Time Table ; Fossils- their types, formation and methods of study ; Calculation of age of rocks / fossils.
3. Distribution, habitat, range , organography, external and internal morphology of sporophyte, spores and their mechanism of dispersal, gametophytic generation and sexuality and embryogeny of following classes of Pteridophytes with reference to the genera mentioned :

A: PSILOPSIDA

i) Rhyniales : *Rhynia, Horneophyton, Yarravia, Cooksonia*
ii) Trimerophytales : *Trimerophyton, Psilophyton*

iii) Zosterophyllales : Zosterophyllum , *Kaulangiophyton, Crenaticaulis, Sawdonia*

B: PSILOTOPSIDA

Psilotales : *Psilotum* and *Tmesipteris* ; A discussion on the systematic position of this group in pteridophytes.

UNIT-II

C: LYCOPSIDA

i) Protolepidodendrales : *Drepanophycus, Asteroxylon, Protolepidodendron,*
ii) Lycopodiales : A brief account of *Lycopodium* and *Phylloglossum*
iii) Lepidodendrales : *Stigmaria*
Family Lepidodendraceae , Family Bothrodendraceae,
Family Sigillariaceae, Family Pleuromeiaceae
iv) Isoetales : *Isoetes, Nathorstiana* , Brief account of *Stylites*
v) Selaginellales : *Selaginella* (A brief account)

D: SPHENOPSIDA

i) Hyeniales : *Hyenia*
ii) Sphenophyllales : *Sphenophyllum, Shenophyllostachys, Eviostachya, Cheirostrobus*
iii) Calamitales : *Asterocalamites, Protocalamites, Calamites, Calamostachys,Paleostachys*
iv) Equisetales : *Equisetum* (A brief account)

UNIT-III

E: PTEROPSIDA

a) Primofilices

i) Cladoxylales : *Cladoxylon, Pseudosporochnus*
ii) Coenopteridales : *Stauropteris, Botryopteris, Rhacophyton*

b) Eusporangiatae

Brief account of Marattiales and Ophioglossales
i) Marattiales: *Psaronius, Angiopteris, Marattia*
ii) Ophioglossales : *Ophioglossum, Botrychium , Helminthostachys*

c) Osmundidae : Osmundales – *Osmunda*

d) Leptospangiatae

General Account of Marsileales, Salviniales and Filicales
i) Marsileales : A brief account
ii) Salviniales : *Salvinia, Azolla*
iii) Filicales: General account of sporophyte morphology, stellar organization, soral and sporangial characters, gametophytes and embryogeny.

UNIT-IV

4. Apogamy and Apospory
5. Reproductive Biology of ferns.
6. Heterospory and its significance.
7. Cytological evolution and Species Concepts – Cytological evolutionary role of polyploidy in the evolution of pteridophytes.
8. Economic importance of Pteridophytes

PRACTICALS **Max. Marks :20**

1. Study of morphology and anatomy of vegetative and reproductive organs using cleared whole mounts, sections , macerations and permanent preparations of following living genera :
Psilotum, Lycopodium, Isoetes, Selaginella, Equisetum, Angiopteris, Ophioglossum, Botrychium, Osmunda, Marsilea, Salvinia, Azolla, Lygodium, Hymenophyllum,

Cyathea, Pteris, Asplenium, Dryopteris, Polystichum, Adiantum, Polypodium, and *Lepisorus.*

2. Study of some fossil pteridophytes through specimens and permanent slides .
3. Preparation of permanent slides / charts.
4. Field trips to familiarize with the diversity of pteridophytes in their natural habitats.

ESSENTIAL READINGS

1. Khullar, S.P. *An Illustrated Fern Flora of West Himalayas* (Vols. I and 2). International Book Distributors, Dehradun, 2000.

3. Sporne, K.R. *The Morphology of Pteridophytes*. B.I., Publications, Bombay, Delhi, Madras, 1982.

SUGGESTED READINGS

1. Parihar, N.S. *An Introduction to Embryophyta Vol. II, Pteridophytes*. Central Book Depot, Allahbad. 1965.
2. Pryer, K.M., H.Schneider, A.R.Smith, R.Cranfill, P.G.Wolf, J.S.Hunt and S.D.Sipes. *Horsetails and Ferns are a monophyletic group and the closest living relatives to seed plants*. Nature 409: 618-622, 2001.
3. Raghavan, V. *Developmental Biology of Fern Gametophytes (Developmental and Cell Biology Series).* Cambridge Univ. Press, Cambridge. 384 pp. 1989.

PAPER VII : GYMNOSPERMS

Objective of the paper is to impart knowledge about Gymnosperms on various aspects like classification, structural organization and developmental studies of sporophyte and gametophyte of extant and extinct Gymnosperms, Economic importance , Cytological studies and Phytogeography.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions in the class rooms. In practical the students make observations and work on the plant materials(including fossils) using Microscopes, Micrometers, Computer and Image Projecting system and permanent glass slides of plant materials.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. General characteristics and Classification of Gymnosperms (Broad outlines).
2. Detailed study of the vegetative morphology, reproductive organs, structure and evolution of the following orders and families (with reference to the genera mentioned)

I . CLASS : PROGYMNOSPERMOPSIDA

i) ORDER : ANEUROPHYTALES
Family: Aneurophytaceae : *Aneurophyton, Tetraxylopteris, Triloboxylon, Proteokalon*

ii) ORDER : PROTOPITYALES
Family : Protopityaceae : *Protopitys*

iii) ORDER : ARCHAEOPTERIDALES
Family : Archaeopteridaceae : *Archaeopteris*

UNIT-II

II. CLASS : CYCADOPSIDA

i) ORDER : PTERIDOSPERMALES
a) Family Lyginopteridaceae : *Lyginopteris, Lagenostoma, Telangium, Crossotheca*
b) Family Glossopteridaceae : *Vertebraria, Glossopteris,*
c) Family Medullosaceae : *Medullosa, Codonotheca Pachytesta,Whittleseya, Goldenbergia*
d) Family Caytoniaceae : *Sagenopteris, Caytonia*

ii) ORDER : BENNETTITALES (CYCADEOIDEALES)
a) Family Bennettitaceae (= Cycadeoideaceae) : *Bennettites* (= *Cycadeoidea*)
b) Family Williamsoniaceae : *Williamsonia*
c) Family Wiellandiellaceae : *Wielandiella, Williamsoniella*

iii) ORDER : CYCADALES
a) Family Cycadaceae : *Macrozamia, Zamia*

iv) ORDER : PENTOXYLALES
a) Family Pentoxylaceae : *Pentoxylon, Nepanioxylon, Carnoconites, Sahnia*

UNIT-III

III CLASS : CONIFEROPSIDA

i) ORDER : CORDAITALES
Family Cordaitaceae : *Cordaites, Cordianthus, Mitrospermum*

ii) ORDER : CONIFERALES
a) General account with reference to the families : Pinaceae, Taxodiaceae, Podocarpaceae, Cephalotaxaceae, Araucariaceae, Sciadopityaceae
b) Range of form, structure and evolution of Female Cones in Coniferales

iii) ORDER : GINKGOALES
Family Ginkgoaceae : *Ginkgo*

iv) ORDER : TAXALES
Family Taxaceae : *Taxus*

IV CLASS : GNETOPSIDA

i) ORDER : GNETALES
a) Family Gnetaceae : *Gnetum*
b) Family Welwitschiaceae : *Welwitschia*

UNIT-IV

3. Male gametophytes in Gymnosperms.
4. Distribution of Living Gymnosperms in India.
5. Structure and Evolution of Archegonium in Gymnosperms.
6. General survey of cytology of Gymnosperms .
7. Economic importance of gymnosperms.

PRACTICALS Max. Marks : 20

1. Study of morphology and anatomy of vegetative and reproductive parts of *Cycas, Zamia, Cedrus, Abies, Pinus, Picea, Cupressus, Cryptomeria, Agathis, Araucaria, Taxodium Taxus, Cephalotaxus , Ginkgo, Ephedra* and *Gnetum.*
2. Study of some Fossil Gymnosperms through specimens and permanent slides.
3. Field trips to familiarize various gymnosperms in nature and field identification of Indian Gymnosperms.
4. Preparation of permanent slides / charts.

ESSENTIAL READINGS

1 Beck, C. E. *Gymnosperm Phylogeny,* Bot. Rev., 51: 176-294, 1985.
2. Bhatnagar, S.P. and Moitra, A. *Gymnosperms*. New Age International Limited, New Delhi, 1996.
3. Sharma, O.P. ad Dixit, S. *Gymnosperms*. Pragati Prakashan, Meerut, 2001.

SUGGESTED READINGS

1. Meyen, S.V. *Basic Features of Gymnosperms, Systematics and Phylogeny as Evidenced by the Fossil Record,* Bot. Rev., 50 : 1-112, 1984.
2. Rothwell, G.W. *The Role of Comparative Morphology and Anatomy in Interpreting the Systematics of Fossil Gymnosperms*, Bot. Rev., 51: 318-327, 1985.

PAPER VIII : ANGIOSPERM MORPHOLOGY, TAXONOMY AND PHYLOGENY

Objective of the paper is to impart knowledge about Angiosperms on various aspects like Taxonomy, Phylogeny, Classification, Botanical gardens, Herbaria, Floras, Manuals, Periodicals and Botanical Survey of India and Biodiversity and structural organization of vegetative and reproductive organs of various groups.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions in the class rooms. In practical the students study flowers of different families.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY Max. Marks : 60

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the

whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. Principles of Plant Classification with emphasis on modern tools of taxonomy ; Taxonomy as a SYNTHETIC DISCIPLINE , Numerical Taxonomy, Chemotaxonomy, Serology and Taxonomy, Biosystematics.
2. Taxonomic literature, General Indexes, Floras, Manuals, Important periodicals with emphasis on Indian floristics.
3. Important Botanical Gardens and Herbaria.
4. Botanical Survey of India – its organization and role.
5. Botanical Nomenclature and International Code of Botanical Nomenclature.

UNIT-II

6. Phylogenetic systems of classification - Hutchinson, Cronquist , Takhtajan , Dahlgren and Thorne.
7. Phylogeny of Angiosperms: Origin, Evolution and inter-relationship of dicots and monocots.

UNIT-III

8. Salient features of following families:

(a) DICOTYLEDONS

Ranunculaceae, Magnoliaceae , Fumariaceae, Cruciferae, Papaveraceae, Capparidaceae, Caryophyllaceae, Malvaceae, Sterculiaceae, Rutaceae, Meliaceae, Rhamnaceae, Anacardiaceae, Leguminosae, Rosaceae, Combretaceae, Myrtaceae, Solanaceae , Lythraceae, Cucurbitaceae, Cactaceae, Umbelliferae, Compositae, Primulaceae, Oleaceae, Asclepediaceae, Apocynaceae, Boraginaceae, Scrophulariaceae, Bignoniaceae, Acanthaceae, Labiatae Verbenaceae, Amaranthaceae, Polygoniaceae, Nyctaginaceae, Euphorbiaceae, and Cannabinaceae.

UNIT-IV

(b) MONOCOTYLEDONS:

Orchidaceae, Cannaceae, Amaryllidaceae, Liliaceae, Palmae, Araceae, Cyperaceae and Graminae.

9. The Species Concept, Taxonomic hierarchies : Species, Genus, Family and other Categories.
10. Evolution of Stamen and Carpel.

PRACTICALS **Max. Marks : 20**

1. Study of morphology, primitive and advanced characters of cultivated and wild representatives of various families. Study of basic structure of flower, variations, floral parts in detail, floral symmetry, insertion of floral parts etc.
2. Location of key characters and use of keys to derive families.
3. Field study of angiosperms in different types of habitats and preparation of Plant album.
4. Training in using floras for identification of specimens described in field or class.

PAPER IX: REPRODUCTIVE BIOLOGY OF ANGIOSPERMS

Objective of the paper is to impart knowledge about various biological aspects of reproduction in Angiosperms like structure of male and female Gametophyte, Palynology, Pollination, Pollen-pistil interaction, Self incompatibility, Apomixis, Fertilization, Endosperm, Embryo and Seed formation.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students make observations and work on the reproductive parts of the plant materials using Microscopes, Micrometers, Computer and Image Projecting system and permanent glass slides of plant materials.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE: Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer /MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified

UNIT-I

1. **Apomixis**: Types and evolutionary significance.
2. **Male Gametophyte:** Structure of anthers; Microsporogenesis; Role of tapetum; Pollen development; Sperm dimorphism.
3. **Palynology:** Pollen wall structure; Male sterility; Hybrid seed production; Pollen viability and storage.

UNIT-II

4. **Female Gametophye** : Ovule development ; Megasporogenesis; organization of Embryo sac, structure of embryo sac cells.
5. **Pollination, Pollen-pistil interaction and fertilization:** Floral characteristics; Pollination mechanisms and vectors ; breeding systems; structure of the pistil ; Pollen-stigma interactions and pollen tube growth and guidance.

UNIT-III

6. Sporophytic and gametophytic self – incompatibility (cytological , biochemical and molecular aspects).
7. Double fertilization, *in vitro* fertilization.

UNIT-IV

8. **Endosperm**: Development and types.
9. **Embryo**: Development of embryo in Monocots and Dicots.
10. **Seed**: Structure and formation.

PRACTICALS

Max. Marks: 20

1. Study of microsporogenesis and gametogenesis in sections of anthers.
2. Examination of modes of anther dehiscence and collection of pollen grains for microscopic examination (maize , grasses, *Cannabis sativa, Crotolaria, Tradescantia, Brassica, Petunia, Solanum melongena* etc.
3. Tests for pollen viability using stains and *in vitro* germination . Pollen germination using hanging drop and sitting drop cultures, suspension culture and surface culture.
4. Study of ovules in cleared preparations ; study of monosporic , bisporic and tetrasporic types of embryo sac development and embryos through examination of permanent stained serial sections
5. Field study of several types of flowers with different pollination mechanisms (Wind pollination, Bee / butterfly pollination, Bird pollination).

ESSENTIAL READINGS

PAPER X : PLANT PATHOLOGY

Objective of the paper is to impart knowledge on various aspects of Plant Pathology like Symptomatology, Defence mechanisms, Host Parasite interactions, Role of enzymes and toxins in pathogenesis, Nutrition of fungi and Disease forecasting . It also aims to study the Etiology, Epidemiology and Control of different plant diseases caused by Fungi and other micro-organisms.

Teaching methodology includes delivery of lectures by the teacher using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students make observations and study the diseased specimens using Microscopes, Micrometers, Computer and Image Projecting system and permanent glass slides.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY

Max. Marks: 60

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. History, concept of plant diseases.
2. Role of enzymes and toxins in pathogenesis.
3. Defense mechanism.
4. Host-parasite interactions.

UNIT-II

5. Disease forecasting and assessment.
6. Principles of Plant Disease control; Biocontrol
7. Nutrition in Fungi.

UNIT-III

8. Etiology , epidemiology and control of following diseases:

    i) Paddy: Paddy Blast, Brown Leaf Spot, Bacterial Blight
    ii) Wheat: Rusts, Bunt and Smuts, Tundu Disease
    iii) Maize: Smut leaf blight, powdery mildew
    iv) Sugarcane: Red Rot, Smut
    v) Grapes: Downy and Powdry Mildews
    vi) Peach: Leaf Curl
    vii) Groundnut: Tikka disease
    viii) Apple: Apple Scab
    ix) Mustard: White Rust, Downy Mildew
    x) Potato: Early and Late Blight, Wart Disease
    xi) Linseed: Rust
    xii) Damping off of the seedlings
    xiii) Ergot of Rye

UNIT-IV

9. Diseases caused by plant viruses, MLOs, Spiroplasma, Viroids and Mycoviruses: General symptoms and Principles of Control.

PRACTICALS

Max. Marks: 20

1. Study and diagnosis of plant diseases mentioned in Theory syllabus.
2. Isolation, purification and single spore culture of pathogens.

ESSENTIAL READINGS

SECOND YEAR
THIRD SEMESTER

PAPER XI : MOLECULAR BIOLOGY

Objective of the paper is to impart knowledge about various aspects of Molecular Biology like Chemical nature and Biosynthesis of Genetic material, Mechanism of Translation, Control function of genes, Cancer, Antigens, Cell cycle and Apoptosis.
Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students learn techniques of histochemical localization, extraction and estimation of DNA, RNA and Protein and Antigen- antibody reaction.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer /MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified

UNIT-I

1. **Cell cycle and Apoptosis & control mechanisms**: Role of cyclins and cyclin dependent kinases, mechanism of programmed cell death.
2. **Chemical Nature of Genetic Material** : Nomenclature, composition and structure of nucleic acids; three dimensional structure of DNA (Prokaryotes, eukaryotes and viral); shape of DNA studied from various physico-chemical properties *(A-, B- , Z-DNA)* ; Structure and functions of different types of RNA ; Biosynthesis of Nucleotides and Biological importance of the nucleotides.

UNIT-II

3. Mechanism of Nucleic Acid Biosynthesis :

a) Replication of DNA (Double-stranded and single stranded); rolling circle model of replication; types of DNA polymerase, DNA topoisomerase, DNA ligase, DNAase, Reverse transcriptase.

b) Biosynthesis of different types of RNA: Transcription factors and machinery, Formation of Initiation complex, Transcription activators and repressors, RNA polymerases, elongation and termination, RNA Processing: RNA editing, Splicing, Polyadenylation, Capping ; RNA transport.

UNIT-III

4. **Mechanism of Translation:** Structure of ribosomes; initiation, elongation and termination of polypeptide chain; Translational proof reading; post-translational processing of polypeptide chain; Inhibitor of protein synthesis .
5. **Control Functions of the Gene :** Constitutive and induced genes; Regulatory genes, structural genes and repressors; Regulation of gene expression in phages; Regulation of gene expression in Prokaryotes; operon model, Role of cAMP in the transcription of operon, lactose and arabinose operons; Regulation of gene expression in eukaryotes, histone, non-histone proteins; different models of control, translation enzymatic and hormonal control.

UNIT-IV

6. **Cancer :** Biochemistry and molecular biology of cancer, Genetic rearrangements in progenitor cells, Oncogenes and Tumour suppressing genes, Cancer and Cell cycle , Virus induced cancer , Metastasis, Interaction of cancer cells with normal cells, Apoptosis, Therapeutic interventions of uncontrolled cell growth, Chemical carcinogenesis.
7. **Antigen :** Structure and functions of different clauses of immunoglobulins; Primary and Secondary immune response; lymphocytes and accessory cells; Humoral and Cell Mediated Immunity ; MHC; Mechanism of Immune response and generation of immunological diversity; Genetic control of immune response, Effector mechanisms; Application of Immunological principles (Vaccines and Diagnostics).

PRACTICALS Max. Marks: 20

1. Histochemical localization of DNA, RNA and Proteins.
2. To draw a standard curve of proteins
3. Estimation of protein content of plant tissues by Lowry's method.
4. Extraction and estimation of DNA contents of plant material.
5. Extraction and estimation of RNA contents of plant material.
6. Demonstration of Antigen – Antibody reactions.

ESSENTIAL READINGS

PAPER XII : PLANT PHYSIOLOGY

Objective of the paper is to impart knowledge about various aspects of Plant Physiology like Cellular organelles, Membranes, Water relations of plants, Inorganic nutrition , Photosynthesis, Respiration, Nitrogen metabolism, Phytohormones, Growth, Stress physiology and Role of plant physiology in agriculture.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions in the class rooms. In practical the students perform experiments pertaining to the syllabus using different equipment.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer /MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **Structural organization and function of intracellular organelles** : Cell wall, Nucleus, mitochondria, Endoplasmic Reticulum, Golgi bodies, Peroxisomes, Lysosomes, Vacuoles, Plastids, Structure and function of cytoskeleton and its role in motility.
2. **Membrane structure and function** : Structure of model membrane, Lipid bilayer and membrane protein, diffusion, osmosis, ion channels, active transport, ion pumps, mechanism of sorting and regulation of intracellular transport, electrical properties of membranes.
3. **Water Relations of Plants:** Modern thermodynamic concepts of physical state of water in plant cells and tissues, movement of water in the Soil – Plant – Atmosphere Continuum. Transpiration, stomatal control and mechanism of guard cell movement.

UNIT-II

4. **Inorganic Nutrition:** Occurrence, availability and physiological roles of *various* elements, ion uptake and active and passive transport, Role of calmodulin, phloem transport.
5. **Photosynthesis :** Energy pathways in photosynthesis, Chloroplast as an energy transducing organelle, composition and characterization of photosystems I and II, electron flow through cyclic and non-cyclic photophosphorylation, pathway of CO_2 Fixation, differences between C_3 and C_4 photosynthesis, different kinds of C_4 pathways, CAM pathway – occurrence, biochemical events, and adaptive advantage. Regulation of photorespiration, Factors affecting photosynthesis, photorespiration and photophosphorylation.
6. **Respiration***:* Glycolysis, Krebs cycle and Electron Transport Chain (Cytochrome System), Gluconeogenesis, Factors affecting respiration.

UNIT-III

7. **Nitrogen Metabolism :** Nitrogen fixation of free living and symbiotic organisms, mechanism of Nitrogen fixation, Soil nitrogen sources, nitrogen uptake and assimilation, nitrate reductase system and induction, Light substrate-controlled induction, interrelationship between photosynthesis and nitrogen metabolism, transport of nitrogen in plants.
8. **Phytohormones :** Auxins, gibberellins, cytokinins, abscissins and ethylene : their transport, biosynthesis, physiological roles and mechanism of action; phenols, synthetic regulators, retardants and inhibitors.

UNIT-IV

9. **Growth :** Process, phases and dynamics of growth. External and internal factors affecting growth, growth and yield analysis, Source – Sink relationship, photoperiodism, phytochrome, endogenous rhythms, tropisms. Seed and bud dormancy and germination.
10. **Stress Physiology:** Mechanism of plant response to water (low and high), temperature (low and high), Salt (Salinity and Alkalinity) and biotic stresses (Pathogens and insects).
11. Applications of Plant Physiology in Agriculture.

PRACTICALS

Max. Marks : 20

1. Experiments pertaining to photosynthesis, respiration and water relations.
2. Determination of water potential by various methods.
3. Determination of Chlorophyll a and Chlrophyll b ratio in C3 and C4 plants.
4. Spectroscopic determination of Chrophyll a , Chlorophyll b , Carotenoids and Anthocyanin under varied environmental conditions.
5. Experimental study of hormonal effects in plant material.
6. Bioassays of hormones.
7. Study of seed germination as effected by different factors.
8. Experimental study of stress physiology.

ESSENTIAL READINGS

PAPER XIII: BIOTECHNOLOGY

Objective of the paper is to impart knowledge about various aspects of Plant Biotechnology like Concept, Scope, Tools, Tissue Culture Techniques, Protoplast Culture and Somatic Hybridization, Anther and Pollen Culture, Recombinant DNA Technology, Biosensors and Application of Biotechnology in Medicines , Agriculture, Transgenic plants , Industry and Pollution control etc.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students perform experiments pertaining to the syllabus using different equipment.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY

Max. Marks : 60

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **History and Scope of Biotechnology and tools.**
2. **Tissue Culture Techniques**: Introduction to the techniques of plant tissue culture, concept of cellular totipotency, Nutritional requirements, cell and organ differentiation, Somaclonal variation, Somatic embryogenesis, Mentor pollen technology, Embryo culture, Embyro rescue, Germplasm storage including Cryopreservation.

UNIT-II

3. **Protoplast Culture and Somatic Hybridization:** Isolation of protoplasts, culture and fusion methods, selection of fusion products, production of hybrids and cybrids.
4. **Anther and Pollen Culture***:* Culture procedures for the induction of haploids, media and nutritional requirements, significance of haploids.

UNIT-III

5. **Recombinant DNA Technology:** Isolation and purification of DNA from plant cells, DNA sequencing, DNA engineering through cutting and joining DNA molecules, Restriction Endonucleases, Ligases.
6. **Application of Biotechnology** in Medicines, Agriculture, Transgenic production and role in Human Welfare.

UNIT-IV

7. **Scope and applications of Microbes** *in* (a) Agriculture with special reference to Biological N_2 fixation, (b) Industry Fermentation (Ethanol, Cheese, Curd) (c) Food (Single Cell Protein), (d) Pollution (degradation of pesticides and Hydrocarbons) and (e) Biogas Production.
8. **Biosensors:** Principles of detection and Applications.
9. **Biosafety and IPR** (a) Objectives of biosafety, guidelines, risk assessment, containment and planned introduction of GMOs and GEMs (b) Intellectual property and protection of IPR, protection of Biotechnological inventions, PBR and management of IPR.

PRACTICALS **Max. Marks :20**

1. Composition and preparation of various culture media :

(a) Knop's medium, (b) Knudson's medium, (c) Moore's medium

2. (d) Murashige & Skoog's medium.
3. Inoculation of Plant Materials, , leaf, root, stem.
4. Demonstration and or experimentation to study callus induction, organogenesis, plant regeneration, anther culture, embryo culture, protoplast isolation and fusion *in vitro*.
5. Visit to university/regional laboratories for demonstration of modern instruments employed in recent biotechnological techniques.

ESSENTIAL READINGS

PAPER XIV : CYTOGENETICS

Objective of the paper is to impart knowledge about various aspects of Cytogenetics like Chromatin organization, types of chromosomes and karyotype, Structural and numerical changes in chromosomes, Molecular cytogenetics, Restriction mapping, Alien gene transfer, Transposons, Mutations , DNA Damage and DNA Repair mechanisms.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students study different types of chromosomes, mitosis and meiosis of diploids. They also study the meiosis of polyploids and translocation heterozygotes.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer /MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **Chromatin Organization:** Chromosome structure and packaging of **DNA**; Molecular organization of centromere and telomere; nucleolus and ribosomal RNA genes; Unique and Repetitive DNA ; Euchromatin and heterochromatin.
2. **Karyotype** : Karyotype analysis ; Karyotype evolution; Various banding techniques and their uses.
3. **Specialized types of chromosomes**: polytene, lampbrush, B- chromosomes and sex chromosomes.

UNIT-II

4. **Structural changes in Chromosomes:** Origin, meiosis, breeding behaviour and evolutionary significance of Duplication, Deficiency, Inversion and Translocation heterozygotes ; Translocation tester sets; Robertsonian translocations ; B-A translocations.
5. **Numerical Changes in Chromosomes:** Origin, occurrence, production and meiosis of Haploids, Aneuploids and Euploids; origins and production of Autopolyploids; chromosome

and chromatid segregation; Allopolyploids; types, genome constitution and analysis; induction and characterization of Trisomics and Monosomics; Use of monosomics and trisomics in chromosome mapping.

UNIT-III

6. **Restriction Maps and Molecular Genetic Maps:** Restriction mapping RFLP as marker for mapping; chromosome walking; *in situ* hybridization as an aid in physical mapping of chromosome, FISH, GISH; chromosome jumping; Random amplified polymorphic DNA and AFLP techniques.
7. **Molecular Cytogenetics :** Nuclear DNA contents; C-value paradox, cot curve and its significance; Southern Northern and Western Blotting Techniques, Polymerase Chain Reaction.
8. **Alien Gene Transfer through Chromosome Manipulations:** Transfer of whole genome, transfer of individual chromosomes and chromosome segments; methods for detecting alien chromatin, production, characterization and utility of alien addition and substitution lines.

UNIT-IV

9. **Transposable Elements in prokaryotes and eukaryotes**: Cut and Paste transposons, Replicative transposons and Retrotransposons; Mutations induced by transposons.
10. **Mutations:** Spontaneous and induced mutations; physical and chemical mutagens; molecular Basis of gene mutations, site-directed mutagenesis applications of mutations.
11. **DNA damage and repair mechanisms**: Sources and types of DNA damage. Light dependent repair, Base Excision repair, Nucleotide Excision repair, Mismatch repair, Double- strand breaks Repair and Error-prone repair; Prokaryotic SOS response and Eukaryotic transcriptional response to DNA damage.

PRACTICALS

Max. Marks : 20

1. Study of meiosis in materials *Allium, Phlox, Chrysanthemum, Delphinium, Papaper*, Pollen and seed fertility and fruit set.
2. Mitotic studies and Karyotype analysis.
3. Linear differentiation of chromosomes through banding techniques, such as G-banding, C-banding and Q-banding (Photographs/Slides).
4. Orcein and Feulgen staining of the salivary gland chromosomes of *Chironomas and Drosophila* (Photographs/Slides).
5. Study of B chromosomes using maize or any other appropriate material.
6. Induction of polyploidy using colchicines, different methods of the application of colchicines.
7. Meiosis of complex translocation heterozygotes.

ESSENTIAL READINGS

PAPER XV: ECOLOGY AND ENVIRONMENT

Objective of the paper is to impart knowledge about various aspects of Ecology and Environment like Plant Communities and Ecosystems, Population Ecology, Biosphere Reserves, Biogeochemical cycles, Biodiversity and its conservation strategies, Pollution, Natural Resources and Non-conventional sources of energy, Climate change, Global Warming, Ozone depletion, Alien plant's invasion and Weed management.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students study the soil samples for pH, conductivity, water holding capacity etc. They also study the ecosystems using Quadrat methods.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer /MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **Environment & Ecosystem:** Concept and Principles.
2. **Population Ecology:** Characteristics of a population, Population growth curve, Population regulation, Life history strategies, Concept of metapopulation – Demes and dispersal, Intrdemic extinctions, Age structured populations.
3. **Plant Communities:** Definition, quantitative characters of Plant Communities. Different sampling techniques to study quantitative characters of plant communities.

UNIT-II

4. **Biosphere Reserve :** The concept, Major functions, Nilgiri Biosphere Reserve (a brief account)
5. **Bio-Geochemical Cycles:** General account types, brief account of the following bio-geochemical cycles: Carbon cycle, Nitrogen cycle, Phosphorus cycle and Sulphur cycle. .
6. **Biodiversity:** Concept, level, measuring of biodiversity; significance in terms of economic, spiritual, scientific, educational, ecological and genetical values; reasons for depletion, magnitude, distribution and conservation strategies; diversity loss from monoculture plantations. Concepts of phytogeography: Endemism, Hotspots and hottest hotspots; Plant Explorations; Invasions and Introductions.

UNIT-III

7. **Pollution:** Definition, different types of pollutants. **Air pollution;** different pollutants of air, control of Air pollution; **Water pollution** : different sources of water pollution, control of water pollution; **Land pollution** : sources, control of land pollution ; Bioremediation and Phytoremediation.

8. **Management and Conservation of Natural Resources :** Aims and objectives of conservation; renewable and non-renewable resources; special interest and total ecosystem conservation policy; maintenance of ecological processes; management of agriculture, forest and soil; preservation of plant genetic diversity; conservation strategies required at national and international level, sustainable development.
9. **Non Conventional Sources of Energy:** Solar Energy, Hydro Power, Wind Power, Biogas, Geothermal Energy, Ocean Thermal Energy, Tidal Energy, Wind Energy.

UNIT-IV

10. **Ozone Depletion:** Reasons and its effects on plants, methods to check ozone depletion.
11. **Invasion of Alien Plants;** Concept, ecological impact and management
12. **Global Warming and Climate Change:** Reasons, effects and the techniques used to control global warming.
13. **Weed Management:** The impact, use and ecological role of weeds in agro-ecosystems, weed characteristics related to success; Major weeds of the world; Ecological approach to weed management, Problems of the weeds; Allelopathy, its mode and Exploitation in weed management.

PRACTICALS

Max. Marks: 20

1. Techniques for collection of soil samples. Chemical analysis of soil samples taken from different types of soils and to assess their suitability for healthy plant growth.
2. To determine soil pH, conductivity, soil texture and water holding capacity of soil.
3. Chemical analysis of underground water samples taken from different depths and to assess its suitability for healthy plant growth.
4. To work out the size of the quadrat and number of Quadrats required to study the ecosystem of a given locality.
5. To determine density, abundance and frequency of species by quadrat method.
6. To determine the Importance Value Index (IVI) and Species Diversity Index of grassland ecosystem.
7. To study the stomatal behaviour in response to herbicides and pesticides.

ESSENTIAL READINGS

1. Primack, R.B. *Essentials of Conservation Biology*. Sinauer Associates, USA, 2010, pp. 601.
2. Singh, J.S., Singh, S.P. and Gupta, S.R. *Ecology, Environmental Science and Conservation*. S. Chand Publishing, India. 2015, pp. 929.
3. Stiling, P. *Ecology: Theories and Applications*. Prentice Hall, India, 2002, pp. 403

SUGGESTED READINGS

1. Odum, F.P. *Fundamentals of Ecology.* 3rd Ed. W.B. Saunders & Co. Philadephia, U.S.A. 534 pp. 1971.
2 Shukla, R.S.&P.S. Chandel. *Plant Ecology and Soil Science.* S.Chand & Company Ltd., ND.552 pp. 1993.
3. Sharma, P.D. *Ecology and Environment.* Rastogi Publications, Shivaji Road, Meerut, 660 pp. 1996.

FOURTH SEMESTER

PAPER XVI : PLANT BIOCHEMISTRY

Objective of the paper is to impart knowledge about various aspects of Plant Biochemistry like Bioenergetics, Role of Water, Structure, types, properties and metabolism of Amino acids and Proteins, Enzymes, Carbohydrates and Lipids ; Compounds of energy transfer and Redox reactions, Catabolism and Generation of phosphate bond energy ; Vitamins and Secondary metabolites.
Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students perform experiments pertaining to the syllabus using different equipment.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer /MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **Bioenergetics:** Concept of free energy changes, Laws of Thermodynamics, Exergonic and Endergonic Reactions, Entropy and Energy, Free Energy and Equilibrium Constant, Redox potential.
2. **Water:** Structure and Properties ; Weak intereactions in aqueous systems, Ionization of water Weak acids and Weak bases; Buffering against pH changes in biological systems, Henderson-Hassalbach equation. The fitness of the aqueous environment for living organisms.

UNIT-II

3. **Amino acids and Proteins:** Structure types, properties and Metabolism of Amino acids; Primary, Secondary, Tertiary and Quatenary structure of proteins ; domains, motif and folds; stability of protein structure ; Classification of proteins based on composition, solubility function; Reverse turns and Ramachandran plot.

4. **Enzymes:** Nomenclature and Classification; Enzyme Kinetics; Mode and Mechanism of Enzyme Action ,Enzyme Regulation, Activators, Inhibitors and Isoenzymes : Allosteric enzymes.

UNIT-III

5. **Carbohydrates:** Classification, composition and structure of Carbohydrates (Polysaccharides, Glycoproteins and Peptidoglycan), Stereoisomerism, Transformation of Carbohydrates, Synthesis and degradation of Sucrose, Starch, Cellulose.

6. **Lipids:** Classification, Structure and functions; Biosynthesis of Fatty Acids.

7. **Compounds of Energy Transfer and Redox Reactions:**
   a. Compounds of Energy Transfer *:* Adenosine Triphosphate, Uridine Triphosphate. Cytidine Triphosphate, Guanosine Triphosphate. Biosynthesis of purines and pyrimidines.

b. Compounds of Redox Reactions *:* Nicotinamide Adenine Dinucleotide (NAD). Nicotinamide Adenine Dinucleotide Phosphate (NADP), flavin Mononucleotide (FMN), Flavin Adenine Dinucleotide (FAD), Ascorbic Acid, Coenzyme, Cytochromes.

UNIT-IV

8. **Catabolism and Generation of Phosphate Bond Energy:** Sites and mechanism of Oxidative phosphorylation; Coupled Reactions, Group Transfer, Biological energy Transducers ; Oxidation of Carbohydrates (Regulation and Mechanism of T.C.A. cycle) and Oxidation of fats.

9. **Vitamins:** Structure, and functions of Thiamine, Riboflavin, Nicotinic Acid, Pantothenic Acid, Pyridoxine, Biotin, Folic Acid, Vitamin B12 , Ascorbic Acid, Vitamin A , D , E and K.

10. **Secondary Metabolites:** Biosynthesis of terpenes and phenols and alkaloids and their role.

PRACTICALS **Max. Marks : 20**

1. Detection of reducing, non reducing and total sugars: Molisch test, Fehling's test, Benedict's test, Barafoed's test, Saliwnoffs test and Iodine test.
2. Quantitative estimation of total carbohydrates by anthrone reagent. Preparation of potato starch, its microscopic structure and solubility test. Histochemical localization of starch.
3. Qualitative tests of protein like Biuret test, Xanthoproteic test, Ninhydrin test.
4. Quantitative estimation of amino acid and phenols by using Spectrophotometer.

ESSENTIAL READINGS

1. Lehninger, A. *Principles of Biochemistry.* Worth Publishers, 1982.
2. Conn, E.E. and Stumpf, P.K *Outlines of Biochemistry.* 5th Ed. Academic Press, London, 1987.
3. Deb, A.C. *Fundamentals of Biochemistry*. 9th ed. New Central Book Agency Pvt. Ltd., Kolkata, 2008.
4. Jain and Jain. *Fundamentals of Biochemistry*. S. Chand Pvt. Ltd., 2005

SUGGESTED READINGS

1 Buchanan, Bob. B., Gruissem, W. and Russeel, L. Jones(eds.). *Biochemistry & Molecular Biology of Plants.* Wiley Publishers, USA. 1280pp. 2015.
2. Malik, C.P. and M.B. Singh. *Plant Enzymology and Histoenzymology.* Kalyani Publishers. 1980.
3. Nelson, D.L. & M.M. Cox. *Lehninger's Principles of Biochemistry*. 5th ed. W.H.Freeman & Co., USA. 1100 pp. 2008.

PAPER XVII: FORESTRY

Objective of the paper is to impart knowledge about various aspects of Forestry like Silviculture, Forest Protection, Social and Urban Forestry, Forest Laws, Conservation of Forests, Types of Forests and Effects of forests.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical the students measure the diameter and height of trees. They study anatomy, moisture contents and

specific gravity of common timber trees of Punjab. They also take an account of the nearest natural forest visited by them.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **Silviculture:** Definition, Regeneration : Types, Natural regeneration from seeds (different factors on which regeneration depends, seedlings establishment period), Regeneration from vegetative parts (Coppice, Root suckers, Cuttings, Layering, Grafting, Budding, Pollarding, Lopping and Pruning); Nursery making.
2. **Forest Protection:** Protection, causes and control of forest fires; Major diseases of forest plants.

UNIT-II

3. **Social and Urban Forestry:** Social forestry - Non commercial farm forestry, scope and limitations of Non commercial forestry, community forestry, scope and limitations of community forestry, social land allocation programmes (Taungya system). Economic benefits of social forestry, Urban forestry.
4. **Forest Laws and Forest Conservation:** Salient features of the Indian Forest Act 1972 (preliminary, reserved forests, protected forests), different methods employed for conservation of forests.

UNIT-III

5. **Forests Types:** Climate of India, different climatic regions of India. Central characters and distribution of the different forest types of India, Mensuration.

UNIT-IV

6. **Forest Effects :** General effects of forests on climate, control of runoff, effects on snow, soil erosion, wild life, pollution control, nutrient cycling, social values and ecotourism, economic values, floods, green belts and control of temperature.

PRACTICALS

Max. Marks : 20

1. To measure diameter at breast height (dbh), diameter over bark (dob) and diameter under bark (dub) and girth of trees.
2. To measure height of standing trees by Abney's level. .
3. To determine the moisture content, specific gravity and weight density of common timber trees of Punjab.
4. To compare the anatomy of Hard wood and soft wood .
5. Students should be taken to nearest natural forests and they should prepare a field report regarding the following points :
   Height above Sea level, Mean annual rain fall and temperature, Soil texture, soil pH, Topography Dominant tree species and the general characters of the forest (Distribution of trees in different storeys, ground flora, nature of leaf fall, average height of dominant tree species etc.) The students will submit the field report.

6 Propagation studies on important common forest trees of Punjab regarding Height and diameter increments (under similar soil conditions) at two months intervals under natural conditions of day length and temperature for young tree saplings of known age and represent the results in a graphic form.
7 Visit to the nearby forest nursery.

ESSENTIAL READINGS

1. Chaturvedi, A.N. *Forest Mensuration.* International Book Distributors, Dehradun. 403 pp. 1982.

3. Gopikumar, K., S. Gopakumar and E.V.Anoop. *Forest Nursery and Tree Husbandry*. International Book Distributors, Dehradun, 169 pp. 2003.

SUGGESTED READINGS

1. Negi, S.S. *Elements of General Silviculture*. International Book Distributors, Dehradun. 316 pp. 2003.
2. Negi, S.S. *Hand Book of Forest Ecology and Biology*. Internat BookDistributors, Dehradun. 268 pp. 2004.
3. Puri, G.S., Gupta, R.K. Mehr-Homji, V.M. and Puri, S. *Forest Ecology.* Vol. 2, Oxford & IBH, New Delhi. 708 pp. 1989.

PAPER XVIII: GENETICS AND PLANT BREEDING

Objective of the paper is to impart knowledge about various aspects of Genetics like Linkage, Gene Mapping, Microbial Genetics, Quantitative Genetics, Population Genetics and Human Genetics. The paper also deals with various methods of breeding in plants reproducing sexually and asexually.

Teaching methodology includes delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. The students make analysis of different problems relating to genetics.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY **Max. Marks : 60**

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer /MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. **Allelism and Linkage**: Multiple Alleles, Pseudo-alleles, Complementation tests, Pleiotropy, Genomic imprinting, Penetrance and Expressivity, Phenocopy, Linkage and Crossing over, Sex Linkage, Sex limited and Sex influenced characters.
2. **Genetic Recombination and Gene Mapping methods** : Recombination, Molecular Mechanism of Recombination, Role of RecA and RecBCD enzymes, Site-specific recombination, Linkage maps, Tetrad analysis - Centromere mapping in linear tetrads and Analysis of unordered tetrads.

UNIT-II

3. **Extrachromosomal Inheritance:** Introduction, mitochondrial DNA and chloroplast DNA.
4. **Microbial Genetics***:* Mapping the bacteriophage genome; phage phenotypes; genetic recombination in phage; genetic transformation, conjugation and transduction in bacteria
5. **Multigene families:** Multigene families and their evolution.

UNIT-III

6. **Quantitative Genetics:** Polygenic inheritance, Heritability and its measurements, QTL mapping.
7. **Human Genetics***:* Pedigree analysis, Lod score for linkage testing, Genetic disorders.
8. **Population Genetics :** Gene pool, Gene frequency, Hardy- Weinberg Law , Concepts and rate of change in gene frequency through mutation, natural selection and migration ; random genetic drift.

UNIT-IV

9. **Principles of Plant Breeding :** Principles and objectives; important conventional methods of breeding of self and cross pollinated crops, Heterosis and Hybrid vigour, Utility of hybrids in Genetics and Plant Breeding.
10. **Asexual Breeding Systems**: Methods of breeding of vegetatively propagated crops; Non-conventional methods; Applications of polyploidy in improvement of crop plants; gene variability.
11. **Male Sterility:** Concept, Genetic control and Breeding utility.

PRACTICALS

Max. Marks : 20

1. Study of problems on Mendelian Genetics , Gene Interactions, Multiple alleles and Multiple gene inheritance.
2. To test the Genetic Hypothesis by Chi- Square Test and study goodness of fit.
3. Preparation of Linkage Maps in Diploids using three point test cross method.
4. Tetrad analysis and Centromere mapping in ordered and unordered tetrads.
5. Pedigree analysis.
6. Problems relating to Population genetics.

ESSENTIAL READINGS

1. Singh, B.D. *Plant Breeding Principles and Methods*. Kalyani Publishers, Ludhiana. 2009.
2. Brooker, R.J. *Genetics.* Addison-Wesley. Longman Publication. U.S.A. 1999.

4. Snustad, D. P., Simmons, M.J., *Principles of Genetics,* J. Wiley and Sons, USA, 2003.

SUGGESTED READINGS

1. Hayward, M.D., Bosemark, M.O., Romagosa, I., *Plant Breeding: Principles and Prospects*, Chapman and Hall, U.K, 1993.
2. Stickberger, M.W. *Genetics*, 2nd ed., MacMillan, New York. 842 pp. 1977.
3. Weaver, R.F.& P.W. Hedrick. *Genetics.* 3rd Ed. William C. Brown Publishers, U.S.A. 656 pp. 1997.

PAPER XIX : PLANT RESOURCE, UTILIZATION AND CONSERVATION

Objective of the paper is to impart knowledge about various economic aspects of plants like Origin of Agriculture; Origin, Distribution, Types, Botany ,Cultivation, Harvesting and Uses of different Cereals, Fruits, Vegetables, Spices, Beverages and Legumes; Medicinal plants and Insecticides; Uses of important plant products like Gums , Tannins, Vegetable oils and fats, Fibres and Wood ; Unexploited plants of economic value and Genetic resources and their conservation.

Teaching methodology include delivery of lectures by the teachers using black board and many other tools like Visual Charts, Over Head projector etc. The students also make group discussions. In practical students study morphology, anatomy and histochemistry of cereals, vegetables, fruits , spices and oil yielding plants.

Theory : 75(60A+ 15HT)
Practical : 25(20A+5HT)

THEORY

Max. Marks : 60

NOTE : Question paper will have ***four*** sections. Examiner will set a total of nine questions comprising two questions from each unit, and one compulsory question of short answer/MCQ type covering the whole syllabus. Students will attempt one question from each unit and the compulsory question. All questions may carry equal marks, unless specified.

UNIT-I

1. History of Agriculture: Ancient and modern agriculture.
2. World Centres of Primary diversity of domesticated plants: The Indo-Burmese Centre, Plant Introductions and Secondary Centres.
3. Origin and Distribution, Wheat, Rice and agronomic practices. .
4. Cultivation and uses of following fruits and vegetables: Citrus, Mango, Apple, Banana, Potato, Allium, Cabbage, Spinach, Tomato, Brinjal and Sweet Potato.

UNIT-II

5. **General Account of the Spices:** Ginger, Turmeric, Cinnamon, Clove, Umbelliferous spices and Peppers.
6. **Beverage Plants:** Source and general account of Tea and Coffee.
7. **Legumes:** Origin, Botany, Cultivation and uses of Pigeon pea, Chick pea, Cluster bean, French bean etc.
8. **Medicinal Plants and Insecticides:** History and classification of drugs, antibiotics, plants as sources of drugs, parts used, composition and uses. Insecticides of plant origin, Pyrethrum and Rotenone.

UNIT-III

9. **Gums:** Important commercial gums and their uses.
10. **Tannins and Dyes:** Sources and their uses.
11. **Vegetable Oils and Fats:** Distinction between fatty and essential oils. Drying (Soyabean and linseed), nondrying (Groundnut and Mustard oil) and Semi drying (cottonseed and Sunflower oil) oils and their uses.
12. **Fibres:** Classification, uses, type of fibres - Soft fibres, Hard fibres, Surface fibres, Brush fibres and Braiding fibres.

UNIT-IV

13. **Wood and its Uses:** Soft woods and hard woods, wood as fuel, construction material (Pilings, Veneers, Plywood), wood containers (cooperage), chemically derived products and wood distillation.
14. Unexploited plants of potential economic value; plants as a source of renewable energy.
15. Genetic Resources and their conservation.

PRACTICALS

Max. Marks : 20

1. Morphology, Anatomy, Microchemical tests of stored food materials of Wheat, Rice, Chick Pea, Potato, Sweet Potato; Comparison of Starch grains of Wheat, Rice, Potato and Mung.
2. Morphology of fruits and vegetables pertaining to theory syllabus.
3. Histochemical tests for cellulose, cutin, suberin, hemicellulose, fat, oils, proteins and starch.
4. Morphology and microscopic structure of umbelliferous fruits, turmeric and clove.
5. Vegetable Oils: Mustard, groundnut, soya bean, coconut, sunflower, castor; Morphology, microscopic structure of the oil yielding tissues, tests for oil.
6. Prepare a list of 10 important sources of firewood and timber in your locality. Give their local names, scientific names and families to which they belong. Mention their properties.
7. The students should be taken to a recognized Botanical Garden or a Museum to show different plants of economic importance.

ESSENTIAL READINGS

SUGGESTED READINGS

1. Kocchar, S.L. *Economic Botany of the Tropics*, 2nd edition, Macmillan India Ltd., Delhi, 1998.
2. Sharma, O.P., *Hill's Economic Botany* (Late Dr. A.F. Hill, adapted by O.P. Sharma), Tata McGraw Hill Co. Ltd., New Delhi, 1996.
3. Swaminathan, M.S. and Kocchar, S.L., (Eds.). *Plants and Society*, MacMillan Publications Ltd., London, 1989

PAPER-XX: RESEARCH PROJECT / FIELD STUDY REPORT AND SEMINAR

Max. Marks : 100

This paper aims at inculcating the aptitude for research in the students so that after completing their postgraduate course they can opt for M. Phil. and / or Ph.D. courses.

Field study provides the students an opportunity to study the plant diversity in their natural habitats.

The purpose of presenting seminar is to train the students to prepare the topic and to deliver it before the students and teachers using the recent tools like Computer, CDs, LCD projector etc. This would instill a sense of confidence in the students to deliver lectures in classrooms and to present any paper before the academicians and scientists.

A): RESEARCH PROJECT/FIELD STUDY REPORT

Max. Marks: 60

RESEARCH PROJECT

The students will be given a small research project under the guidance of a supervisor which will be evaluated by a panel of two examiners.

OR

FIELD STUDY REPORT

The students will visit the field for study of plants pertaining to Algae, Fungi, Bryophytes, Pteridophytes, Gymnosperms and Angiosperms. The students will also submit a Field Study Report on the flora of the place visited by them.

A panel of 2-3 examiners will evaluate the field study report.

B): SEMINAR **Max. Marks: 40**

The Seminar will be presented by all the students and it will be compulsory for all the students to attend the seminars.

The break-up of 40 marks will be as under:-

1. Presentation 30
2. Contents 10

Every seminar will be evaluated by a team of two examiners individually and the average of marks awarded by these examiners will be considered as the "Marks obtained".

		FOURTH SEMESTER			
MS-21	**Major Project**		**320**	**80**	

The project period will be of 6 months duration.

The project will involve development of application/system software in industrial/ commercial/ scientific environment

The report should consist of the following :

- Cover page including Project title, Name of the student, Name of the Department and Names of the Project Guides (both External and Internal).
- Acknowledgements.
- Certificates from company and department duly signed by external guide, Principal and internal guide.
- Contents with page numbers.
- Introduction (includes background and application or importance of the project)
- Objectives
- **System Analysis** System Feasibility study
- Software requirement specifications
- Design with system flowcharts and input/output design.
- Implementation and Testing

- Hardware and software used
- Listing of well commented programs with result/output or detailed algorithms with input and output.

Further scope of the project

- Bibliography
- Appendices (any other information related to project)

Each student should observe the following norms while submitting the synopsis/thesis for the Project :

(a) Use both sides of the paper instead of only single side.
(b) Use one and half interline spacing in the text (instead of double space)
(c) Stop using a blank sheet before the page, carrying figure or table.
(d) Try to insert figure/table in the text page itself (instead of using a fresh page for it, each time.)

Students must consult/inform the internal guides regarding the progress of their work at least once in 20 days. It is the duty of the student to be in touch with his internal guide. The student must prepare 5 copies of the report including one copy for self. The remaining four are to be submitted before 31st May every year as per the following :

1. Main Library
2. Department Library
3. Internal Guide
4. Company

One softcopy of the work is to be submitted to the concerned head of the department/institution along with the report. The student must present his/ her work in 15 minutes mainly focusing on his/her contribution with the help of slides followed by demonstration of the practical work done. The project Viva will be completed before 15th June every year exact dates will be informed before 31st May every year.

An external examiner, internal examiner and the internal guide will conduct project viva.

SEMESTER I

Paper Code: MS - 66
Paper Title: Linux Administration and Programming
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90 (45 minutes duration)

L	**P**
6	**8**

Objective: This course enables students to get familiar with Linux system, its commands, files & directories, system, shell programming, PERL programming and system administration. After the completion of this course, student will be able to:

- Work in the Linux environment for Linux server administration
- Write the shell programs, PERL programs and C-program with system calls

Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT –I

1. **Introduction to Linux:** Functions of an **o**perating system, Linux's History, different flavors of Linux, Minimum System Requirements for installing Linux: Using LILO; Linux's fdisk.

2. **Using Linux:** Starting and Stopping your Linux System, Linux Shutdown Commands, Login, Passwords; Linux Error Messages, Search Paths, Input and Output Redirection, Man pages, Wildcards: * and ?, Environment Variables, process Commands: ps, kill, su command; GREP pattern searching command, vi text-editor.

UNIT-II

3. **Using the File System** : Files Overview, Common types of files, file and directory management commands, Absolute and relative filenames; pwd, cd, rm, cat, mkdir, mv, cp;, Important directories in the Linux file System: / , /home, /bin, /usr, /usr/bin, /usr/spool, /dev, /usr/bin, /sbin, /etc.

4. **File and Directory Permissions**: File and Directory ownership, User and ownership, Groups, Changing group ownership, File Permissions, UMASK Setting, Changing File Permission, Changing directory permissions; Bourne Again Shell (BASH): Command-line Completion, Wildcards, Command History, Aliases, Pipelines, setting shell prompts, Job control, Customizing bash, bash variables.

UNIT-III

5. **Shell Programming:** Creating and Running Shell Programs, Using variables, Positional Parameters and other built-in Shell Variables; importance of quotation marks, test Command, Conditional Statements: if Statement, case Statement; Iteration Statements: for Statement, while Statement, until Statement, shift Command, select Statement, repeat Statement, Functions.

6. **Linux for System Administrators:** System Administration Basics, The root Account, Starting and Stopping the System; Mounting File Systems: Mounting a Device, Creating a New file System, Un-mounting file Systems, Checking file Systems, Compressing files with gzip and compress: Using tar, Backups, Setting the Login Message, Setting of DNS, Ping, WWW, and e-mail.

UNIT-IV

7. **PERL:** Creating and Executing Perl Programs, Handling Data in Perl: Variables, Numbers, Strings, File Operators: Arrays, Perl Programming Constructs: Statement Blocks, If Statements, unless Statements, for Statements, for each Statements, while Statements, until Statements, Functions: Passing Arguments to Functions, Using Return Values; Perl Operators.

8. **System Calls:** C as System Programming Language, I/O system calls – umask(); create(); open(); read(); write(); lseek(); dup(); link(); access(); chmod(); chown(); Process management system calls; fork(); getpid(); getppid(); exit(); wait(); sleep() ; Signal system calls – kill(); signal().

L	P
6	0

Objectives: This course enables students to understand Software Configuration Managements Tools and Techniques. After the completion of this paper, student will be able to

- Use principles, concepts, methods, and techniques of the software engineering approach to produce quality software.
- Apply software engineering principles and practices in the planning and development of an actual software product.

Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. **Introduction to Software Engineering:** Definition, Software Engineering goals, Characteristics of well-engineered software, Software Process Models: Waterfall Model, Prototyping Model, Spiral Model, RAD, Agile Modelling.
2. **Software Requirement Specification (SRS):** Software Requirements, Definition of SRS, Characteristics of SRS, Components of SRS, Designing of SRS.
3. **System Analysis:** Principles of Structures Analysis, DFDs, E-R Diagrams, Data Dictionary.

UNIT - II

4. **Software Design:** Design Objectives, Design Principles, Concepts, Design Process, Design Methodologies: Structured Design, Modular Design, Object Oriented Design, User Interface Design and its elements and its Characteristics.

5. **Software Project Planning & Scheduling:** Objectives, Decomposition techniques, Planning and Scheduling Tools: GANTT Chart, PERT Chart, Critical Path Method and Work Breakdown Structure; Cost estimation, Cost estimation Models: Single Variable Model, COCOMO Model; Software Risks, Risk Assessment.

UNIT – III

6. Software Metrics**:** Role of Metrics and Measurement, Types of Software Metrics: Product Metrics, Software Size Metrics: LOC and Function Points, Process Metrics, People Metrics**.**
7. System Maintenance and Reliability**:** Maintenance and its types; Factors Affecting Software Reliability, Software Reliability vs Hardware Reliability, Software Reliability Metrics.

UNIT-IV

8. **Software Testing Techniques:** Introduction to Software Testing Process, Objectives of Software Testing. BBT & its Techniques: Boundary Value Analysis, Equivalence Class Testing, and Cause- Effect Graph, White-Box Testing and its Techniques: Domain and Boundary Testing, Logic Based Testing, Data Flow Testing and Basic Path Testing.
9. **Software Testing Strategies:** Characteristics, Integration Testing, Functional Testing, Object Oriented Testing, Alpha and Beta Testing.

Paper Code: MS - 62
Paper Title: Computer Algorithm
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90 (45 Minutes duration)

L	P
6	8

Objective:
The objective of the module is to create skills in students to design and analyze algorithms. After studying this subject students will be able to

- Understand algorithms and give theoretical estimates for the resources needed by any algorithm.
- Analyze Algorithms.
- Have an empirical approach to gauge the comparative performance of a given set of algorithms.

Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. **Introduction to Data Structures**: Definition, Types of Data Structures, Stacks and its operations(Push, Pop), Queue and its operations (Insert, Delete), Tree (Binary Tree, General Tree and its Traversal), Graph(Types and its Traversal).
2. **Algorithms and Analysis:**Definition; Analysing algorithms; space and time complexity, Asymptotic Notation (O, Ω, θ) practical complexities, Best, average and worst case performance of algorithms, examples, Recursive algorithms, Introduction to recurrence relations.

UNIT – II

3. **Divide and Conquer:** General method, Binary search, Merge sort, Quick sort, Selection problem, Strassen's matrix multiplication and analysis of these problems.

4. **Greedy Method:** General Method, Knapsack problem, Job sequencing with deadlines, Minimum spanning Trees (Prim's Algorithm, Kruskal's Algorithm), Single source shortest paths and analysis of these problems.

UNIT - III

5. **Dynamic Programming:** General method, Optimal binary search trees, 0/1 Knapsack, the traveling salesperson problem, Single Source Shortest Path Problem (Bellman Ford Algorithm), All pair shortest path problem (Floyd's Algorithm).

6. **Back Tracking:** General method, N queen's problem, Graph coloring, Hamiltonian cycles, Analysis of these problems.

UNIT - IV

7. **Branch-And-Bound:** General Method, 0/1 Knapsack, Traveling Salesperson problems.

8. **NP-hard and NP-complete problems:** Basic concepts, Statement of Cook's Theorem, Satisfiability SAT, Examples of NP-hard graph [Clique Decision Problem, Chromatic Number

Decision Problem] and NP-scheduling problems [Scheduling Identical Processors, Job Shop Scheduling].

Paper Code: MS - 42
Paper Title: Operating System Concepts
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90 (45 Minutes duration)

L	P
6	0

Objectives: This course enables students to understand **the concepts of Operating System.** After the completion of this paper, student will be able to

- Manage various processes and use the scheduling algorithms.
- Handle the deadlock conditions.
- Manage the files on the disk with effective outcome.

Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. **Introduction to Operating System:** History, Structure of OS, Functions/ Operations of OS, Types: Single User, Multi-user, Simple Batch Processing, Multiprogramming, Multitasking, Parallel systems, Distributed system, Real time system.
2. **Process Management:** Process, Process state, Process Control Block; Process scheduling: Scheduling queues, Schedulers, Context switch; Operation on process: Process creation and termination; interrupt mechanism, threads, Scheduling Algorithms: Pre-emptive and non pre-emptive scheduling, FCFS, SJFS, RRS, priority scheduling, Multilevel queue scheduling, Multilevel feedback queue scheduling, Inter process communication: Shared memory systems, Message passing systems.

UNIT - II

3. **Process Synchronization:** Concurrent Processes, Race condition, Shared data; Critical section problem: Mutual exclusion, Progress, Bounded waiting; Software solution: Busy form of waiting, lock and unlock primitives, Peterson's solution; Synchronization: Semaphores, Monitors, Reader Writer Problem, Producer Consumer Problem, Dinning Philosopher Problem.
4. **System Deadlock:** System Model; Deadlock Characterization: Necessary conditions, Resource Allocation graph; Deadlock prevention: Mutual Exclusion, Hold and Wait, No Preemption, Circular wait; Deadlock Avoidance: Safe state, unsafe state, Resource Allocation graph Algorithm, Banker's Algorithm; Deadlock Detection & Recovery from deadlock: Wait-for-graph

UNIT - III

5. **Memory Management:** Hierarchy of memory types, Cache memory: Types: Associative memory, direct mapped, set associative.
6. **Memory Allocation:** Address binding, Address Space, Memory Protection, Contiguous and Non- Contiguous allocation, Swapping, Fragmentation; Paging: Protection, Shared pages, Techniques for structuring of page table; Segmentation: Segmentation with paging; Virtual

Memory: Demand paging; Page replacement Algorithms: FIFO, Optimal, LRU, LFU, MFU, Working set, Thrashing;

UNIT - IV

7. **Storage Management:** File(s): Attributes, Operations, Types, Structure; Access Methods: Sequential, Direct access, Index; Directory Structure: Single level, Two level, Tree Structured, Acyclic Graph; File System mounting; File sharing; Protection: Types of access, access control.
8. **File system** structure, File system implementation, Directory implementation, Allocation methods: Contiguous Allocation, Linked Allocation, Indexed Allocation; Disk scheduling: FCFS, SSTF, SCAN, C-SCAN, LOOK; Disk management; Swap space management; RAID.

SEMESTER II

Paper Code: MS - 45
Paper Title: Advance Java and Network Programming.
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90(45 minutes duration)

L	P
6	4

Objectives: This paper enables student to enhance the programming skills using object oriented programming approaches. After the completion of this paper, student will be able to

- To create enterprise and standard applications Java.
- To develop web applications with database support.
- To develop client server based applications.

Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT-I

1. **Review of Java Basics:** Applets, Multithreading, AWT Controls, Event Handling.
2. **Swing:** Features, components, Swing vs AWT, swing containers, controls, using Dialogs, sliders, progress bars, tables, creating user interface using swing.

UNIT-II

3. **Java Database Connectivity:** Connectivity model, Java. SQL package, JDBC Exception classes, Database connectivity, Data manipulation and navigation, Using Prepared Statement, creating database applications
4. **Java RMI:** Distributed object technologies, RMI architecture, creating RMI applications.

UNIT-III

5. **Java Servlets:** Servlets vs CGI, Servlet Lifecycle, creating and running servlets.
6. **Networking:** Networking basics, Client / server model, Java and the Net, TCP/IP client sockets, TCP/IP server sockets, Inet Address, URL, Data grams, creating networking applications.

UNIT-IV

7. **Java Beans :** Component architecture, Components, Advantages of Beans, Bean Developer kit (BDK), JAR files, introspection, developing Beans, Using Bound properties, The Java Beans API, Introduction to EJB (Enterprise Java Beans),Types of EJB, Uses of EJB.
8. **Java Server Pages:** Introduction, JSP Architecture, JSP Elements: Implicit Objects, Comments, Directives, Action Elements, Scripting Elements., developing simple Web Applications.

Paper Code: MS – 65
Paper Title: E-Commerce and Emerging Trends
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90 (45 minutes duration)

L	P
6	0

Objectives: This course enables students to be familiar with Fundamentals of Electronic Commerce and Emerging Technologies such as Parallel Computing, Cloud Computing, Grid Computing, Mobile Computing, and Concept of Big Data.
Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT-I

1. **Electronic Commerce:** Traditional Commerce vs Electronic Commerce, Types of E-Commerce, E-Commerce infrastructure: Hardware and Software requirements, **Electronic Data Interchange (EDI):** EDI enabled procurement process and its benefits; Components of EDI system: EDI standards, EDI software, communication networks; **Electronic Payment Methods:** Types of Electronic Payment Systems, Digital Token Based Electronic Payment Systems, Smart cards and Electronic payment Systems, Credit Card-Based Electronic Payment Systems, Risk and Electronic payment Systems.

2. **Issues in E-commerce:** The legal and policy environment of E-Commerce; Intellectual Property, advertising and consumer protection; Copyright Law; Patent Law; Network Security and Firewalls; Client-Server Network Security Threats; Data and Message Security; Encrypted Documents and E-mail; Digital Signatures.

UNIT-II

4. **Business Intelligence:** Introduction to Business Intelligence, Digital data and its types – structured, semi-structured and unstructured, Introduction to Online Transaction Processing (OLTP), Online Analytical Processing (OLAP), Different OLAP architectures: MOLAP, ROLAP, HOLAP, Comparison of OLTP and OLAP. BI Definitions and need, BI Component Framework, Business Applications of BI.

5. **Case Studies:** Supply Chain management, Banking, Online Reservation Systems, Online Publishing

UNIT-III

6. Parallel Computing: Introduction and use, Flynn's Classical Taxonomy: SISD, SIMD, MISD, MIMD; Parallel Computer Memory Architectures: Shared Memory, Distributed Memory, Hybrid Distributed-Shared Memory; Parallel Programming Models: Shared Memory Model, Threads Model, Distributed Memory/Message Passing Model, Data Parallel Model, Hybrid Model, SPMD and MPMP, Introduction to Parallel Virtual Machine and Message Passing Interface, Supercomputers.
7. Cloud Computing: Introduction and use, Architecture, Service Models: infrastructure as a service, platform as a service, and software as a service;

UNIT-IV

8. Grid computing: Introduction and benefits, virtual organisations, grid Architecture and its relationship to other distributed technologies, grid application areas.

9. Mobile Computing : Definition, Guided Transmission, Unguided Transmission; Mobile computing architecture, Mobile Devices, Mobile System Networks: Cellular, WLAN, Ad hoc networks; Introduction to : GSM,CDMA,GPRS,EDGE; Introduction to Mobile Databases; Mobile Applications; Mobile Application Languages; features of Mobile Operating system: Palm OS , Symbian, Android.

Paper Title : Advanced Database System and MySQL
Paper Code: MS-60
Maximum Marks: 100 (External : 80 + Internal : 20) Time : 3 Hrs.
Number of Lectures: 90 (45 Minutes dduration)

Objectives:
The course aims at providing the students through insight on few DBMS principles and practices. Students will learn and implement the operations for making and using databases with help of SQL and PL/SQL.
Note :

i) The Question Paper will consist of Four Units.
ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii) The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv) All questions carry equal marks unless specified.

UNIT - I

1. **Database Management Systems**: Definition, Characteristics, Advantages of Using DBMS Approach, Classification of DBMSs, Data Models, Database Schema and Instance, Three Schema Architecture, Data Independence – Physical and Logical data Independence.
2. **Entity- relationship model**: Entities, Relationships, Representation of entities, attributes, Representation of relationship set, Generalization, aggregation.
3. **Normalization**: Functional Dependency, Full Functional Dependency, Partial Dependency, Transitive Dependency, Normal Forms– 1NF, 2NF, 3NF, BCNF, Multi-valued Dependency.

UNIT - II

4**. Relational Algebra and Relational Calculus**: Relational Algebra: Operations- Union, Intersection, Difference, Cartesian product, Projection, Selection, Division and relational algebra queries; Relational Calculus: Tuple oriented and domain oriented relational calculus and its operations.

5. **Transaction and Concurrency control**: Concept of transaction, ACID properties, Serializibility, States of transaction, Concurrency control: Locking techniques, Time stamp based protocols, Granularity of data items, Deadlock.

UNIT - III

6. **MySQL**: Introduction; Why MySql; Tools provided with MySQL; MySQL Architectural Terminology; Databases:Creating, Selecting, Dropping and Altering Databases; Tables: Creating, dropping, Altering, Indexing Tables; Adding new rows, Retrieving Information, Deleting or Updating Existing rows; Obtaining MySQL Metadata; Joins; Subqueries; Views; Multiple Tables Deletion and Updation; Foriegn Keys and Referential Integrity; MySQL Data Types; Sequences.

UNIT - IV

10.**Data Warehousing**: Introduction; Features; Data modeling for Data Warehousing; Building Data warehouse; Comparison between Data Warehouse and DBMS Metadata; Problems and issues in Data Warehouse.

11. **Data Mining**: Overview; Goals of Data Mining; Techniques: Association rules(Market Basket Algorithm, Apriori Algorithm); Classification: Decision Tree, Induction Algorithm; Applications of Data Mining.

Paper Code: MS - 67
Paper Title: Artificial Intelligence
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90 (45 minutes duration)

L	P
6	8

Objectives: The paper enables students to understand Artificial Intelligence techniques and the language LISP. After the completion of this paper, student will be able to

- Apply standard AI techniques to solve problems.
- Characterize the Knowledge Acquisition
- Differentiate various expert systems
- Write programs of AI using PROLOG.

Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. **Artificial Intelligence (AI)** : Introduction and Applications, History of AI from Alan Turing and developments in AI, application areas; Criteria for success; Problem Characteristics; Problem representation-State space representation, problem reduction representation, production system; Introduction to agents, intelligent software systems, Applications, Intelligent architectures, components of intelligent agent based distributed systems.
2. **Search and Control Strategies:** Data driven and goal driven search; Uninformed search-Breadth -first Search and Depth-First Search methods; Heuristic Search Techniques - Hill Climbing, Best first Search, A*, AO*, Constraint satisfaction and means-ends analysis techniques.

UNIT - II

3. **Knowledge Representation** : Information and Knowledge, Knowledge Acquisition and Manipulation, Issues in Knowledge Representation, Knowledge Representation Methods, Propositional Logic and First Order Predicate Logic, Resolution: Definition, Conversion to ClauseForm, Resolution in Propositional and Predicate Logic, Unification and Resolution Principle; Horn's Clauses, Semantic Networks, Partitioned Semantic Nets, Frames, Scripts and Conceptual Dependencies.
4. **Game Playing:**Minimax Search Procedure, Adding Alpha-Beta Cutoffs.

UNIT - III

5. **Expert Systems** : Definition and Applications, Characteristics of Expert systems, Architecture of a typical Expert System, Expert System Shells, Building an Expert System, Case studies of Expert Systems like MYCIN, Specific Application of AI. Definition of Neurons, Communication and Learning in Neural Networks, Definition of Fuzzy / Logic set.

6. **Natural Language understandingand Processing**: Complexity of the problem, Syntactic processing: Grammars and Parsers, Augmented Transition Networks; Semantic Analysis: Semantic Grammars, Case Grammars; Discourse and Pragmatic processing:Using Focus in Understanding, Modeling Beliefs; Introduction to Perception :Vision using Low-Level and High-Level Image Features and Action: Navigation and Manipulation.

UNIT - IV

7. **AI Language PROLOG**: Features of Prolog, Elementary Data Types, Compound objects in Prolog, Writing simple program in Prolog, Understanding Default flow control of the Prolog Program, Controlling Program Flow with cut and fail, List Manipulation, String manipulation, Arithmetic Operators and evaluation of Arithmetic expressions, Input /Output statement. Some simple example problems: Tower of Hanoi, Sorted Tree Dictionary, Sorting, Searching Graphs, Searching a Maze.

SEMESTER – III

Paper Code: MS - 32
Paper Title: .NET FRAMEWORK AND C#
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90(45 minutes duration)

L	P
6	8

Objectives: This course aims at making a student capable of developing console, windows and web applications using C# on .NET platform.

Note:
i. The Question Paper will consist of Four Units.
ii. Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE** compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt **ONE** question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT-I

1. **Introduction to .NET environment:** The .NET strategy, the origins of the .NET technology, the .NET framework, the common language runtime, framework base classes, user and programs interface, visual studio .NET, .NET languages, benefits of the .NET approach.
2. **Introduction to C#** :Introducing C#, Overview of C#, Literals, Variables, Data Types, Operators, Expressions, Branching, Looping, Methods, Arrays, Strings, Structures, Enumerations, difference between C++ and C#, difference between Java and C#.

UNIT-II

3. **Object Oriented Aspects of C#** : Classes, Objects, Inheritance, Polymorphism, Interfaces, Operator Overloading, Delegates, Events, Errors and Exceptions.
4. **I/O and Object Serialization:** I/O: System. I/O, Streams, TextWriter, TextReader, BinaryWriter, Binary Reader, File Stream, File; Serialisation: Binary, SOAP, XML and Custom Serialisation.

UNIT-III

5. **Writing Windows Forms Applications and Deploying Windows Forms Applications**: Writing Windows Forms Applications: Understanding Windows Forms, Window form controls, Menus, MDI Forms, Using Inheritance in Windows Forms, Using Common Dialog Controls, Deploying Windows Forms Applications: Introduction to deployment, Click Once deployment, Creating an Installation Package for project.
6. **Writing ASP .NET applications and Deploying ASP .NET Applications:** Introduction to ASP.NET, Using Validation Controls, Managing State in ASP.NET Web Applications, Deploying ASP.NET Applications with Windows Installer.

UNIT-IV

7. **Accessing Data with ADO .NET:** ADO .NET Architecture, Components, Database, DataReader, DataAdapter, DataSet, Viewing data using Data Grid View Control, Creating Applications.

Paper Title: THEORY OF COMPUTATION
Paper Code: MS - 69
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90 (45 minutes duration)

Objectives:
The goal of this course is to provide students with an understanding of basic concepts of Theory of Computation.

Note :
(i) The Question paper will consist of Four Units.
(ii) Examiner will set total of nine questions comprising two questions from each unit and one compulsory question of short answer type covering whole syllabi.
(iii) The students are required to attempt one question from each unit and the compulsory question.
(iv) All questions carry equal marks.

UNIT I

1. **Theory of Automata**: Definition, Description of Automata, Transition Systems, Language, Grammar, Deterministic & Non-Deterministic Finite State Machines, Equivalence of DFA and NDFA, Finite State Machine with output (Moore Machine and Meally Machine), Conversion of Moore Machine to Meally Machine & vice-versa, Minimization of Finite Automata.
2. **Formal Languages**: Chomsky Classification of Languages, Languages and their Relations, Languages and Automata.

UNIT II

3. **Regular Sets and Regular Grammars**: Regular Expressions, Finite Automata and Regular Expressions, Conversion of NDFA to DFA, Arden's Theorem, Construction of FA equivalent to Regular Expression, Equivalence of two Finite Automata, Equivalence of two Regular Expressions, Pumping lemma for Regular Sets and applications, Closure Properties of Regular Sets, Construction of Regular Grammar generating Transition System for a DFA, Construction of Transition System accepting Language for a Regular Grammar , limitations of finite state machine.

UNIT III

4. **Context Free Languages**: Context free grammar, Simplification of Context Free Grammars, Normal Forms for Context Free Grammers: Chomsky Normal Form, Greibach Normal Form, Pumping Lemma, CYK algorithm.
5. **PDA**: Push down stack machine, Design of deterministic and non-deterministic push-down stack, Parser design.

UNIT IV

6. **LR(K) Grammars**: Properties of LR(K) Grammar, Closure properties of Languages.
7. **Turing Machine**: Turing machine definition and design of Turing Machine, Church-Turing Thesis, Variations of Turing Machines, combining Turing machine, Universal Turing Machine, Post Machine, Chomsky Hierarchy, Halting problem, Post Correspondence problem.

Paper Code: MS – 39
Paper Title: Computer Graphics
Maximum Marks: 100 (External : 80 + Internal : 20) **Time : 3 Hrs.**
Number of Lectures: 90 (45 minutes duration)

L	P
6	8

Objectives:
This paper enables students to understand graphics hardware and various 2D and 3D algorithms. After the completion of this paper, student will be able to:
- Implement the principles and commonly used paradigms and techniques of computer graphics.
- Use OpenGL proficiently using C / C++.

Note:
i. The Question Paper will consist of Four Units.
ii. Examiner will set total of NINE questions comprising TWO questions from each Unit and ONE compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt ONE question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

1. **Introduction to Computer Graphics**: Overview of Graphics Systems, Display Devices, Display Processors, Character Generation; Interactive graphical techniques; Positioning, (Elastic or Rubber Band lines, Inking, zooming, panning)
2. **Raster Scan Graphics**: Line Drawing algorithms-Direct method, DDA and Bresenham's; Circle drawing algorithm- 2-point, 4-point, trigonometric method, 8-point, Bresenham method, Bresenham Midpoint method.

UNIT - II

3. **Two Dimensional Geometric Transformation & Viewing**: homogeneous coordinate system; Basic Transformations- Translation, Rotation, Scaling, Reflection, Shear, composite transformation like- Rotation about an Arbitrary Point, Reflection through an Arbitrary Line; transformation of points and unit square.
4. **Clipping: Point clipping Line clipping algorithms**: Cohen-Sutherland and Liang-Barsky, Polygon Clipping; Window to viewport coordinate transformation.

UNIT - III

5. **Graphics Programming using C/C++**: Basic Graphical functions; Mouse Programming, Graphic Languages: Primitives (Constants, actions, operators, variables), display subroutines, plotting and geometric transformations, Concept of Animation, Saving, Loading and Printing graphics images from/to disk. Animated algorithms for sorting, Towers of Hanoi.

6. **Open GL using C/C++**: Geometric Primitives and Attributes; Viewing; Color; Lighting, Animation**.**

UNIT - IV

7. **Three Dimensional Concepts & Object Representations**: Three Dimensional Display Methods, Parallel Projection, Perspective Projection; Translation, Rotation, Scaling, Composite Transformation; Hidden line and surface elimination-Z-buffer, back face, scan line, depth sorting.

8. **Shading-**Modelling light intensities- flat shading, gouraud shading, phong shading. Representation of Space Curves, Cubic Splines, Bezier Curves, B-spline Curves, B-spline Curve Fit, B-spline Curve Subdivision, Parametric Cubic Curves, Quadric Surfaces. Bezier Surfaces.

6	0

Objective: This course enables students to be familiar with different types of Info systems, basics of DR and its practical problems.

Note:

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of NINE questions comprising TWO questions from each Unit and ONE compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt ONE question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT-I

1. **Concepts of Computer Based Systems**: Data, Information, Information Systems, Model ofcomputer based information system; Introduction to Management Information System,Decision Support System and Knowledge Based Systems.
2. **Accounting Information System**: Characteristics, sample system, subsystems for fillingcustomer order, order replenishment stock, performing general ledger processes; features anduse of Accounting Information System Package-Tally.
3. **Marketing Information System**: Basic concepts, model, subsystems including MarketingResearch, Marketing Intelligence, Product, Place, Promotion and Pricing subsystems.

UNIT-II

4. **Manufacturing Information System**: Model and subsystems including Accounting information, Industrial Engineering, Inventory, Quality and Cost Subsystems.
5. **Financial Information System**: Model and Subsystems including Forecasting, FundsManagement and Control Subsystems.
6. **Human Resources Information Systems**: Model and Subsystems including humanresources research, human resources intelligence, HRIS Database, HRIS output.

UNIT-III

7. **Basics of Operations Research (OR)**: Origin and Development of OR, Characteristics ofOR, Models in OR, OR and Decision Making, Role of Computers in OR, Limitations of OR.
8. **Linear Programming**: Mathematical Formulation, Graphical and Simplex method, Dualityin Linear programming, Dual Simplex Method, The Revised Simplex Method, SensitivityAnalysis.

UNIT-IV

9. **Special types of Linear Programming problems**: Transportation and Assignmentproblems.
10. **Integer Programming**: Introduction, Branch and Bound Techniques, Binary LinearProgramming, Assignment & Traveling salesman problems.
11. **Dynamic Programming**: Deterministic & Probabilistic Dynamic Programming.

PANJAB UNIVERSITY, CHANDIGARH-160014 (INDIA)

(Estd. under the Panjab University Act VII of 1947—enacted by the Govt. of India)

FACULTY OF BUSINESS MANAGEMENT & COMMERCE

SYLLABI

FOR

M.COM. [SEMESTER SYSTEM] EXAMINATIONS, 2017-18

(For Regular College/University/USOL Students)

--: o :--

SCHEME, SYLLABI AND COURSES OF READING FOR M. COM. (SEMESTER SYSTEM)
FOR THE EXAMINATION OF 2017-2018

Note : 1. The duration of the examination in each subject will be 3 hours.

2. Maximum marks for external/written examination are 80 marks and Internal Assessment is 20 marks.

3. **The marks for Internal Assessment will be divided as Follows:**

For Regular Students

(a) Attendance : 20%

(b) Written Assignments : 30%

(c) Mid Semester Test : 50%

For University School of Open Learning (USOL) Students:

100% Internal Assessment will be based on Written Assignments

N. B.: Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University.

INSTRUCTIONS TO THE PAPER SETTERS :

IF THERE ARE TWO UNITS : Set 10 questions in all. Five questions from each unit. The students are required to answer five questions in all selecting at least 2 questions from each unit.

IF THERE ARE THREE UNITS : Set 10 questions in all. Three or four questions from each unit. The students are required to answer five questions in all selecting at least one question and not more than two from each unit.

IF THERE ARE FOUR UNITS : Set 10 questions in all. Two or three questions from each unit. The students are required to answer five questions in all selecting at least one question from each unit.

IF THERE ARE FIVE UNITS : Set 10 questions in all. Two questions from each unit. The students are required to attempt five questions in all selecting one question from each unit.

SCHEME OF EXAMINATION

SEMESTER-I

Paper 1	**M.C.101**	MANAGERIAL ECONOMICS	100 Marks
Paper 2	**M.C.102**	QUANTITATIVE METHODS FOR BUSINESS	100 Marks
Paper 3	**M.C.103**	MODERN ACCOUNTING THEORY & REPORTING PRACTICES	100 Marks
Paper 4	**M.C.104**	ORGANISATION THEORY AND BEHAVIOUR	100 Marks
Paper 5	**M.C.105**	MARKETING MANAGEMENT	100 Marks
Paper 6	**M.C.106**	MANAGEMENT INFORMATION SYSTEM	100 Marks
Paper 7	**M.C.107**	WORKSHOP ON IT APPLICATIONS IN COMMERCE (For Regular Students Only)	100 Marks
	M.C.107 A	IT APPLICATIONS IN COMMERCE (For USOL Students Only)	100 Marks
		Total	700 Marks

SEMESTER-II

Paper 1	**M.C.201**	BUSINESS ENVIRONMENT	100 Marks
Paper 2	**M.C.202**	RESEARCH METHODOLOGY IN COMMERCE	100 Marks
Paper 3	**M.C.203**	FINANCIAL MANAGEMENT AND POLICY	100 Marks
Paper 4	**M.C.204**	PRODUCTION AND MATERIALS MANAGEMENT	100 Marks
Paper 5	**M.C.205**	OPERATIONS RESEARCH	100 Marks
Paper 6	**M.C.206**	BUSINESS POLICY & STRATEGIC MANAGEMENT	100 Marks
Paper 7	**M.C.207**	SUMMER TRAINING REPORT AND VIVA VOCE (For Regular College Students)	100 Marks
	M.C.207 A	ENTREPRENEURSHIP DEVELOPMENT AND PROJECT MANAGEMENT (For USOL Students Only)	100 Marks
		OR	
	M.C.207 B	FINANCIAL SERVICES (For USOL Students Only)	100 Marks
		Total	700 Marks

SEMESTER-III

Paper 1	**M.C.301**	BUSINESS PERFORMANCE MEASUREMENT	100 Marks
Paper 2	**M.C.302**	TAX PLANNING AND MANAGEMENT	100 Marks

For Paper 3, Paper 4, Paper 5, Paper 6 Students has to select two groups from the given groups A to F having two papers each. (MC. 303 to MC. 314)

Paper-3		Select Group from A-F	100 Marks
Paper 4		Select Group from A-F	100 Marks
Paper 5		Select Group from A-F	100 Marks
Paper 6		Select Group from A-F	100 Marks
Paper 7			
	M.C.315	MC. 315-WORKSHOP ON FINANCIAL MARKETS AND INSTRUMENTS (For Regular Students Only)	100 Marks
	M.C.315 A	FINANCIAL MARKETS AND INSTRUMENTS (Theory paper For USOL Students Only)	100 Marks
		Total	700 Marks

Group A: Marketing

MC. 303	Integrated Marketing Communication & Brand Equity	100 Marks
MC. 304	Marketing Research	100 Marks

Group B: Human Resource Management

MC. 305	Human Resource Development	100 Marks
MC. 306	Industrial Relations	100 Marks

Group C: International Business

MC. 307	Indiaôs Foreign Trade and Investment	100 Marks
MC. 308	Management of International Business Operations	100 Marks

Group D: Accounting & Finance

MC. 309	Strategic Cost Management	100 Marks
MC. 310	International Accounting	100 Marks

Group E: Applied Economics

MC. 311	Industrial Economics	100 Marks
MC. 312	Applied Econometrics	100 Marks

Group F: Banking and Insurance

MC. 313	Bank Management	100 Marks
MC. 314	Insurance Management	100 Marks

SEMESTER-IV

Paper 1	**M.C.401**	PROJECT PLANNING AND CONTROL	100 Marks
Paper 2	**M.C.402**	KNOWLEDGE MANAGEMENT	100 Marks
Paper 3	**M.C.403**	BUSINESS ETHICS AND CORPORATE GOVERNANCE	100 Marks

Every student has to select any one group from the two groups selected in the third semester (Selected group in the 4th semester will be having three papers) (MC. 404 to MC. 421)

Paper 4		Select Group from A-F	100 Marks
Paper 5		Select Group from A-F	100 Marks
Paper 6		Select Group from A-F	100 Marks
Paper 7	**M.C.422**	COMPREHENSIVE VIVA-VOCE	100 Marks
		Total	700 Marks

Group A: Marketing

MC. 404	Advertising and Sales Management	100 Marks
MC. 405	Services Marketing	100 Marks
MC. 406	Consumer Behavior	100 Marks

Group B: Human Resource Management

MC. 407	Organizational Change and Development	100 Marks
MC. 408	Training and Development	100 Marks
MC. 409	Compensation Management	100 Marks

Group C: International Business

MC. 410	International Business Environment	100 Marks
MC. 411	Global Financial Management	100 Marks
MC. 412	International Marketing Management	100 Marks

Group D: Accounting & Finance

MC. 413	Advanced Corporate Accounting	100 Marks
MC. 414	Security Analysis and Portfolio Management	100 Marks
MC. 415	Advanced Auditing	100 Marks

Group E: Applied Economics

MC. 416	Macro Economic Analysis and Policy	100 Marks
MC. 417	Economics of Services	100 Marks
MC. 418	World Trading System	100 Marks

Group F: Banking and Insurance

MC. 419	Bank Legislation	100 Marks
MC. 420	Risk Management	100 Marks
MC. 421	Actuarial Practice	100 Marks

SEMESTER-I

PAPER 1: MC. 101- MANAGERIAL ECONOMICS

Objective: The objective of the course is to acquaint students with the concepts of microï economic theory and their use in business decision making. The effort is to make them capable of using various concepts to deal with business problems in a global economic environment.

UNIT-I

Nature and scope of managerial economics, relationship with economic theory, decision sciences, and functional areas of business; Theory of the Firm: Reasons for existence of the firms & their functions, the objective and value of the firm, constraints on the operation of the firms, limitations of the theory of the firm; Nature & Functions of Profits: Business vs. Economic Profits, theories of profit, functions of profit; Tools of Analysis: Marginal Analysis, Optimization, Decision and Game Theory - Concepts; The International Framework of Managerial Economics.

UNIT-II

The demand for a commodity: Individualôs demand, Market demand, and the firm demand; Price, Income & Cross elasticity of demand; Using elasticityôs in managerial decisions; Theories of consumer behavior.

UNIT-III

Pricing Practices and Risk Analysis**:** Price and Output relationship under different market structures; Pricing Theories; Pricing of multiple products; Price discrimination - International price discrimination & Dumping, Transfer Pricing; Risk and Uncertainties in managerial decision making; Measuring risk with probability distribution; Utility Theory and risk aversion.

UNIT-IV

Technological change and the global market economy: Impact of technological change on productivity, labor and market structure; Industrial innovation and technology and technological environmental forecasting.

Reference Books:

1. Koutsyiannis, A., Modern Microeconomics, Macmillan Press Ltd.
2. Varian, Micro-Economic Analysis (ed. 3), Norton.
3. Pindyck Robert S. and Daniel L. Rubinfeld, Micro Economics, Third Edition, Prentice Hall of India, New Delhi.
4. Madala, G.S. and Ellen Miller, Micro Economics, Theory and Applications, McGraw Hill Book Company, New York.
5. Gould, John P., Edward P. Lazear, Micro-Economic Theory, Richard D. Irwin, Inc., Homewood Illinois.
6. Sen Anindya, Micro-Economics: Theory and Applications , Oxford University Press, New Delhi.
7. Tirole J., The Theory of Industrial Organization, Cambridge MIT Press.

PAPER 2: MC. 102 - QUANTITATIVE METHODS FOR BUSINESS

Objective: The objective of the course is to acquaint students with some of the important statistical techniques for managerial decision making. The emphasis will be on their applications to business and economic situations.

UNIT-I

Probability and Probability Distribution: Definitions - Probability Rules ï Application of Probability Rules- Conditional Probability- Bayes theorem- Random Variable and Probability Distributions; Binomial Distribution- Poisson Distribution and Normal Distribution.

UNIT-II

Statistical Estimation and hypothesis testing: Introduction to Hypothesis testing ï Meaning of Population, sample and sampling distribution - parameters and statistics - Central limit theorem - Concept of Standard Error - Confidential limits - Estimation of population parameters - properties of a good estimator - Point and interval estimation ï Hypothesis Formulation and testing procedure - Type I and Type II errors - one tail and two tail tests - Sampling of Attributes - Estimation and testing Number and Proportions of Successes, Difference between two proportions.

UNIT-III

Sampling Variables : Large Samples - Difference between large and small samples - Estimating population mean - testing the significance of Mean - Significance of the difference between means of two samples - Significance between the standard deviations of two samples - Small Samples -âô test - fixing fiducial limits to population mean ï testing the significance of the mean - testing the significance of the difference between two independent means - testing the significance of the difference between two dependent means- F test - meaning - Applications of F test - ANOVA - Assumptions - Procedure - one way and two-way analysis of variance.

UNIT-IV

Statistical Quality Control - Introduction - Chance and Assignable Causes of Variation Uses of SQC - Process Control and Product Control- Control Charts - Control Charts for Variables -X: Chart ï Range chart ï Standard deviation chart - Control charts for attributes - C chart -p chart - np chart. Decision Tree Analysis ï Decision Making under Uncertainties.

Reference Books:

1. Levin, R.I. and D.S. Rubin: Statistics for Management, Prentice-Hall of India.
2. S.C. Gupta : Fundamentals of Statistics, Himalaya Publishing House, New Delhi.
3. Anderson Quantitative Methods for Business Decision, Thomson.

4. Barry Render, Ralph M. Stair Jr., Michael E. Hanna: Quantitative Analysis for Management, Prentice Hall of India.
5. Anderson, Introduction to Management Science: Quantitative Techniques for Decision Making, Thomson.
6. D.C. Sancheti & V.K. Kapoor : Statistics, Sultan Chand & Sons, New Delhi.
7. Sharma, J.K.: Operations Research ï Theory & Applications, Macmillan India Ltd.
8. Gupta, S.P: Statistical Methods, S. Chand & Sons, New Delhi.

PAPER 3: MC. 103 - MODERN ACCOUNTING THEORY & REPORTING PRACTICES

Objective: In view of the convergence of the Indian Accounting Standards with the IFRS, it is desirable to equip the students with the required knowledge of International financial reporting standards and practices. The students are expected to achieve a clear conceptual understanding of the IFRS and possess sufficient knowledge expected out of an expert.

UNIT-I

The Regulatory and Financial Reporting Framework: The International Accounting Standards Board (IASB)-The role and the standard setting process. Progress towards international harmonization. The IASB-Framework for the Preparation and Presentation of Financial Statements; The first time adoption of international financial reporting standards : Objective of financial statements, Qualitative characteristics of financial statements, Elements of financial statements, Recognition and measurement of elements of financial statements, Fair value basis of measurement, Concepts of capital and capital maintenance.

UNIT-II

Elements of financial statements as per International Financial Reporting Standards: (a) Property, plant and equipment (b). Intangible assets inventories (c). Construction contracts (d). Liabilities (e). Financial instruments (f). Provisions and contingencies (g). Employment and post-employment benefits (h). Accounting for tax (i). Accounting for agriculture (j). Share based payment (k). IFRS- 6: Exploration for and evaluation of mineral resources.

UNIT-III

Presentation and additional disclosures as per International Financial Reporting Standards (a). Events after the balance sheet date (b). Earnings per share (c). Related party disclosures (d). Interim financial reporting (e). Effects of changes in foreign exchange rates (f.) Segment reporting.

UNIT-IV

Preparation of external financial reports for single entities as per International Standards (a) Income statements and discontinuing operations (b) Cash flow statements (c) Statement of changes in equity

(d) Preparation of external financial reports for combined entities and joint ventures (e) Definitions of subsidiaries, investments in associates and joint ventures (f) Exclusions from consolidations (g) Preparation of consolidated balance sheets and income statements (h) Equity accounting (i) Proportionate consolidation and joint ventures.

Reference Books:

1. Elliott, B. & Elliott, J. (2008), Financial Accounting and Reporting. 12th ed. Harlow: Pearson/Prentice Hall.

3. S. Agarwal, Manual of Accounting Standards, Snow White.
4. T.P. Ghosh, Accounting Standards and Corporate Accounting Practices, Taxman.
5. Bhabatosh Banerjee, Regulation of Corporate Accounting and Reporting in India, World Press.
6. Lev Baruch, Financial Statement Analysis - A New Approach, Prentice Hall.
7. Bernstein & Wild, Financial Accounting Theory - Issues and Controversies, McGraw Hill.
8. K.S. Most, Accounting Theory, Holt, Rinehart & Winston.

PAPER 4: MC. 104 - ORGANISATION THEORY AND BEHAVIOUR

Objective: The objective of the course is to develop a theoretical understanding among students about the structure and behavior of organization as it develops over time. The course will also make them capable of realizing the competitiveness for firms.

UNIT-I

Organizational Theories and Behaviour: Classical, Neo - classical and Contemporary. Authority, Power, status, formal and informal structure. Flat and Tall structures. Bureaucratization of organizations. Organizational Behaviour Concepts, determinants, models, challenges and opportunities of OB. Transaction cost and organizational behaviours. Contributing disciplines to the OB. Individual Behaviour: Foundations of individual behaviour, values, attitudes, personality and emotions. Theory X and Theory Y, Chris Argyris behaviour patterns, Perceptual process.

UNIT-II

Group Decision making and Communication: Concept and nature of decision making process, Individual versus group decision making, Nominal group technique and Delphi technique, models of communication, communication effectiveness in organizations. Feedback, TA, Johari Window. Motivation: Need hierarchy, Maslowôs Need Hierarchy, Two factor theory, Contemporary theories of motivation (ERG, Cognitive evaluation, goal setting, and equity) expectancy model. Behaviour modification, Motivation and organizational Effectiveness.

UNIT-III

Leadership, Power and Conflict: Concept and theories, Behavioral approach, Situational approach, Leadership effectiveness, Contemporary issues in leadership. Power and conflict. Bases of Power, power tactics, sources of conflict patterns, levels and conflict resolution strategies. Transactional Analysis (TA) - Work Stress.

UNIT- IV

Organizational Culture, Organizational Development and Stress Management: Concept and determinants of organizational culture, Organizational Development: Concept and intervention techniques. Individual and organizational factors to stress, Consequences of stress on individual and organization, management of stress. Case Studies: Some cases of real business world are required to be discussed.

Reference Books:

1. Stephen Robbins, Organisational Behaviour, Pearson Education.
2. Fred Luthans, Organizational Behavior, McGraw Hill.
3. Wagner, Organizational Behavour, Thomson Learning.
4. S.S. Khanka, Organisational Behaviour, S.Chand & Co., New Delhi .

6. Hellriegel, D & J.W. Slocam, Organizational Behavior, Thomson Learning.
7. McSchane, Organization Behavior, TMH.
8. New Storm Davis Organisation Behavior, THM, New Delhi.
9. Slocum, Fundamentals of Organizational Behavior, Thompson Press (Indian Edition).

PAPER 5: MC. 105 - MARKETING MANAGEMENT

Objective: The objective of the course is to familiarize the students with the basic concepts and principles of marketing and to develop their conceptual and analytical skills to be able to manage marketing operations of a business firm.

UNIT-I

Introduction to Marketing Management**;** Marketing - Meaning and approaches, Role of Marketing in Organizations, 4Ps & beyond, Marketing Challenges, Marketing Process and Marketing Planning, Marketing information system.

UNIT –II

Analyzing Market Opportunities ; Analyzing the Marketing Environment- Economic, Demographic, Social, Cultural, Technical, Political & Legal Buying Behaviour- Consumer, Business & Industrial Measuring and Forecasting Market Demand.

UNIT –III

Product management**:** Product - Meaning and Classifications, New Product Development. Managing Product Life Cycles, Brand Strategies and Management. Managing Service - Idea, Institution, Person, Place and Event.

UNIT–IV

Pricing, Distribution and Promotion Pricing- Influencing factors, Approaches, Strategies and Programmes. Channels of Distribution and Logistics. Promotion Strategies - Advertising, Sales Promotion & Public Relations.

Reference Books:

1. Kotler, Philip: Marketing Management Analysis, Planning Implementation and Control (Prentice Hall of India, N. Delhi, 2005).
2. Kotler, Keller, Koshy & Jha: Marketing Management, Pearson Education, N. Delhi.
3. Stone, Marilyn A. & John, Desmond: Fundamentals of Marketing, Routledge, UK.
4. Kumar and Minakshi, Marketing Management, Vikas Publ. House, New Delhi.
5. Kurtz : Principles of Marketing, Cengage Learning India Pvt. Ltd., New Delhi.
6. Stern, Luis W. & El-Ansary, Adel I: Marketing Channels, Prentice Hall of India, N. Delhi.
7. Markin, Ram: Marketing Strategy and Management, John Willey & Sons.
8. Kelly, E.J.& Lazer, William: Managerial Marketing ï Perspectives, Richard D. Irwin Inc, Illinois.

PAPER 6: MC. 106 - MANAGEMENT INFORMATION SYSTEM

Objective: The objective of the paper is to offer a comprehensive overview of Management information systems (MIS). It will explore technical, strategic and tactical issues related to MIS. Basic concepts in analyzing and designing information systems will be presented.

UNIT-I

MIS Definition - Characteristics - Evolution of MIS: Concepts; framework for understanding and designing MIS in an organization; MIS and other related disciplines: MIS and Management Accounting,

MIS and Computer Science, MIS and OR, MIS and Organizational Behavior, MIS and Management. Concept of information : definition, features, types, process of generation and communication; quality of information; information overload; techniques for managing overload; summarizing; filtering; inferences and message routing. System concepts : definition, types and characteristics of system-control in systems: feedback: positive and negative; negative feedback control system, input, process and output control; law of requisite variety.

UNIT-II

Structure of MIS: Basic structural concepts: formal and informal information systems; public and private information systems; multiple approaches to the structure of MIS: Operational elements (physical components, process, outputs for users), activity subsystems, functional subsystems and decision support ï synthesis of multiple approaches into a conceptual structure for MIS.

UNIT-III

Information systems: Transaction Processing Systems, Office Automation Systems, Information Reporting Systems, Decision Support Systems, Executive Support Systems, Expert systems.

UNIT-IV

Systems Development and Implementation: System development methodologies; SDLC approach; prototyping approach and user development approach - Systems Analysis; Systems Design; Concepts of database and database design; system implementation; management of information system projects; system documentation ï information system audit. Security of information resources; threats to information resources; security systems for risk management. Enterprise Resource Planning Systems ï Features-ERP Modules - implementation of ERP.

Reference Books:

1. OôBrien, James A: Management Information Systems, Tata McGraw Hill, New Delhi.
2. George M. Scott: Management Information Systems, McGraw Hill Book Company, New Delhi.
3. Schultheis, Robert and Summer, Mary: Management Information Systems, Tata McGraw Hill, New Delhi.
4. Gordon B Davis, et. El: Management Information Systems, Prentice Hall of India, New Delhi.
5. Kenneth C.Laudon and Jane P. Laudon: Management Information Systems ï Managing the Digital Firm, Pearson Education Asia, New Delhi.
6. Effy Oz, Management Information Systems, Vikas Publishing House, New Delhi.

8. Post, Gerald V and Anderson, David L: Management Information Systems, Tata McGraw Hill, New Delhi.
9. Alex Leon: Enterprise Resource Planning ï Tata McGraw-Hill, New Delhi.

PAPER 7: MC. 107 - WORKSHOP ON IT APPLICATIONS IN COMMERCE

(For Regular Students studying in Colleges/University Department Only)

Objective: The objective of the course is to expose the students with the use of IT technologies to solve business problems regarding various functional areas of business.

UNIT-I

IT applications in commerce-application areas - An Overview of Management Science and Quantitative Analysis: The Management Science Process - Model development- Steps in modeling- Benefits of Business models.

UNIT-II

Introduction to Spread sheet- Understanding basic features of Spread sheet ï Statistical functions- Database Functions -Finance Functions - Logical statements and formula creation- Creating Charts.

UNIT-III

Building decision models and data analysis through Spreadsheets - Forecasting Analyzing Financial Statements using accounting ratios - Project Appraisal IRR,NPV, MIRR - Inventory management ï EOQ and Quantity discounts- Leasing decisions ï Flexible budgets -Break even analysis-goal seek- scenario management and pivot table applications.

UNIT-IV

Database management systems - Concept of database-features- components of DBMS, Types of databases hierarchical, network, relational,-Normalization- Database administrator- Data warehousing- Data mining. Features of RDBMS -Database design and application development ï Tables- creation- relationships- Forms designing forms queries- types of queries- reports- report design-use of RDBMS in business decisions.

Note: The workshop will include (a) Regular training of the students in labs and through interactions with experts and presentations. (b) Assigning a project to the students as per the curriculum of the subject (c) Internal Examination to be conducted by the subject teacher (e) Presentation session of the students on the assigned project.

PAPER 7: MC. - 107A - IT APPLICATIONS IN COMMERCE

(For USOL Students Only)

Objective: The objective of the course is to expose the students with the use of IT technologies to solve business problems regarding various functional areas of business.

UNIT-I

IT applications in commerce-application areas- An Overview of Management Science and Quantitative Analysis: The Management Science Process-Model development- Steps in modeling- Benefits of Business models.

UNIT-II

Introduction to Spread sheet - Understanding Basic Features of Spread sheet ï Statistical functions- Database Functions -Finance Functions - Logical statements and formula creation- Creating Charts.

UNIT-III

Building decision models and data analysis through Spreadsheets - Forecasting Analyzing Financial Statements using accounting ratios- Project Appraisal IRR,NPV, MIRR - Inventory management ï EOQ and Quantity discounts- Leasing decisions ï Flexible budgets -Break even analysis-goal seek- scenario management and pivot table applications.

UNIT-IV

Database management systems - Concept of database ï features - components of DBMS, Types of databases hierarchical, network, relational,-Normalization- Database administrator- Data warehousing-Data mining. Features of RDBMS -Database design and application development ï Tables- creation-relationships- Forms designing, forms queries- types of queries- reports- report design-use of RDBMS in business decisions.

SEMESTER-II

PAPER 1: MC. 201 - BUSINESS ENVIRONMENT

Objective: The objective of the course is to acquaint students with the concepts of macro ï economics and the macro environment in which a business organization operates. The course would also make the student capable of analyzing and understanding the macro economic policies of the government implemented from time to time and assess their impact on business.

UNIT-I

Business Environment: Cultural, social, political, technological, economic and legal environment - scanning - techniques of environmental forecasting - SWOT ï Internal environment - their impact on policy formulation.

UNIT-II

Economic reforms in India - Liberalization - privatization and globalization ï Competitive Strength of Indian industry - Impact of liberalization policy on different sectors ï Foreign Investments policy in India. Multi-national corporations - Their participation in India ï Their strategies, competitive strengths policies and performance.

UNIT-III

Industrial Policies: A brief review of industrial policies since independence, Industrial policy of 1991 and recent developments, Policy on foreign direct investment in Indian industry. Fiscal Policy: Public revenues, public expenditure, public debt, development activities financed by public expenditure, an evaluation of recent fiscal policy of Government of India ï Monetary Policy: Demand for and supply of money, Objectives of monetary and credit policy, recent trends - Role of Finance Commission. Integration of Worldôs economies and its impact on Indian Business.

UNIT-IV

Money and Capital market: Features and components of Indian Financial system, objectives, features and structure of Money market and capital market, recent developments - Stock Exchanges, Investor Protection and Role of SEBI. Legal Framework: Consumer Protection Act, 1986, Right to Information and Right to Service Acts and its implications for business.

Reference Books:

1. Wheelen, Concepts of Strategic Management and Business Policy, Pearson Education, New Delhi.
2. William Gluck & L R Jauch, Business Policy & Strategic Management, McGraw-Hill., New Delhi.
3. Kazhmi Azhar , Business Policy, TMH.

4. Gupta, Liberalisation - Its Impact on Indian Economy, Macmillan.
5. K.V.Sivayya and VBM Das: Indian Industrial Economy, Sultan Chand Publishers, Delhi.
6. Suresh Bedi: Business Environment, Excel, New Delhi.
7. Francis Cherunilam: Business Environment - Text & Cases, Himalayan Publishing House, Mumbai.
8. M. Adhikari: Economic Environment of Business, Sultan Chand & Sons, New Delhi.
9. Prof. Laxmi Narain : Globalization , Liberalization and Privatization of Public Enterprises, Sultan Chand & Co., New Delhi.
10. Pandey, G.N., Environmental Management, Vikas Publishing House.

PAPER 2: MC. 202 - RESEARCH METHODOLOGY IN COMMERCE

Objective: The objective of this paper is to impart knowledge about various stages of the research processes and their application in Commerce and Management Education.

UNIT-I

Introduction: - Meaning of the Research ï Qualities of a research worker ï Scientific Method ï Definition ï stages of scientific study ï Different steps in scientific study ï Logical Methods ï Inductive & Deductive Methods ï Nature of the Phenomena & the use of the scientific methods. Approach to a Research Project **:-** Purpose of Research ï Functions in Research ï Research Programme ï Problem solving through research /financial aspects of research ï Research Design (Selective topic, Coverage, Hypothesis) ï Sources of Information ï Nature of study ï Definition of terms ï Techniques of study ï Collection, Analysis & presentation of the data ï Testing hypothesis ï Stating results.

UNIT-II

Use of the Library: - Finding the correct sources of information ï Uses of books, periodicals & encyclopedia ï Taking down notes ï Collection & organization of Material. Research Method :- Sampling Method ï Observation Method ï Case Study Method ï Interview Method ï Survey Method ï Experimental Method ï Questionnaire Method - Library Method ï Documentary Method ï Suitable Combination & Selection of Method ï advantages, disadvantages & limitations of methods.

UNIT-III

Presentation of Information:-Analysis of information ï Classification, tabulation & interpretation ï Presentation of data & its application ï Pictorial presentation ï Composition of information (quotation, footnotes, bibliography - tables, standards, abbreviations) - style of writing. Coordinating contents :- Front matter (blank sheet, title page, dedication, preface, table of contents, list of tables, list of figures, list of appendices etc.) ï Text proper (Chapter wise information) ï Back matter (appendices, glossary, bibliography, index, blank sheet).

UNIT-IV
